### ***License Restrictions Warranty/Consequential Damages Disclaimer***

This software and related documentation are provided under a license agreement containing restrictions on use and disclosure and are protected by intellectual property laws. Except as expressly permitted in your license agreement or allowed by law, you may not use, copy, reproduce, translate, broadcast, modify, license, transmit, distribute, exhibit, perform, publish, or display any part, in any form, or by any means. Reverse engineering, disassembly, or decompilation of this software, unless required by law for interoperability, is prohibited.

### ***Warranty Disclaimer***

The information contained herein is subject to change without notice and is not warranted to be error-free. If you find any errors, please report them to us in writing.

### ***Restricted Rights Notice***

U.S. GOVERNMENT RIGHTS Programs, software, databases, and related documentation and technical data delivered to U.S. Government customers are "commercial computer software" or "commercial technical data" pursuant to the applicable Federal Acquisition Regulation and agency-specific supplemental regulations. As such, the use, duplication, disclosure, modification, and adaptation shall be subject to the restrictions and license terms set forth in the applicable Government contract, and, to the extent applicable by the terms of the Government contract, the additional rights set forth in FAR 52.227-19, Commercial Computer Software License (December 2007). Oracle America, Inc., 500 Oracle Parkway, Redwood City, CA 94065.

### ***Hazardous Applications Notice***

This software or hardware is developed for general use in a variety of information management applications. It is not developed or intended for use in any inherently dangerous applications, including applications that may create a risk of personal injury. If you use this software or hardware in dangerous applications, then you shall be responsible to take all appropriate fail-safe, backup, redundancy, and other measures to ensure its safe use. Oracle Corporation and its affiliates disclaim any liability for any damages caused by use of this software or hardware in dangerous applications.

### ***Trademark Notice***

Oracle and Java are registered trademarks of Oracle and/or its affiliates. Other names may be trademarks of their respective owners.

Intel and Intel Xeon are trademarks or registered trademarks of Intel Corporation. All SPARC trademarks are used under license and are trademarks or registered trademarks of SPARC International, Inc. AMD, Opteron, the AMD logo, and the AMD Opteron logo are trademarks or registered trademarks of Advanced Micro Devices. UNIX is a registered trademark of The Open Group.

***Third Party Content, Products, and Services Disclaimer***

This software or hardware and documentation may provide access to or information on content, products, and services from third parties. Oracle Corporation and its affiliates are not responsible for and expressly disclaim all warranties of any kind with respect to third-party content, products, and services. Oracle Corporation and its affiliates will not be responsible for any loss, costs, or damages incurred due to your access to or use of third-party content, products, or services.

***Documentation Accessibility***

### **1-1 General Aspects of Release 1.4.0.0**

### **1-5 Changes to the supported browser versions**

### **1-5 Changes to handling Dynamic Fields of type Date in Dynamic Logic**

### **1-5 Changes to the Installation and Upgrade software**

### **1-6 Updating System Configuration Properties**

### **1-6 Changes to Web Services Contracts**

1-6 Changes to Existing Web Services Contracts

1-7 Web Services Contracts for New Integration Points

1-7 Changes to Existing Web Services Contracts since release 1.3.0.10

### **1-7 Changes to US Seed Data**

### **1-8 Database changes**

### **1-8 Changes to Pre-defined Dynamic Logic methods**

### **1-8 Upgrading from a previous release**

### **1-9 Issues that were fixed in Release 1.4.0.0 (previous patches)**

### **1-12 Issues that were fixed in Release 1.4.0.0**

### **1-13 Known issues in Release 1.4.0.0**

## Chapter 1

---

### Release Notes

This document contains the release notes for OHI Claims release 1.4.0.0.

### GENERAL ASPECTS OF RELEASE 1.4.0.0

The following table provides a summary of functionality that was added in release 1.4.0.0:

ID	Deliverable	Description	Included in Patch
	ClaimLineParameter	Added claim line parameters to the Claims In, Update, and Pre-Finalized Out IPs. Added the setClaimLineParameter and deleteClaimLineParameter pre-defined dynamic logic methods.	
	CoverageLabel	Added the INPUT action and a function dynamic logic to CoverageLabel.	
	Work Managers to isolate UI & WebService traffic	Using separate WebLogic work managers to isolate UI & WebService requests can improve the predictable behavior. See the installation guide for more details.	
NXT-5447	Technical event notifications	Added an EMGC Management plugin for technical monitoring of OHI Claims. Usage and installation is documented in the Operations Guide.	
NXT-5457	Add triggering dynamic condition to combination checks	An optional reference from COMBINATION CHECK to CONDITION DYNAMIC LOGIC has been added, to specify when this check should apply.	

