Primary Authors: Debapriya Datta, Shiladitya Guha

Contributing Authors: Don Gosselin, Lyju Vadassery

The Programs (which include both the software and documentation) contain proprietary information; they are provided under a license agreement containing restrictions on use and disclosure and are also protected by copyright, patent, and other intellectual and industrial property laws. Reverse engineering, disassembly, or decompilation of the Programs, except to the extent required to obtain interoperability with other independently created software or as specified by law, is prohibited.

The information contained in this document is subject to change without notice. If you find any problems in the documentation, please report them to us in writing. This document is not warranted to be error-free. Except as may be expressly permitted in your license agreement for these Programs, no part of these Programs may be reproduced or transmitted in any form or by any means, electronic or mechanical, for any purpose.

If the Programs are delivered to the United States Government or anyone licensing or using the Programs on behalf of the United States Government, the following notice is applicable:

U.S. GOVERNMENT RIGHTS Programs, software, databases, and related documentation and technical data delivered to U.S. Government customers are "commercial computer software" or "commercial technical data" pursuant to the applicable Federal Acquisition Regulation and agency-specific supplemental regulations. As such, use, duplication, disclosure, modification, and adaptation of the Programs, including documentation and technical data, shall be subject to the licensing restrictions set forth in the applicable Oracle license agreement, and, to the extent applicable, the additional rights set forth in FAR 52.227-19, Commercial Computer Software--Restricted Rights (June 1987). Oracle USA, Inc., 500 Oracle Parkway, Redwood City, CA 94065.

The Programs are not intended for use in any nuclear, aviation, mass transit, medical, or other inherently dangerous applications. It shall be the licensee's responsibility to take all appropriate fail-safe, backup, redundancy and other measures to ensure the safe use of such applications if the Programs are used for such purposes, and we disclaim liability for any damages caused by such use of the Programs.

Oracle, JD Edwards, PeopleSoft, and Siebel are registered trademarks of Oracle Corporation and/or its affiliates. Other names may be trademarks of their respective owners.

The Programs may provide links to Web sites and access to content, products, and services from third parties. Oracle is not responsible for the availability of, or any content provided on, third-party Web sites. You bear all risks associated with the use of such content. If you choose to purchase any products or services from a third party, the relationship is directly between you and the third party. Oracle is not responsible for: (a) the quality of third-party products or services; or (b) fulfilling any of the terms of the agreement with the third party, including delivery of products or services and warranty obligations related to purchased products or services. Oracle is not responsible for any loss or damage of any sort that you may incur from dealing with any third party.

# Preface

*Oracle Identity Manager Connector Guide for Microsoft Exchange 2000 and 2003* provides information about integrating Oracle Identity Manager with Microsoft Exchange 2000 and 2003.

---

---

**Note:** This is a transitional release following Oracle's acquisition of Thor Technologies. Some parts of the product and documentation still refer to the original Thor company name and Xellerate product name and will be rebranded in future releases.

---

---

## Audience

This guide is intended for users who want to deploy the Oracle Identity Manager connector for Microsoft Exchange 2000 and 2003.

## Documentation Accessibility

Our goal is to make Oracle products, services, and supporting documentation accessible, with good usability, to the disabled community. To that end, our documentation includes features that make information available to users of assistive technology. This documentation is available in HTML format, and contains markup to facilitate access by the disabled community. Accessibility standards will continue to evolve over time, and Oracle is actively engaged with other market-leading technology vendors to address technical obstacles so that our documentation can be accessible to all of our customers. For more information, visit the Oracle Accessibility Program Web site at

<http://www.oracle.com/accessibility/>

### Accessibility of Code Examples in Documentation

Screen readers may not always correctly read the code examples in this document. The conventions for writing code require that closing braces should appear on an otherwise empty line; however, some screen readers may not always read a line of text that consists solely of a bracket or brace.

### Accessibility of Links to External Web Sites in Documentation

This documentation may contain links to Web sites of other companies or organizations that Oracle does not own or control. Oracle neither evaluates nor makes any representations regarding the accessibility of these Web sites.

### TTY Access to Oracle Support Services

Oracle provides dedicated Text Telephone (TTY) access to Oracle Support Services within the United States of America 24 hours a day, seven days a week. For TTY support, call 800.446.2398.

