Copyright © 1995, 2008, Oracle Corporation and/or its affiliates. All rights reserved.

The Programs (which include both the software and documentation) contain proprietary information; they are provided under a license agreement containing restrictions on use and disclosure and are also protected by copyright, patent, and other intellectual and industrial property laws. Reverse engineering, disassembly, or decompilation of the Programs, except to the extent required to obtain interoperability with other independently created software or as specified by law, is prohibited.

The information contained in this document is subject to change without notice. If you find any problems in the documentation, please report them to us in writing. This document is not warranted to be error-free. Except as may be expressly permitted in your license agreement for these Programs, no part of these Programs may be reproduced or transmitted in any form or by any means, electronic or mechanical, for any purpose.

If the Programs are delivered to the United States Government or anyone licensing or using the Programs on behalf of the United States Government, the following notice is applicable:

#### U.S. GOVERNMENT RIGHTS

Programs, software, databases, and related documentation and technical data delivered to U.S. Government customers are "commercial computer software" or "commercial technical data" pursuant to the applicable Federal Acquisition Regulation and agency-specific supplemental regulations. As such, use, duplication, disclosure, modification, and adaptation of the Programs, including documentation and technical data, shall be subject to the licensing restrictions set forth in the applicable Oracle license agreement, and, to the extent applicable, the additional rights set forth in FAR 52.227-19, Commercial Computer Software--Restricted Rights (June 1987). Oracle USA, Inc., 500 Oracle Parkway, Redwood City, CA 94065.

The Programs are not intended for use in any nuclear, aviation, mass transit, medical, or other inherently dangerous applications. It shall be the licensee's responsibility to take all appropriate fail-safe, backup, redundancy and other measures to ensure the safe use of such applications if the Programs are used for such purposes, and we disclaim liability for any damages caused by such use of the Programs.

The Programs may provide links to Web sites and access to content, products, and services from third parties. Oracle is not responsible for the availability of, or any content provided on, third-party Web sites. You bear all risks associated with the use of such content. If you choose to purchase any products or services from a third party, the relationship is directly between you and the third party. Oracle is not responsible for: (a) the quality of third-party products or services; or (b) fulfilling any of the terms of the agreement with the third party, including delivery of products or services and warranty obligations related to purchased products or services. Oracle is not responsible for any loss or damage of any sort that you may incur from dealing with any third party.

Oracle and Agile are registered trademarks of Oracle Corporation and/or its affiliates. Other names may be trademarks of their respective owners.

Java and Solaris are trademarks or registered trademarks of Sun Microsystems, Inc. in the U.S. or other countries.

Microsoft, Windows, Excel, and Microsoft Internet Explorer are trademarks or registered trademarks of Microsoft Corporation in the United States and/or other countries.

| WFA (Workflow Administration) Resolved Issues.....                  | 17         |

# Preface

This document describes issues that you may encounter with this release. Internal Tracking numbers that appear in the tables are used to identify issues reported by customers. You can use these numbers to identify the issue should you need to contact Oracle Support. Locator numbers that appear in parentheses after some notes are for Oracle internal use only.

# Chapter 1: Resolved Issues

*This section contains information on Agile Product Lifecycle Management for Process 5.2.1 resolved issues.*

## Resolved Issues

The following tables outline known issues that have been resolved for the Agile Product Lifecycle Management for Process 5.2.1 release.

