This software and related documentation are provided under a license agreement containing restrictions on use and disclosure and are protected by intellectual property laws. Except as expressly permitted in your license agreement or allowed by law, you may not use, copy, reproduce, translate, broadcast, modify, license, transmit, distribute, exhibit, perform, publish, or display any part, in any form, or by any means. Reverse engineering, disassembly, or decompilation of this software, unless required by law for interoperability, is prohibited.

The information contained herein is subject to change without notice and is not warranted to be error-free. If you find any errors, please report them to us in writing.

If this software or related documentation is delivered to the U.S. Government or anyone licensing it on behalf of the U.S. Government, the following notice is applicable:

U.S. GOVERNMENT RIGHTS Programs, software, databases, and related documentation and technical data delivered to U.S. Government customers are "commercial computer software" or "commercial technical data" pursuant to the applicable Federal Acquisition Regulation and agency-specific supplemental regulations. As such, the use, duplication, disclosure, modification, and adaptation shall be subject to the restrictions and license terms set forth in the applicable Government contract, and, to the extent applicable by the terms of the Government contract, the additional rights set forth in FAR 52.227-19, Commercial Computer Software License (December 2007). Oracle USA, Inc., 500 Oracle Parkway, Redwood City, CA 94065.

This software is developed for general use in a variety of information management applications. It is not developed or intended for use in any inherently dangerous applications, including applications which may create a risk of personal injury. If you use this software in dangerous applications, then you shall be responsible to take all appropriate fail-safe, backup, redundancy, and other measures to ensure the safe use of this software. Oracle Corporation and its affiliates disclaim any liability for any damages caused by use of this software in dangerous applications.

Oracle and Java are registered trademarks of Oracle Corporation and/or its affiliates. Other names may be trademarks of their respective owners.

This software and documentation may provide access to or information on content, products, and services from third parties. Oracle Corporation and its affiliates are not responsible for and expressly disclaim all warranties of any kind with respect to third-party content, products, and services. Oracle Corporation and its affiliates will not be responsible for any loss, costs, or damages incurred due to your access to or use of third-party content, products, or services.

Preface

The *Agile Product Lifecycle Management for Process Supplier Portal User Guide* explains how Supplier Portal (SP) provides a central location for your company's supply chain partners to access specification data, review catalogs of procedural and standards documents, and manage contact information. It also describes how administrators use the Supplier Portal Administration (SPA) application to manage Supplier Portal registrations.

This preface contains these topics:

- [Audience](#)
- [Variability of Installations](#)
- [Documentation Accessibility](#)
- [Related Documents](#)
- [Conventions](#)

Audience

This guide is intended for end users who are responsible for creating and managing information in Agile PLM for Process. Information about administering the system resides in the *Agile Product Lifecycle Management for Process Administrator User Guide*.

Variability of Installations

Descriptions and illustrations of the Agile PLM for Process user interface included in this manual may not match your installation. The user interface of Agile PLM for Process applications and the features included can vary greatly depending on such variables as:

- Which applications your organization has purchased and installed
- Configuration settings that may turn features off or on
- Customization specific to your organization
- Security settings as they apply to the system and your user account

Documentation Accessibility

Our goal is to make Oracle products, services, and supporting documentation accessible to all users, including users that are disabled. To that end, our documentation includes features that make information available to users of assistive technology. This documentation is available in HTML format, and contains markup to facilitate access by the disabled community. Accessibility standards will continue to evolve over time, and Oracle is actively engaged with other market-leading technology vendors to address technical obstacles so that our documentation can be accessible to all of our customers. For more information, visit the Oracle Accessibility Program Web site at <http://www.oracle.com/accessibility/>.

Accessibility of Code Examples in Documentation

Screen readers may not always correctly read the code examples in this document. The conventions for writing code require that closing braces should appear on an otherwise empty line; however, some screen readers may not always read a line of text that consists solely of a bracket or brace.

Accessibility of Links to External Web Sites in Documentation

This documentation may contain links to Web sites of other companies or organizations that Oracle does not own or control. Oracle neither evaluates nor makes any representations regarding the accessibility of these Web sites.

TTY Access to Oracle Support Services

To reach AT&T Customer Assistants, dial 711 or 1.800.855.2880. An AT&T Customer Assistant will relay information between the customer and Oracle Support Services at 1.800.223.1711. Complete instructions for using the AT&T relay services are available at <http://www.consumer.att.com/relay/tty/standard2.html>. After the AT&T Customer Assistant contacts Oracle Support Services, an Oracle Support Services engineer will handle technical issues and provide customer support according to the Oracle service request process.

