Preface

This document describes issues that you may encounter with this release. Internal Tracking numbers that appear in the tables are used to identify issues reported by customers. You can use these numbers to identify the issue should you need to contact Oracle Support. Locator numbers that appear in parentheses after some notes are for Oracle internal use only.

Chapter 1: What's New in This Release

This chapter contains information on new product features for Release 6.0.0.4.0 of Oracle Agile Product Lifecycle Management for Process.

What's New in This Release?

There are no new features in this release.

Chapter 2: Resolved Issues

This chapter contains resolved issues for Release 6.0.0.4.0 of Oracle Agile Product Lifecycle Management for Process.

Resolved Issues

The following tables outline known issues that have been resolved for Release 6.0.0.4.0 of Oracle Agile Product Lifecycle Management for Process.

General Resolved Issues

Table: 2-1 General Resolved Issues

Bug/Enh ID	Issue	Resolution
10271093	Internal Tracking # 18147 Extended attributes and custom section grids do not handle special characters.	Special characters are now allowed.
None	Internal Tracking # 18915 A previous change added the opt virtual directory but a required subdirectory was not created.	The opt/GSMExtensions virtual directory was added.
11776137	Internal Tracking # 19145 This change replaced the outdated navigation section in the brand.css configuration file with new branding elements.	
None	Internal Tracking # 19507 Timeout during cache load causes a partial cache load.	Cache now loads after applications have been loaded, and the timeout no longer occurs.
None	Internal Tracking # 19809 Searches are returning information that should not be accessible to the user.	SCRM business unit security has been added to some searches and is now respected.

ADMN (Data Administration) Resolved Issues

Table: 2-2 ADMN Resolved Issues

Bug/Enh ID	Issue	Resolution
9703044	Internal Tracking # 17775 Once a user deletes a custom section row, the user receives an error message for any future adding of a row in that custom section. This occurred because the ID for the new row was numbered incorrectly in the unique ID.	The error no longer occurs.
10415443	Internal Tracking # 18366 The IU and kcal UOMs within an extended attribute did not belong to a Category and were unable to be selected within the extended attribute.	The following categories were added: Energy – cal, kcal, KJ IU – IU RE – RE
11826788	Internal Tracking # 19623 For a formulation specification, data is missing in a denormalization custom section.	Data is now refreshed correctly, and all custom section data is intact.
None	Internal Tracking # 19786 The custom section row counter returns a Unique ID error when the user attempts to copy a row after deleting a row.	The error no longer occurs.

CACS (Computer Aided Compliance Screening) Resolved Issues

None

CSS (Content Synchronization and Syndication) Resolved Issues

Table: 2-3 CSS Resolved Issues

Bug/Enh ID	Issue	Resolution
10390310	Internal Tracking # 19199 CSS does not allow ':' colon characters in custom section row names.	Special characters are now accepted.
None	Internal Tracking # 19731 CSS syndication service returns an exception error.	The error no longer occurs.

DRL (Document Reference Library) Resolved Issues

None

EQ (eQuestionnaire) Resolved Issues

Table: 2-4 EQ Resolved Issues

Bug/Enh ID	Issue	Resolution
None	<p>Internal Tracking # 17997</p> <p>If the user creates a questionnaire where the User Group Selection is the only thing selected for the allergens, additives, and intolerances, the section is not displayed to the user in Supplier Portal.</p> <p>This applies to ingredient, product, and trade questionnaires.</p>	An additional visibility check was added for when the Add New button is enabled.
None	<p>Internal Tracking # 17998</p> <p>The Nutrient Properties that are selected by the supplier using the Add New button (User Group selections) are not getting returned on the questionnaire. This occurs when Nutrient Properties (User Group Selection) is the only thing selected for that section. This applies to ingredient, product, and trade questionnaires.</p>	This issue has been resolved.

GSM (Global Specification Management) Resolved Issues

Table: 2-5 GSM Resolved Issues

Bug/Enh ID	Issue	Resolution
9343069	<p>Internal Tracking # 17658</p> <p>There were several differences between the on screen display and the printed version of packing configuration specifications.</p>	The discrepancies have been resolved, and the on screen version now matches the printed version.
9495751	<p>Internal Tracking # 17663</p> <p>A saved search based off a packaging material specification with multiple Custom Section (Advanced) attributes does not save all additional attributes criteria.</p>	The saved search now saves all additional attributes criteria.
None	<p>Internal Tracking # 17979</p> <p>When a specification is copied, the supplier information is not copied to the specification. Therefore, the related sourcing approval on a % Breakdown should not be copied.</p>	The copy feature now works as designed.
None	<p>Internal Tracking # 18067</p> <p>If the user attaches packaging material items (packaging and printed packaging specifications) to a trade specification and selects "Label" for the packaging type, the specification is not displayed in "Where Used" functionality.</p>	The Where Used functionality now supports packaging material items with packaging type of Label.

