February 2010

# Oracle Insurance Insbridge Rating and Underwriting Release Notes Version 3.13.02

The purpose of this document is to:

Describe the new features and resolved issues offered in the Insbridge Rating and Underwriting system Release 03.13.02. This document also provides a history of enhancements and bug fixes from past releases.

## NEW FEATURES

No New Features were added in 3.13.02.

## ISSUE RESOLUTION

ORACLE Issue #	Product	Description
INSB-4664	RateManager	<p><b>Impacted Area:</b> Custom XML Mappings (Input and Output) (Stateful and Non-Stateful)</p> <p><b>Issue Impact:</b> A customer reported that after they upgraded from a previous version of RateManager to release 3.13, custom input and output mappings were no longer visible in RateManger.</p> <p><b>Resolved by:</b> Corrections were made to the system and custom input and output mappings are functioning as expected.</p>
INSB-4663	SoftRater	<p><b>Impacted Area:</b> Custom XML Mappings (Input and Output) (Stateful and Non-Stateful)</p> <p><b>Issue Impact:</b> A customer reported that after they upgraded from a previous version of SoftRater to release 3.13, SoftRater was failing when using custom input mappings specifying a program version. SoftRater wasn't filtering unused categories properly.</p> <p><b>Resolved by:</b> This issue has been corrected and SoftRater is working correctly.</p>
INSB-4673	BatchManager	<p><b>Impacted Area:</b> BatchManager Documentation</p> <p><b>Issue Impact:</b> An incorrect example in the BatchManager User Guide indicated that Name Space was supported.</p> <p><b>Resolved by:</b> Name Space is not supported. Corrections were made to BatchManager User Guide. We regret any confusion this may have caused.</p>

# RETIREMENT NOTICE for Release 03.13.00

The following software versions are no longer supported by Oracle Insurance Insbridge Rating and Underwriting beginning with Oracle Insurance Insbridge Rating and Underwriting Release 3.13.

- **Oracle Insurance Insbridge Rating and Underwriting Release 3.13 will not support WebLogic 9.2.**

Oracle Insurance Insbridge Rating and Underwriting Release 3.13 has been certified on Microsoft .NET Framework 3.5 and on WebLogic 10.3.1.

# UPGRADE NOTICE for Release 03.13.00

## Microsoft .NET Framework 3.5

Microsoft .NET Framework 3.5 is now required for any new installation or upgrade. Please verify that Microsoft .NET Framework 3.5 is installed prior to upgrading.

## SoftRater for Java

This notice is for customers currently running a SoftRater for Java engine Release 3.12 or lower. This includes:

- **SoftRater for WebLogic**
- **SoftRater for WebSphere**
- **SoftRater for JBoss**

Necessary updates have been made to the SoftRater for Java engines. This includes:

- **SoftRater for WebSphere has been updated to SOAP version 1.1.**
- **SoftRater for WebLogic has been updated to SOAP version 1.2.**
- **SoftRater for JBoss has been updated to SOAP version 1.2.**

These changes mean that the WSDLs for the SoftRater for Java engines have been modified. Updated WSDL documents will need to be incorporated into any client calling application that communicates with SoftRater. If upgrades are done to the SoftRater for Java engines without updating the calling applications, the calling application will fail.

**Please update a test environment prior to deploying to production.** Install the .EAR file in a test environment to obtain the WSDL. Update your calling application and then test. When testing is complete, you can upgrade your other environments.

---

**NOTE:** *Customers running a Windows only environment, without a Java component, will not be affected.*

---

These updates are for the 3.13 release of SoftRater for Java engines only.

# RELEASE 03.13.01

## NEW FEATURES

No New Features were added in 3.13.01.

## ISSUE RESOLUTION

ORACLE Issue #	Product	Description
9286634	SoftRater	<b>Impacted Area:</b> SoftRater for Java  <b>Issue Impact:</b> In program to program callouts, cache was not being utilized.  <b>Resolved by:</b> Cache is now being utilized in Program to Program callouts resulting in improved performance.
INSB-4501	SoftRater	<b>Impacted Area:</b> SoftRater for WebSphere  <b>Issue Impact:</b> The initial access of the environment setup link on SoftRater for WebSphere resulted in an error message being displayed.  <b>Resolved by:</b> This issue has been corrected and users will no longer receive an error message when accessing the environment setup link on SoftRater for WebSphere.

## KNOWN ISSUES for 3.13.01

Source	Product	Description
INSB-4543	JBoss	<b>Impacted Area:</b> Turning off logging in SoftRater for JBoss.  <b>Issue Impact:</b> When logging is turned off in the Jboss engine, the configuration changes will not take effect until the application server has been stopped and re-started.

# RELEASE 03.13.00

## NEW FEATURES

ORACLE Feature #	Product	Description
INSB-4364	RateManager	<b>Impacted Area:</b> RateManager <b>Enhancement:</b> Exponent was added to the math functions. An exponent step can be used to raise a number to a power.
INSB-3	RateManager	<b>Impacted Area:</b> RateManager <b>Enhancement:</b> Advanced Algorithm Looping has been added to RateManager. This option will allow an algorithm (and all of its steps) to be processed 1 or more times on a given category instance. Processing will execute until the Do While conditional expression is met or a Maximum Number of Loops has been executed.
INSB-4395	SoftRater	WebLogic 9.2 is being retired for SoftRater for Java. WebLogic 10.3.1 has been certified for SoftRater for Java in V3.13.

## NAMING UPDATES

- Get Absolute Value Step is now an Absolute Value step under Math Functions
- Get String Length Step is now a Get Length step under the String Functions
- Set String/Message Step is now a Set Message step under String Functions
- Arithmetic step is now available under Math Functions
- String Addition is now under String Functions

## ISSUE RESOLUTION

ORACLE Issue #	Product	Description
8822272	RateManager	<b>Impacted Area:</b> RateManager  <b>Issue Impact:</b> During P2P, automatic versioning on the target program (Program B in an A -> B P2P) would use the input values as they came to the source program (Program A in an A -> P2P). Changing the input value in the source program prior to the callout would have no effect.  <b>Resolved by:</b> Automatic versioning on the target program will now use the input values as they come to the target program. This will allow the source program to manipulate the input values used in automatic versioning in an effort to rate against different versions of the same target program.

ORACLE Issue #	Product	Description
8896541	RateManager	<p><b>Impacted Area:</b> RateManager</p> <p><b>Issue Impact:</b> A conflict was reported regarding permissions required by Insbridge to access the MachineKeys directory.</p> <p><b>Resolved by:</b> The security module was enhanced to access the MachineKeys directory using the user account the product was installed with instead of the service account.</p>

## KNOWN ISSUES for 3.13

Source	Product	Description
Internal	JBoss	<p><b>Impacted Area:</b> Installations or upgrades to environments set in IBSS.</p> <p><b>Issue Impact:</b> When a new environment is created or when an existing environment is updated, the JBoss service must be stopped and started in order for the additions or updates to be activated.</p>
