# PeopleSoft Enterprise Gradebook Preface

This preface discusses:

- PeopleSoft Products
- PeopleSoft application fundamentals.
- PeopleBook structure.

---

## PeopleSoft Products

This PeopleBook refers to the following PeopleSoft product: PeopleSoft Enterprise Gradebook.

---

## PeopleSoft Enterprise Campus Solutions Application Fundamentals

Additional, essential information describing the setup and design of your system appears in two companion volumes of documentation called *PeopleSoft Enterprise Campus Solutions 9.0 Application Fundamentals PeopleBook* and *PeopleSoft Enterprise Campus Community Fundamentals 9.0 PeopleBook*. Each PeopleSoft product line has its own version of this documentation.

See *PeopleSoft Enterprise Campus Community 9.0 Fundamentals PeopleBook*, "PeopleSoft Enterprise Campus Community Preface," *PeopleSoft Enterprise Campus Solutions Application Fundamentals*.

---

## PeopleBook Structure

PeopleSoft PeopleBooks follow a common structure. By understanding this structure, you can use this PeopleBook more efficiently.

The PeopleBooks structure conveys a task-based hierarchy of information. Each chapter describes a process that is required to set up or use the application. Chapter sections describe each task in the process. Subsections within a section describe a single step in the process task.

Some PeopleBooks may also be divided into parts. PeopleBook parts can group together similar implementation or business process chapters within an application or group together two or more applications that integrate into one overall business solution. When a book is divided into parts, each part is divided into chapters.

The following table provides the order and descriptions of chapters in a PeopleBook.

<b>Chapters</b>	<b>Description</b>
Preface	<p>This is the chapter you're reading now. It explains:</p> <ul style="list-style-type: none"> <li>• How to use the Application Fundamentals book.</li> <li>• How PeopleBooks are structured.</li> <li>• Common elements used in the PeopleBook, if necessary.</li> </ul>
Getting Started with...	<p>This chapter discusses product implementation guidelines. It explains:</p> <ul style="list-style-type: none"> <li>• The business processes documented within the book.</li> <li>• Integrations between the product and other products.</li> <li>• A high-level documentation to how our documentation maps to the overall implementation process; it doesn't offer step-by-step guidance on how to perform an actual implementation.</li> </ul>
Navigation	<p>(Optional) Some PeopleSoft applications provide adapted navigation pages that contain groupings of folders that support a specific business process, task, or user role. When an application contains adapted navigation pages, this chapter provides basic navigation information for these pages.</p> <p><b>Note.</b> Not all applications have delivered adapted navigation pages.</p>
Understanding...	<p>(Optional) This is an introductory chapter that broadly explains the product and the functionality within the product.</p>
Setup and Implementation	<p>This can be one or more chapters. These chapters contain documentation to assist you in setting up and implementing the product. For example, if functionality X is part of a product, this chapter would be devoted to explaining how to set up functionality X, not necessarily how to use functionality X. You would look to the corresponding business process chapter to learn how to use the functionality.</p> <p><b>Note.</b> There may be times when a small amount of business process information is included in a setup chapter if the amount of business process documentation was insufficient to create a separate section in the book.</p>

<b>Chapters</b>	<b>Description</b>
Business Process	<p>This can be one or more chapters. These chapters contain documentation that addresses specific business processes with each chapter generally devoted to a specific functional area. For example, if functionality X is part of a product, this chapter would be devoted to explain how the functionality works, not necessarily how to set up functionality X. You would look to the corresponding setup and implementation chapter to learn how to set up the functionality.</p> <p><b>Note.</b> There may be times when a small amount of setup and implementation information is included in a business process chapter if the amount of setup and implementation documentation was insufficient to create a separate chapter in the book.</p>
Appendixes	(Optional) If the book requires it, one or more appendixes might be included in the book. Appendixes contain information considered supplemental to the primary documentation.
Delivered Workflow Appendix	<p>(Optional) The delivered workflow appendix describes all of the workflows that are delivered for the application.</p> <p><b>Note.</b> Not all applications have delivered workflows.</p>
Reports Appendix	(Optional) This appendix contains an abbreviated list of all of the product's reports. The detailed documentation on the use of these reports is usually included in the related business process chapter.

---

## PeopleBooks and the Online PeopleSoft Library

A companion PeopleBook called PeopleBooks and the Online PeopleSoft Library contains general information, including:

- Understanding the PeopleSoft online library and related documentation.
- How to send PeopleSoft documentation comments and suggestions to Oracle.
- How to access hosted PeopleBooks, downloadable HTML PeopleBooks, and downloadable PDF PeopleBooks as well as documentation updates.
- Understanding PeopleBook structure.
- Typographical conventions and visual cues used in PeopleBooks.

- ISO country codes and currency codes.
- PeopleBooks that are common across multiple applications.
- Common elements used in PeopleBooks.
- Navigating the PeopleBooks interface and searching the PeopleSoft online library.
- Displaying and printing screen shots and graphics in PeopleBooks.
- How to manage the PeopleSoft online library including full-text searching and configuring a reverse proxy server.
- Understanding documentation integration and how to integrate customized documentation into the library.
- Glossary of useful PeopleSoft terms that are used in PeopleBooks.

You can find this companion PeopleBook in your PeopleSoft online library.

## Chapter 1

# Getting Started with Gradebook

This chapter provides an overview of PeopleSoft Gradebook and discusses:

- Gradebook business processes.
- Gradebook integrations.
- Gradebook implementation.

---

## Gradebook Overview

Gradebook helps you monitor class assignments and grades as well as facilitate communication between instructors and students.

With this application, you can:

- Set up and check class assignments and due dates.
- Enter and view grades.
- Enter and view instructor comments.

---

## Gradebook Business Processes

The following list outlines the Gradebook business processes:

- Class Assignments Entry
- Grade Entry
- Grade Export
- Assignment Review
- Grade Review

---

## Gradebook Integrations

The Gradebook integrates with the PeopleSoft Enterprise Student Records application.

Gradebook integration

---

## Gradebook Implementation

PeopleSoft Setup Manager enables you to generate a list of setup tasks for your organization based on the features that you are implementing. The setup tasks include the components that you must set up, listed in the order in which you must enter data into the component tables, and links to the corresponding PeopleBook documentation.