### General Resolved Issues

Table: 1-1 General Resolved Issues

| Internal Tracking # | Onyx / Bug DB # | Application  | Issue  | Resolution   |
|---------------------|-----------------|--------------|--|--|
| 5269                | None            | ALL (PORTAL) | The user profile group was incorrectly associated with extended attributes. This option appeared in the Show Choices for drop-down list in the Extended Attribute dialog box.  | Because extended attributes are not controlled by user profile groups, this option has been removed from the Show Choices for drop-down list on the top of the Extended Attributes dialog box.   |
| 10498               | None            | ALL          | <p>This was listed as a known issue in the 5.2 release notes.</p> <p>The following items that were once marked as 'Active' in ADMN and have been consumed in various applications could not be removed from the specification (or business object) once the item has been changed to 'Inactive' or 'Archived.'</p> <ol style="list-style-type: none"> <li>1. DRL--Catalogs (UGM, SCRM, and DRL)</li> <li>2. DRL--Classifications (DRL)</li> <li>3. Global --Restrictions (GSM formulation, DWB Profile, FIC)</li> <li>4. GSM Common--Business Units (all specification types)</li> <li>5. GSM Common--Label Owner (Trade)</li> <li>6. NPD--Business Units</li> <li>7. SCRM--Business Units</li> </ol> <p>This occurred because the Inactive/Archived items no longer appeared in the selection list.</p> | <p>Under the following conditions, Inactive and Archived items now appear with Active items in selection lists across applications.</p> <ol style="list-style-type: none"> <li>1. The Inactive and Archived items display as selected items in the selection lists.</li> <li>2. Once the item is deselected and the dialog box is closed, that item does not display again when the dialog box is re-opened. The Inactive/Archived item is no longer associated with the business object.</li> </ol> |

| Internal Tracking # | Onyx / Bug DB # | Application  | Issue  | Resolution   |
|---------------------|-----------------|--------------|--|--|
| 10579               | None            | ALL          | This was listed as a known issue in the 5.2 release notes.<br><br>The Security Classification field is still appearing on Attachment/Procedures dialog box in GSM even when object level security (OLS) is configured off. | When OLS is configured off, the Security Classification field is not displayed on the Attachment/Procedures dialog box in GSM. |
| 11847               | 7219443         | ALL (PORTAL) | Users receive an error when they attempt to access Profile and Preferences when they are in a module that is not hosted on the same server as Portal.  | The error no longer occurs.  |

### ***ADMN (Data Administration) Resolved Issues***

Table: 1-2 ADMN Resolved Issues

| Internal Tracking # | Onyx / Bug DB # | Application  | Issue   | Resolution   |
|---------------------|-----------------|--------------|---|--|
| 10224               | None            | ADMN         | This was listed as a known issue in the 5.2 release notes.<br><br>When a user is working with nodes, the Delete feature is not deleting all children/grandchildren nodes.   | Delete now deletes all children/grandchildren nodes. This feature is available only when the node is in the status of 'New.' |
| 10366               | None            | ADMN         | This was listed as a known issue in the 5.2 release notes.<br><br>In ADMN>NPD>Project Type, Available In columns are displaying only the lowest node of the project type category.  | The complete project type category now displays.   |
| 10475               | None            | ADMN (Cache) | This was listed as a known issue in the 5.2 release notes.<br><br>New Cross References added using the ADMN>Global>Cross References option are not displaying upon consumption in GSM, SCRM, etc. This was caused by the cache flush working incorrectly. | The cache flush feature now works correctly, so new cross references can be added in related applications.                   |
| 10507               | 300111          | ADMN         | Custom section names, row names, and column names that contain the degree symbol (°) are not always saving correctly.   | The degree symbol now saves correctly in custom section names, row names, and column names.                                  |

| Internal Tracking # | Onyx / Bug DB # | Application | Issue   | Resolution  |
|---------------------|-----------------|-------------|---|---|
| 10610               | None            | ADMN        | <p>This was listed as a known issue in the 5.2 release notes.</p> <p>The following ADMN pages allow you to change the sort order of items.</p> <p>Global&gt;UOM<br/> GSM Common&gt;Nutrient Source<br/> GSM Common&gt;Packaging UOM<br/> GSM Common&gt;Shelf Life Type<br/> GSM FSIS&gt;Application Status<br/> GSM FSIS&gt;CFIA Approval Type<br/> GSM FSIS&gt;CFIA Payment Method<br/> GSM FSIS&gt;CFIA Product Type<br/> GSM FSIS&gt;USDA HACCP Category<br/> PQS&gt;Lot Sample Quantity UOMs<br/> PQS&gt;Scorecard Qualifications<br/> SCRM&gt;Class<br/> SCRM&gt;SDM Status</p> <p>However, clicking <b>Cancel</b> on these pages changes the sort order of items on the page. Additionally, clicking the edit icon (✎) after clicking <b>Cancel</b> changes the sort order.</p> | The sort order remains unchanged when <b>Cancel</b> and the edit icon are clicked.  |
| 10635               | None            | ADMN        | <p>This was listed as a known issue in the 5.2 release notes.</p> <p>In NPD &gt; Functional Area and in WFA &gt; System Actions, users with the role of [DATA_ADMIN] are able to change the Available In field regardless of status. They should only be able to change the Available In field with items in status of 'New.'</p>   | Users with the role of [DATA_ADMIN] can change the Available In field for only those items with the status of 'New.'  |
| 10685               | None            | ADMN        | <p>This was listed as a known issue in the 5.2 release notes.</p> <p>Project Type import/export is not including dependencies, which are defined as Project Type Categories. Both Project Types and Project Type Categories are set up using the ADMN&gt;NPD submenu.</p>   | Project Type imports/exports now include the Project Type Category.   |
| 11105               | None            | ADMN        | For ADMN>Global>UOM, the user is allowed to enter a non-unique name, abbreviation, ID, and ISO Code. These fields should be unique.   | The system now checks these fields for uniqueness.  |
| 11166               | None            | ADMN        | For the ADMN>GSM Compliance items, all items check for a unique name with the exception of Additives.   | For Additives, a validation for unique name has been added. This should be checked when the user clicks the apply changes icon (✔) to accept the row changes. |