## Related Documents

For more information, refer to the following documents in the Oracle Identity Manager documentation set:

- *Oracle Identity Manager Release Notes*
- *Oracle Identity Manager Installation and Upgrade Guide for JBoss*
- *Oracle Identity Manager Installation and Upgrade Guide for WebLogic*
- *Oracle Identity Manager Installation and Upgrade Guide for WebSphere*
- *Oracle Identity Manager Administrative and User Console Guide*
- *Oracle Identity Manager Administrative and User Console Customization Guide*
- *Oracle Identity Manager Design Console Guide*
- *Oracle Identity Manager Tools Reference Guide*
- *Oracle Identity Manager Audit Report Developer Guide*
- *Oracle Identity Manager Best Practices Guide*
- *Oracle Identity Manager Connector Framework Guide*
- Connector guides for various third-party applications

## Documentation Updates

Oracle is committed to delivering the best and most recent information available. For information about updates to the Oracle Identity Manager 9.0.1 connector documentation set, visit Oracle Technology Network at

<http://www.oracle.com/technology/documentation/index.html>

## Conventions

The following text conventions are used in this document:

Convention	Meaning
<b>boldface</b>	Boldface type indicates graphical user interface elements associated with an action, or terms defined in text or the glossary.
<i>italic</i>	Italic type indicates book titles, emphasis, or placeholder variables for which you supply particular values.
monospace	Monospace type indicates commands within a paragraph, URLs, code in examples, text that appears on the screen, or text that you enter.

---

## About the Connector

Oracle Identity Manager automates access rights management, security, and provisioning of IT resources. Oracle Identity Manager connectors are used to integrate Oracle Identity Manager with third-party applications. The connector for Microsoft Exchange 2000 and 2003 is used to integrate Oracle Identity Manager with Microsoft Exchange 2000 and 2003.

---

**Note:** Oracle Identity Manager connectors were referred to as *resource adapters* prior to the acquisition of Thor Technologies by Oracle.

---

This chapter contains the following sections:

- [Supported Functionality](#)
- [Reconciliation Module](#)
- [Provisioning Module](#)
- [Files and Directories That Comprise the Connector](#)

### Supported Functionality

The following table lists the functions that are available with this connector.

Process Task	Type	Description
Create Mailbox	Provisioning	Creates a mailbox in Microsoft Exchange 2000 and 2003
Delete Mailbox	Provisioning	Deletes a provisioned mailbox from Microsoft Exchange 2000 and 2003
Deleted Item Manager Updated	Provisioning	Updates the configuration of a mailbox in Microsoft Exchange 2000 and 2003 according to a change in the Deleted Item Manager attribute
Disable Mailbox	Provisioning	Disables a provisioned mailbox in Microsoft Exchange 2000 and 2003
Display Name Updated	Provisioning	Updates the configuration of a mailbox in Microsoft Exchange 2000 and 2003 according to a change in the Display Name attribute
Email Alias Updated	Provisioning	Updates the configuration of a mailbox in Microsoft Exchange 2000 and 2003 according to a change in the Email Alias attribute

