Customer Support

Customer Support hours

Customer Support is available 7x24x365 via email, phone, and Web access.

Depending on the Support option chosen by a particular client (Standard, Plus, or Premium), the times that certain services are delivered may be restricted. Severity 1 (Critical) issues are addressed on a 7x24 basis and receive continuous attention until resolved, for all clients on active maintenance. Retek customers on active maintenance agreements may contact a global Customer Support representative in accordance with contract terms in one of the following ways.

Chapter 1 – Overview

Below are the necessary steps to migrate from RDW 10.2 to 11.0. Review and make sure you understand the process before beginning this migration.

While we have provided scripts to change the tables into the new structure, clients are responsible for ensuring that the scripts retain data in a manner appropriate for their own environment. *A fresh install is highly recommended if you have no data to convert.*

Note: Due to the volume of your data to convert, Retek recommends that the scripts be tested with a limited amount of data before production data is run.

Review all documentation

Before installing, review the following key documents that are included with this release:

- RDW 11.0 Release Notes.
- RDW 11.0 Operations Guide

Note: Defect numbers are RDW version specific. All defects referred to in this document and the RDW 11.0 Release Notes use non-RDW 10.2 defect numbers. Defect descriptions will need to be used to match defects from the RDW 10.2 release.

Software upgrades

The migration to RDW 11.0 requires upgrades of the following dependent software packages. Refer to the product documentation for more information on upgrading these products.

- MicroStrategy Intelligence Server 7.5.2
- MicroStrategy Web 7.5.2
- MicroStrategy Desktop 7.5.2
- MicroStrategy Administrator 7.5.2
- RETL 11.2.1

Chapter 2 – General setup

System setup

- 1 After completing a successful batch run for RDW, verify that there are no outstanding errors in the batch error directory for RDW.
- 2 *Make a backup of the RDW environment.*

Unpack files

RDW

- 1 Log in to the RDW UNIX server as `retek`.
- 2 Create a staging directory on your server to hold the only the code that has changed since RDW 10.2:

```
%mkdir <RDW_STAGING_AREA>
```

- 3 In binary mode, FTP the file `rdwl10_migration.tar` from the extracted zip file.
- 4 Change directory to the `<RDW_STAGING_AREA>`.
- 5 Untar the file:

```
%tar -xvf rdwl10_migration.tar
```

The following directory structure(s) will exist under the `<RDW_STAGING_AREA>`:

```
<RDW_STAGING_AREA>/rdw/ora/dim  
                        /facts  
                        /views
```

Chapter 3 – RETL code migration

RDW 11 Unix environment setup

Setup the RDW 11 Unix environment. To do this, execute the steps given in chapter 3 of the RDW 11 Installation Guide. When executing chapter 3 of the Install Guide, skip step 1 of ‘Create Unix Directories’.

Cleanup 10.2 Unix environment

Remove RDW Unix environment

- 1 The removal of the RDW 10.2 Unix environment is not mandatory.
- 2 Take note of any customizations that you have made to RDW 10.2 batch modules, schema files, installation files, resource files, configuration files and libraries and make backups for future reference. These customizations should be applied to the newly created RDW 11.0 Unix environment.

Note: The <base_directory> referred to below is the location of the code directory that was installed for RDW 10.2.

- 3 Log in to the RDW server as `retek`.
- 4 Change directories on the Unix server to your existing RDW 10.2 code tree
`<base_directory>`
- 5 Execute the command below to remove the directory `rdw10.2`

```
%rm -r rdw10.2
```

Remove DWI Unix environment

In RDW 10.2, the RETL modules, schemas, etc that are used to extract data from the Retek Merchandising System (RMS) were packaged with the RDW product. The RDW 10.2 Installation Guide, specifically chapters 3 of that guide, gives instructions on how to install the DWI UNIX environment. With RDW 11.0, the DWI piece will no longer reside with RDW. The DWI piece is not going away, it is now packaged with the source system RMS. As part of the migration from RDW 10.2 to RDW 11.0, the DWI piece created at the time of the RDW 10.2 installation should be removed. When RMS 11.0 is installed, the DWI piece will be re-installed. Below are the steps to remove the DWI piece created at the time of RDW 10.2 installation.

- 1 The removal of the DWI 10.2 Unix environment is not mandatory.
- 2 Take note of any customizations that you have made to DWI batch modules, schema files, installation files, resource files, configuration files and libraries and make backups for future reference.

Note: The <base_directory> referred to below is the location of the code directory that was installed for RDW 10.2.

- 3 Log in to the DWI server as `retek`.