| Internal Tracking # | Onyx / Bug DB # | Application   | Issue  | Resolution  |
|---------------------|-----------------|---------------|--|---|
| 11551               | 304066          | ADMN          | There is no way to enter negative values into a numeric extended attribute or to calculate using a negative extended attribute.            | Extended attributes now accept numeric values containing negatives. |
| 11768               | None            | ADMN (Caches) | The cache flush is not working correctly for storage requirements added using ADMN>GSM Common > Storage Requirements then consumed in GSM. | The cache flush is now working properly.                            |

### ***CACS (Computer Aided Compliance Screening) Resolved Issues***

Table: 1-3 CACS Resolved Issues

| Internal Tracking # | Onyx / Bug DB # | Application | Issue   | Resolution   |
|---------------------|-----------------|-------------|---|--|
| 10601               | None            | CACS        | This was listed as a known issue in the 5.2 release notes.<br><br>On a CACS Constraint tab, the user receives an error when clicking the <b>Cancel</b> icon in the Lower Level Screens table. | The <b>Cancel</b> icon has been removed from this table as there are no properties that can be edited. |
| 12000               | 7212723         | CACS        | When editing constraints, the Show Choices For filter is not working correctly when adding extended attributes.   | The Show Choices for filter now works correctly.   |

### ***CSS (Content Synchronization and Syndication) Resolved Issues***

Table: 1-4 CSS Resolved Issues

| Internal Tracking # | Onyx / Bug DB # | Application | Issue   | Resolution  |
|---------------------|-----------------|-------------|---|---|
| 10669               | 301802          | CSS         | The Environmental Waste weight fails on syndication when it has a value less than .0001.  | Values less than .0001 are now successfully syndicated. |
| 11815               | 7121697         | CSS         | In the CSS application, the quantity field on the Next Lower Level Items of the trade specification and the Gross Weight (w/o Pallet) on the Packaging tab are not included in the syndication. | These fields are now included in the syndication.       |

**DWB (Design Workbench) Resolved Issues**

Table: 1-5 DWB Resolved Issues

| Internal Tracking # | Onyx / Bug DB # | Application | Issue | Resolution |
|---------------------|-----------------|-------------|-------|------------|
| None                |                 |             |       |            |

**DRL (Document Reference Library) Resolved Issues**

Table: 1-6 DRL Resolved Issues

| Internal Tracking # | Onyx / Bug DB # | Application | Issue   | Resolution  |
|---------------------|-----------------|-------------|---|---|
| 8963                | None            | DRL         | The search feature is not working correctly when multiple catalog items are entered as search criteria.                                 | The search feature now works correctly when multiple catalog items are searched on. |
| 10973               | 303080          | DRL         | The session timeout error message is displayed incorrectly.   | The timeout error message now displays correctly.                                   |
| 11658               | None            | DRL         | In DRL, when the user copies an existing record, the original author is also copied. The user making the copy should be the new author. | The current user is the author of the copied record.                                |