Related Documents

For more information, see the following documents in the Agile PLM for Process Release 6.1 documentation set:

- *Agile Product Lifecycle Management for Process Administrator User Guide*
- *Agile Product Lifecycle Management for Process Global Specification Management User Guide*
- *Agile Product Lifecycle Management for Process eQuestionnaire User Guide*
- *Agile Product Lifecycle Management for Process Document Reference Library User Guide*
- *Agile Product Lifecycle Management for Process Supply Chain Relationship Management User Guide*
- *Agile Product Lifecycle Management for Process Release Notes*. Up-to-date Release Notes and other documentation are posted on Oracle Technology Network (OTN) at this location:

<http://www.oracle.com/technetwork/documentation/agile-085940.html>

Conventions

The following text conventions are used in this document:

| Convention | Meaning |
|------------------------|--|
| boldface | Boldface type indicates graphical user interface elements associated with an action, or terms defined in text or the glossary. |
| <i>italic</i> | Italic type indicates book titles, emphasis, or placeholder variables for which you supply particular values. |
| <code>monospace</code> | Monospace type indicates commands within a paragraph, URLs, code in examples, text that appears on the screen, or text that you enter. |

Introducing Supplier Portal

This chapter presents an overview of Supplier Portal and Supplier Portal Administration. Topics in this chapter include:

- [Supplier Portal Overview](#)
- [Supplier Portal Administration Overview](#)
- [Touch Points with Other Applications](#)

Supplier Portal Overview

Supplier Portal (SP) provides a central location for your company's supply chain partners to access specification data, review catalogs of procedural and standards documents, and manage contact information.

Refer to [Chapter 2, "Using Supplier Portal"](#) for more information on a supplier's use of Supplier Portal.

Supplier Portal Administration Overview

Administrators use the Supplier Portal Administration (SPA) application to manage Supplier Portal registrations.

Refer to [Chapter 3, "Using Supplier Portal Administration"](#) for more information on an administrator's use of Supplier Portal Administration.

For general information on using Agile PLM for Process software, see the *Agile Product Lifecycle Management for Process Getting Started Guide*.

Touch Points with Other Applications

Supplier Portal and Supplier Portal Administration interface with several other Agile PLM for Process applications.

Global Specification Management

Suppliers can view specifications created in the Global Specification Management (GSM) application using Supplier Portal. Refer to ["Viewing Specifications"](#) on page 2-10 and ["Supplier Actions"](#) on page 2-14, or for more information, see the *Agile Product Lifecycle Management for Process Global Specification Management User Guide*.

Supply Chain Relationship Management

Suppliers can view sourcing approvals, documents, and contacts for select companies and facilities using Supplier Portal. Sourcing approvals and contacts for companies and facilities are set up and maintained using the Supply Chain Relationship Management (SCRM) application. Refer to "[Viewing Supplier and Facility Documents](#)" on page 2-18 for more information, or see the *Agile Product Lifecycle Management for Process Supply Chain Relationship Management User Guide*.

Administrators control what information registrants see in Supplier Portal by assigning companies and facilities, which are set up in SCRM. Refer to "[Assigning Companies or Facilities to a Supplier Portal User](#)" on page 3-3 for more information.

Document Reference Library

Using Supplier Portal, suppliers can view documents and catalogs of documents stored in the Document Reference Library (DRL) application for their associated companies and facilities. Refer to "[Viewing Document Reference Library](#)" on page 2-19 for more information, or see the *Agile Product Lifecycle Management for Process Document Reference Library User Guide*.

eQuestionnaire

Suppliers can initiate questionnaires from Supplier Portal. Refer to the *Agile Product Lifecycle Management for Process eQuestionnaire User Guide* for more information on the eQuestionnaire (eQ) application.

Using Supplier Portal

This chapter describes how a company and its suppliers use Supplier Portal. It includes the following topics:

- [Overview of Supplier Portal](#)
- [Accessing Supplier Portal—Registrants](#)
- [Viewing Specifications](#)
- [Publishing Specifications](#)
- [Access Control and Visibility](#)
- [Supplier Actions](#)
- [Viewing Supplier and Facility Documents](#)
- [Viewing Document Reference Library](#)
- [Displaying Your Company and Facility Contacts to a Supplier](#)
- [Managing Supplier Contact Information](#)

Overview of Supplier Portal

Supplier Portal provides a central location for your company's supply chain partners to access specification data, review catalogs of procedural and standards documents, and manage contact information. It gives supply chain partners (such as vendors, suppliers, brokers, and distributors) the ability to:

- Obtain information regarding specifications that they have a sourcing relationship with
- Obtain guidance surrounding expectations of deliverables in the form of catalogs of documents from a managed library
- Manage contact data for personnel at their facilities
- View selected documentation related to suppliers' facilities, compliance, contracts, and specifications
- Approve or reject a specification
- Initiate questionnaires for specifications

Using Global Specification Management (GSM) and Supply Chain Relationship Management (SCRM), you can set restrictions that control the information that is visible to your suppliers.

This guide explains the use of:

- Supplier Portal (SP) from a supplier perspective in terms of functionality and information available. These topics are covered in this chapter, as well as a supplier requesting and receiving access to the Supplier Portal Web site.
- Supplier Portal Administrator (SPA) from a company perspective (granting access to Supplier Portal to a supplier). See [Chapter 3, "Using Supplier Portal Administration"](#) for this information.

Supported Specification Types

Supplier Portal supports the following specification types:

- Material
- Product
- Printed packaging
- Packaging material
- Trade
- Equipment

Accessing Supplier Portal—Registrants

Note: This chapter is written for a company's suppliers who register for and use Supplier Portal.

When the supplier accesses the Supplier Portal site, the Welcome page is displayed, as shown in [Figure 2-1](#).

Figure 2-1 Welcome page

The supplier clicks on the language of preference. If the supplier selects **English**, the Login page will be displayed, as shown in [Figure 2-2](#).

