This software and related documentation are provided under a license agreement containing restrictions on use and disclosure and are protected by intellectual property laws. Except as expressly permitted in your license agreement or allowed by law, you may not use, copy, reproduce, translate, broadcast, modify, license, transmit, distribute, exhibit, perform, publish, or display any part, in any form, or by any means. Reverse engineering, disassembly, or decompilation of this software, unless required by law for interoperability, is prohibited.

The information contained herein is subject to change without notice and is not warranted to be error-free. If you find any errors, please report them to us in writing.

If this software or related documentation is delivered to the U.S. Government or anyone licensing it on behalf of the U.S. Government, the following notice is applicable:

U.S. GOVERNMENT RIGHTS

Programs, software, databases, and related documentation and technical data delivered to U.S. Government customers are "commercial computer software" or "commercial technical data" pursuant to the applicable Federal Acquisition Regulation and agency-specific supplemental regulations. As such, the use, duplication, disclosure, modification, and adaptation shall be subject to the restrictions and license terms set forth in the applicable Government contract, and, to the extent applicable by the terms of the Government contract, the additional rights set forth in FAR 52.227-19, Commercial Computer Software License (December 2007). Oracle USA, Inc., 500 Oracle Parkway, Redwood City, CA 94065.

This software is developed for general use in a variety of information management applications. It is not developed or intended for use in any inherently dangerous applications, including applications that may create a risk of personal injury. If you use this software in dangerous applications, then you shall be responsible to take all appropriate fail-safe, backup, redundancy, and other measures to ensure the safe use of this software. Oracle Corporation and its affiliates disclaim any liability for any damages caused by use of this software in dangerous applications.

Oracle is a registered trademark of Oracle Corporation and/or its affiliates. Other names may be trademarks of their respective owners.

This software and documentation may provide access to or information on content, products, and services from third parties. Oracle Corporation and its affiliates are not responsible for and expressly disclaim all warranties of any kind with respect to third-party content, products, and services. Oracle Corporation and its affiliates will not be responsible for any loss, costs, or damages incurred due to your access to or use of third-party content, products, or services.

Where an Oracle offering includes third party content or software, we may be required to include related notices. For information on third party notices and the software and related documentation in connection with which they need to be included, please contact the attorney from the Development and Strategic Initiatives Legal Group that supports the development team for the Oracle offering. Contact information can be found on the Attorney Contact Chart.

The information contained in this document is for informational sharing purposes only and should be considered in your capacity as a customer advisory board member or pursuant to your beta trial agreement only. It is not a commitment to deliver any material, code, or functionality, and should not be relied upon in making purchasing decisions. The development, release, and timing of any features or functionality described in this document remains at the sole discretion of Oracle.

This document in any form, software or printed matter, contains proprietary information that is the exclusive property of Oracle. Your access to and use of this confidential material is subject to the terms and conditions of your Oracle Software License and Service Agreement, which has been executed and with which you agree to comply. This document and information contained herein may not be disclosed, copied, reproduced, or distributed to anyone outside Oracle without prior written consent of Oracle. This document is not part of your license agreement nor can it be incorporated into any contractual agreement with Oracle or its subsidiaries or affiliates.

Oracle Insurance Policy Administration

Oracle Insurance Policy Administration (OIPA) is a next-generation, flexible, rules-based insurance solution for life and annuities that supports policy processing across multiple lines of business. OIPA greatly enhances ease of use and speed for business analysts, actuaries and others involved in the product configuration process. Robust navigation also makes it easy for users, including CSRs, to locate policy information and drill down into a granular level of customer detail. This allows insurers to respond more rapidly to customer inquiries, reduce call times and improve customer service.

These release notes contain the enhancements that were made to OIPA maintenance release 9.3.1.0, 2011.

Customer Support

If you have any questions about the installation or use of our products, please visit the My Oracle Support website: <https://support.oracle.com>, or call (800) 223-1711.

Oracle Insurance Policy Administration

This section describes configuration, features and technology specific enhancements for maintenance release 9.3.1.0.

Configuration New Features

- The DeliveryRequirements business rule was enhanced to support the new attribute NewActivityDate. This allows OIPA to accept a configured date value from fields or math variables that will be used as the effective date once all the requirements are satisfied. In previous releases, the effective date was always set to the system date (or last requirement CloseDate) by the DeliveryRequirements rule.

Application New Features

- Support was added for an Identifier field type that can be added to a screen in OIPA. This new feature allows a configurator to build a unique identification ID from characters or numbers, which can be incremented. The ID is automatically generated when a new policy is first saved.
- Support was added for OptionText and OptionTextFlag in AsFile Web Service.

- MultiValueFields can now be inserted through the AsFile Web Service.

Technology Specific Enhancements

- Cycle now processes pre-Company activities.
- New extension points have been created at the Activity.prepareActivityChanges life cycle step in the following kinds of activities.

	Point	variables
PolicyFinancial	Activity.ProcessActivityChanges	Activity
NuvPendingPolicyFinancial	Activity.ProcessActivityChanges	Activity
ClientFinancial	Activity.ProcessActivityChanges	Activity
PlanFinancial	Activity.ProcessPlanActivityChanges	Activity, Transaction
ClientDocument	Activity.ProcessDocumentActivityChanges	Activity
PlanDocument	Activity.ProcessDocumentActivityChanges	Activity
PolicyDocument	Activity.ProcessDocumentActivityChanges	Activity

New Extension Points

Certification Details

The OIPA application is certified against the following stacks:

Microsoft SQL Server

- Database Version: Microsoft SQL Server 2005 9.0.4035
- Application Server: WebSphere 6.1.0.31
- Application Server Operation System: Windows 2003
- Database Operation System: 32-bit Windows 2003 R2
- JDK: 1.5.17
- Internet Explorer Version: IE6, IE7

DB2

- Database Version: DB2 9.1.0.3, Fix Pack 3
- Application Server: WebSphere 6.1.0.31
- Application Server Operation System: Oracle Enterprise Linux 5.3
- Database Operation System: 64-bit Oracle Enterprise Linux 5.4
- JDK: 1.5.17
- Internet Explorer Version: IE6, IE7

Oracle

- Database Version: Oracle 11g 11.1.0.6.0
- Application Server: WebSphere 6.1.0.31, WebLogic 10.3.1.0
- Application Server Operation System: Oracle Enterprise Linux 5.3 for both WebSphere and WebLogic

- Database Operation System: 64-bit Solaris 10, SunOS 5.10 (WebSphere) and Solaris 10 (WebLogic)
- JDK: 1.5.17 for both WebSphere and WebLogic
- Internet Explorer Version: IE6, IE7 for both WebSphere and WebLogic
