Primavera P6™ Tested Configurations
Release Version: 6.2.1
Date: March 2010
Revision: 6.2.1.0.7

This document lists the configurations that have been tested for the Primavera P6 version 6.2.1 release.

Notes:
- The P6 product suite is supported on VMware.
- In general, the P6 product suite is compatible with configurations supported by third party vendors.
- For information on tested configurations for Contract Manager, see the *Contract Manager Tested Configurations* document (testedcfg.htm in the root folder of the Contract Manager physical media or download).
- For information on tested configurations for the Primavera Integration API, see the *Primavera Integration API Administrator's Guide* (\Integration\API\docs\setup.pdf of the P6 physical media or download).
- Except where noted, all configurations were tested with English as the operating system locale and input language.