Figure 2–2 Login page

By entering this network, you agree to the following terms and conditions:

This network contains confidential, proprietary information of CPI and its subsidiaries ("CPI"). The unauthorized disclosure of this information could reasonably be expected to cause serious economic damage to CPI. Unauthorized access, disclosure, use (including improper or illegal duplication) or modification of the network may be subject to civil and criminal penalties under applicable federal, state or local law.

Access to the network is limited to authorized individuals. This network is to be used only for the legitimate business purpose of CPI personnel and vendors. If you are not authorized to have access, do not enter this network. By entering the network, you agree to maintain its confidentiality and not to disclose or misuse the information contained in the network and you further agree to CPI monitoring your use of this network.

Notification
User logged out successfully. Please login again to access Supplier Portal

User Name:

Password:

[I Agree to these Terms and Conditions](#)

[Click HERE if you have not registered with this site](#)

[Forgot Your Password?](#)

The supplier logs in using a user name and password. Or, if the supplier has not yet registered, the supplier clicks the **Click HERE if you have not registered with this site** link.

Note: The user name is defined by the system based on the supplier's first and last name provided during the registration process. It is emailed to the user once approval has been granted. The user name can be changed by the Supplier Portal Administrator.

Clicking the **Click HERE if you have not registered with this site** displays the first step in the registration process, the Company Information page, shown in [Figure 2–3](#).

Figure 2–3 Company Information page

The screenshot displays a form titled "Company Information page" with the following fields and labels:

- Company Name:
- Company Web Site:
- Street Address 1:
- Street Address 2:
- City:
- State/Province:
- Postal Code:
- Country: (dropdown menu)
- Phone:
- Fax:

Below the form fields is a large blue arrow pointing to the right, indicating the next step in the process.

This is the first page where a supplier fills out company information. The following fields are required:

- Company Name
- Company Web Site
- Street Address 1
- City
- State/Province
- Postal Code
- Country
- Phone
- Fax

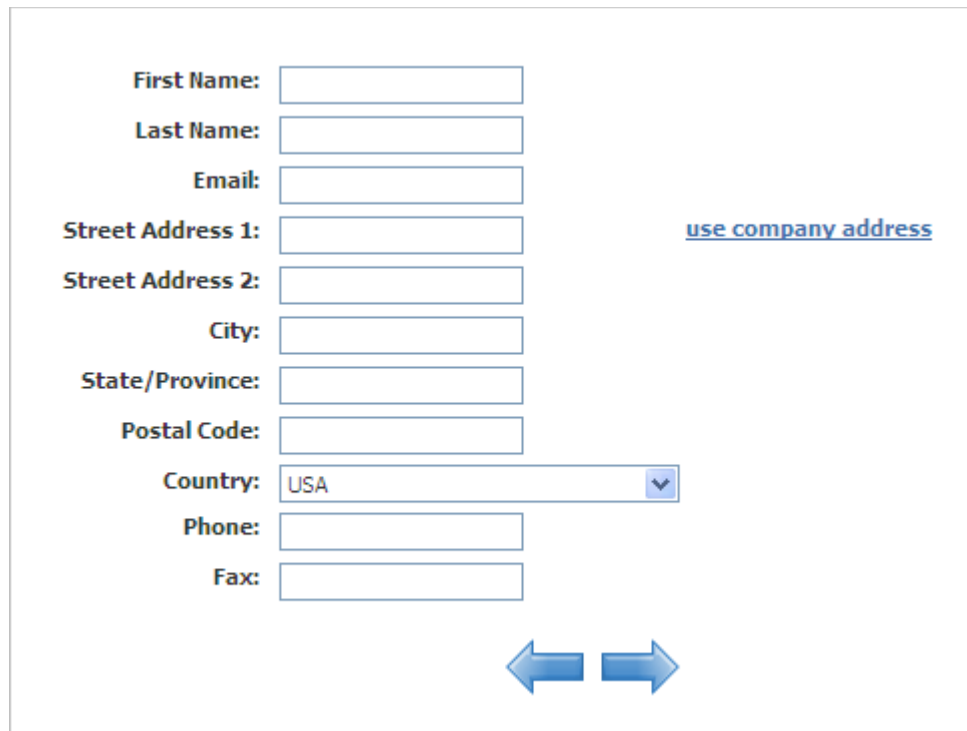

The supplier fills in the company information and clicks the next page icon (). The Contact Information page is displayed, as [Figure 2–4](#) shows:

Figure 2–4 Contact Information page

The screenshot shows a registration form for contact information. The fields are arranged vertically on the left side of the form:

- First Name:
- Last Name:
- Email:
- Street Address 1:
- Street Address 2:
- City:
- State/Province:
- Postal Code:
- Country: (dropdown menu)
- Phone:
- Fax:

To the right of the address fields, there is a blue underlined link that reads [use company address](#).

At the bottom center of the form, there are two blue arrow icons: one pointing left and one pointing right.

This is the second registration page where a supplier provides contact information. The following fields are required:

- First Name
- Last Name
- Email
- Street Address 1
- City
- State/Province
- Postal Code
- Country
- Phone
- Fax

The supplier fills in the fields and clicks the next page icon () to go forward, or clicks the previous page icon () to update information on prior pages. The supplier can click the **use company address** link and the system will populate the address fields from the previous page. Clicking the next page icon () displays the Username & Password page, shown in [Figure 2–5](#).

