

# Oracle AutoVue Desktop Version

## ActiveX - Feature Matrix

### Version 20.0.1, Windows Platforms

For organizations to bring successful products to market, geographically dispersed teams and external partners and customers must be able to effectively collaborate on technical documents without compromising security or precision. Oracle's AutoVue Enterprise Visualization solutions help organizations streamline technical document collaboration across the enterprise to improve productivity, reduce errors, and accelerate innovation and time to market. This document lists the features supported by the ActiveX components of the AutoVue Desktop Version family of products on the Windows platform.

# ActiveX - Feature Matrix

The following tables list the available ActiveX features of the Oracle AutoVue Desktop Version product family on the Windows platform. The tables are organized by the following features: general features, 2-D specific features, EDA specific features, 3-D specific features, and markup features.

Note that several of the following features are supported only if the file that is being viewed in AutoVue contains relevant information.