### ***Other Sources of Information***

In the planning phase of your implementation, take advantage of all PeopleSoft sources of information, including the installation guides, data models, business process maps, and troubleshooting guidelines.

### ***See Also***

## Chapter 2

# Using the Self-Service Gradebook

This chapter provides an overview of Gradebook and discusses how to:

- Review dates and grade calculations in Gradebook.
- Access Gradebook.
- Define assignment categories.
- Define Gradebook Uniform Resource Locators (URLs).
- Define course assignment defaults.
- Create class assignment data.
- Enter grades.
- Export grades.
- Review class assignments (students).

---

**Note.** PeopleSoft Enterprise Campus Solutions offers self-service applications that are licensed separately. Refer to the PeopleSoft Enterprise Campus Self Service PeopleBook for further information.

If you have licensed the Gradebook application, you can use the self-service pages that are discussed here

---

---

## Understanding Gradebook

This section discusses:

- Prerequisites.
- Common elements.
- Gradebook functions and users.

### Prerequisites

Before instructors and students can use the self-service Gradebook, a power user must:

- Understand the way that the system calculates grades in the Gradebook.

- Create assignment categories on the Gradebook Category page.

Assignment categories are high-level groups of assignments that an instructor might track (for example, homework, extra credit, quizzes, tests, midterms, finals, and so on). Instructors cannot set up assignment categories through the self-service application, although they can access the page through PeopleSoft Campus Portal or through regular database access if you grant them security. Traditionally, administrators, not instructors, set up assignment categories.

- Ensure that each instructor has appropriate grade roster access for the Gradebook classes.

This table explains the three levels of access:

<b>Grade Roster Access</b>	<b>Add and Delete Class Assignments</b>	<b>Modify Class Assignments</b>	<b>Enter Grades</b>	<b>Update Grades to Grade Roster</b>	<b>Set Grade Roster To</b>
<i>Grade</i>	No	Yes	Yes	Yes	Ready for Review
<i>Approve</i>	Yes	Yes	Yes	Yes	Approved
<i>Post</i>	Yes	Yes	Yes	Yes	Approved

See *PeopleSoft Enterprise Student Records 9.0 PeopleBook*, "Managing the Schedule of Classes," Defining Class Meeting Patterns.

- Ensure that each instructor and student who needs to use Gradebook has the appropriate security access.

See *PeopleSoft Enterprise Campus Solutions 9.0 Application Fundamentals PeopleBook*, "Establishing Terms and Sessions."

- Ensure that the instructors have activated the Gradebook information for their classes (by accessing the Class Assignments component and saving it) so that students who are enrolled in a class can access the Gradebook data.
- (Optional) Define your institution's Gradebook File Transfer Protocol (FTP) server and URL address so that if an instructor wants to export grades to a Microsoft Excel spreadsheet, the system has a temporary place for the file.
- (Optional) Set up class assignment defaults at the course catalog level on the Course Assignments - Assignments page, the Course Assignments - Category Weight page, and the Course Assignments - Grading Scale page.

Course assignment defaults are especially advantageous for classes that are always taught with the same curriculum because you set up the assignments once at the catalog level, and the system supplies the values to the class level when an instructor first accesses the Gradebook for his or her class. You can also use this component to specify assignments, such as a final examination, that are required by the institution.

## Common Elements Used in This Chapter

<b>Assessed</b>	Select to specify that the assignment can be graded. Any assignment can be assessed, whether or not it is set to <i>Required</i> . If you clear this check box, no grade input field appears on the Class Gradebook page or the Grade by Assignment page.
<b>Description</b>	Enter the description for the assignment, assignment category, or location.
<b>Grade</b>	Select a grade for each mark. Grade values are entered in your system as translate values and assigned to grade bases on the Grading Scheme Table page.
<b>Mark</b>	Select the minimum percentage for the grade that is earned. The system uses this value to calculate the final grade (which the instructor can override). Students must have a percentage that is equal to or greater than a specific mark to receive the corresponding grade. One grade value should have a blank mark value (such as a Fail grade). No duplicate marks are allowed.
<b>Maximum Points</b>	Enter the maximum points for the assignment. This value is used in all weighted average calculations. The student's grade for an assignment is Grade/Maximum Points.
<b>Required</b>	<p>Select to specify that this assignment is not optional but is required of all students unless it is overridden on a student-by-student basis. If you clear this check box, students are not penalized if they do not have a grade for this assignment. Instructors can use this check box to differentiate between required and optional, extra-credit assignments.</p> <hr/> <p><b>Note.</b> If a category has no required assignment, the category, including extra-credit assignments, is not calculated in the grade</p> <hr/>
<b>Required by Institution</b>	Select to specify that this assignment is an institutional requirement for the course. Assignments that have this check box selected appear by default on the class Assignments page and cannot be deleted by the instructor. The system limits instructor changes.
<b>Short Description</b>	Enter a short description of the assignment or assignment category.
<b>Weight% (weight percentage)</b>	Enter a weight percentage value for each assignment category. The total of all weight percentage values for a component must equal 100. This value determines how each assignment category contributes to the midterm and final (current) grades. If the total percentage is not 100, an error message appears.
<b>Weight in Points</b>	Enter the weight in points for the assignment. For example, if a quiz contributes its full points (on a one-to-one basis) toward the cumulative grade, enter the same value as the maximum points value. If the quiz counts double, double the maximum points value and enter the result as the weight in points value. The system populates this field with the value from the Maximum Points field.

## Gradebook Functions and Users

Gradebook is a collaborative, self-service application for instructors and students.

Instructors can use this application to set up class assignments and due dates, enter grades for individual assignments, submit midterm grades for deficiency reporting, communicate with students, and submit final grades.

Students can use this application to check their current assignments, view their grades, review personal comments from their instructor, and view their midterm and final grades.

Users can take advantage of Gradebook in these ways:

- Staff members can create assignment categories.
- Staff members can define Gradebook URLs.
- (Optional) Staff members can create course catalog assignment default values.
- Instructors can create class assignments.
- Instructors can enter, import, and update grades.
- Instructors can export grades to a local drive.
- Students can review class assignments and grades.