Bug/Enh ID	Issue	Resolution
None	Internal Tracking # 18158 For smart issues, the last edit date is not getting updated when the user makes changes to custom sections, and therefore the changes are not recognized by CS Denorm.	The last edit date is now updated and passed to CS Denorm.
None	Internal Tracking # 18281 A global succession request does not successfully complete against Oracle DB.	Succession requests are now run successfully.
10362488	Internal Tracking # 18736 An LIO request is taking too long to process.	We have added a “Please Wait” progress page to notify the user of the status of the LIO request.
10435685	Internal Tracking # 18784 When a global succession request runs for the second time, the targeted specification is deleted.	A validation check has been added for the run global succession action to ensure the change is still valid.
10640113	Internal Tracking # 19206 The user receives an error when attempting to add then remove a custom section when adding an activity specification.	The error no longer occurs.
11828618	Internal Tracking # 19431 Invalid data for an ingredient statement is displayed in the Audit History tab in LIO creation.	Audit History now displays the correct information: the % value for the ingredient statement, or if the ingredient statement is not available, a blank value.
11831838	Internal Tracking # 19508 LIO profile displays Label Composition in ascending order, but when pushed to the nutrient profile, Label Composition is displayed in descending order.	Label Composition now displays in descending order in both places.
11843054	Internal Tracking # 19546 For formulation specifications, the user is unable to search using the ‘Output Item’ criterion.	The search is now performed successfully.
None	Internal Tracking # 19748 For nutrient profiles, label composition names are not displaying in ascending order if the percentages are the same.	Label composition names now display in ascending order when percentages are the same.
12331012 12330938	Internal Tracking # 19834 and # 19835 Duplicate key issue found in print template and calculated extended attributes.	This issue has been fixed.
12326225	Internal Tracking # 19879 A search for ingredient specifications by breakdown component catalog fails.	The search is now successful.

NPD (New Product Development) Resolved Issues

Table: 2-6 NPD Resolved Issues

Bug/Enh ID	Issue	Resolution
9586744	Internal Tracking # 17673 Action items are not always updating correctly. Changes in activity and project status were not reflected in action items.	Action items now update correctly.
9873949	Internal Tracking # 17900 Users that are now inactive still receive email notifications when specified in projects.	Inactive users no longer receive email notifications.
10028973	Internal Tracking # 18088 The user receives an error when workflowing a project to Terminated.	The project now workflows to Terminated with no error.
7185608	Internal Tracking # 19110 The Projects Metrics that prints with a project PDF is not sorted.	The Projects Metrics now prints in sorted order.

NSM (Nutrition Surveillance Management) Resolved Issues

None

PQS (Product Quality Scorecard) Resolved Issues

None

RPT (Reporting) Resolved Issues

Table: 2-7 RPT Resolved Issues

Bug/Enh ID	Issue	Resolution
None	Internal Tracking # 17872 SCRM business unit security is not respected in search results. For ingredient, packaging, printed packaging, and product specifications, the user can add sourcing approval information to the custom layout. The EQTs respect SCRM BU security but the search results do not.	SCRM business unit security is now respected in the search results.

SP (Supplier Portal) Resolved Issues

Table: 2-8 SP Resolved Issues

Bug/Enh ID	Issue	Resolution
None	Internal Tracking # 17891 When a specification name contains double quotes, it causes formatting issues in Supplier Portal.	Formatting is no longer affected by double quotes.
None	Internal Tracking # 17986 For trade specifications, custom sections for nutrient profiles and master specifications, attachments (images), and Rich Text do not print.	All items now print successfully.
None	Internal Tracking # 18059 Supplier Portal Administration (SPA) displays company contacts for a user, but the user is only associated with a facility.	SPA now indicates facility contacts.
None	Internal Tracking # 18061 The notification from Supplier Portal that the sourcing approval has been approved or rejected is sent to the supplier instead of the sourcing approval owner of that step.	Notifications are now sent correctly.
10415388	Internal Tracking # 19077 When attempting to register as a new supplier, a user with a last name containing a single quote “'” receives an error message.	Special characters are now accepted.
None	Internal Tracking # 19814 Inactive and Archived catalogs are displayed in Supplier Portal and should not be.	Inactive and Archived catalogs are no longer displayed in Supplier Portal.

SCRM (Supply Chain Relationship Management) Resolved Issues

Table: 2-9 SCRM Resolved Issues

Bug/Enh ID	Issue	Resolution
None	Internal Tracking # 17840 The receiving facility is not hidden when the user does not have access to the facility's business unit.	Receiving facility is now hidden when the user does not have access to the facility's business unit.
10067588	Internal Tracking # 18016 Several issues arise when searching for specification related sourcing approvals by taxonomy.	Search on a specification by Taxonomy returns the same result set as the search on specification by Category.

Bug/Enh ID	Issue	Resolution
None	<p>Internal Tracking # 19792</p> <p>The user is unable to remove all Category information from a company/facility contact. Category information removed using the pop-up window still remains in the field on the page.</p>	Category information is now successfully removed from a company/facility contact.

UGM (User Group Management) Resolved Issues

Table: 2-10 UGM Resolved Issues

Bug/Enh ID	Issue	Resolution
9574903	<p>Internal Tracking # 17670</p> <p>When the user attempts to close the user dialog box in edit mode, a server error is displayed. This occurs when the Done button is clicked with no user selected.</p>	The error no longer occurs.
9703324	<p>Internal Tracking # 17776</p> <p>After removing (unchecking the boxes) all of a user's access from the Access tab of user, an unhandled error occurs.</p>	The error no longer occurs.

WFA (Workflow Administration) Resolved Issues

None

Chapter 3: Hot Fixes

This chapter contains hot fixes included in Release 6.0.0.4.0 of Oracle Agile Product Lifecycle Management for Process.

Hot Fixes

The following table lists hot fixes that are included in the Oracle Agile Product Lifecycle Management for Process 6.0.0.4.0 release.

Table: 3-1 Hot Fixes

5.2.2.19	6.0.0.3.46	6.0.0.3.61
5.2.2.20	6.0.0.3.47	6.0.0.3.62
6.0.0.1.17	6.0.0.3.48	6.0.0.3.64
6.0.0.2.2	6.0.0.3.49	6.0.0.3.65
6.0.0.3.36 - Rollup	6.0.0.3.50	6.0.0.3.66
6.0.0.3.37	6.0.0.3.51	6.0.0.3.68
6.0.0.3.41	6.0.0.3.52	6.0.0.3.69
6.0.0.3.42	6.0.0.3.55	
6.0.0.3.45	6.0.0.3.56