Process Task	Type	Description
Enable Mailbox	Provisioning	Enables a disabled mailbox in Microsoft Exchange 2000 and 2003
Garbage Collection Period Updated	Provisioning	Updates the configuration of a mailbox in Microsoft Exchange 2000 and 2003 according to a change in the Garbage Collection Period attribute
Hide From Address Lists Updated	Provisioning	Updates the configuration of a mailbox in Microsoft Exchange 2000 and 2003 according to a change in the Hide From Address Lists attribute
Mailbox Size Receipt Quota Updated	Provisioning	Updates the configuration of a mailbox in Microsoft Exchange 2000 and 2003 according to a change in the Mailbox Size Receipt Quota attribute
Mailbox Size Transmit Quota Updated	Provisioning	Updates the configuration of a mailbox in Microsoft Exchange 2000 and 2003 according to a change in the Mailbox Size Transmit Quota attribute
Mailbox Warning Size Updated	Provisioning	Updates the configuration of a mailbox in Microsoft Exchange 2000 and 2003 according to a change in the Mailbox Warning Size attribute
Max Incoming Message Size Updated	Provisioning	Updates the configuration of a mailbox in Microsoft Exchange 2000 and 2003 according to a change in the Max Incoming Message Size attribute
Max Outgoing Message Size Updated	Provisioning	Updates the configuration of a mailbox in Microsoft Exchange 2000 and 2003 according to a change in the Max Outgoing Message Size attribute
Max Recipients Per Message Updated	Provisioning	Updates the configuration of a mailbox in Microsoft Exchange 2000 and 2003 according to a change in the Max Recipients Per Message attribute
Disable Mailbox Time Stamp Updated	Provisioning	Updates the configuration of a mailbox in Microsoft Exchange 2000 and 2003 according to a change in the Disable Mailbox Time Stamp attribute
Set Exchange Related Properties	Provisioning	Updates certain important configurations of a mailbox in Microsoft Exchange 2000 and 2003
Use Storage Defaults Updated	Provisioning	Updates the configuration of a mailbox in Microsoft Exchange 2000 and 2003 according to a change in the Use Storage Defaults attribute
Get ObjectGUID from Process	Provisioning	Retrieves the ObjectGUID (unique identifier in Microsoft Active Directory) for an existing provisioned Microsoft Active Directory user, for whom the Microsoft Exchange 2000 and 2003 mailbox needs to be provisioned
Create Mailbox	Reconciliation	Reconciles a mailbox from Microsoft Exchange 2000 and 2003 into Oracle Identity Manager

## Reconciliation Module

The reconciliation module extracts the following elements from the target system to construct reconciliation event records:

- Display Name

- Employee Type
- Mobile Number
- Pager Number
- ObjectGUID
- SAMAccountName
- Mail
- Mail Nick Name
- Garbage Collection Period
- Deleted Item Flags
- Delivery Cont Length
- Submission Cont Length
- DB Over Hard Quota Limit
- DB Over Quota Limit
- DB Storage Quota
- Exchange Recipient Limit
- DB User Defaults
- Exchange Hide From Address Lists
- Employee ID
- Street Address
- Telephone Number
- Other Telephone Number
- Extension Attribute1
- Extension Attribute2
- Extension Attribute3
- Extension Attribute4
- Extension Attribute6
- Extension Attribute8
- Extension Attribute12
- Extension Attribute15
- Exchange Server
- AD Server
- Distinguished Name

## Provisioning Module

The following fields of Microsoft Exchange 2000 and 2003 are provisioned:

- Email Alias
- Display Name

- Garbage Collection Period
- Deleted Item Manager
- Max Incoming Message Size
- Max Outgoing Message Size
- Mailbox Size Receipt Quota
- Mailbox Size Transmit Quota
- Mailbox Warning Size
- Max Recipients Per Message
- Use Storage Defaults
- Hide From Address Lists
- Rout Email
- Employee Type
- Registered Represent
- Desk Location
- PL Proceed
- Company Address
- Mailbox Type
- Mobile Number
- Pager Number
- Routing Email Addr
- Major Business Number
- Other Business Number
- Object GUID

## Files and Directories That Comprise the Connector

The files and directories that comprise this connector are compressed in the following ZIP file on the installation media:

Collaboration and Messaging Applications\Microsoft Exchange\Microsoft Exchange Rev 3.3.0.zip

These files and directories are listed in the following table.

File in the Installation Media Directory	Description
xml\xliExchangeObject.xml	<p>This file contains the following components of the connector:</p> <ul style="list-style-type: none"><li>■ IT resource type</li><li>■ Custom process Form</li><li>■ Process task and adapters (along with their mappings)</li><li>■ Resource object</li><li>■ Provisioning process</li><li>■ Pre-populate rules</li></ul>
xml\xliExchangeSchedulerTask.xml	<p>This XML file contains the parameters for setting up the reconciliation scheduled task.</p>
lib\xliExchange.jar	<p>This JAR file contains the class files required for provisioning and reconciliation.</p>
docs\B31120_01.pdf docs\html	<p>These are PDF and HTML versions of this guide, which provides instructions to deploy the connector.</p>

The ["Step 3: Copying the Connector Files"](#) section on page 2-1 provides instructions to copy these files into the required directories.

