This software and related documentation are provided under a license agreement containing restrictions on use and disclosure and are protected by intellectual property laws. Except as expressly permitted in your license agreement or allowed by law, you may not use, copy, reproduce, translate, broadcast, modify, license, transmit, distribute, exhibit, perform, publish, or display any part, in any form, or by any means. Reverse engineering, disassembly, or decompilation of this software, unless required by law for interoperability, is prohibited.

The information contained herein is subject to change without notice and is not warranted to be error-free. If you find any errors, please report them to us in writing.

If this software or related documentation is delivered to the U.S. Government or anyone licensing it on behalf of the U.S. Government, the following notice is applicable:

U.S. GOVERNMENT RIGHTS Programs, software, databases, and related documentation and technical data delivered to U.S. Government customers are "commercial computer software" or "commercial technical data" pursuant to the applicable Federal Acquisition Regulation and agency-specific supplemental regulations. As such, the use, duplication, disclosure, modification, and adaptation shall be subject to the restrictions and license terms set forth in the applicable Government contract, and, to the extent applicable by the terms of the Government contract, the additional rights set forth in FAR 52.227-19, Commercial Computer Software License (December 2007). Oracle USA, Inc., 500 Oracle Parkway, Redwood City, CA 94065.

This software is developed for general use in a variety of information management applications. It is not developed or intended for use in any inherently dangerous applications, including applications which may create a risk of personal injury. If you use this software in dangerous applications, then you shall be responsible to take all appropriate fail-safe, backup, redundancy, and other measures to ensure the safe use of this software. Oracle Corporation and its affiliates disclaim any liability for any damages caused by use of this software in dangerous applications.

Oracle is a registered trademark of Oracle Corporation and/or its affiliates. Other names may be trademarks of their respective owners.

This software and documentation may provide access to or information on content, products and services from third parties. Oracle Corporation and its affiliates are not responsible for and expressly disclaim all warranties of any kind with respect to third-party content, products, and services. Oracle Corporation and its affiliates will not be responsible for any loss, costs, or damages incurred due to your access to or use of third-party content, products, or services.

Welcome

How to Use This Book

This book describes how to install Oracle WebCenter JSR-168 Container 10.3.

Audience

This guide is written for the user responsible for installing Oracle WebCenter JSR-168 Container. This user must have strong knowledge of the operating system and web application servers.

Organization

This chapter provides information on how to use this guide and lists additional resources. This guide also includes the following chapters:

- [Chapter 2, “Installation Prerequisites,”](#) provides hardware and software requirements. Read this chapter and meet the prerequisites before proceeding with installation.
- [Chapter 3, “Installation,”](#) provides detailed instructions for installing and configuring Oracle WebCenter JSR-168 Container on all platforms.

Typographical Conventions

This book uses the following typographical conventions.

Table 1-1 Typographical Conventions

Convention	Typeface	Examples/Notes
<ul style="list-style-type: none">File namesFolder namesScreen elements	bold	<ul style="list-style-type: none">Upload Procedures.doc to the portal.The log files are stored in the logs folder.To save your changes, click Apply Changes.
<ul style="list-style-type: none">Text you enter	computer	Type Marketing as the name of your community.
<ul style="list-style-type: none">Variables you enter	computer with angle brackets (<>)	Enter the base URL for the Remote Server. For example, <code>http://<my_computer>/</code> .
<ul style="list-style-type: none">New termsEmphasisObject example names	<i>italic</i>	<ul style="list-style-type: none"><i>Portlets</i> are Web tools embedded in your portal.The URI <i>must</i> be a unique number.The example Knowledge Directory displayed in Figure 5 shows the <i>Human Resources</i> folder.

Oracle Documentation and Resources

This section describes other documentation and resources provided by Oracle.

Resource	Description
Developer Guide	The Developer Guide provides detailed information on implementing and configuring portlets using the JSR-168 Container.
Release Notes	The release notes provide information about new features, issues addressed, and known issues in the release.