---

## Reviewing Dates and Grade Calculations in GradeBook

Gradebook allows for complicated grade calculations, but it also accommodates simple, straightforward averages. The simplest way to calculate grades is to have only one category and have the maximum points for each assignment equal the assignment weight. The result is a simple average.

Alternatively, you can define multiple assignments that are organized in different assignment categories (for example, homework assignments in the Homework category, quizzes in the Quiz category, and so on). That way each assignment can have its own maximum points and weight (in points), and the assignment category itself can have a specific percentage of the overall grade. For example, the assignments that make up the homework category overall can make up 25 percent of the final grade, and the Quiz category overall can make up 50 percent of the overall grade.

This section discusses how the system calculates grades.

### How the System Calculates Grades

The system calculates weighted grades for individual assignments like this:

$(\text{student's grade in points} \times \text{assignment weight}) \div \text{maximum grade in points for the assignment}$

The system calculates cumulative assignment category grades like this:

total of assignment weighted grades / total weight of assignments that count for the category (not including extra credit)

The system excludes ungraded assignments from the calculation until the due date. The system also excludes an assignment from the calculation if either of the following is true:

- The assignment is designated as optional, and the assignment has not been graded.
- The assignment, graded or ungraded, is excluded for specific students on the Class Gradebook page.

### **Calculation Examples**

A class grade is based on 30 percent homework, 30 percent tests, 30 percent class presentations, and 10 percent final examination.

Five homework assignments were given, each worth 10 points, and the weight of each is 10 points.

Three tests were given, each with a maximum of 100 points: The second test is weighted at 200 points, and the other two are weighted at 100 points.

One presentation was required: The maximum grade is 20 points, and the weight is the same. The final examination is one test, for 200 points and weighted at 200 points.

David's grades are:

- Homework: 8, 7, 9, 9, 8.
- Tests: 85, 93, 90.
- Presentation: 19.
- Final examination: 167.

- His homework grade is calculated as:

$$[(8 * 10 / 10) + (7 * 10 / 10) + (9 * 10 / 10) + (9 * 10 / 10) + (8 * 10 / 10)] / (10 + 10 + 10 + 10 + 10) = 41 / 50 = 82\%.$$

- His test grade is calculated as:

$$[(85 * 100 / 100) + (93 * 200 / 100) + (90 * 100 / 100)] / (100 + 200 + 100) = 361 / 400 = 90.25\%.$$

- His presentation grade is calculated as:

$$(19 * 20 / 20) / 20 = 95\%.$$

- His final examination grade is calculated as:

$$(167 * 200 / 200) / 200 = 83.5\%.$$

- His total grade is calculated as:

$$[(82 * 30 / 100) + (90.25 * 30 / 100) + (95 * 30 / 100) + (83.5 * 10 / 100)] / 100 = (24.6 + 27.075 + 28.5 + 8.35) / 100 = 88.53\%.$$

- If the system calculates the grade before the final is due, the final category is ignored:

$$[(82 * 30 / 100) + (90.25 * 30 / 100) + (95 * 30 / 100)] / 90 = (24.6 + 27.075 + 28.5) / 90 = 89.08\%.$$

## Grades Over Time

The previously mentioned grades reflect the grade at or toward the end of the class. Consider Lisa's grades for another class, on different dates:

Maximum grades are:

- Homework assignment: 10 points.
- Quiz: 100 points.
- Class presentation: 20 points.
- Final grade: 100 points.

For this example, the assignment weights equal the maximum points.

This class grade is also based on 30 percent homework, 30 percent tests, 30 percent class presentations, and 10 percent final examination.

<b>Assignment</b>	<b>Due Date</b>	<b>Grade</b>
Homework 1	February 11, 2001	10
Quiz 1	February 15, 2001	80
Homework 2	March 1, 2001	8
Class Presentation 1	March 5, 2001	20
Quiz 2	March 30, 2001	90
Class Presentation 2	April 10, 2001	0 (never submitted)
Quiz 3	April 15, 2001	85
Homework 3	April 30, 2001	7
Homework 4	May 1, 2001	9
Final	May 15, 2001	96

Assuming that all the assignments were graded on the due date:

On March 1, 2001, the assignments due include homework 1, homework 2, and quiz 1. The categories of *class presentations* and *final* do not count because no assignments for these categories are due:

- Homework grade:  $(10 / 10 / 10 + 8 / 10 / 10) / 20 = 90\%$ .
- Quiz grade:  $(80 / 100 / 100) / 100 = 80\%$ .
- Final grade:  $[90 / 30 / 100 + 80 / 30 / 100] / 60 = 85\%$ .

On April 30, 2001, the assignments due include homework 1, 2, and 3; quizzes 1 and 2; and class presentations 1 and 2. Class presentation 2 was never submitted, so after the due date, the grade is 0. The final grade for this date includes homework, quizzes, and class presentations:

- Homework:  $(10 * 10 / 10 + 8 * 10 / 10 + 7 * 10 / 10) / 30 = 83.33\%$ .
- Quizzes:  $(80 * 100 / 100 + 90 * 100 / 100 + 85 * 100 / 100) / 300 = 85\%$ .
- Class presentations:  $(20 * 20 / 20 + 0 * 20 / 20) / 40 = 50\%$ .
- Final:  $[83.33 * 30 / 100 + 85 * 30 / 100 + 50 * 30 / 100] / 90 = 72.78\%$ .

The final grade on May 15, 2001 includes homework 4 and the final grade:

- Homework:  $(10 * 10 / 10 + 8 * 10 / 10 + 7 * 10 / 10 + 9 * 10 / 10) / 40 = 85\%$ .
- Quizzes:  $(80 * 100 / 100 + 90 * 100 / 100 + 85 * 100 / 100) / 300 = 85\%$ .
- Class presentations:  $(20 * 20 / 20 + 0 * 20 / 20) / 40 = 50\%$ .
- Final:  $(96 * 100 / 100) / 100 = 96\%$ .

