

## Accessing Sun Documentation Online

A broad selection of Sun system documentation is located at:

<http://www.sun.com/products-n-solutions/hardware/docs>

A complete set of Solaris documentation and many other titles are located at:

<http://docs.sun.com>

## Sun Welcomes Your Comments

Sun is interested in improving its documentation and welcomes your comments and suggestions. You can email your comments to Sun at:

[docfeedback@sun.com](mailto:docfeedback@sun.com)

Please include the part number (806-1403-10) of the document in the subject line of your email.

---

This doclette provides instructions for installing a Sun Fire Link fiber optic cable.

Complete documentation for the Sun Fire Link interconnect product is available in two formats:

- In a printed version, which you can order (part number, X4190A)
- In Adobe Acrobat Exchange (.pdf) format on the Sun Fire Link CD. The CD ships with:
  - The Sun Fire Link assembly (Sun Fire 6800 system)
  - The Sun Fire Link assembly (Sun Fire 15K/12K system)

To read the documentation online, use the CD-ROM drive on the workstation that serves as your administration station.

## Fire Link Optical Cable

Details:

- Cables are available in 5-meter, 12-meter, and 20-meter lengths.
- Each cable has two connectors at each end. The white connector is on the transmit cable, and the black connector is on the receive cable.
- Each cable is labeled with a serial number that aids in cable route tracing.
- The cable connectors have a ridge on one side that indicates proper alignment of the cable with the connector.
- The connectors make a distinct clicking sound when fully inserted.
- Cable changes can be made while the system is operational.
- Changes should be made consistent with the software intended to manage and validate these changes.

Protect the cables by:

- Keeping dust caps in place whenever cables are not connected
- Maintaining a minimum bend radius of at least 30 millimeters (1.2 inches)

---

## Installing Fire Link Optical Cables

These instructions are for use by trained service representatives who have been trained on Sun Fire Link interconnect hardware and who have previously installed a Sun Fire Link cable in the field. They are not complete instructions; they lack illustrations and precautions.

---

**Note** – These instructions are intended only as a reminder for those who have previous experience with this procedure. See the *Sun Fire Link Installation Guide* for more detailed instructions including illustrations.

---

Optical cables can be added to the system while the system is operating.

- ♦ **Install cables. (The black connector is receive and the white connector is transmit.) Make sure to follow the cabling patterns you planned for your system in Appendix A of the *Sun Fire™ Link Hardware Installation Guide*.**

Make sure to insert the cable connector all the way in until you hear a clicking sound.