Resource	Description
Oracle Technology Network (OTN)	<p>The Oracle Technology Network is the world's largest community of developers, DBAs, and architects using Oracle products and industry-standard technologies. Every day, members collaborate via OTN to share real-world insight, expertise, and best practices on how to build, deploy, manage, and optimize applications.</p> <p>As a member of the Oracle Technology Network you will enjoy access to software downloads, discussion forums, documentation, wikis, podcasts, blogs, plus much more.</p> <p>Access the Oracle Technology Network at http://www.oracle.com/technology/index.html.</p>
Oracle Support	<p>The Oracle Support site provides access to all Oracle support resources including online support, software and patches, technical articles, and contact numbers.</p> <p>Access the Oracle Support site at http://www.oracle.com/support/index.html.</p>

Welcome

Installation Prerequisites

Before you run the Oracle WebCenter JSR-168 Container installer, complete the following steps:

1. Read the product release notes for additional information on compatibility issues, known problems, and workarounds that might affect how you proceed with your deployment. Release notes are located at the top-level directory of the product package.
2. Provision host computers for your deployment and install prerequisite software. For details, see the [Hardware and Software Requirements](#) that follow.

Hardware and Software Requirements

The following tables summarize the operating system and software requirements for Oracle WebCenter JSR-168 Container.

- [Software Requirements on Unix and Linux](#)
- [Software Requirements on Windows](#)

Software Requirements on Unix and Linux

Component	Requirement
Remote Server (Host Computer)	<p data-bbox="454 355 704 381">Disk: 128 MB available</p> <p data-bbox="454 395 704 421">Memory: 512 MB RAM</p> <p data-bbox="454 435 669 461">Operating System:</p> <ul data-bbox="454 475 1155 678" style="list-style-type: none"> <li data-bbox="454 475 857 501">• AIX 5.3 on POWER, 32bit or 64bit <li data-bbox="454 515 825 541">• HP-UX 11i v2 on Itanium, 32bit <li data-bbox="454 555 1155 605">• Red Hat Enterprise Linux 4 Update 5 or RHEL 3 Update 3 (ES & AS) <li data-bbox="454 619 700 645">• Solaris 8, 9, and 10 <li data-bbox="454 659 720 685">• SUSE Linux 9 on x86 <p data-bbox="454 699 1126 725">Application Server: (must follow the 2.3 servlet specifications)</p> <ul data-bbox="454 739 1155 1397" style="list-style-type: none"> <li data-bbox="454 739 572 765">• On AIX <ul data-bbox="494 779 995 829" style="list-style-type: none"> <li data-bbox="494 779 995 805">– IBM WebSphere 6.0.1 with the Java 1.4 VM <li data-bbox="494 819 975 845">– IBM WebSphere 6.1 with the Java 5.0 VM <li data-bbox="454 861 608 887">• On HP-UX <ul data-bbox="494 902 959 928" style="list-style-type: none"> <li data-bbox="494 902 959 928">– BEA WebLogic 9.2 with the Java 5.0 VM <li data-bbox="454 942 740 968">• On Red Hat and SUSE <ul data-bbox="494 982 1046 1152" style="list-style-type: none"> <li data-bbox="494 982 999 1008">– BEA WebLogic 8.1sp5 with the Java 1.4 VM <li data-bbox="494 1015 1046 1041">– BEA WebLogic 9.1 and 9.2 with the Java 5.0 VM <li data-bbox="494 1048 995 1074">– IBM WebSphere 6.0.1 with the Java 1.4 VM <li data-bbox="494 1081 975 1107">– IBM WebSphere 6.1 with the Java 5.0 VM <li data-bbox="494 1114 911 1140">– Tomcat 5.0.28 with the Java 1.4 VM <li data-bbox="494 1147 911 1173">– Tomcat 6.0.14 with the Java 5.0 VM <li data-bbox="454 1183 606 1209">• On Solaris <ul data-bbox="494 1223 1126 1397" style="list-style-type: none"> <li data-bbox="494 1223 1126 1249">– BEA WebLogic 8.1sp4 and 8.1sp5 with the Java 1.4 VM <li data-bbox="494 1256 1046 1282">– BEA WebLogic 9.1 and 9.2 with the Java 5.0 VM <li data-bbox="494 1289 995 1315">– IBM WebSphere 6.0.1 with the Java 1.4 VM <li data-bbox="494 1322 975 1348">– IBM WebSphere 6.1 with the Java 5.0 VM <li data-bbox="494 1355 911 1381">– Tomcat 5.0.28 with the Java 1.4 VM <li data-bbox="494 1388 870 1414">– Tomcat 6.0.14 with Java 5.0 VM

