Customer Support

Customer Support hours:

Customer Support is available 7x24x365 via e-mail, phone, and Web access.

Depending on the Support option chosen by a particular client (Standard, Plus, or Premium), the times that certain services are delivered may be restricted. Severity 1 (Critical) issues are addressed on a 7x24 basis and receive continuous attention until resolved, for all clients on active maintenance.

Minneapolis, MN 55403

When contacting Customer Support, please provide:

- Product version and program/module name.
- Functional and technical description of the problem (include business impact).
- Detailed step by step instructions to recreate.
- Exact error message received.
- Screen shots of each step you take.

Defect documentation

A Defect is a modification to base Retek code (a bug fix, a performance enhancement, or a functional enhancement). Each Defect that is included in this quarterly patch has a corresponding Defect document in the \Documentation\Defect docs folder titled <Defect#> <module>.doc.

There is also a document in that same folder entitled “DEFECT MODULE XREF RDW10.2.xls”, that lists every Defect # and the accompanying modules/scripts that are included in the patch. Each Defect document should be reviewed fully before this patch is implemented. What follows is a list of the more significant fixes in the patch.

Batch schedule

\Documentation\Miscellaneous docs\rdw-1021-batch-schedule.pdf: this is an updated batch schedule flow chart, reflecting the following minor batch scheduling changes as of the 10.2.1 patch:

- Module slsilddm.ksh must run before tsildqdm.ksh.
- D33 signifies the completion of the of the channel dimension load.

RDW Web 3.1

RDW Web 3.1 is now available. It is compatible with any version of RDW on MicroStrategy 7.2.2 and replaces previous versions of RDW Web. To receive a copy of RDW Web 3.1 please send a request to support@retex.com.

RMS Interface

340467 dwi extracts.doc: corrects an issue with some DWI modules on RETL 10.3. More robust error checking in RETL 10.3 causes schema mismatches for nullability settings even if no data violates the schema constraints.

332404 invildex.doc: corrects an issue of incorrectly calculated stock on hand for pack component items.

340382 ivuildex.doc: fixes a problem where RDW was not extracting pack item unavailable inventory facts.

342046, 331456 ivaildex.doc: resolves several issues related to how inventory adjustments are processed.

Library changes

336697 fact_agg factload.doc: fixes an issue where back-posted sales facts were double-counted in the aggregation tables. Note that some aggregation modules have new program types in program_control_dm.

341387 libraries, slspilddm.doc: resolves an issue with analyze_tbl.ksh not executing and enhances the performance of several library modules.

Reclassification

335739 factopendm.doc: fixes an issue in which two database tables were not updated correctly following item reclassification.