On May 15, 2001, the final grade will be:

$$[85 * 30/100 + 85 * 30/100 + 50 * 30/100 + 96 * 10/100] / 100 = 75.6\%.$$

An instructor can change an assignment due date for a specific student. The date that the system uses in the calculations is the student's assignment due date.

---

**Note.** When an instructor changes a due date for an assignment to a later date or adds an extended due date, the system assigns the later due date to the student record the next time the instructor accesses Gradebook.

---

The dates and grading for open entry and open exit classes work the same way, taking into account the student's own due dates.

---

## Accessing Gradebook

This section provides an overview of how Gradebook users access the system.

## Understanding How Gradebook Users Access the System

Gradebook has three primary users. This table lists these users and their possible modes of access:

<i>User</i>	<i>Component</i>	<i>Direct Menu Navigation</i>	<i>Gradebook Homepage</i>
Administrator	Gradebook Category	Yes	No
Administrator	URL Maintenance	Yes	No
Administrator	Course Assignments	Yes	No
Instructor	Access Gradebook	Yes	Yes
Instructor	Class Assignments	Yes	Yes
Student	View My Assignments	Yes	Yes

Administrators access the Gradebook Category page directly through the system's menu navigation to create high-level assignment categories that instructors can use to cluster their assignments (for example, homework, quizzes, tests, participation, and so on). This is setup data that you must create before instructors can use Gradebook.

The Gradebook Category page is not designed for self-service. In addition, administrators can, as an option, access the Course Assignments - Assignments page, the Course Assignments - Category Weight page, and the Course Assignments - Grading Scale page to set up course assignments at the catalog level. The system populates these pages to the class level by default. Finally, an administrator must define an FTP server and URL address if you want to enable instructors to export grades to a Microsoft Excel spreadsheet on their local drives.

Instructors access Gradebook to create assignments and enter grades. They can do this through:

- Faculty Center navigation.
- Gradebook menu navigation.

Students access Gradebook to review their assignments, due dates, and current grades. They can do this by:

- Using Student Center navigation (Gradebook icon).
- Navigating to Self Service, Enrollment, View My Assignments.

---

## Defining Assignment Categories

Before instructors can set up their Gradebook data, a power user must define assignment categories. Assignment categories are high-level groupings of assignments that an instructor might track (for example, homework, extra credit, quizzes, tests, midterm, final, and so on). Traditionally, administrators, not instructors, set up assignment categories.

This section discusses how to define assignment categories.

## Page Used to Define Assignment Categories

Page Name	Definition Name	Navigation	Usage
Gradebook Category	LAM_TYPE	Curriculum Management, Gradebook, Gradebook Category	Define assignment categories.

## Defining Assignment Categories

Access the Gradebook Category page (Curriculum Management, Gradebook, Gradebook Category).

Gradebook Category page

When you access the page, enter an alphanumeric assignment category (1 to 10 characters in length). Instructors cannot set up assignment categories through the self-service application, although they can access the page through PeopleSoft Campus Portal or through regular database access if you grant them authority.

**Effective Date** Enter an effective date for the assignment category. The assignment category must be active as of the course and class component effective date to which the assignment is attached.

**Status** Select a status for the assignment category. Values are:  
*Active:* Select when adding a new assignment category.  
*Inactive:* Select only if your institution no longer uses the assignment category. In particular, do not inactivate assignment category values that are assigned to ungraded class components. Doing so orphans Gradebook data.

## Defining Gradebook URLs

Instructors can export Gradebook data to their local drive. Gradebook provides an export utility. To use it, you must first define an FTP server and URL address for the extract file.

This section lists a prerequisite and discusses how to define an FTP server and URL address.

### See Also

[Chapter 2, "Using the Self-Service Gradebook," Exporting Grades, page 42](#)

## Prerequisite

Set up the FTP server and confirm its full FTP address.

## Page Used to Define Gradebook URLs

<i>Page Name</i>	<i>Definition Name</i>	<i>Navigation</i>	<i>Usage</i>
URL Maintenance	URL_TABLE	PeopleTools, Utilities, Administration, URLs, URL Maintenance	Define an FTP server and URL address.

## Defining an FTP Server and URL Address

Access the URL Maintenance page (PeopleTools, Utilities, Administration, URLs, URL Maintenance).

### URL Maintenance

**URL Identifier:** GRADEBOOK

**\*Description:**

**\*URL:**

**Comments:**

URL Maintenance page

**URL Identifier** (uniform resource locator identifier) Define this value in Add mode. Enter *GRADEBOOK* in uppercase letters, American English, for all versions.

**URL** (uniform resource locator) Enter the FTP location that your institution uses to store temporary file attachments. When the instructor clicks the Export button on the Class Gradebook page, the system exports the class grades to the server in csv format and prompts the instructor to save the file to his or her local directory (where the file can be launched in Microsoft Excel).

**Comments** Make notations and comments; these do not appear elsewhere.

### See Also

---

## Defining Course Assignment Defaults

Use the Course Assignments component to set up course assignments at the catalog level that the system populates to the class level. The values appear as defaults in the Class Assignments component (where the instructor can edit them) when the instructor first accesses the Gradebook component for his or her classes. You can use this component to specify course assignments that are required by the institution.

This section lists a prerequisite and discusses how to:

- Define default assignments for each course.
- Define default weight values for each class assignment category.
- Define default marks and grades for course grading schemes.

### Prerequisite

Create assignment categories on the Gradebook Category page.

### Pages Used to Define Course Assignment Defaults

<b>Page Name</b>	<b>Definition Name</b>	<b>Navigation</b>	<b>Usage</b>
Course Assignments - Assignments	LAM_CRSE_COMP	Curriculum Management, Gradebook, Define Course Assignments, Assignments	Define assignments that the system populates the Class Assignments page with.
Course Assignments - Category Weight	LAM_CRSE_TYPE_PER	Curriculum Management, Gradebook, Define Course Assignments, Category Weight	Define default weight percentage values for each class assignment category in a component.
Course Assignments - Grading Scale	LAM_CRSE_COMP_SCL	Curriculum Management, Gradebook, Define Course Assignments, Grading Scale	Define default marks and grades for course grading schemes.