---

## Deploying the Connector

Deploying the connector involves the following steps:

- [Step 1: Verifying Deployment Requirements](#)
- [Step 2: Configuring the Target System](#)
- [Step 3: Copying the Connector Files](#)
- [Step 4: Importing the Connector XML Files](#)
- [Step 5: Configuring Reconciliation](#)
- [Step 6: Compiling Adapters](#)

### Step 1: Verifying Deployment Requirements

The following table lists the deployment requirements for the connector.

Item	Requirement
Oracle Identity Manager	Oracle Identity Manager release 8.5.3 or later
Target systems	Microsoft Exchange 2000 and 2003
Target system host platforms	Microsoft Windows Server 2000 or 2003
Other systems	Microsoft Active Directory

---

**Note:** You must deploy the Microsoft Active Directory connector before you can deploy and use the Microsoft Exchange connector.

Refer to *Oracle Identity Manager Connector Guide for Microsoft Active Directory* for instructions to deploy the Microsoft Active Directory connector.

---

### Step 2: Configuring the Target System

For using this connector, you do not need to perform any configuration steps on the target system.

### Step 3: Copying the Connector Files

The connector files to be copied and the directories to which you must copy them are given in the following table.

**Note:** The directory paths given in the first column of this table correspond to the location of the connector files in the following ZIP file on the installation media:

Collaboration and Messaging Applications\Microsoft Exchange\Microsoft Exchange Rev 3.3.0.zip

Refer to "[Files and Directories That Comprise the Connector](#)" on page 1-4 for more information about these files.

File in the Installation Media Directory	Destination Directory
The following files in the xml directory: xliExchangeObject.xml xliExchangeSchedulerTask.xml	xellerate_home\xellerate \XLIntegrations\Exchange\xml\
lib\xliExchange.jar	xellerate_home\xellerate\JavaTasks xellerate_home\xellerate\ScheduleTask
The following contents of the docs directory: B31120_01.pdf html	xellerate_home\xellerate\XLIntegrations\Exchange\docs

## Step 4: Importing the Connector XML Files

To import the connector XML files into Oracle Identity Manager:

1. Open the Oracle Identity Manager Administrative and User Console.
2. Click the **Deployment Management** link on the left navigation bar.
3. Click the **Import** link under Deployment Management. A dialog box for locating files is displayed.
4. Locate and open the xliExchangeObject.xml file, which is in the xellerate\_home\xellerate\XLIntegrations\Exchange\xml directory. Details of this XML file are shown on the File Preview page.
5. Click **Add File**. The Substitutions page is displayed.
6. Click **Next**. The Confirmation page is displayed.
7. Click **Next**. The Provide IT Resource Instance Data page for the Exchange Server - Dev IT resource is displayed.
8. Specify values for the parameters of the Exchange Server - Dev IT resource. Refer to the table in the "[Defining IT Resources](#)" section on page 2-3 for information about the values to be specified.
9. Click **Next**. The Provide IT Resource Instance Data page for a new instance of the Exchange Server - Dev IT resource type is displayed.
10. Click **Skip** to specify that you do not want to define another IT resource. The Confirmation page is displayed.

**See Also:** If you want to define another IT resource, then refer to *Oracle Identity Manager Tools Reference Guide* for instructions.

**11. Click View Selections.**

The contents of the XML file are displayed on the Import page. You may see a cross-shaped icon along with some nodes. You must remove these nodes. To do this, right-click each such node and then select **Remove**.

**12. Click Import.** The connector XML file is imported into Oracle Identity Manager.**13. Perform the same procedure to import the xliExchangeSchedulerTask.xml file, which is in the**  
*xellerate\_home\xellerate\XLIIntegrations\Exchange\xml* directory.

After you import the connector XML file, proceed to the ["Defining IT Resources"](#) section on page 2-3.

## Defining IT Resources

You must specify values for the Exchange Server - Dev IT resource parameters listed in the following table.

Parameter Name	Parameter Description
Server Name	Host name of the Microsoft Windows computer on which Microsoft Exchange 2000 and 2003 is installed Sample value: W2K_HOST <b>Note:</b> The value must be specified in uppercase.
Store Name	Mailbox store name Sample value: Mailbox Store (OWX-INT-2K3) Here, OWX-INT-2K3 is the host name of the Microsoft Exchange 2000 and 2003 Server.
Last Modified Time Stamp	Time at which the last reconciliation run was completed This is in the timestamp format YYYYMMDDHHMMSSZ . At the end of each reconciliation run, the value is updated with the target system timestamp at that instance. Sample value: 19721001000000Z The initial value must be 0 .

