

SunVTS 7.0 Patch Set 8

Release Notes

Part No. 821-1361-11
August 2010, Revision A

Copyright© 2010 Sun Microsystems, Inc., 4150 Network Circle, Santa Clara, California 95054, U.S.A. All rights reserved.

Sun Microsystems, Inc. has intellectual property rights relating to technology embodied in the product that is described in this document. In particular, and without limitation, these intellectual property rights may include one or more of the U.S. patents listed at <http://www.sun.com/patents>, and one or more additional patents or pending patent applications in the U.S. and in other countries.

This document and the product to which it pertains are distributed under licenses restricting their use, copying, distribution, and decompilation. No part of the product or of this document may be reproduced in any form by any means without prior written authorization of Sun and its licensors, if any.

Third-party software, including font technology, is copyrighted and licensed from Sun suppliers.

Parts of the product may be derived from Berkeley BSD systems, licensed from the University of California. UNIX is a registered trademark in the U.S. and other countries, exclusively licensed through X/Open Company, Ltd.

Sun, Sun Microsystems, the Sun logo, docs.sun.com, SunVTS, Sun Enterprise Authentication Mechanism, OpenSolaris, and Solaris are trademarks, registered trademarks, or service marks of Sun Microsystems, Inc. in the U.S. and other countries.

All SPARC trademarks are used under license and are trademarks or registered trademarks of SPARC International, Inc. in the U.S. and other countries. Products bearing SPARC trademarks are based upon an architecture developed by Sun Microsystems, Inc.

The OPEN LOOK and Sun trademark Graphical User Interface was developed by Sun Microsystems, Inc. for its users and licensees. Sun acknowledges the pioneering efforts of Xerox in researching and developing the concept of visual or graphical user interfaces for the computer industry. Sun holds a non-exclusive license from Xerox to the Xerox Graphical User Interface, which license also covers Sun's licensees who implement OPEN LOOK GUIs and otherwise comply with Sun's written license agreements.

DOCUMENTATION IS PROVIDED "AS IS" AND ALL EXPRESS OR IMPLIED CONDITIONS, REPRESENTATIONS AND WARRANTIES, INCLUDING ANY IMPLIED WARRANTY OF MERCHANTABILITY, FITNESS FOR A PARTICULAR PURPOSE OR NON-INFRINGEMENT, ARE DISCLAIMED, EXCEPT TO THE EXTENT THAT SUCH DISCLAIMERS ARE HELD TO BE LEGALLY INVALID.

Copyright© 2010 Sun Microsystems, Inc., 4150 Network Circle, Santa Clara, Californie 95054, États-Unis. Tous droits réservés.

Sun Microsystems, Inc. a les droits de propriété intellectuels relatants à la technologie incorporée dans le produit qui est décrit dans ce document. En particulier, et sans la limitation, ces droits de propriété intellectuels peuvent inclure un ou plus des brevets américains énumérés à <http://www.sun.com/patents> et un ou les brevets plus supplémentaires ou les applications de brevet en attente dans les États-Unis et dans les autres pays.

Ce produit ou document est protégé par un copyright et distribué avec des licences qui en restreignent l'utilisation, la copie, la distribution, et la décompilation. Aucune partie de ce produit ou document ne peut être reproduite sous aucune forme, par quelque moyen que ce soit, sans l'autorisation préalable et écrite de Sun et de ses bailleurs de licence, s'il y en a.

Le logiciel détenu par des tiers, et qui comprend la technologie relative aux polices de caractères, est protégé par un copyright et licencié par des fournisseurs de Sun.

Des parties de ce produit pourront être dérivées des systèmes Berkeley BSD licenciés par l'Université de Californie. UNIX est une marque déposée aux États-Unis et dans d'autres pays et licenciée exclusivement par X/Open Company, Ltd.

Sun, Sun Microsystems, le logo Sun, docs.sun.com, SunVTS, Sun Enterprise Authentication Mechanism, OpenSolaris, et Solaris sont des marques de fabrique ou des marques déposées de Sun Microsystems, Inc. aux États-Unis et dans d'autres pays.

Toutes les marques SPARC sont utilisées sous licence et sont des marques de fabrique ou des marques déposées de SPARC International, Inc. aux États-Unis et dans d'autres pays. Les produits portant les marques SPARC sont basés sur une architecture développée par Sun Microsystems, Inc.

L'interface d'utilisation graphique OPEN LOOK et Sun trademark a été développée par Sun Microsystems, Inc. pour ses utilisateurs et licenciés. Sun reconnaît les efforts de pionniers de Xerox pour la recherche et le développement du concept des interfaces d'utilisation visuelle ou graphique pour l'industrie de l'informatique. Sun détient une licence non exclusive de Xerox sur l'interface d'utilisation graphique Xerox, cette licence couvrant également les licenciés de Sun qui mettent en place l'interface d'utilisation graphique OPEN LOOK et qui en outre se conforment aux licences écrites de Sun.