NXT-5470	Retrieval auditing on UI pages that display member information	Extend the existing retrieval auditing mechanism to log access to the following pages: Relations, Persons , View Limit Counters, View Regime Counters and View Medical Cases.	
NXT-5472	Support provider claim settlements	Provide for restriction of settling and unsettling a claim. After a claim is finalized, a provider settlement may occur which means that a settlement with the provider has been agreed upon. As a consequence, the claim should be prevented from being manually adjusted or further processed. An access restriction for Claims settlement is introduced.	
NXT-5454	UI for counter updates	Provide the ability to update counters through the View Limit Counters page. External consumption can be created, following the same logic as the Counter IP.	
NXT-5835	ENHANCEMENT RQST: ADD PAYMENT DUE DATE TO EXTERNAL CLAIMS DATA AND USE AS SELECT	Payment due date and Release date are added to External Claims Data. Transaction Creation Scenarios are able to set them, just like the financial message mandatory indicator.	
NXT-5453	Screen on External Claims Data (ins/upd)	Provide ability to manipulate External Claims Data through the UI analogous to the External Claims Data IP.	
NXT-5452	Parametrization of cover withhold rule amounts and percentages (claimline parameters)	Introduction of Claim Line Parameters to parametrize amount and percentages in Cover Withhold Rules with consequences for Processing, UI and Integration Points.	

NXT-5456	Multiple benefit input amounts	Introduction of Coverage Labels with Action 'INPUT' to support multiple Benefit Input Amounts. Replacement of 'ORIGINAL' indicator by new Action 'ORIGINAL'.	
NXT-6619	ALLOW \$0 AS A VALID PAYMENT OPTION	Claim lines with a benefits input amount of \$0 and no fatal messages are no longer denied with the CLA-FL-ADJU-001. Instead, these lines are approved. This is especially relevant for lines that have been priced as \$0 due to being included in a contracted rate by the pricer component.	
NXT-6555	INCLUDE MINUTE COMPONENT IN DISCHARGE HOUR AND ADMISSION HOUR	The US seeded dynamic fields admissionHour and dischargeHour now store both the hour and minute component, conform to the format in the 837, i.e., HHMM. Existing values are converted to conform to this format as well.	
NXT-6654	EXTEND DRG FLEX CODE DEFINITION FROM 3 TO 4 DIGITS	It is now possible (and mandatory) to store DRG numbers consisting of 4 digits, rather than 3, either through the diagnosis IP or entry in the UI. As a consequence it is now also possible to sent in claims with a 4 digit DRG number.	
NXT-6167	US Seed Data: Remove time validity of procedures and occurrence codes	Remove Time Validity of otherProcedures, principalProcedure, occurrenceCodes and occurrenceSpanCodes (all fields on CLA_CLAIMS).	1.3.0.4

NXT-5953	Access restriction plus user and timestamp tracking on resolving of pend reason	<p>The ability to resolve a pend reason is now restrictable by using the following mechanism</p> <ul style="list-style-type: none"><li>* If a Pend reason is non restricted then every user can resolve it</li><li>* If a Pend reason has a restriction tag then only users with a role that has a grant to that restriction tag can resolve the Pend reason.</li></ul> <p>When a pend is resolved the following is tracked in the pend reason history</p> <ul style="list-style-type: none"><li>* which user resolved the pend</li><li>* the timestamp when the pend reason was resolved</li></ul>	1.3.0.5
	<p>Removal of Business Rules:</p> <p>REL-PRGR-001 A provider group can only contain provider groups or providers, not both.</p> <p>REL-PRGA-001 At any given point in time a provider can not be linked more than once to the same hierarchy.</p>	<p>The support for provider group hierarchy is scheduled for removal from OHI Claims in 1.5.0.0. The group hierarchy is not in use, so this has no functional impact.</p> <p>The removal of the validation of these business rules will improve the performance of the provider integration point</p>	1.3.0.7
	Reduce memory usage of search claims	The memory usage of the Search Claims page has been improved	1.3.0.7