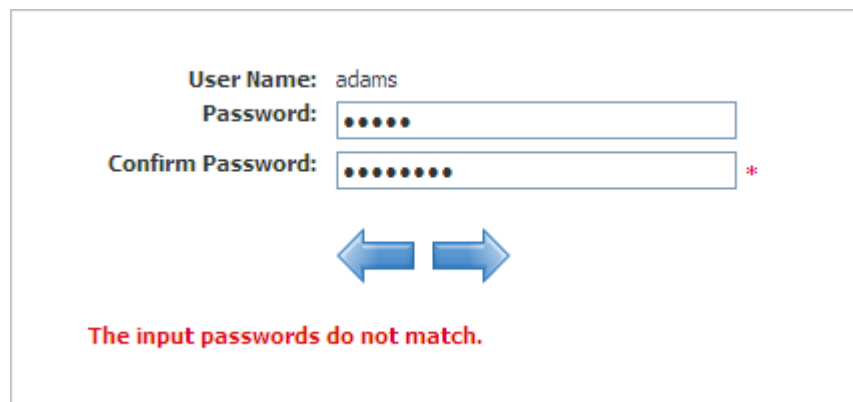

Figure 2–5 Username & Password page

The screenshot shows a registration form with three fields: "User Name:" with the value "adams", "Password:" with an empty text box, and "Confirm Password:" with an empty text box. Below the fields are two blue arrows, one pointing left and one pointing right, indicating navigation options.

This is the third page of the registration process. The User Name field displays the system defined user name. The supplier enters a password in the **Password** field, and confirms it by typing it again in the **Confirm Password** field.

If the passwords do not match, an error message is displayed as shown in [Figure 2–6](#).

Once a valid user name and password is entered, the supplier can click the previous page icon (←) to update information on prior pages, or move forward by clicking the next page icon (→).

Figure 2–6 Error message

The screenshot shows the same registration form as Figure 2–5, but with the "Password:" field containing five dots and the "Confirm Password:" field containing eight dots. A red asterisk (*) is visible to the right of the "Confirm Password:" field. Below the fields are two blue arrows, one pointing left and one pointing right. At the bottom of the form, the text "The input passwords do not match." is displayed in red.

The Registration Summary page, shown in [Figure 2–7](#), is the final place for the supplier to review the information provided before submitting the registration request.

Figure 2–7 Registration Summary page

Please review the information below. If it is correct, click the submit button to submit your application for inclusion in the CPI Vendor Quality Program website.

| | | | |
|--------------------------|---------------------|--------------------------|----------------------------|
| Company Name: | Global Foods | First Name: | Sarah |
| Company Web Site: | www.globalfoods.com | Last Name: | Adams |
| Street Address 1: | 100 Main Street | Email: | sarahadams@globalfoods.com |
| Street Address 2: | Suite 100 | Street Address 1: | 100 Main Street |
| City: | Dallas | Street Address 2: | Suite 100 |
| State/Province: | TX | City: | Dallas |
| Postal Code: | 55555 | State/Province: | TX |
| Country: | USA | Postal Code: | 55555 |
| Phone: | 555-111-2222 | Country: | USA |
| Fax: | 555-222-3333 | Phone: | 555-111-2222 |
| | | Fax: | 555-222-3333 |

When the supplier clicks **Submit**, the request is sent to the Supplier Portal Administration (SPA) application. The Thank You confirmation page, shown in [Figure 2–8](#), is displayed. The Thank You page confirms that the request has been successfully sent. The supplier now waits for approval from the Supplier Portal administrator.

Figure 2–8 Thank You page

Thank you for registering with the CPI Vendor Portal Quality Program website. Your application will be reviewed for inclusion. If accepted, you will be notified electronically.