After you specify values for these IT resource parameters, go to Step 9 of the procedure to import connector XML files.

## Step 5: Configuring Reconciliation

Configuring reconciliation involves creating the reconciliation scheduled task. To create this scheduled task:

1. Open the Oracle Identity Manager Design Console.
2. Expand the **Xellerate Administration** folder.
3. Select **Task Scheduler**.
4. Click **Find**. The details of the predefined scheduled task are displayed.
5. Enter a number in the **Max Retries** field. This number represents the number of times Oracle Identity Manager should attempt to complete the task before assigning the ERROR status to the task.
6. Ensure that the **Disabled** and **Stop Execution** check boxes are cleared.

7. In the Start region, double-click the **Start Time** field. From the date-time editor that is displayed, select the date and time at which you want the task to run.
8. In the Interval region, set the following schedule parameters:
  - To set the task to run on a recurring basis, select the **Daily, Weekly, Recurring Intervals, Monthly, or Yearly** option.  
  
If you select the **Recurring Intervals** option, then you must also specify the time interval at which you want the task to run on a recurring basis.
  - To set the task to run only once, select the **Once** option.
9. Provide values for the attributes of the scheduled task. Refer to the appropriate table in the "[Specifying Values for the Scheduled Task Attributes](#)" section on page 2-4 for information about the values to be specified.

**See Also:** *Oracle Identity Manager Design Console Guide* for information about adding and removing task attributes

10. Click **Save**. The scheduled task is created. The **INACTIVE** status is displayed in the **Status** field, because the task is not currently running. The task is run at the date and time that you set in Step 7.

After you create the scheduled task, proceed to the "[Step 6: Compiling Adapters](#)" section on page 2-4.

## Specifying Values for the Scheduled Task Attributes

You must specify values for the following attributes of the reconciliation scheduled task.

---

---

**Note:** Attribute values are predefined in the connector XML file that you import. Specify values only for those attributes that you want to change.

---

---

Attribute Name	Description	Default/Sample Value
ADServer	Name of the Microsoft Active Directory IT resource	Active Directory Server - Dev
Server	Name of the Microsoft Exchange 2000 and 2003 IT resource	Exchange Server - Dev

After you specify values for these scheduled task attributes, go to Step 10 of the procedure to create scheduled tasks.

## Step 6: Compiling Adapters

The following adapters are imported into Oracle Identity Manager when you import the connector XML file. You must compile these adapters before you can use them to provision accounts on the target system.

- check user process ordered
- Exchange Delete Mailbox
- AD Set User Property

- Set Time Stamp
- Get Value Form User Process
- Chk Value Set
- Exchange Create Mailbox
- Exchange Set User Properties
- DB Prepopulate UserLogin

To compile adapters by using the Adapter Manager form:

1. Open the Adapter Manager form.
2. To compile all the adapters that you import into the current database, select the **Compile All** option.

To compile multiple (but not all) adapters, select the adapters you want to compile. Then, select the **Compile Selected** option.

---

**Note:** Click **Compile Previously Failed** to recompile only those adapters that were not compiled successfully. Such adapters do not have an OK compilation status.

---

3. Click **Start**. Oracle Identity Manager compiles the adapters that you specify.

To view detailed information about an adapter:

1. Highlight the adapter in the Adapter Manager form.
2. Double-click the row header of the adapter, or right-click the adapter.
3. Select **Launch Adapter** from the shortcut menu that is displayed. Details of the adapter are displayed.

---

**Note:** To compile multiple adapters simultaneously, use the Adapter Manager form. To compile one adapter at a time, use the Adapter Factory form. Refer to *Oracle Identity Manager Tools Reference Guide* for information about how to use these forms.

---

---

## Known Issues

The following is a known issue associated with this release of the connector:

The `Server Name` parameter of the IT resource accepts only the host name of the Microsoft Exchange 2000 and 2003 server. Provisioning and reconciliation would not work if the IP address of the computer is provided as the input.