## Defining Default Assignments

Access the Course Assignments - Assignments page (Curriculum Management, Gradebook, Define Course Assignments, Assignments).

Notes:

Course Assignments - Assignments page

- |                                   |   |
|-----------------------------------|---|
| <b>Effective Date</b>             | Enter an effective date for the course component default data. This date determines when the status that you select is valid.   |
| <b>Status</b>                     | Select a status for the course component default data. Select <i>Active</i> when adding a new course assignment. Select <i>Inactive</i> only if your institution no longer wants the system to supply this data by default. |
| <b>Course Component</b>           | Select the course component for this assignment.  |
| <b>Assignment Category</b>        | Select an assignment category for your first default course assignment. For example, select an assignment category of <i>HW</i> if you are going to create a homework assignment.   |
| <b>Include for Mid Term Grade</b> | Select if you want the assignment to count toward the cumulative midterm grade.   |

<b>Import Grades</b>	Select to define this assignment as an import target. If instructors select this check box, they can import grades from another class component into this assignment (almost as a placeholder). For example, because only one component can be graded, you can import the final grade from the ungraded laboratory component gradebook into an assignment for the graded lecture component. Oracle recommends that you assign the target assignment to its own assignment category. Also, when you select the Import Grades check box, the system populates the Maximum Points and Weight in Points fields with <i>100</i> and makes the Weight in Points field unavailable for entry.
<b>Number Days after Class Begins</b>	Enter the number of days after the student begins the class during which he or she must start the assignment. For regular classes, the system uses this value to calculate the assignment start date, adding the number of days to the class start date. For open entry and open exit classes, the system uses this value to calculate the assignment begin date for each student based on the student's start date. This value is visible (as a start date) to students for non-open entry and non-open exit classes through an Assignment link in the student gradebook.
<b>Duration</b>	Enter the number of days (including the begin date) that the student has to complete the assignment. For regular classes, the system uses this value in conjunction with the class begin date. For open entry/open exit classes, the system uses this value in conjunction with the student's start date to generate a due date. The due date is calculated as assignment start date, plus duration. For open entry/open exit classes, this date is based on the student's individually calculated start date. This value is visible (as an end date) to students for non-open entry/non-open exit classes through the Assignment link in the student gradebook.
<b>Estimated Grading Duration</b>	Enter the estimated grading duration to let students know when they can expect to see their grades for the assignment. The system uses this value in conjunction with the assignment start date to determine the date on which the student can expect to see his or her grade. This value is visible to students through the Assignment link in the student gradebook.
<b>Notes</b>	Enter any notes that the instructor might want to communicate to students about this assignment.

## Defining Default Weight Values

Access the Course Assignments - Category Weight page (Curriculum Management, Gradebook, Define Course Assignments, Category Weight).

Assignments		Category Weight		Grading Scale

Course Assignments - Grading Scale page

You must enter data only for the graded component.

- Course Component** Select the course component that you want the system to use as the default for the grading scale and grading basis information.
- Grading Scheme** Select the grading scheme that you want the system to use as the default for this component. You can create as many rows as you need to cover all grading scheme values for all components.
- Grading Basis** Select the grading basis that you want the system to use as the default for this component and grading scheme. You can create as many rows as you need to cover all grading basis values for all components.

## Creating Class Assignment Data

Instructors use the Class Assignment component to create, view, or edit their class assignments. They can create each assignment, including its assignment category, maximum points, and due date. Instructors can even define an extended due date for an assignment or specify whether a student sees the assignment grade when accessing the student's view of Gradebook. When accessing the Class Assignment component, the system prompts instructors with choices that help them identify the class that they want to edit.

To define class assignments:

1. Search and identify the class for which you want to create assignments.
2. Describe the class assignments and define the class assignments on the Assignments page.
3. Create weight values for each category on the Category Weight page.
4. Create grading scales for the class on the Grading Scale page.

This section lists prerequisites and discusses how to:

- Create, define and cluster assignments by category.
- Set weight values.
- Define marks and grades for grading schemes.

## Prerequisites

Verify that the following prerequisites are met before you create class assignment data:

- To define class assignments, instructors must have grade roster access of *Approve* or *Post* for the class.

---

**Note.** Instructors with *Grade* access can only enter grades and modify existing assignments.

---

- To select a class within a term, first create assignment categories on the Gradebook Category page.
- To set weight values, first define assignment categories.
- To define marks and grades for class grading schemes, first define grading schemes and grading bases.

## Pages Used to Create Class Assignment Data

Page Name	Definition Name	Navigation	Usage
Class Assignments	LAM_CLASS_ACTIVITY	<ul style="list-style-type: none"> <li>• Self Service, Faculty Center, Assignments</li> <li>• Self Service, Faculty Center, My Schedule</li> </ul> <p>Click the  icon next to a class on the My Schedule page.</p>	Create, define, and cluster assignments by category.
Category Weight	LAM_CLASS_TYPE_PER	Click the Category Weight link on the Class Assignments page.	Set weight values for each class assignment category.
Grading Scale	LAM_CLASS_GRD_SCL	Click the Grading Scale link on the Class Assignments page.	Define marks and grades for each class's grading schemes.

Notes:

SAVE

Assignments page (2 of 2)

**Note.** You cannot delete an assignment that is required by the institution or that has been graded.

### Copy Assignments

Click to copy the assignments from another class to the current class. You can copy assignments only from other classes that are taught by the instructor of the current class. The copied assignments add to, rather than replace, any existing assignments on the current class.

### Assignment Category

Select an assignment category for the class assignment. For example, select the user-defined assignment category *HW* (homework) to create a homework assignment.

### Include for Mid Term Grade

Select if you want the assignment to count toward the midterm grade, for midterm deficiency reporting purposes.

### Import Class Component Grades

Select to define this assignment as an import target. If instructors select this option, they can import grades from another class component into this assignment (almost as a placeholder). For example, because only one component can be graded, you can import the final grade from the ungraded laboratory component gradebook into an assignment for the graded lecture component. Oracle recommends that you assign the target assignment to its own assignment category. Also, when you select the Import Grades check box, the system populates the Maximum Points and Weight in Points fields with *100* and makes the Weight in Points field unavailable for entry.