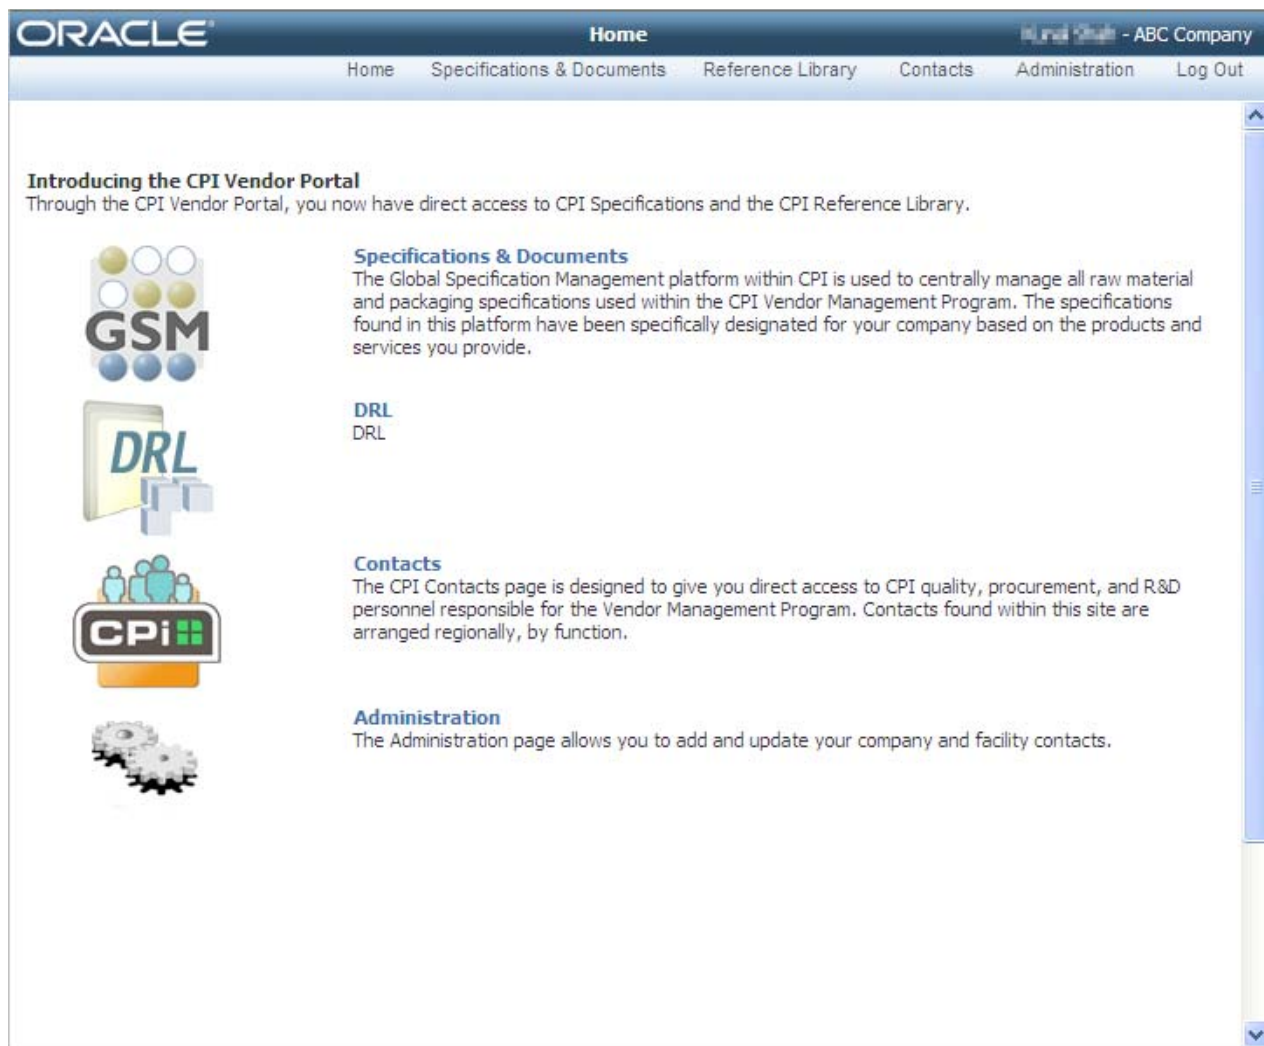

The administrator accesses Supplier Portal Administration (SPA) and views the registration request. The administrator can either grant or deny the request from the supplier. When the administrator approves the request from the supplier, the supplier will receive an email confirming that the request has been granted. The administrator will also associate the appropriate companies and facilities to the supplier, as this will determine the specification and contact information the supplier will see in Supplier Portal. Refer to [Chapter 3, "Using Supplier Portal Administration"](#) for more information.

When the administrator grants the request from the supplier, the supplier will be sent an email confirming that the request has been granted.

Once logged into Supplier Portal, the supplier will be able to view those specifications for which they have sourcing approvals. Several criteria are used to decide which specifications will be visible to the supplier. These are described in more detail later in this chapter.

On logging in, the supplier will see the page shown in [Figure 2–9](#). This is the Home page of Supplier Portal.

Figure 2–9 Home page

The supplier can perform the following tasks using Supplier Portal:

- View raw material specifications such as material, product, printed packaging, packaging material, trade, and equipment specifications
- View public documents attached to these specifications
- View related specifications
- View sourcing approvals
- View public documents attached to the sourcing approvals
- Approve specifications by sending an electronic signature
- Submit changes to specifications by creating and sending a supplier-initiated questionnaire
- View selected documents in the Document Reference Library (DRL)
- View selected documents attached to the supplier

- View selected documents attached to facilities
- Manage contact information for companies and facilities that the supplier has been associated with

You can log out of Supplier Portal by clicking **Log Out** in the navigation bar. Supplier Portal displays the login page with a message verifying a successful logout.

Viewing Specifications

The supplier can view specification-related information by clicking **Specifications & Documents** from the Home page. The Action Items page only displays if the supplier has action items. This page contains specifications awaiting approval from the supplier, as [Figure 2-10](#) shows. The Action Item page only displays specifications where the sourcing approvals related to the specifications contain the 'Supplier Review' tag in their WFA template's step.

