NEW FEATURES

=====

The JBoss application server is now supported; Apache Tomcat was deimplemented.

INSTALLATION INFORMATION

=====

For complete installation instructions, including installation prerequisites, refer to the Oracle Primavera Compression Server Administration Guide (CompSrvAdminGuide.pdf), which is available in the \Documentation\<language>\Technical Documentation\Compression Server folder of the P6 physical media or download.

- P6 Compression Server can be used with Primavera Project Management module release 5.0 SP3 or later.
- To successfully install the Compression Server, you must completely uninstall any previous version of the Compression Server service. Refer to the Primavera Compression Server Administration Guide for complete details.

KNOWN ISSUES

=====

None.

ISSUES RESOLVED IN THIS VERSION

=====

For a list of issues from previous versions that are resolved in P6 version 7.0, refer to Solution ID prim82774 in the Oracle Primavera Support Knowledgebase: <http://www.oracle.com/primavera/support.html>.

CONTACTING ORACLE PRIMAVERA

=====

For instructions on how to submit a service request for technical support for your products, go to <http://www.oracle.com/primavera/support.html>. This page provides the latest information for contacting support and the support renewals process.
