## Customer Support

### Customer Support hours

Customer Support is available 7x24x365 via email, phone, and Web access.

Depending on the Support option chosen by a particular client (Standard, Plus, or Premium), the times that certain services are delivered may be restricted. Severity 1 (Critical) issues are addressed on a 7x24 basis and receive continuous attention until resolved, for all clients on active maintenance. Retek customers on active maintenance agreements may contact a global Customer Support representative in accordance with contract terms in one of the following ways.

Contact Method	Contact Information
----------------	---------------------

E-mail	support@retex.com
--------	-------------------

Internet (ROCS)	<a href="https://rocs.retek.com">rocs.retek.com</a> Retek's secure client Web site to update and view issues
-----------------	---

Phone	+1 612 587 5800
-------	-----------------

Toll free alternatives are also available in various regions of the world:

Australia	+1 800 555 923 (AU-Telstra) or +1 800 000 562 (AU-Optus)
France	0800 90 91 66
Hong Kong	800 96 4262
Korea	00 308 13 1342

### When contacting Customer Support, please provide:

- Product version and program/module name.
- Functional and technical description of the problem (include business impact).
- Detailed step-by-step instructions to recreate.
- Exact error message received.
- Screen shots of each step you take.

## Overview

This document contains information concerning the changes that have been made to Retek Data Warehouse (RDW) since the previous release.

## Defect documentation

A Defect is a modification to base Retek code (a bug fix, a performance enhancement, or a functional enhancement). Each Defect that is included in this patch has a corresponding Defect document in the \Documentation\Defect docs folder titled <Defect#> <module>.doc.

There is a document in the Defect docs folder entitled “DEFECT MODULE XREF RDW10.2.xls” that lists every Defect # and the accompanying modules/scripts that are included in the patch. Each Defect document should be reviewed fully before this patch is implemented.

## RETL 11.2.2

RDW is now certified with RETL 11.2.2. Note that RDW 10.2.4 can be used with either RETL 10.3.x or RETL 11.x. However, Retek recommends that the retailer use the latest release of RETL because it contains the latest fixes and functionality. Before installing RETL 11.2.2, review the RETL Release Notes and Programmer's Guide. These documents contain information regarding the differences between RETL 11.2.2 and previous versions of RETL, including changes to the RETL configuration file.

## Microstrategy 7.5.3

RDW 10.2.4 is now certified with MicroStrategy 7.5.3. Because support for Microstrategy products 7.2.x and 7.3.x expires on June 30<sup>th</sup> 2005, Retek recommends that retailers upgrade to MSTR 7.5.3.

## RMS interface

393826 stlblwex.ksh

Defect 366312 released in RMS 10.1.8 changes the way that data is populated in the RMS stock ledger tables when the multi-currency indicator is set. Prior to this change, the stock ledger tables (WEEK\_DATA) included both 'L'ocal currency and 'P'rimary currency records for every loc/dept/class/subclass/etc combination, regardless of the currency at the location. After this change, if the local currency for a location is the same as the primary currency, only the 'L'ocal currency record is written to the stock ledger tables. stlblwex.ksh has been changed to extract the stock ledger data for primary currency where only a 'L'ocal record exists.

394845 slsildmex.ksh

The logic for promotion validation, transaction reversal processing, and profit calculation of pack items has been corrected.

377841

The time calendar hierarchy in Microstrategy has been corrected to include the half year attribute as part of the hierarchy