<b>Allow Students to View Grades</b>	<p>Select if you want the system to display the student's grade for this assignment through the student gradebook view. Instructors may want to leave this check box cleared until they have entered grades for all students in a class. That way one student does not see an assignment grade before another student sees it.</p> <hr/> <p><b>Note.</b> If the instructor enters a grade, the system calculates it into the category average, midterm, or final grade, regardless of whether this check box is selected. If you do not select this check box, students see a course grade that is calculated differently than the grade that the instructor sees. The student's class grade does not include this hidden assignment, whereas the instructor's view includes all grades.</p> <hr/>
<b>Begin Date</b>	For non-open entry/non-open exit classes, enter the date that the assignment begins (such as when a thesis paper is assigned) or the date of the assignment (such as the date of an exam). This date is visible to students through the student gradebook.
<b>Due Date</b>	<p>For non-open entry/non-open exit classes, enter the date when the assignment is due. This date is visible to students through the student gradebook. Grades are calculated into the cumulative grade as soon as they are entered. Ungraded assignments will not affect the cumulative grade until the system date is equal to or greater than the due date.</p> <p>This field is neither required nor available for entry for open entry/open exit classes.</p>
<b>Extended Due Date</b>	For non-open entry/non-open exit classes, enter the extended due date for this assignment if and when the instructor decides to extend the due date for the class. This value is also visible to students through the student gradebook.
<b>Estimated Grading Date</b>	For non-open entry/non-open exit classes, enter the estimated grading date to let students know when they can expect to see their grades for the assignment. This value is visible to students through the student gradebook.
<b>Number Days after Class Begins</b>	For open entry/open exit classes, enter the number of days after the student begins the class during which they must start the assignment. The system uses this value in conjunction with the student's start date.
<b>Duration</b>	For open entry/open exit classes, enter the number of days (including the begin date) that the student has to complete the assignment. The system uses this value (in conjunction with the student's begin date) to dynamically generate a due date.
<b>Notes</b>	Enter any notes that the instructor might want to communicate to students about this assignment.

## Setting Weight Values

Grading Scale page

**Note.** If no assignments, category weights, or grading scales exist, the system populates the fields for those items with the values on the Course Assignments - Grading Scale page. Also, the system creates grading scheme and grading scale records to match the grading scheme and grading scale on the Class Association page, in conjunction with any values at the course level. If the grading basis is optional, the system creates grading basis records to match the linked grading bases.

<b>Copy Grade Scale</b>	Click to copy the grade scale information from another class to which the instructor is assigned. The system overwrites existing grade scale values with the copied grade scale values.
<b>Grading Scheme</b>	The system populates this field with the course's grading scheme (as assigned on the Course Assignments - Grading Scale page). If no values are on the Grading Scale page, the system populates this field with the default grading scheme for the career of the course. You can modify or add values. Do not delete the grading scheme values that are associated with students in your class, because this prevents the percentage grades from mapping to corresponding letter (or pass/no pass) grades. In cases in which your institution uses the grading basis remapping feature, you might need to enter grade scales that are linked to grading schemes that are not normally associated with this class.
<b>Grading Basis</b>	The system populates this field with the course's grading basis (as defined on the Course Assignments - Grading Scale page). You can modify or add values. If no values are on the Grading Scale page, the system populates this field with the grading basis on the Class Associations page. Do not delete the grading basis values that are associated with students in your class, because this would prevent the percentage grades from mapping to corresponding letter or pass/no pass grades. In cases in which your institution uses the grading basis remapping feature, you might need to enter grading bases that are not normally associated with this class.

---

## Entering Grades

This section provides an overview of the grade entering process, lists prerequisites, and discusses how to:

- Enter points for assignments.
- Enter assignment notes for students.
- Enter grades by assignment.
- Review cumulative grades and post grades.
- Enter Gradebook notes for students.
- Enter requirement designation grades.
- Import component grades.
- Select the class from which to import grades.
- View the results of the class search.
- View further details about a class search.

## Understanding the Grade Entering Process

After an instructor creates assignments and reviews the student assignments, the instructor can enter grades for the student assignments. The instructor can exclude specific student assignments from calculation if he or she chooses. The instructor can also enter notes or comments about each student, override midterm and final grades, update the midterm grades to the roster for deficiency analysis and reporting, or send final grades to the grade roster for official posting.

To enter, import, and update grades:

1. Search and identify the class for which you want to enter grades.
2. Enter individual assignment grades (in numeric format) on the Class Gradebook page or the Grade by Assignment page.
3. Override midterm or final grades on the Cumulative Grades page (leave blank to use the system-generated values).
4. (Optional) Click the Notes link on the Cumulative Grades page to write private instructor comments for each student.
5. Enter requirement designation grades, if applicable, on the Requirement Designation page.
6. Import grades from other component assignments on the Import Component Grades page.
7. Click the Update button on the Cumulative Grades page to update midterm or final grades to the official grade roster.

---

**Note.** Grades are calculated into the cumulative grade as soon as they are entered. Ungraded assignments will not affect the cumulative grade until the system date is equal to or greater than the due date.

---

## Prerequisites

Before the instructor can enter, import, update, or export grades:

- The instructor must be assigned to teach a class for the term, and he or she must have a grade roster access of *Grade*, *Approve*, or *Post*.
- Instructors must define class assignments.
- A system administrator must define the GRADEBOOK URL for your FTP server.