Handling Claim Line Modifiers in Claims Pages has been changed	<p>1 the table embedded component is changed from a selectManyChoice, to an inputText field</p> <p>2 the text field can be used to directly key in modifiers. It is possible to enter multiple modifiers, separated by a semicolon.</p> <p>3 the content of the field is validated as soon as the focus moves to the next component or the pages is saved/submitted. If invalid the user gets an error message.</p> <p>4 within the same table cell as the inputText field, there is an "edit" icon. This icon is placed on the right of the text field.</p> <p>5 when clicking on this icon, a new dialog opens that allows the user to manipulate the modifiers. This is the same dialog as currently used to edit unmatched modifiers.</p>	1.3.0.10
--	---	----------

## CHANGES TO THE SUPPORTED BROWSER VERSIONS

The list of supported browsers has been changed. See the installation guide.

## CHANGES TO HANDLING DYNAMIC FIELDS OF TYPE DATE IN DYNAMIC LOGIC

Starting with release 1.4.0.0, OHI Claims expects Dynamic Fields of type date in Dynamic Logic scripts to be of type `java.sql.Date`. This may impact existing Dynamic Logic.

All dynamic logic declaring dates in the logic itself, will have to be changed. Any occurrence of `Date().parse..` or `Date.parse..` should be replaced with appropriate `java.sql.Date.valueOf(...)`.

Pre Defined methods, `asOfDate` and `inGeographicRegion` have been changed to accept `java.sql.Date` instead of `java.util.Date`.

## CHANGES TO THE INSTALLATION AND UPGRADE SOFTWARE

None

## UPDATING SYSTEM CONFIGURATION PROPERTIES

For 1.4.0.0, the properties that are listed in the following table were added to the ohi-claims.properties file:

Property	Description
ohi.processing.enrollmentcomplete.delay	Value (in seconds) that the application will wait before it checks if all Enrollment response messages are received. Increase this value if the Enrollment service does not respond to requests within 10 seconds (the default value). By default this property is not in the ohi-claims.properties sheet.
ohi.processing.paymentstatuscomplete.delay	Value (in seconds) that the application will wait before it checks if all Payment Status response messages are received. Increase this value if the Payment Status service does not respond to requests within 10 seconds. By default this property is not in the ohi-claims.properties sheet.

The following properties were removed:

Property	Description
ohi.eclipselink.logging.level	This is a technical property; if so required its value can be changed in a different way

The system properties are documented in the Installation Guide.

## CHANGES TO WEB SERVICES CONTRACTS

### CHANGES TO EXISTING WEB SERVICES CONTRACTS

The contracts for the following Integration Points were changed (rolling the 1.3 changes):

Integration Point	Version	WSDL and XSD	Reason(s) for change
Claims In IP	4.3	ClaimsIn.xsd	Added ClaimLineParameters element Removed diagnosesInType (replaced with diagnosesType)
Claims Update IP	1.2	ClaimsUpdateRequest.xsd	Added ClaimLineParameters element
Claim Pre-Finalized Out IP	2.1	ClaimPreFinalizedOutResponse.xsd	Added ClaimLineParameters element. Added indKeepPricing and indKeepBenefits to claimLine element. Added totalClaimedAmount and payerCode to claimHeader element. Removed providerOrRelationType (replaced with relationType) in various elements.
Counters IP	4	counters.wsdl	The response message for the ReadMember operation was corrected. Added counters batch operations.
Counters IP	4	CountersRequest.xsd	For write consumption the "subscriptionDate" field is no longer mandatory.
File Import IP	3	fileImport.wsdl fileImportResponse.wsdl	Corrected the reference to the fileimport namespace
Product IP	1.5	ProductBenefitsSpecificationRequest.xsd	Replaced fractionalPercentage with thousandPercentage
Authorization IP	4.1	AuthorizationResponse.xsd	Fix validation error for procedure without consumption (consumption element no longer required)

Claims Transactions IP	2	ClaimTransaction.xsd ClaimTransactionResponse.xsd	Roll-up ClaimTransaction.xsd in ClaimTransactionResponse.xsd; that prevents validation errors
External Claims Data IP	3	externalClaimsData.wsdl ExternalClaimsDataRequest.xsd	Added paymentDueDate and releaseDate attributes to writeExternalClaimsDataRequest
Financial Messages IP	3	financialMessage.wsdl FinancialMessage.xsd	Added paymentDueDate and releaseDate attributes to selectionCriteria. In financialMessageSelectionJobRequest the selectionCriteria are moved outside of the choice tag.
File Import IP	3	fileImport.wsdl fileImportResponse.wsdl	WSDLs for the FileImport and FileImportResponse services now correctly reference the fileimport namespace

## WEB SERVICES CONTRACTS FOR NEW INTEGRATION POINTS

No new Integration Points were added.