- 4 Change directories on the Unix server to your existing DWI code tree

<base_directory>

- 5 Execute the command below to remove the directory dwi10.2

```
%rm -r dwi10.2
```

RMS 11.0 Installation

- 1 If you have not already done so, install RMS 11.0. Please reference the “Retek Merchandising System 11.0.2 Installation Guide” document for installation instructions.
- 2 After completing the RMS installation, apply any custom changes you made to the DWI RETL modules, schema files, installation files, resource files, configuration files and libraries to the corresponding modules, schemas, etc created at time of RMS 11.0.2 installation.

Chapter 4 – RDW Oracle database migration

Update RDW database objects and populate data

Important: Review and understand the *.sql scripts and their accompanying documentation before you run them. Verify that each script runs successfully before moving to the next script.

Note: Each script contains comments at the beginning; these comments list which user should execute the scripts along with other important information.

- 1 Change directories in Unix to <RDW_STAGING_AREA>/rdw/ora.
- 2 Look through each script that `start_rdw110dm.sql` calls and verify that each retains data as needed for your RDW environment. Once verified, log in to SQL*Plus as `rdw10dm` and enter:

```
SQL>@start_rdw110dm.sql
```

Note: `start_rdw110dm.sql` will call all the database change scripts as well as the migration install scripts. This serves as the calling script to migrate RDW 10.2 to RDW 11.0.

- 3 The migration install scripts called are as follows:
 - `mig103_cde_dtl_dm.sql` – populates the `cde_dtl_dm` dimension table.
 - `mig103_maint_dim_key_dm.sql` - populates the dimension surrogate key information for the new RDW dimensions.
 - `mig103_program_control_dm.sql` – populates the program control data for the RDW modules.
 - `mig104_maint_dim_key_dm.sql` – populates the dimension surrogate key information for the new RDW dimensions.
 - `mig104_program_control_dm.sql` – populates the program control data for the RDW modules.
 - `mig105_program_control_dm.sql` – populates the program control data for the RDW modules.
 - `mig110_cde_dtl_dm.sql` – populates the `cde_dtl_dm` dimension table.
 - `mig110_load_rtl_type_dm.sql` – populates the `rtl_type_dm` dimension table.
 - `mig110_program_control_dm.sql` – populates the program control data for the RDW modules.
 - `mig110_load_dummyrows.sql` – populates the new dimension tables with dummy rows.
 - `load_tsf_type_dm.sql` – populates the `tsf_type_dm` dimension table.
 - `load_indicator_dm.sql` – populates the `indicator_dm` dimension table.
 - `load_cde_dtl_com_dm.sql` – populates the `cde_dtl_com_dm` dimension table.

- 4 View the log file `rdw110dm_mig.lst` and correct any errors that may occur due to data inconsistencies.

Create 11.0 database, tablespace, and users

- 1 As the retek user, export the `rdw10dm` schema:

```
exp userid=rdw10dm/<password>@<oracle_sid> file=rdw10dm.dmp  
owner=rdw10dm statistics=none log=rdw10dm_export.log
```
- 2 Review the `rdw10dm_export.log` file for errors and make appropriate corrections if needed and rerun.
- 3 Execute 'Chapter 4 – RDW Oracle RDBMS installation and configuration' of the RDW 11 Installation Guide up except for the "Create RDW Datamart-Level Tables", "Set up RDW User Permissions" and "Configure RETL" sections. Executing these steps from the Install Guide will create new RDW 11 database schema.
- 4 Import dmp file (export file) created in step 1 to the newly created `rdw11dm`.

```
imp userid=rdw11dm/<password>@<oracle_sid> file=rdw10dm.dmp  
fromuser=rdw10dm touser=rdw11dm buffer=1000000 log=  
rdw11dm_import.log
```
- 5 Review the `rdw11dm_import.log` file for errors and make appropriate corrections if needed and rerun.
- 6 Execute 'Setup RDW User Permissions' and 'Configure RETL' steps from 'Chapter 4 – RDW Oracle RDBMS installation and configuration' of the RDW Install Guide.
- 7 Perform Chapter 3 of the Middle Tier Installation Guide.
- 8 At this point, the RDW 11 MicroStrategy metadata has been installed. If you have made changes or have custom objects in your RDW 10.2 metadata that you want to migrate into RDW 11, please refer to Chapter 5 'MicroStrategy object migration' of this document.
- 9 Perform the rest of the chapters after Chapter 3 of the Middle Tier Installation Guide as needed.