LA DOCUMENTATION EST FOURNIE "EN L'ÉTAT" ET TOUTES AUTRES CONDITIONS, DECLARATIONS ET GARANTIES EXPRESSES OU TACITES SONT FORMELLEMENT EXCLUES, DANS LA MESURE AUTORISÉE PAR LA LOI APPLICABLE, Y COMPRIS NOTAMMENT TOUTE GARANTIE IMPLICITE RELATIVE A LA QUALITE MARCHANDE, A L'APTITUDE A UNE UTILISATION PARTICULIERE OU A L'ABSENCE DE CONTREFAÇON.

Product Notes

These release notes describe late-breaking information or changes to the SunVTS 7.0 Patch Set 8 (PS8) release.

Open Issues

Memory LT May Cause System Panic

Due to a bug in the Solaris kernel, some of the tests that use the `physmem` driver interfaces in Solaris may not function properly. When testing in SunVTS 7.0 patch set 8 and patch set 9, the memory profiles may cause a system panic.

[CR 6965691]

Workaround: Do not run Memory Test in stress level 5 and stress level 6.

Bootable CD Image Does Not Run on Systems with Memory Equal to or Larger than 500 Gigabytes

The SunVTS 7.0 Patch Set 8 (PS8) Bootable CD may not run on large memory systems, 500 Gigabytes or larger)

[CR6943442]

Workaround: None

Mode Sequencer Sometimes Starts in the Wrong Mode

If the mode sequencer is stopped in the middle of a testing session, you need to reset the session before starting the session again. Restarting the session without a reset can lead to nondeterministic behavior. The reasons a session might be stopped are:

- User initiates a manual stop.
- Test failures cause the session to stop.

[CR 6904175]

Workaround:

1. **Reset the session.**
2. **Restart the tests.**

The mode sequencer should run the tests in the correct order.

netlbttest Never Passes on igb Ports Running Internal Loopback Test - Packet Missed

There is a known issue with Solaris `igb` driver. Internal Loopback is not working on any Intel 82576 Gigabit Ethernet Controller (Kawela) card with the `igb` driver and the Solaris 10 OS. Because of this driver issue, `netlbttest` and `iobustest.netlbttest` will fail for the internal loopback on any system that has a Kawela card and the Solaris 10 OS. There is no issue if these tests are run on OpenSolaris or use the external loopback mode.

[CR 6916491 and 6897986]

Workaround: Connect an external loopback connector so that these tests can run in external loopback mode and not in the internal loopback mode.

OpenSolaris and Audio Probe Error

In OpenSolaris, when the Audio device probe is asserted, an Audio device will not register, or will not be tested by SunVTS.

[CR 6910364]

SunVTS might generate the following error message:

```
Audio probe error: Unknown audio device (name=SUNW, audio1575#, config=Uli M1575 AC'97)
```

Workaround: No workaround for OpenSolaris. This error does not occur with the Solaris 10 OS.

Note – This issue has been resolved in SunVTS 7.0 Patch Set 9.

Java GUI Does not Allow User to Scroll Windows for AutoMode Sequencer, Disk Logical Test, and Network Logical Test

This problem is seen when SunVTS graphical user interface is invoked and the unit under test is running JDK1.5. The screen does not open as maximized and some options are cut.

You might not be able to scroll the GUI windows down to click buttons like OK and Cancel in the Auto Mode Sequencer, Disk Logical Test and Network Logical Test windows. [CR 6879712]

Workaround: Use JDK1.6 or resize the window to have full view. Enlarge the GUI display size in Solaris.

There is no workaround for the ILOM GUI. The ILOM GUI can not be enlarged because the maximum screen resolution is 1024x768. Use the TTY or CLI for these features and tests.

1. Using Solaris, change the GUI display for the display that you are using.

The example below shows a Sun Ray terminal named `sr1-mstp-xx:xx.0`.

```
# xhost +
# setenv DISPLAY sr1-mstp-xx:xx.0
# /usr/sunvts/bin/startsunvts -g
```

Note – This issue has been resolved in SunVTS 7.0 Patch Set 9.

Java Multicaster Messages Displayed

Some `java.awt` messages scroll down on the terminal when running the Java GUI in Mode Sequencer.

[CR 6883164]

A message similar to the following is displayed:

```
at java.awt.AWTEventMulticaster.mouseEntered(AWTEventMulticaster.java:241
```

Workaround: None. You can ignore these messages.

Note – This issue has been resolved in SunVTS 7.0 Patch Set 9.

Removable LT (Disk test) Sometimes Hangs

Disktest under `Removable_Disk LT` sometime hangs and the test does not pass. This issue is intermittent.

[CR 6917627]

Workaround: If the test hangs, stop the testing manually. You can also de-select `Removable_Disk LT` so that no further testing will be performed.

Note – This issue has been resolved in SunVTS 7.0 Patch Set 9.

Support for Premount Feature in Disk Test and Removable Disk Test

The premount feature in Disk test and Removable Disk test allows you to premount partitions that have filesystems. Then, Disk test can run filesystem subtests on those partitions.

The premount feature might be discontinued with Sun VTS 7.0 Patch Set 9 and subsequent compatible releases. Removing the premount feature makes `disktest` safer and less intrusive.

Support for Browser User Interface

The browser user (BUI) interface has been discontinued for Patch Set 8 (PS8) and subsequent compatible releases. You can continue to use the graphical user interface, command line interface, or TTY interface.

Documentation, Feedback and Support