## CHANGES TO EXISTING WEB SERVICES CONTRACTS SINCE RELEASE 1.3.0.10

Integration Point	Version	WSDL and XSD	Reason(s) for change
Claims In IP	4.3	ClaimsIn.xsd	Added ClaimLineParameters element (this element is optional) Removed diagnosesInType (replaced with diagnosesType)
Claims Update IP	1.2	ClaimsUpdateRequest.xsd	Added ClaimLineParameters element (this element is optional)
Claim Pre-Finalized Out IP	2.1	ClaimPreFinalizedOutResponse.xsd	Added ClaimLineParameters element (this element is optional)
Counters IP	4	CountersRequest.xsd	For write consumption the "subscriptionDate" field is no longer mandatory.
External Claims Data IP	3	externalClaimsData.wsdl ExternalClaimsDataRequest.xsd	Added paymentDueDate and releaseDate attributes to writeExternalClaimsDataRequest (neither of these is required)
Financial Messages IP	3	financialMessage.wsdl FinancialMessage.xsd	Added paymentDueDate and releaseDate attributes to selectionCriteria (neither of these is required). In financialMessageSelectionJobRequest the selectionCriteria are moved outside of the choice tag.

## CHANGES TO US SEED DATA

- The text of message "CLA-FL-BENS-015" was changed to "No parameter value found for cover withhold rule {0} in coverage regime {1}".
- The code & text of message "CLA-IP-LIMI-015" was changed to "CLA-LICO-001", "Limit does not count across providers, but no provider is specified." respectively.

- The code & text of message "CLA-IP-LIMI-016" was changed to "CLA-LICO-002", "Limit does not count across products, but no aggregation level is specified." respectively.
- The code & text of message "CLA-IP-LIMI-004" was changed to "CLA-LICO-004", "Referenced aggregation level {0} is unknown." respectively.
- The code & text of message "CLA-IP-LIMI-007" was changed to "CLA-LICO-005", "Referenced relation code {0} is unknown." respectively.

The complete set of US Seed Data is listed in the Implementation Guide for US Seed Data.

## **DATABASE CHANGES**

For this release the following database changes were made:

- The ohi\_config user, previously used to perform administrative tasks is deprecated.
- PEND REASON:
  - New relationship to ACCESS RESTRICTION
- CLAIM PEND REASON HISTORY:
  - New relationship 'resolved by' to USER
  - New attribute 'resolved datetime'
- CLAIM STATUS HISTORY:
  - Remove relationship 'resolved by' to USER
- CTR PEND REASON HISTORY:
  - New attribute 'user login name'
  - New attribute 'resolved datetime'
- CTR STATUS HISTORY:
  - Remove attribute 'user login name'

## **CHANGES TO PRE-DEFINED DYNAMIC LOGIC METHODS**

For this release the following changes were made to pre-defined methods:

- 2nd Parameter in addMessage method has been removed
- method addExternalClaimsData has been removed
- asOfDate and inGeographicRegion methods have been changed to accept java.sql.Date instead of java.util.Date

## **UPGRADING FROM A PREVIOUS RELEASE**

Prior to the upgrade, perform the following steps:

- Stop the existing version of the application.
- Undeploy the existing version of the application.
- Stop the application server in order to terminate database connections.
- Back up the database.
- Drop the OHI\_CONFIG schema from the database.
- Unpack the 1.4.0.0 release bundle into a directory that we refer to as **OHI\_ROOT** from now on.
- Change Installation Configuration: In <OHI\_ROOT>\util\install, make a copy of **ohi\_install.cfg.template** and name it **ohi\_install.cfg**. Edit **ohi\_install.cfg** to contain your specific database connection data and other configuration settings. The settings are explained in the file itself.
- Make sure NO connections are present to the database using the OHI\_CLAIMS\_USER account
- Run the Upgrade script:
  - Open a command window and browse to <OHI\_ROOT>\util\install.
  - Run the upgrade by executing **ohi-update.bat** for Windows based upgrades, or **./ohi-update.sh** for \*nix based upgrades.
- Make the required changes to the ohi-claims.properties file.
- **Deploy the Application:**  
If you want to make use of custom WebLogic work managers to isolate the load between UI & WebService requests (or) to change the default context-root, follow the steps mentioned in the sections "**Creating WebLogic Work Manager**" and "**Installing OHI Claims Application To Use Custom Work Manager (OR) To Change Context-Root**" in the installation guide. Else, using the WebLogic Console, deploy the Enterprise Archive file that is located in the <OHI\_ROOT>\application\app directory of the release bundle as an application.