Figure 2-10 Action Items tab

| <div> <div>Action Items</div> <div>Specification(s)</div> <div>Documents</div> </div> | | | | | | |
|--|----------------|-----------------|-----------------------|-------------------------|-----------------|--|
| <div> <div>Group By:</div> <div>Receiving Facilities</div> <div>Order By:</div> <div>Spec Name</div> <div>Refresh</div> </div> | | | | | | |
| <div> <div>Europe Quality Center</div> <div>Results Per Page</div> <div>20</div> </div> | | | | | | |
| Spec Name | Source Company | Source Facility | Receiving Facilities | Sourcing Status | Supplier Item # | Sourcing Documentation |
| My Burger (5079816-002 - Draft) | ABC Company | ABC Facility | Europe Quality Center | Pending Supplier Review | |  |
| 1 | | | | | | |

The listing displays the name of the specification in addition to sourcing approval information.

The Action Items and Specifications tabs include two drop-down lists used to categorize the specification listing. By default, specifications are sorted by receiving facility and then ordered by specification name inside each facility grid.

- Group By** — Select a choice to group the specifications by:
 - Source Company
 - Source Facility
 - Receiving Facilities
 - Status
 - -- No grouping (The supplier would select this to only use the Order By option)
- Order By** — Select a choice to order the specifications by:
 - Spec Name
 - Source Company
 - Source Facility
 - Status
 - Supplier Item #

The supplier clicks the **Refresh** button after making selections from the drop-down lists. Each group is paged. Select the **Results Per Page** drop-down to control how many specifications are listed in each grid. The default value is 20.

Select the numbers in the footer of the grid to see the next page of specifications. See [Figure 2-11](#).

Figure 2-11 Specification(s) tab

Select the number of specifications to view per grid. The default is 20.

Action Items **Specification(s)** Documents

Group By: Receiving Facilities Order By: Spec Name Refresh

ABC Foods - Atlanta Results Per Page 20

| Spec Name | Source Company | Source Facility | Receiving Facilities | Sourcing Status | Supplier Item # | Sourcing Documentation |
|---|---------------------------|-----------------|----------------------|-----------------|-----------------|------------------------|
| Can - 300 mL - Aluminum (5083196-001 - Draft Review) | Pello Grocery Products Co | Angus Facility | ABC Foods - Atlanta | Draft | | |

Angus Facility Results Per Page 20

| Spec Name | Source Company | Source Facility | Receiving Facilities | Sourcing Status | Supplier Item # | Sourcing Documentation |
|--|---------------------------|-----------------|----------------------|-----------------|-----------------|------------------------|
| Tomato Paste - Grade A Fancy (5077420-001 - Approved) | Pello Grocery Products Co | Angus Facility | Angus Facility | Draft | 123 | |

Empty group data (Receiving Facilities) Results Per Page 20

| Spec Name | Source Company | Source Facility | Receiving Facilities | Sourcing Status | Supplier Item # | Sourcing Documentation |
|--|---------------------------|---------------------|----------------------|-----------------|-----------------|------------------------|
| 014218 - CU (co-pack) (5103582-003 - Draft) | ABC Company | ABC Company | | Draft | 123 | |
| BBQ Beef and Vegetable Dinner - 11 oz (5077539-004 - Approved) | ABC Company | ABC Company | | Draft | | |
| Fly Burger (5079816-002 - Draft) | Pello Grocery Products Co | Angus Facility | | Draft | | |
| Salt for Brining (5077503-001 - Approved) | Pello Grocery Products Co | Fort Worth Facility | | Draft | | |
| Swing Door Cooler - LSR-510RDB-CK (5080152-001 - Requested for Certification) | ABC Company | ABC Facility | | Draft | | |

Each specification is listed with the following key information:

- **Spec Name** — The specification name
- **Source Company** — The company sourcing this specification
- **Source Facility** — The facility sourcing this specification
- **Receiving Facilities** — The facilities that receive this specification
- **Sourcing Status** — The status of the sourcing approval (draft, approved, etc.)
- **Supplier Item #** — The unique material ID assigned by the supplier. The Supplier Item # is found on the sourcing approval.
- **Sourcing Documentation** — The field displays attachments associated with a sourcing approval. It does not include sourcing approval supplier documents.

Publishing Specifications

Printing and Viewing a Specification

The supplier can print a specification. From the Action Items tab or the Specifications tab, the supplier clicks on the Spec Name link to view details about the specification in the Print dialog box, as [Figure 2–12](#) shows.

Figure 2–12 Print dialog box

Print

Cancel

Print Format:

US - letter

The specification you have selected includes one or more sections. Please indicate the section(s) you wish to print using the checkbox provided in the "Sections" column, then click the "Print" option in the upper right-hand corner of this screen. PLEASE NOTE THAT EACH SECTION MAY CONTAIN ONE OR MORE SUPPORTING DOCUMENTS AS INDICATED IN THE "Attachments" COLUMN. YOU MAY OPEN/DOWNLOAD THESE ATTACHMENTS INDIVIDUALLY BY CLICKING ON EACH FILE NAME.

| Specification Type | Sections | Attachments |
|-----------------------|---|--|
| Current Specification | <input type="checkbox"/> Tomato Paste - Grade A Fancy (5077420-001) | |
| | <input type="checkbox"/> 5012711 - Angus Facility / Angus Facility | |
| | <input type="checkbox"/> Nutrient Composition | |
| Master Specifications | <input type="checkbox"/> Supporting Documentation | picture - 2006+logow.jpg |
| | <input type="checkbox"/> Rich Text - please read | |

Information printed from this dialog box reflects the data as it currently exists in GSM. The supplier can decide to print the details of the specification or details about related specifications. In the figure above, the primary specification has several related specifications.