## Pages Used to Enter, Import, Update, and View Grades

<i>Page Name</i>	<i>Definition Name</i>	<i>Navigation</i>	<i>Usage</i>
Class Gradebook	LAM_CLASS_GRADES	<ul style="list-style-type: none"> <li>Self Service, Faculty Center, Gradebook</li> <li>Self Service, Faculty Center, My Schedule</li> </ul> <p>Click the  icon next to a class on the My Schedule page.</p>	Enter assignment points and exclude assignments from cumulative grades.
Assignment Note	SSR_ASSIGN_NOTE	Click the Note link on the Class Gradebook page.	<p>Enter comments about an assignment.</p> <p>Students can view the comments by clicking the Assignment Note link on the View Assignments and Grades page.</p>
Grade by Assignment	LAM_CLASS_GRD_DATE	Click the Grade by Assignment link on the Gradebook page.	Enter grades for each student by assignment. Exclude grades from calculation. Edit the due date and date submitted values on a student-by-student basis.
Cumulative Grades	LAM_CLAS_GRADE_TOT	Click the Cumulative Grades link on the Gradebook page.	View the cumulative grades for each assignment category. View or edit the generated midterm and current grades. Update midterm and final grades. Send grades to the roster for posting.
Gradebook Notes	LAM_GRADE_NOTE	Click the Note link on the Cumulative Grades page.	Enter notes about the student and communicate information that the student can view on the Instructor Comments page.
Requirement Designation	LAM_CLAS_GRD_REQ_D	Click the Requirement Designation link on the Gradebook page.	Enter requirement designation grades.

<b>Page Name</b>	<b>Definition Name</b>	<b>Navigation</b>	<b>Usage</b>
Import Component Grades	LAM_CLASS_COPY_GRD	Click the Import Component Grades link on the Gradebook page.	Import grades from an ungraded component into an assignment in the graded component. The Import Grades feature is particularly useful for multiple component classes that have only one graded component, but the instructor wants grades from all components to contribute to gradebook calculations for the final class grades.
Import Component Grades - class search	SSR_CLSRCH_ENTRY	Click the Import Grades button on the Import Component Grades page.	Select the class from which you want to import grades.
Import Component Grades - class search results	SSR_CLSRCH_RSLT	Click the Search button on the Import Component Grades - class search page.	View the results of your class search.
Import Component Grades - Class Details	SSR_CLSRCH_DTL	Click the Section link on the Import Component Grades - class search results page.	View further details about a class.

### Grade by Assignment page

**Select Assignment** Enter the assignment for which you want to record the assignment submission date or grade. This refreshes the page.

**Submitted Dt** (submitted date) Enter the date on which the student submitted the assignment. The system populates this field with the date on which you enter a grade. You can change this value. The submitted date appears in the Date Rec'd (date received) field on the Student Assignment Dates page.

**Due Date** Enter the due date of the assignment. The system populates this field with the due date that the instructor sets up on the Assignments page. If the instructor defines an extended due date on the Assignments page, the system displays that value. If the due date or extended due date is greater than the student due date, the system displays the latest of the three dates.

**Grade** Enter the points that the student earns for the assignment.

<b>(Exclude Grade)</b>	A column of check boxes appears for each assignment that has the Assessed check box selected on the Assignments page. Select this check box to exclude a particular assignment grade from all cumulative grades (including assignment averages).
<b>Last Updated</b>	Displays the date and time when a user last modified any of the following fields copied from another assignment through an import: Submit Date,Grade,Exclude Grade,Grade(s).
<b>Class Assignments</b>	Click this link to access the Class Assignments - Assignments page, where you can view or edit the class assignment. This is helpful if you forget the point range or some other piece of information about an assignment. If you make changes on the Assignments page through this link, the system does not display them on the gradebook unless you leave and reenter the component.

## Reviewing Cumulative Grades and Posting Grades

Access the Cumulative Grades page (click the Cumulative Grades link on the Gradebook page).

Cumulative Grades page

- Select Grade Roster

If you are preparing to update midterm or current (final) grades, select the target grade roster.
- Grading Status

After you select the grade roster, the grading status of the roster appears.

<b>Update</b>	<p>Click to send the midterm or current (final) grades to the grade roster. When you click this button, it does not post student grades for the course.</p> <hr/> <p><b>Note.</b> If you click the Update button and a Current Grade value is missing for a student, the system presents you with a warning that grades have not been assigned for all students. You can cancel to go back and enter any missing grades, or you can proceed with the update. The update will set the grade roster to a status of <i>Partial Post</i>.</p> <p>Conversely, if you click the Update button and all current grades are complete, the system sets the grade roster approval status value according to the instructor's access (as defined on the Meetings page). If the instructor's access is <i>Graded</i>, the system sets the approval status to <i>Ready to Review</i>. If the instructor's access is <i>Approve</i> or <i>Post</i>, the system sets the approval status to <i>Approved</i>.</p> <hr/>
<b>Next&gt;and&lt;Previous</b>	Click to view the next or previous cumulative category grades. This button acts as a horizontal scroll bar.
<b>Mid Term/Override</b>	Enter a value in this field if you want to override the midterm grade that the system calculates. If you leave this field blank, the system-generated grade is sent to the grade roster when you click the Update button (with a target roster of Mid Term).
<b>Current Grade/Override</b>	Enter a value if you want to override the current grade that the system calculates. If you leave this field blank, the system-generated current grade is sent to the grade roster as the final grade when you click the Update button (with target roster of Final).
<b>Note</b>	Click to access the Gradebook Notes page, where you can enter notes for each student. Optionally, the student can be permitted to view notes through the student gradebook. Only the specific student for whom the note is written can see the note.

## Entering Gradebook Notes for Students

Access the Gradebook Notes page (click the Note link on the Cumulative Grades page).

### Requirement Designation page

If the class does not have a requirement designation that requires a separate grade, the fields on this page are unavailable for entry.

**Current Grade** Displays the current grade for each student. At the end of the class, this is the student's final grade.

**Designation** The system displays the code for the requirement designation that the student is attempting.

**RD Option**(requirement designation option) Displays whether the student is attempting the requirement designation. The value that appears for students attempting the requirement designation is *Yes*. Otherwise, no information appears.

**RD Grade** (requirement designation grade) If the requirement designation requires a separate grade, select a grade of *Satisfied* or *Not Satisfy*. If a separate grade is not required for this requirement designation, this field is unavailable for entry. If no separate grade is required, the system determines whether the requirement designation is satisfied or not satisfied based on whether the student earns credit for the class. If the student receives a final grade that earns credit, the requirement designation is satisfied. If the student does not earn credit for the class, the requirement designation is not satisfied.

**Import Grades**

Use this feature to import the final grades from a non-graded class component. First, select an assignment which will receive the grades, then click 'Import Grades' to select the class component.