## ISSUES THAT WERE FIXED IN RELEASE 1.4.0.0 (PREVIOUS PATCHES)

BugDB id	Service Request	Summary	Included in Patch
12900200	3-4323683401	COUNTER ARE UPDATED FOR LINE HAVING FATAL MESSAGE	1.3.0.3
12925908	3-4044649751	AUTHORIZATIONMESSAGELIST IS ALWAYS EMPTY WITH NEW AUTHS	1.3.0.4
12915977	3-4311210861	AUTHORIZATION/ RELATION SCREEN: ERROR COMING WHEN SEARCHING ON FLEX FIELD	1.3.0.4
12939878	3-4323912201	STOP REMOVING INFORMATIVE AUTH MESSAGES WHEN LINE IS NOT COVERED	1.3.0.4

12934648	3-4393031791	CASE RETURNS GEN-PROC-ERRIF DYNAMIC LOGIC DOES NOT RETURN START DATE	1.3.0.4
12914578	3-4401252071	COUNTERS WSDL READMEMBER OPERATION IS INCORRECTLY SPECIFIED	1.3.0.4
12955434	3-4453845621	WSDL FOR FILE IMPORT IS MISSING VERSION INFORMATION	1.3.0.4
12956332	3-4138517731	LAZY RELATIONSHIP ERROR WHEN COPYING COVERAGE REGIME WITH DYNAMIC FIELD VALUES	1.3.0.4
12961536	3-4462964561	SENDING MULTIPLE CLAIMS FOR THE SAME MEMBER IN PARALLEL MAY CAUSE DEADLOCK DB	1.3.0.4
12971374	3-4401252071	COUNTERS WSDL MISSES READMEMBERRESPONSE MESSAGE	1.3.0.5
12976833	3-4489117461	ADDMESSAGE DYNAMIC LOGIC ERROR WHEN SUBMITTING A CLAIM IN MANUAL BENEFITS	1.3.0.5
12975414	3-4463189061	HAVE CLAIMSIN IP USE DIAGNOSISTYPE FROM DATATYPES (REMOVE THE DIAGNOSISINTYPE)	1.3.0.5
12958920	3-4453668991	COUNTERS IP READCONSUMPTIONBATCH REQUEST DOES NOT SEND AN ASYNC RESPONSE	1.3.0.5
12948379	3-4344819461	ERROR MESSAGES ATTACHED IN PREBENEFITS CHK PREVIOUS RUN ARE NOT ALWAYS DELETED	1.3.0.5
12877108	3-4419428751	PROVIDER GROUP SCOPE INHERITANCE FOR CASE DEFINITION NO PRESENT	1.3.0.5
12930871	3-4393859951	CLAIMLINEBENEFITSPECIFI CATIONLIST SOMETIMES MISSING PART OF DATA	1.3.0.5
12981450	3-4501184351	AUTHORIZATION SCREEN: NOT ABLE TO SEARCH ON FLEX FIELD	1.3.0.5
12986255	3-4502611161	CANNOT CHANGE THE COVERED AND WITHHOLD AMOUNT IN THE MB PAGE	1.3.0.5
12961536	3-4462964561	SENDING MULTIPLE CLAIMS FOR THE SAME MEMBER IN PARALLEL MAY CAUSE DEADLOCK DB (added another missing foreign key database index)	1.3.0.5