The supplier can also print the shared documents and the associated sourcing approval attached to the specification. Only the sourcing approval that is tied to the supplier registrant will be accessible. The sourcing approval print includes:

- Company Name

■ Sourcing Type

■ Protocol ID

■ Cross References grid

■ Sourcing Facility Name

■ Supplier Item #

■ Class

■ All Custom Data (Extended Attributes and Custom Sections)

■ Receiving Facilities grid

■ Supplier Signed Info

■ Notes

■ Sourcing Approval Status

Note: Attachments and SDM will not be included in the print out.

The supplier selects one of the following options from the Print Format drop-down list:

US - letter —Standard U.S. 8x11 inch paper (default)

Europe - A4 — Standard international A4 sized paper

Once the supplier has made selections, clicking **Print** generates a document with the selected information from the Print dialog box. The supplier can then print the file as needed.

Access Control and Visibility

The visibility and access control of information in the Supplier Portal is managed at several levels.

Controlling Access

As described earlier in this chapter, a registrant must have an approved user name and a password to access Supplier Portal. In addition, the registrant can only see information about companies or facilities that he or she has been associated with by the Supplier Portal administrator. The registrant can not access information related to other partners and suppliers.

Controlling Visibility

Users working in Global Specification Management (GSM) and Supply Chain Relationship Management (SCRM) have the ability to control the information that the approved registrant can view in Supplier Portal. For GSM specifications to be visible to the supplier, the following criteria have to be met:

- The GSM specification must be in a workflow step on which the Tag is set to "Publish to Supplier Portal" and
- The sourcing approval for that specification must be in a workflow step on which the Tag is set to "Publish to Supplier Portal"

If either of the two conditions is not true, the specification will not be visible on the Supplier Portal.

For more information on workflow steps, refer to the *Agile Product Lifecycle Management for Process Administrator User Guide*.

The following objects' visibility can be controlled through tags set in GSM:

- Attachments
- %Breakdowns
- Shelf Life
- Custom Sections
- Extended Attributes

See the *Agile Product Lifecycle Management for Process Global Specification Management User Guide* for more details.

Note: The material specification's substitutes grid is not available to the supplier.

Supplier company contacts and facility contacts will be visible in Supplier Portal only if the **Publish to Supplier Portal** field is selected in SCRM. Documents attached to supplier company and facility will be visible in Supplier Portal only if the **Publish to Supplier Portal** field is selected in SCRM. See the *Agile Product Lifecycle Management for Process Supply Chain Relationship Management User Guide* for more details.

Notifying the Supplier

The supplier can be notified when the specification is published to the Supplier Portal. When the tag of "Send Notification to Sourcing Supplier" is added to the sourcing approval's WFA step, an email will be sent to the supplier when the sourcing approval transitions. See the WFA chapter of the *Agile Product Lifecycle Management for Process Administrator User Guide* for more information.

Supplier Actions

Suppliers can use Supplier Portal to approve specifications and initiate changes to a specification.

Approving Specifications

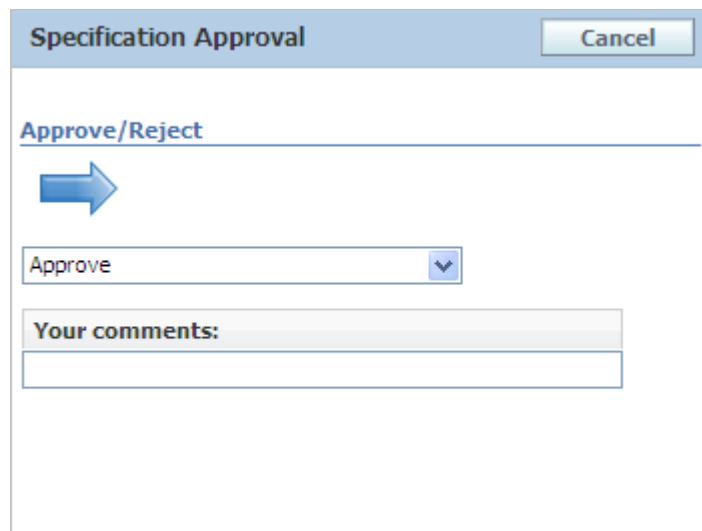

Suppliers can view the specification by clicking the hyperlinked **Spec Name** field, as described in "[Printing and Viewing a Specification](#)" on page 2-12. Suppliers can take action on a specification, providing an electronic signature, by clicking the supplier actions icon (). The Suppliers Action dialog box displays, as [Figure 2-13](#) shows.

Figure 2-13 Supplier Actions dialog box

Suppliers can approve or reject a specification by selecting the **Approve/Reject** link. When the Approve/Reject link is selected, the Supplier Actions dialog box closes and the Specification Approval dialog box displays, as [Figure 2-14](#) shows.

Figure 2–14 Specification Approval dialog box

The dialog box is titled "Specification Approval" and has a "Cancel" button in the top right corner. Below the title bar, there is a section header "Approve/Reject" followed by a blue right-pointing arrow icon. Underneath the icon is a drop-down menu currently showing "Approve". Below the drop-down menu is a text area labeled "Your comments:".

