

Version 10.1.4.1.0

Getting Started with ESSO-AM

This guide provides a brief introduction to Oracle Enterprise Single Sign-on Authentication Manager (ESSO-AM) and directs you to the product documentation that enables you to install, configure, and deploy ESSO-AM.

Product Overview

ESSO-AM integrates with most authentication methods and provides support for both primary logon and re-authentication requests (such as forced re-authentication, session timeout, or application-specific authentication request) for both connected and disconnected use.

Step 1: Access ESSO-AM documentation

For complete documentation, including installation instructions, see the ESSO-AM document center at:

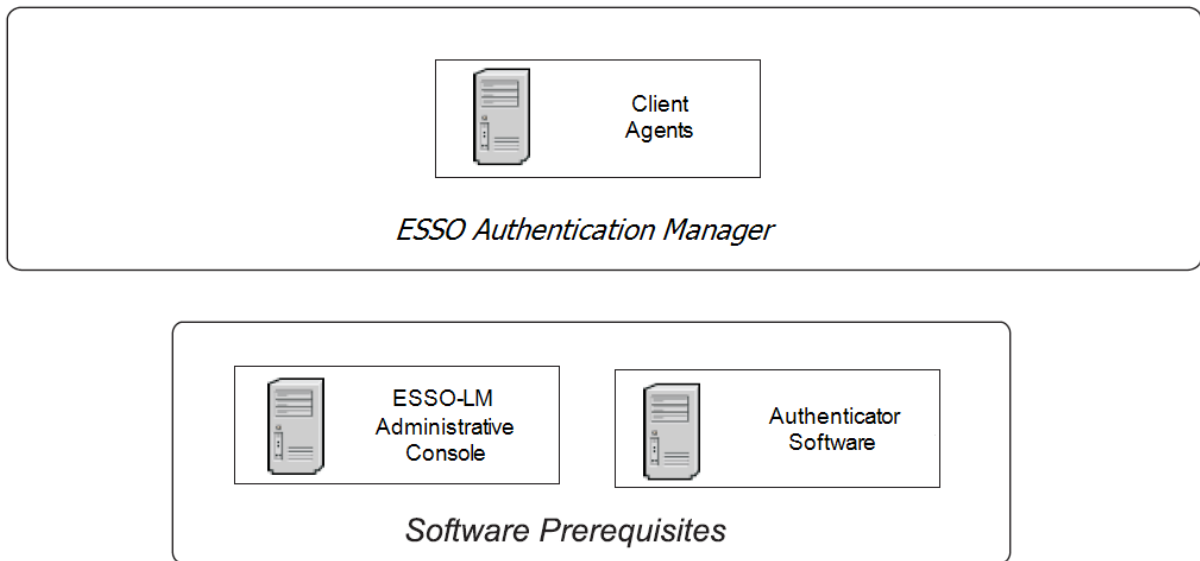

http://download.oracle.com/docs/cd/E10805_01/index.htm.

Step 2: Evaluate your hardware and software requirements and system configuration

See information about the hardware and software requirements, supported authenticators, and supported operating systems in the *ESSO-AM Release Notes*.

Step 3: Review the base architecture

The ESSO-AM installation process requires several products as shown in this diagram:

Step 4: Install ESSO-AM

Install ESSO-AM version 10.1.4.1.0. For instructions, see the *ESSO-AM Installation and Setup Guide*.