**eQ (eQuestionnaire) Resolved Issues**

Table: 1-7 eQ Resolved Issues

| Internal Tracking # | Onyx / Bug DB # | Application | Issue  | Resolution   |
|---------------------|-----------------|-------------|--|--|
| 8485                | None            | eQ          | This was listed as a known issue in the 5.2 release notes.<br><br>When a new GSM specification is created from an imported eQ questionnaire, the eQ access level is not retained.  | The imported questionnaire's access level is tied to the new specification.                        |
| 8679                | None            | eQ          | In eQ, analytical properties were displayed in alphabetical order.   | Analytical properties are now displayed in the order that they are displayed on the specification. |
| 10657               | None            | eQ          | The user receives an application error when attempting to save packaging questionnaire attributes to a GSM specification. The error occurred when additional values were entered in the Storage Instructions and Relative Humidity fields. | The character limit has been increased for these fields so the error message no longer displays.   |

| Internal Tracking # | Onyx / Bug DB # | Application | Issue   | Resolution  |
|---------------------|-----------------|-------------|---|---|
| 10659               | None            | eQ          | The user receives an application error when attempting to save printed packaging questionnaire attributes to a GSM specification. The error occurred when a large amount of text was entered in the Reason for Change field.                            | The character limit has been increased for this field so the error message no longer displays.          |
| 10697               | None            | eQ          | The user receives an application error when attempting to save ingredient questionnaire attributes to a GSM specification. The error occurred when additional values were entered in the Relative Humidity field.                                       | The character limit has been increased for this field so the error message no longer displays           |
| 10767               | 300353          | eQ          | The shelf life information in an existing GSM ingredient specification is not visible during the eQ>>GSM process if the user has selected the "Create New Issue" option. The shelf life information is visible when using the "Update Existing" option. | During the eQ>>GSM process, the shelf life information remains visible for the Create New Issue option. |

### ***GSM (Global Specification Management) Resolved Issues***

Table: 1-8 GSM Resolved Issues

| Internal Tracking # | Onyx / Bug DB # | Application | Issue   | Resolution   |
|---------------------|-----------------|-------------|---|--|
| 8370                | None            | GSM         | For process and menu item specifications, on the Formulation tab, in the Bill of Materials table, the history icon (📄) is not displaying.   | The history icon now displays.   |
| 8384                | None            | GSM         | This was listed as a known issue in the 5.2 release notes.<br><br>Extended attributes have been added to testing protocols. However, when the user prints testing protocols, the extended attributes are not printing.          | Extended attributes now print with testing protocols.  |
| 8512                | None            | GSM         | The search page for custom sections is allowing users who do not have access to a custom section to search for it.  | Custom sections set up as non-contextual (in object level security) cannot be searched by users without the correct permission.                |
| 8968                | None            | GSM         | If the user creates a copy of an ingredient specification that was generated from eQ with an attachment, the document gets copied. That functionality is missing from product, printed packaging, and packaging specifications. | Creating a copy of a specification now includes attachments from EQ. This applies to product, printed packaging, and packaging specifications. |
| 8978                | None            | GSM         | Attachments are not searchable when they are pushed from eQ to GSM. This applies to packaging material, ingredient, product, and printed packaging specifications.  | The attachments are now searchable.  |

| Internal Tracking # | Onyx / Bug DB # | Application | Issue   | Resolution  |
|---------------------|-----------------|-------------|---|---|
| 9399                | 296166          | GSM         | If a selected allergen is in edit mode, when the user opens the allergens listing popup and deselects that same allergen, an unhandled error occurs. This applies to menu item and ingredient specifications for Allergens (known to contain).  | The error no longer occurs.   |
| 9511                | None            | GSM         | Specifications imported from DWB are not included in the GSM Action Items list.   | The Action Items list in GSM now includes specifications imported from DWB.   |
| 10544               | None            | GSM         | This was listed as a known issue in the 5.2 release notes.<br><br>A configuration has been added to turn off analytical properties. On a labeling specification and a master specification, the only thing displayed on the Compliance tab is the analytical properties grid.                                     | When analytical properties are configured off, the Compliance tab no longer displays for labeling and master specifications.                            |
| 10560               | None            | GSM         | This was listed as a known issue in the 5.2 release notes.<br><br>This change applies to label claims, complies with, allergens, intolerances, and additives. The data group filter should only change the left column of the multi-select dialog box. Currently the selected (right) column is filtered as well. | Data group filters affect the left column only in multi-select dialog boxes for label claims, complies with, allergens, intolerances, and additives.    |
| 10606               | None            | GSM         | This was listed as a known issue in the 5.2 release notes.<br><br>When analytical properties are configured off, they are still appearing as options in the Print dialog box for process specifications.  | The Analytical Properties options have been removed from the Print dialog box for process specifications when analytical properties are configured off. |
| 10607               | 305211          | GSM         | An error occurred when the user clicked on the <b>Display As XML</b> button on an ingredient specification.   | The error message no longer appears.  |
| 10628               | None            | GSM         | For GSM search pages that include the Approved for Use In – Country search criteria, the resulting dialog box should include inactive and active items. Currently it only includes active items.  | The Approved for Use in – Country dialog box on the search page now includes active and inactive items.   |
| 10637               | None            | GSM         | This was listed as a known issue in the 5.2 release notes.<br><br>On specifications including an NPD Activities option, the resulting dialog box called Related NPD Activities is missing a way to close the window.  | The <b>Close</b> button has been added to the dialog box.   |