Cleanup 10.2 database

Remove RDW and DWI users and tablespace

- 1 Now that the RDW 11.0 users and tablespaces have been established and the migration of the MicroStrategy objects has been completed, the RDW 10.2 users and tablespaces created during RDW 10.2 installation may be removed. Users and tablespaces were established by scripts `run_crdb_ora.sh`, `crtbspc_dwi.sql` and `crusers_dwi.sql` (see RDW 10.2 Installation Guide for more information). The removal of the RDW 10.2 users and tablespaces is not mandatory.

Chapter 5 – MicroStrategy object migration

You need to perform the following steps if your RDW 10.2 project has been implemented with modifications and additions (such as users, user objects, your own custom objects, or modification of the “out-of-the-box” objects). This will allow you to move your modified or new objects from your existing RDW 10.2 Workbenches into the new RDW 11.0 Workbenches. This will ensure that your changes are not lost where appropriate

You will need MicroStrategy Desktop and Microstrategy Object Manager in order to perform these steps. MicroStrategy Object Manager is shipped as part of MicroStrategy Administrator.

Important: You may not be able to migrate all the changes that you have made in RDW 10.2 to RDW 11.0. RDW 11.0 includes a number of fundamental changes in the underlying data model and schema level objects. If the customizations and modifications that you have made in RDW 10.2 relate to these fundamental changes, then these changes may not be upgradeable to RDW 11.0.

Beginning with RDW 11.0, RDW will only provide the most common and re-usable metrics and reports. Rarely used metrics and reports, available in previous versions of RDW will no longer be maintained within the metadata. Retek realizes that each retailer is unique and has their own reporting analysis that focuses on their specific goals. The flexibility of RDW gives each retailer the ability to build reports important to them. RDW 11.0 contains common and re-usable metrics and reports along with the building blocks a retailer needs to meet their reporting goals.

For you to be able to determine what has been removed from RDW 10.2, as well as to know what has been added in RDW 11.0, please refer to Appendix C for these lists of objects per Workbench.

Pre-installation Requirements:

- An existing RDW 10.2 metadata repository
- A local MicroStrategy Desktop installation

You will need:

- A 2-tier (direct) connection project source that points to the existing RDW 10.2 metadata repository.
 - A MicroStrategy administrator login id and password for the above project source.
- 1 Use MicroStrategy Desktop to duplicate the RDW 10.2 workbenches into your RDW 11 project source.
 - 2 Use MicroStrategy Object Manager to move the necessary objects:

After installation of the RDW 11.0 projects, you will need to use MicroStrategy Object Manager to migrate objects that you have modified/added to your existing RDW 10.2 installation to your new RDW 11.0. While using the MicroStrategy Object Manager to migrate your customized objects, the sequence and steps in which you should migrate your objects is as follows.

- a Tables: Within MicroStrategy Desktop, open the Warehouse Catalog, and add any custom tables. Update the Catalog and do a full schema update after adding the tables.
- b Facts: Within Object Manager, select any custom fact folders and facts to the new RDW 11.0 project. Upon completion of migrating schema level objects, perform a full schema update.
- c Attributes: Within Object Manager, select any custom attribute folders and attributes to the new RDW 11.0 project. Upon completion of migrating schema level objects, perform a full schema update.
- d Base Formulas: Within Object Manager, select any custom base formula folders and base formulas to the new RDW 11.0 project. A Schema update is not required after moving public objects.
- e Filters: Within Object Manager, select any custom filter folders and filters to the new RDW 11.0 project. A Schema update is not required after moving public objects.
- f Metrics: Within Object Manager, select any custom metric folders and metrics to the new RDW 11.0 project. A Schema update is not required after moving public objects.
- g Templates: Within Object Manager, select any custom template folders and filters to the new RDW 11.0 project. A Schema update is not required after moving public objects.
- h Reports: Within Object Manager, select any custom report folders and reports to the new RDW 11.0 project. A Schema update is not required after moving public objects.

Warning: Any objects migrated from RDW 10.2 are considered custom objects by Retek and are not supported.

- 4 After completely migrating your modified/added objects from your existing RDW 10.2 Workbenches to the corresponding RDW 11.0 Workbenches, you may unload the RDW 10.2 Workbenches. You can do this in MicroStrategy Desktop by going to Administration|Project Monitor, right-clicking on the Workbench and selecting Unload. This will make the RDW 10.2 Workbenches unavailable from users in Server mode.
- 5 At the time when you feel comfortable that your new installation is working fine, you can remove the RDW 10.2 Workbenches.

Appendix A – Database changes

The following is a list of database object changes from the base version of RDW 10.2 to the base version of RDW 11.0.