Component	Requirement
Remote Server (Host Computer)	<p>Disk: 128 MB available</p> <p>Memory: 512 MB RAM</p> <p>Operating System: Windows 2003 Server</p> <p>Application Server: (must follow the 2.3 servlet specifications)</p> <ul style="list-style-type: none">• BEA WebLogic 8.1sp4 and 8.1sp5 with the Java 1.4 VM• BEA WebLogic 9.1 and 9.2 with the Java 5.0 VM• IBM WebSphere 6.0.1 with the Java 1.4 VM• IBM WebSphere 6.1 with the Java 5.0 VM• Tomcat 5.0.28 with the Java 1.4 VM
Portal Compatibility	<ul style="list-style-type: none">• Plumtree Foundation 6.0.x• AquaLogic Interaction 6.5.x, 6.1.x• Oracle WebCenter Interaction 10.3.0.0.0

Installation

This chapter explains how to install and configure the Oracle WebCenter JSR-168 Container on all supported platforms.

Before installing, confirm that your system meets the requirements. For details, see [Chapter 2, “Installation Prerequisites.”](#)

The installation process involves two steps:

- [“Install Files on Remote Server” on page 3-2](#)
- [“Configure Remote Server” on page 3-2](#)

In addition, samples illustrating how to use the Oracle WebCenter JSR-168 Container can be installed:

- [“Install the Oracle WebCenter JSR-168 Container Samples” on page 3-3](#)

Install Files on Remote Server

Follow the steps below to install the Oracle WebCenter JSR-168 Container on your remote server (host computer).

1. Ensure the PT_HOME environment variable has been set correctly. If PT_HOME has not been previously set, create a directory for PT_HOME. Set the PT_HOME environment variable to this directory.
2. Extract the Oracle WebCenter JSR-168 Container zip/tgz distributable to PT_HOME.

Configure Remote Server

The steps required to configure the remote server vary depending on whether the PT_HOME directory existed prior to installation, or if the PT_HOME directory had to be created.

If the PT_HOME directory already existed:

1. Navigate to the directory referenced by PT_HOME and open **pthome.xml** in a text editor.
2. Add the following code within the pthome element (between <pthome> and </pthome>).

Note: The <path> and <configpath> elements must reflect the fully qualified path to the ptjsr168 directories. Forward slashes must be used regardless of operating system.

```
<product name="ptjsr168">
<install version="10.3">
    <path>C:/bea/alui/ptjsr168/10.3</path>
    <configpath>C:/bea/alui/ptjsr168/10.3/settings/config</configpath>
</install>
</product>
```

If the PT_HOME directory did not exist:

Copy the **pthome.xml** file from <PT_HOME>/ptjsr168/10.3/settings/config to the root <PT_HOME> directory.

Install the Oracle WebCenter JSR-168 Container Samples

To install the Oracle WebCenter JSR-168 Container samples:

1. Deploy the **ali168Samples.war** file from the **<PT_HOME>/ptjsr168/10.3/samples** directory using the method appropriate for your application server.
2. Migrate the **jsr-168.pte** server package using the method appropriate for the version of Oracle WebCenter Interaction installed. For details on importing server packages, see the *Administrator Guide for Oracle WebCenter Interaction*.

The Oracle WebCenter JSR-168 Container server package is **<PT_HOME>/ptjsr168/10.3/serverpackages/jsr-168.pte**.

After the resource package is imported, a JSR-168 folder will appear in portal administration that includes the JSR-168 Remote Server, two Web Services (RSSPortletWebService and JspPortletWebService), and two portlets (RSSPortlet and JspPortlet). These portlets do not require any configuration.

Note: Before placing the portlets on a page, edit the JSR-168 Remote Server object and change the Remote Server URL to the correct address of the host computer.

Note: The sample RSSportlet contains an admin preference page that allows you to save your proxy server settings. You must configure your application server to work with a proxy server setting. Follow the documentation for your application server to configure the proxy server setting.

Installation