| Internal Tracking # | Onyx / Bug DB # | Application | Issue  | Resolution  |
|---------------------|-----------------|-------------|--|---|
| 10650               | None            | GSM         | An error occurs when the user attempted to save a printed packaging specification after entering a large amount of data in the Variety Title field.  | The error no longer occurs.   |
| 10907               | None            | GSM         | The sum function in the % Breakdown feature is not working correctly. Totals are not equaling 100% when the user is entering amounts less than or equal to .1.   | Totals are now totaling 100% for small amounts.   |
| 10942               | 285415          | GSM         | An error occurs when the user attempts to cancel a change to a Cross Reference using the cancel icon (✖).  | The cancel icon now works correctly for Cross References.                               |
| 11158               | 297146          | GSM         | When users perform ingredient searches, the search criteria on extended attributes do not return to the main search page consistently. Users have to try several times to get the criteria to appear and allow searching.                | Search criteria on extended attributes now consistently return to the main search page. |
| 11221               | None            | GSM         | An error occurred when the user attempts to create a copy of a menu item specification using the Create New Specification option.  | The error no longer occurs.   |
| 11286               | 303054          | GSM         | When printing a trade specification with an active Nutrient Profile, the extended attributes do not follow the sort order of the extended attributes found on the Compliance tab of the trade specification.                             | The printed order now matches that on the Compliance tab.                               |
| 11380               | 304705          | GSM         | When the supplier opens eQ and tries to select entries from the list in the custom section for packaging regulatory impact, a run time error occurs.   | The error no longer occurs.   |
| 11387               | None            | GSM         | The words "Select from the list" have been removed from the Source drop-down list on the Nutrient Data Source dialog box. This dialog box appears when the user edits the Source field on the Nutrition Panel tab of a nutrient profile. | The drop-down list is now consistent with others.                                       |
| 11601               | 304996          | GSM         | If the user edits an extended attribute with a multi-line text field and enters text with spaces, the entry field grows larger than the characters being entered.  | The text now wraps correctly.   |
| 11755               | None            | GSM         | On a packaging material specification, when the user chooses the Print option, selects the check boxes for Specification and Supporting Documentation, and clicks <b>Print</b> , the PDF viewer displays only the title of the jpg file. | The PDF viewer now displays the appropriate photos.                                     |

| Internal Tracking # | Onyx / Bug DB # | Application | Issue   | Resolution   |
|---------------------|-----------------|-------------|---|--|
| 11759               | None            | GSM         | An error message displays when the user tried to select a brand containing a single quote (') on a trade specification.   | The error no longer occurs.  |
| 11761               | None            | GSM         | On a menu item specification's Build tab, the user searched based on Created date, and then selected two specifications for Menu Item Build. However, neither of the selected specifications was added to the build.  | Selected specifications are added successfully.                            |
| 11765               | None            | GSM         | For nutrient profiles, Nutrient Panel, Source column, the source selected by the user did not populate the column; instead the choice above the selected source was used. This error occurs for the Populate All Sources option as well.  | The item selected now populates the Source column.                         |
| 11767               | None            | GSM         | A user with no access to sourcing approvals can view sourcing approvals when new issues are created.  | The user is now restricted from viewing sourcing approvals.                |
| 11812               | 7137488         | GSM         | Specifications that are transferred from eQ are missing on the GSM Action Items list.   | The specifications now appear on the GSM Action Items list.                |
| 11997               | 7257110         | GSM         | An error occurs when the user attempts to edit a nutrient profile and add an ingredient statement via the rollup feature.   | A field length validation has been added, and the error no longer occurs.  |
| 12052               | 7295378         | GSM         | Temporary signature authority assignment in GSM was not working correctly. The assignee was unable to "see" any TSA assignor specifications in the GSM Action Items list, and no TSA assignees received a system notification that a specification needed attention in the GSM Action Items list. | The temporary signature authority feature in GSM is now working correctly. |
| 12421               | 7108625         | GSM         | When a sourcing approval is imported into a copied GSM specification, an error occurs when the user tries to open the sourcing approval.  | The error no longer occurs.  |

