Version 3.12

July 2009

# Oracle Insurance Insbridge Rating and Underwriting Release Notes Version 3.12

**The purpose of this document is to:**

Describe the new features and resolved issues offered in the Insbridge Rating and Underwriting system Release 03.12.00. This document also provides a history of enhancements and bug fixes from past releases.

## RETIREMENT NOTICE for VERSION 03.12.00

The following software versions are being retired and will no longer be supported by Oracle Insurance Insbridge Rating and Underwriting after Version 3.12.

- **3.12 will be the last version to support the following:**
  - SQL Server 2000
  - Windows Server 2000. Along with system requirements for IIS 5.0 and .NET 2.0.
  - SoftRater – DB2 V7
  - SoftRater – IIS V5
  - SoftRater – Solaris V8

## RELEASE 03.12.00

### NEW FEATURES

Oracle Bug DB	Product	Description
8380006	RateManager	<p><b>Impacted Area:</b> Program versions, result variables, input variables, categories, result groups and sequences</p> <p><b>Enhancement:</b> Notes can be added to program versions, result variables, input variables, categories, result groups and sequences. Notes also can be added to local and global mapped variables, calculated variables and algorithms. When a note has been added, an icon will be displayed on the item. Notes can be added, edited or deleted at any time.</p>
8379395	RateManager	<p><b>Impacted Area:</b> Program versions, algorithms, and variables</p> <p><b>Enhancement:</b> Change control can be done on any item that can be revisioned or have a new version created, such as local and global mapped variables, calculated variables and algorithms or program versions. This feature can be mandated by the system. Any time a new revision is created, the user will be prompted to enter a change control number and description. When a change control has been added, an icon will be displayed on the item. Change control entries can be added or deleted at any time.</p>

Oracle Bug DB	Product	Description
8379394	RateManager	<p><b>Impacted Area:</b> Algorithms and variables</p> <p><b>Enhancement:</b> Item locking is done on any variable or algorithm that is being edited. This prevents two people from working on the same item. When editing is closed, the item will be available.</p>
8381315	IBRU	<p><b>Impacted Area:</b> System wide</p> <p><b>Enhancement:</b> OBIEE Publisher is incorporated into RateManager. This component allows for reports to be published from RateManager. The reports settings are located in IBFA.</p>
8380492	RateManager	<p><b>Impacted Area:</b> Reports</p> <p><b>Enhancement:</b> Program Version Report is now available. Program Version Report details the elements of the program and can be generated from the right click menu of a program version on the Program Listing screen.</p>
8379391	RateManager	<p><b>Impacted Area:</b> Reports</p> <p><b>Enhancement:</b> Program Difference Report is now available. This report compares two programs and shows the differences between them. The program number and line of business are included. Users can view the program while the report is open. Program Difference Report is on the right click menu on the Program Listing screen.</p>
	RateManager	<p><b>Impacted Area:</b> Logs/Reports</p> <p><b>Enhancement:</b> Audit Report is now available. This report details the audit logs and allows for filtering. The Audit Report is on the logs menu of the Tools section.</p>
8379393	IBFA	<p><b>Impacted Area:</b> Reports</p> <p><b>Enhancement:</b> Package Difference Report is now available. This report compares two packages and shows what's been changed since the last time packaged. Package Difference Report is on the right click menu in IBFA.</p>

## ISSUE RESOLUTION

Oracle Bug DB	Product	Description
8383324	BatchManager	<p><b>Impacted Area:</b> BatchManager</p> <p><b>Issue Impact:</b> Email addresses default to the logged-in user. No additional entry can be made.</p> <p><b>Resolved by:</b> The default email address can now be changed to another email address if necessary.</p>

Oracle Bug DB	Product	Description
8380294	IBRU	<p><b>Impacted Area:</b> Database Management</p> <p><b>Issue Impact:</b> Database updates were manually applied in the MS SQL server RateManager and IB_Client databases.</p> <p><b>Resolved by:</b> Database updates can be performed on the IB_CLIENT and IBRM database through RateManager. Previously run updates will no longer be available and exact execution order will be enforced.</p>
8379161	IBFA	<p><b>Impacted Area:</b> Database Management</p> <p><b>Issue Impact:</b> Database connections could not be validated for RateManager environments.</p> <p><b>Resolved by:</b> Database connections can now be validated for RateManager environments. This will let users know that a connection can be established.</p>
Internal	RateManager	<p><b>Impacted Area:</b> Line of Business Management</p> <p><b>Issue Impact:</b> LOB ID numbers were auto generated when a Custom LOB was created.</p> <p><b>Resolved by:</b> LOB ID numbers are no longer auto generated when creating a Custom LOB. Users now have the ability to enter in a number of their choosing. This allows users to create a Custom LOB that matches any LOB brought in from a template program in the Library.</p>
Internal	RateManager	<p><b>Impacted Area:</b> Batching</p> <p><b>Issue Impact:</b> The Batching option for exporting programs has been removed due to system changes.</p> <p><b>Resolved by:</b> Programs can now be exported one at a time in real time.</p>
Internal	RateManager	<p><b>Impacted Area:</b> Callouts</p> <p><b>Issue Impact:</b> Program versions that were copied were not correctly displaying the Insbridge Callout screen.</p> <p><b>Resolved by:</b> A fix was implemented that allows for a clean copy to be made and any copied program in the system to access the Insbridge Callout screen.</p>

## KNOWN ISSUES for 3.12

Oracle Bug DB	Product	Description
Internal	BatchManager	<b>Impacted Area:</b> BatchManager <b>Issue Impact:</b> When creating a Batch packaging job, if you select all three options, only the input and output XML are listed in the details on the IBFA screen.
Internal	ESI	<b>Impacted Area:</b> ESI <b>Issue Impact:</b> When creating a program version, the NOTE field is no longer valid due to a schema change in 3.12. That attribute must be left blank and will be removed in a future release.