13011136	3-4568044351	BENEFIT SPEC CONDITIONS THROWING UNKNOWN PROPERTY ERROR FOR CLAIM LINE DYNAMIC	1.3.0.6
13011152	3-4563705781	ADDING BENEFITS SPEC CONDITION IN OHICMM1 IS SLOW	1.3.0.6
13036292	3-4622480651	EXCESSIVE DYNAMIC LOGIC PARSING - DYNAMIC LOGIC NOT LOADED FROM THE CACHE	1.3.0.7
13022567		SLALOGGER SHOULD BE USED FOR ALL IP'S	1.3.0.7
12972227		DUPLICATE INTERCEPTORS USED IN COUNTERS -WS-SERVLET.XML (AND OTHER WS CONFIGS)	1.3.0.7
12902694	3-4529995715	IN MESSAGES PAGE (FN0002) UPDATING A TRANSLATABLE ATTRIBUTE GIVES NOT FOUND ERRO	1.3.0.7
13041039	3-4622164351	INPROVIDERGROUPEFUNCTI ON APPEARS TO BE VERY SLOW OHIETE1	1.3.0.8
13065020	3-4668358791	UNIQUE KEY VIOLATION ON CLAIM AND CLAIM LINE DIAGNOSIS	1.3.0.9
13061665	3-4631762251	REPRCSSING THE DENIED STATUS OF THE PRMRY CLAIMLINE FROM THE PREVIOUS RUN MAKES	1.3.0.9
13028589	3-4419428751	CASE DEF: MESSAGE FOR RECOG AS PRIMARY IS ATTACHED TO CLAIM LINE WHEN MULTIPLE B	1.3.0.9
13035351	3-4613071865	CASE DEFINITION: THE MEDICAL CASE IS NOT GETTING OPEN WHEN AUTH IS NOT FOUND	1.3.0.9
12820039	3-4500916217	GEN-DYN FILLING OF DYNAMIC FIELD WITH LOV EMPTIES OTHER DYNAMIC FIELDS	1.3.0.9
13062486		UNACCEPTABLE DURATION OF ENROLLMENTCOMPLETE TASK	1.3.0.9
13080756	3-4697349511	DYNAMIC LOGIC CONDITION SEEMS 'CACHED' WHEN REPROCESSING CLAIM	1.3.0.10
13076800	3-4693994371	IN A CLUSTERED ENVIRONMENT, STALE DATA IS SHOWN	1.3.0.10

13078766		MANY THREADS BLOCKED WAITING TO LOCK CLASSLOADER	1.3.0.10
13034884	3-4577617931	PERFORMANCE DEGRADATION WHEN MORE TABS ARE OPEN	1.3.0.10
12606546	3-3729193137	Entered values disappear before saving (when switching tabs and doing a quick search)	1.3.0.10
13093064	3-4718182261	CLICKING ON THE 'PREFERENCES' SCREEN RESULTS IN AN 'INTERNAL SERVER ERROR'	1.3.0.10

## ISSUES THAT WERE FIXED IN RELEASE 1.4.0.0

BugDB id	Service Request	NXT-number	Summary
12691393		NXT-4832	Claims flow currently not prepared for claims that are overwritten from claimsIn, which may cause errors.
12700978		NXT-5703	DYNAMIC FIELD 'DATE' HANDLING IS NOT IN ACCORDANCE WITH IMPLEMENTATION GUIDE
12741573	3-3997478291	NXT-5852	COLUMN WIDTHS CANNOT BE DECREASED UNDER CLAIM LINE SECTION IN VIEW CLAIM PAGE
12790838	3-4083560931	NXT-5974	BUSINESS RULE VALIDATION FINALIZE STEP DOES NOT RETURN PARAMETERS
12798429	3-4085749901	NXT-5985	DETAILS IN RECOVERY TASKS ONLY PARTLY DISPLAYED AND ORDERED ASCENDING ON CREATIO
12819694		NXT-6020	DEFAULTRESETTABLE EXCEPTION ERROR MESSAGE POLLUTES LOG FILE
12823474		NXT-6030	ECLIPSELINK 'OBJECT' WAS NEVER REGISTERED IN THIS UNITOFWORK' TASKATTRIBUTES
12839388		NXT-6056	PC0013- REPLACED BY/REPLACES INCORRECT FILLED IN CTR
12874305		NXT-6108	CL0005- COPYING WITH A COUNT TOWARDS LIMITS LEADS TO OUTSTANDING CHANGES
12883894		NXT-6128	FN0009- USING SPECIAL CHARACTERS IN DYNAMIC LOGIC CODE GIVES ERROR
12887178		NXT-6138	COVER WITHHOLD CATEGORY: COVER LABEL AND WITHHOLD LABEL SWITCHED IN DATABASE
12888702		NXT-6150	COUNTERS CREATED DUE TO CARRYOVER PERIOD ARE NOT SHOWN ON VIEW COUNTERS PAGE.
12896644	3-4257344721	NXT-6155	NPE WHEN USING LOV FOR VALIDATION ON BILL TYPE DYNFIELDS COMBINATION