**NPD (New Product Development) Resolved Issues**

Table: 1-9 NPD Resolved Issues

| Internal Tracking # | Onyx / Bug DB # | Application | Issue   | Resolution   |
|---------------------|-----------------|-------------|---|--|
| 10362               | 301054          | NPD         | Users are unable to remove users assigned to Project Reader(s) field on the Summary tab of project templates.<br><br>When the user clicks the <b>Project Reader(s)</b> link, the user search page displays assigned users in the Selected Items section. The user clicks <b>Clear</b> to remove all users. However, when the user clicks <b>Done</b> to close the dialog box, the users still display in the Project Reader(s) field. | The Clear function on the user search page now clears all selected users.  |
| 10537               | 302531          | NPD         | When the owner of an activity step is changed to another person, the new owner is not receiving an activity in his or her Action Items list. The activity remains in the old owner's Action Items list.   | The NPD application has been updated so that activities correctly appear in the current owner's Action Items list.                 |
| 10625               | None            | NPD         | The search page dialog box for Consumer Value Perception and Enabling Technologies needs to include active and inactive items. Currently it only displays active items.   | The search page dialog boxes for Consumer Value Perception and Enabling Technologies now contain inactive as well as active items. |
| 10664               | 296508          | NPD         | When an activity is moved back to 'Draft' status, the originator is not receiving an email.   | The originator now receives an email when an activity moves back to 'Draft' status.  |
| 10829               | 300839          | NPD         | In portfolio layout, the value of activity status is showing the html image code instead of the image.  | The Activity status column in portfolio layout is showing the red/amber/green status bar in the correct location.                  |
| 10943               | 294788          | NPD         | NPD is not allowing all specifications to be removed from an activity.  | Now all specifications can be removed from an NPD activity.  |
| 11140               | 303921          | NPD         | The user search page is too small to see the default search results rows and the Done button.   | The page has been resized so that these elements appear.   |
| 11260               | None            | NPD         | An error occurs when the user workflows an activity to a step where the only available owner is a group. For example, if "Originator" is not selected on the template, and no individual users are in the Owners table, the error occurs.   | The error no longer occurs.  |

| Internal Tracking # | Onyx / Bug DB # | Application | Issue  | Resolution  |
|---------------------|-----------------|-------------|--|---|
| 11264               | 304747          | NPD         | Users who are listed in the Project Leader field of a project cannot remove or replace themselves if they are not the project originator.  | Project leaders can now remove themselves from the Project Leader field.  |
| 11599               | 306045          | NPD         | Within a portfolio, the Project Schedule column in a custom layout displays source code instead of the red/amber/green graphic indicator.  | The column now displays the red/amber/green indicator.  |
| 11657               | None            | NPD         | When the user clicks the icon located on the left navigation bar, the portal page does not display.  | In the “EnvironmentSettings.config”, add the following keys as children of the node at “/EnvironmentSettings/NPD/AppSettings”. <ol style="list-style-type: none"> <li>1. &lt;add key=”HomeURL” value=”@@VAR:Prodika.Portal.URL@@” /&gt;</li> <li>2. &lt;add key=”SiteMapURL” value=”#” /&gt;</li> </ol> Clicking the icon now displays the portal page. |
| 11696               | None            | NPD         | On activity templates, the checkboxes are still editable after the user clicks <b>Save &amp; Close</b> .   | The checkboxes are no longer editable after the user clicks <b>Save &amp; Close</b> .   |
| 11752               | None            | NPD         | An error occurs when the user attempts to workflow an ISP signature request through a temporary signature authority (TSA).   | The error no longer occurs.   |
| 11754               | None            | NPD         | When the user workflows an instance of ISP to ‘Approved,’ a message is sent indicating a project has been generated. However, the link in the message takes the user back to the ISP. No actual project was created. | This message is no longer sent.   |
| 11758               | None            | NPD         | An error occurred when a signature request was workflowed for a private project. This occurred when a signature requestee was not listed as a team member or team leader on the TMFR.                                | Any signature requestee is considered to have the authorization to workflow a signature request on a private project, even if the requestee may not explicitly be on the team.  |
| 11763               | None            | NPD         | When the owner of an ISP workflows it to ‘Rejected,’ any outstanding signature requests for the ISP remain in effect and remain on Action Items list.  | Once an ISP moves to a ‘Rejected’ state, all outstanding signature requests are now cancelled.  |