Select Assignment:  

[import grades](#)

[REFRESH](#)
[SAVE](#)

Import Component Grades page

### Select Assignment

Select the assignment that will receive the grade import. You must set up this assignment in advance of the import, and the assignment must have the Import Class Component Grades check box selected on the Assignments page.

### Import Grades

Click to access the Import Component Grades - Basic Class Search page, where you can select the class component from which you want to import grades. Only classes from the current term for which you are one of the instructors are available. When you import the final grades, the system converts the grade percent into points (the maximum of which is 100) and displays the result in the target assignment on the Class Gradebook page and the Grade by Assignment page. You can edit the grades after you import them.

## Selecting the Class from Which to Import Grades

Access the Import Component Grades - class search page (click the Search tab in the Faculty Center).

#### Import Component Grades - class detail page

Click the Select Class button to select the class and enter the assignment grade for students who exist in both classes. You can repeat this process and import from different classes if you have one large lecture section with multiple laboratories or discussions.

---

## Exporting Grades

Instructors can export class grades to a temporary location, such as their C drives. Instructors can export grades as many times as needed.

To export grades:

1. Click the Export button on the Class Gradebook page.
2. Wait for the export process to finish.
3. If your browser prompts you with the option to open the file from its present location or to save it to your local computer's hard drive, choose the latter.
4. Specify the location on your directory where you want the system to place your class gradebook csv file, and detach the file.
5. Launch your spreadsheet program (for example, Microsoft Excel).
6. Navigate to the directory that you specified, locate your csv file, and launch it.
7. Use the csv file to view or manipulate data locally, or save the file as a Microsoft Excel file and use it for your manipulations.

## Prerequisite

Before you can export grades, you must define an FTP URL address for your system on the URL Maintenance page.

## Reviewing Class Assignments (Students)

If an instructor sets up a class for Gradebook, students in the class can access information about the class and their progress-to-date through the student gradebook, which is available through the Student Center. Students can also access this information by clicking the View My Assignments link in the Enrollment menu.

This section lists prerequisites and discusses how students can:

- View summary information about assignments and grades.
- View assignments in detail.
- View total points for each category.

- View the class grade scale.
- View instructor comments.
- View student assignment dates.

## Prerequisites

Before a student can use the gradebook pages:

- The student must be enrolled in a class that has gradebook data.
- The instructor must have activated gradebook information for the class.

The instructor does this by accessing and saving the Class Assignments component.

## Pages Used to Review Class Assignments

<i>Page Name</i>	<i>Definition Name</i>	<i>Navigation</i>	<i>Usage</i>
View Assignments and Grades	LAM_STDNT_GRADES	<ul style="list-style-type: none"> <li>• Self Service, Enrollment, View My Assignments, and select the term and class.</li> <li>• Self Service, Student Center, and click  beside the relevant class.</li> </ul>	Students can view summary information about class assignments and cumulative grades and link to other pages to view more detail.
Assignment Details	LAM_STDNT_CLAS_ACT	Click the link for an assignment in the Assignment column on the View Assignments and Grades page.	Students can view each assignment in detail.
Assignment Note	SSR_STDNT_ASIGNNOTE	Click the Assignment Note link on the View Assignments and Grades page.	Students can view instructor comments about an assignment.
Assignment Categories	LAM_STDNT_CATEGORY	Click the Assignment Category link on the View Assignments and Grades page.	Students can view total points for each category.
Class Grade Scale	LAM_STDNT_GRAD_SCL	Click the Grade Scale link on the View Assignments and Grades page.	Students can view their class grade scale.

Page Name	Definition Name	Navigation	Usage
Instructor Comments	LAM_STDNT_GRD_NOTE	Click the Instructor Comments link on the View Assignments and Grades page.	Students can view notes from their instructor.
Student Assignment Dates	LAM_STDNT_DATES	Click the Student Assignment Dates link on the View Assignments and Grades page.	Students can view due dates and grades for each assignment.

## Viewing Summary Information About Assignments and Grades

Students can click the View My Assignment link from the Enrollment menu or click the Gradebook icon beside the class in the Student Center to access the View Assignments and Grades page and view assignment details and summary information about their cumulative grades, and link to other pages for more detail.

Access the View Assignments and Grades page (Self Service, Enrollment, View My Assignments).

---

**Note.** Class assignment data remains accessible to students even after the term ends.

---

### Current Mid Term Grade

Displays the student's current midterm grade, including the weighted points and letter grade to date. Only assignments for which the Include for Mid Term Grade check box is selected contribute to this percentage.

<b>Current Overall Grade</b>	Displays the student's current overall grade, including the points and letter grade to date for all assignments that have grades to date. All assignments (except those that are specifically excluded or not yet due) contribute to this percentage.
<b>Begin Date</b>	Displays the start date of the assignment. Typically, this is the date of the activity or the date that the instructor assigns the assignment.
<b>Due Date</b>	Displays the date that the assignment is due. The system includes all grades that were entered by this date in the cumulative grades. If the due date or extended due date is less than or equal to the system date, a missing grade counts as 0.
<b>Assignment</b>	Displays a description of the assignment, as entered by the instructor. Students can click an Assignment link to access the Assignment Details page, where they can review each assignment in detail.
<b>Category</b>	Displays the category of the assignment, as defined by the instructor.
<b>Grade</b>	Displays the points that the student earns for the assignment. <hr/> <b>Note.</b> If an instructor has dropped a grade from the calculation, it will appear in the Assignment Notes section. <hr/>
<b>Out of</b>	Displays the maximum points that the assignment is worth.
<b>Assignment Note</b>	Click a link in this column to view instructor notes about a particular assignment.
<b>Other Information</b>	Displays specific information about an assignment.
<b>Assignment Category, Grade Scale Instructor Comments, and Student Assignment Dates</b>	Click any link to access the page where you can view information about the linked topic.
<b>Select Another Class</b>	Click to access the View Assignments and Grades page, where you can select a different class to view.
<b>View My Class Schedule</b>	Click this link to view the student's schedule for the term.

## Viewing Assignments in Detail
