This document contains important information about the SunSAI/P board and device driver.

Note – For access to the Sun bug report database, and for information on how to get the latest patches and patch revisions, please visit the SunSolve website at <http://sunsolve.sun.com>.

SAI/P Update 2 Software

Sun uses a method of pre-patching a package for an update release. This allows for package updating without requiring a new patch to support it. The SAI/P 2.0 packages require Patch Number 106955-06, which is already applied. The SAI/P 3.0 Solaris 8 package requires Patch Number 109338-06, which is already applied. The new patch created for Solaris 9 support is also included in the new package.

Adapters will run with a default configuration. To change options or to configure new adapters, use the **saipconfig** utility.

You can find the utility in the following location:

```
/etc/opt/SUNWconn/saip/bin/saipconfig
```

To fully utilize the **sitty** and **spm** utilities add **/opt/SUNWconn/bin** to your PATH. Similarly, to fully utilize the included man pages for this driver and its utilities add **/opt/SUNWconn/man** to your MANPATH.

Note – When removing or adding any SAI/P interface boards, run the **/etc/opt/SUNWconn/saip/bin/saipconfig** script to clean up the device entry tables and devices.