| Internal Tracking # | Onyx / Bug DB # | Application | Issue  | Resolution  |
|---------------------|-----------------|-------------|--|---|
| 11809               | 7156619         | NPD         | In NPD, the user is unable to revise the dates in Project Milestone and Schedule activity. The user can select a new date, but the application reverts to the old date when the user clicks <b>Save</b> or <b>Save &amp; Close</b> . | The dates can now be revised.   |
| 11811<br>11927      | 7141007         | NPD         | An error occurred when the user entered a large number of names in the NPD Portfolio Shared With field.  | The error no longer occurs.   |
| 11956               | None            | NPD         | On projects starting in a stage other than Stage 1, an error occurs when the user workflows a signature request with a “No-Go” decision.   | The error no longer occurs.   |
| 12051               | 7289815         | NPD         | A trade specification workflow indicates that a completed trade specification should be a green status. However, when attached to an NPD project, the trade specification appears in a red status.                                   | The status of the specification attached to a project in NPD now matches the workflow status. |

### ***NSM (Nutrition Surveillance Management) Resolved Issues***

Table: 1-10 NSM Resolved Issues

| Internal Tracking # | Onyx / Bug DB #    | Application | Issue  | Resolution   |
|---------------------|--------------------|-------------|--|--|
| 11922               | 7244439<br>7276478 | NSM         | When the user enters the nutrient data source, the selected source is not being assigned. Instead, the source which is below the selected one on the list is assigned.   | The selected source is now assigned.                   |
| 11992               | 7272585            | NSM         | While creating an NSM composite that consists of one or more NSM analyses, the Results section displays a list of nutrient errors whereby a nutrient is missing in one or more analyses. As the user navigates to the analysis to add and save the missing nutrient, the error messages are not updated to reflect the change. | NSM composites now refresh after errors are corrected. |

**PQS (Product Quality Scorecard) Resolved Issues**

Table: 1-11 PQS Resolved Issues

| Internal Tracking # | Onyx / Bug DB # | Application | Issue  | Resolution                                 |
|---------------------|-----------------|-------------|--|--|
| 11762               | None            | PQS         | An error occurs when the user attempts to add a new attachment to a sample by clicking the <b>Upload</b> button. | Attachments are now uploaded successfully. |

**RPT (Reporting) Resolved Issues**

Table: 1-12 RPT Resolved Issues

| Internal Tracking # | Onyx / Bug DB # | Application | Issue  | Resolution  |
|---------------------|-----------------|-------------|--|---|
| 10496               | None            | RPT         | Currently, a report can exist in only one report group. This prevents the ability to include a report in multiple report groups. | A report can now be included in more than one report group.                           |
| 10864               | 303233          | RPT         | An error occurred when a saved search name containing special characters was loaded.   | The application now supports saved searches with names containing special characters. |
| 11617               | None            | RPT         | Report security only works at the Report Group level and should work at the Context and Report level.                            | Report security now covers all three levels: group, context, and report.              |

**SP (Supplier Portal) Resolved Issues**

Table: 1-13 SP Resolved Issues

| Internal Tracking # | Onyx / Bug DB # | Application | Issue   | Resolution  |
|---------------------|-----------------|-------------|---|---|
| 10828               | 302441          | SP          | <ol style="list-style-type: none"> <li>1) On the Contacts page, when the Import link is selected, the dialog box showing available contacts is not scrolling correctly, so all the information is not viewable.</li> <li>2) The Contacts page is lacking required fields, so blank contacts are allowed to be saved.</li> </ol> | <ol style="list-style-type: none"> <li>1) The import dialog box now contains a scroll bar so all contacts can be viewed.</li> <li>2) On the Contacts page, the First Name and Last Name fields are now required.</li> </ol> |
| 11165               | 303843          | SP          | Printed packaging specifications in Supplier Portal do not have the third party watermark.  | The third party watermark is now included.  |
| 11787               | None            | SP          | The user received an error when attempting to print a trade specification from the Specifications & Documents page.   | The error no longer occurs.   |

## **SCRM (Supply Chain Relationship Management) Resolved Issues**

Table: 1-14 SCRM Resolved Issues

| Internal Tracking # | Onyx / Bug DB # | Application | Issue   | Resolution  |
|---------------------|-----------------|-------------|---|---|
| 10968               | 302690          | SCRM        | The amber color in the RAG/SLA column is not updating correctly for specification-related and non-specification-related sourcing approvals.   | The amber status now updates correctly.             |
| 11766               | None            | SCRM        | An error occurred when the user selected the Action Items option.   | The error no longer occurs.                         |
| 11832               | None            | SCRM        | The Item/Service Description field is used as a link on the Sourcing Approvals tab for non specification-related sourcing approvals within a facility. This should be a required field. | The Item/Service Description field is now required. |

## **UGM (User Group Management) Resolved Issues**

Table: 1-15 UGM Resolved Issues

| Internal Tracking # | Onyx / Bug DB # | Application | Issue  | Resolution  |
|---------------------|-----------------|-------------|--|---|
| 11674               | None            | UGM         | UGM does not respect the password complexity configuration setting when entering a password in UGM.<br><br>The configuration is UGM.EnforcePasswordComplexity = False.<br>When this is set to false, the UGM admin user can assign any password to a user. When this is set to true, the UGM admin user must follow the rules that have been set up for password (for example, the new password must be at least 8 characters and include 3 of the following: Upper Case (A-Z), Lower Case (a-z), Numbers (0-9) and/or Special Characters (~ ! @ # \$ % ^ & * ( ) _ + - = [ ] ; : < > ? ). | UGM now respects the configuration setting when passwords are entered in UGM. |
| 11805               | 7192680         | UGM         | When a user searches for a country in UGM, the wrong search query is being run.  | The correct search query is now in place.                                     |

**WFA (Workflow Administration) Resolved Issues**

Table: 1-16 WFA Resolved Issues

| Internal Tracking # | Onyx / Bug DB # | Application | Issue  | Resolution   |
|---------------------|-----------------|-------------|--|--|
| 10348               | None            | WFA         | <p>This was listed as a known issue in the 5.2 release notes.</p> <p>For GSM and SCRM workflows, duplicate tab headings were created when multiple signature requests were tied to the same functional area (for example 'FA', 'FA,' 'FA'). The tabs displayed on the pages where owners, signature requests, and notifications are selected. The tabs did not work and an error was returned when the tabs were selected.</p> | <p>Unique tabs are now created for signature requests using the same functional area. Duplicated functional area names are displayed on tab headings such as FA(1), FA(2), and FA(3).</p> <p>This change applies GSM and SCRM workflows where owners, signature requests, and notifications are defined.</p> |
| 10696               | None            | WFA         | <p>An issue similar to that described in WFA 10348 occurred.</p>   | <p>Unique tabs are now created for signature requests using the same functional area. Duplicated functional area names are displayed on tab headings such as FA(1), FA(2), and so on.</p> <p>This change applies GSM and SCRM workflows where owners, signature requests, and notifications are defined.</p> |
| 11074               | None            | WFA         | <p>An error occurs when the user adds a step containing a long name to a GSM workflow template. The error occurs when a large amount of text is entered in the Status field.</p>   | <p>The maximum number of characters allowed for the Status field has been increased, so the error no longer occurs.</p>  |
| 11084               | None            | WFA         | <p>An error occurs when the user attempts to add a long list of business units to the Transitions row in a GSM workflow template.</p>  | <p>The error no longer occurs.</p>   |