The supplier enters any comments related to the approval or rejection of the specification in the Your Comments field (required), and then chooses from the options in the drop-down field. These options may vary based on your configuration. A simple example would be the following options:

Approve — Approves the specification

Reject — Rejects the specification

Note: The name of these options are based on the WFA template step names that contain the tags 'supplier approved' and 'supplier rejected.' Refer to the *Agile Product Lifecycle Management for Process Administrator User Guide* for more information.

The supplier clicks the move step forward icon () to submit the approval or rejection. The specification no longer appears in the Action Items list. Based on the supplier action, the associated sourcing approval will be advanced in its workflow to the specified approved/rejected status. The supplier's comments and action will be captured on the sourcing approval's audit trail tab. If the supplier approved the specification, the sourcing approval's Supplier Signed Spec field will be checked and dated, and comments will be captured.

Sourcing Approval Owner Notification

When the supplier submits accept/reject, the owners of the sourcing approval will be notified by email informing them of the supplier's actions. (If the owner is a group then all users of that group will be emailed.) The email is configurable and includes the following variables:

- | | | |
|---|----------------------------------|------------------------------|
| ■ <Approver First Name> | ■ <Approver Last Name> | ■ <Approved/Rejected Action> |
| ■ <specification Number> | ■ <specification version number> | ■ <Specification Name> |
| ■ <cross reference system name-equivalent number> | ■ <Date Stamp> | ■ < Time Stamp> |
| ■ <approver comments> | | |

Note: Emails are not sent until a workflow transition occurs.

Sample Email A sample email follows:

```
SUBJECT:
<Approved/Rejected Action>: <Specification
Name>(<specification Number>-<specification version
number>, <cross reference system name-equivalent number>)
MESSAGE:
<Approver Supplier First Name><Approver Last Name>
<Approved/Rejected> the specification <Specification
Name>(<specification Number>-<specification version
number>, <cross reference system name-equivalent number>)
on <Date Stamp> at <Time Stamp>. They included the
following comments:
<comments>
Sample:
REJECTED: Chicken Nuggets (50001232-001, SAP -
1254516-02341, ORC - 00034503.)
John Supplier rejected the specification Chicken Nuggets
(50001232-001, SAP - 1254516-02341, ORC - 00034503.) an May
5, 2008 at 3:42pm. They included the following comments:
The peanut allergen is missing from the specification.
```

Access Control and Visibility

For the supplier to provide an electronic signature, the following conditions must be met:

- The sourcing approval must be in a status with the "Supplier Review" tag. The sourcing approval workflow template must contain the appropriate supplier approved and supplier rejected tagged statuses.
- Registrants receiving the email that the specification is ready for review must have a valid email address.

- The specification and sourcing approval status must contain the "Publish to Supplier Portal" tag.

For more information on workflow templates, refer to the "Using WFA to Manage SCRM Workflows" chapter in the *Agile Product Lifecycle Management for Process Administrator User Guide*.

Initiating a Questionnaire for a Specification

From the Action Items and/or Specifications tab(s), the supplier can initiate a questionnaire for the associated specification. The supplier clicks on the supplier action icon (). In the Supplier Actions dialog box, shown in [Figure 2-13](#), on page 2-14, the supplier clicks on **Submit Changes**.

When the **Submit Changes** button is selected, a new questionnaire is created, and the eQuestionnaire Welcome page is displayed. The supplier can now login to eQ and fill out the questionnaire. For more information, refer to the *Agile Product Lifecycle Management for Process eQuestionnaire User Guide*. At the same time, an email is sent to the supplier who initiated the questionnaire. This content of this email is configurable. This email contains a link to the questionnaire just created.

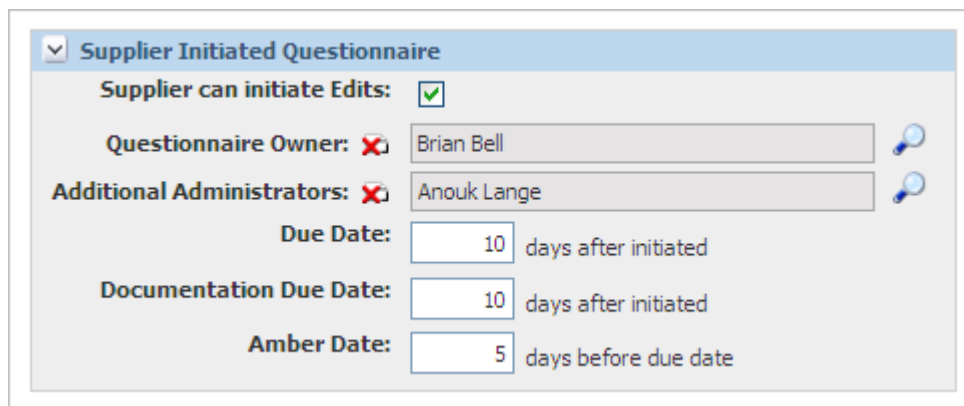

For more information, on questionnaires, refer to the *Agile Product Lifecycle Management for Process eQuestionnaire User Guide*. Refer to the *Agile Product Lifecycle Management for Process Supply Chain Relationship Management User Guide* for more information on sourcing approvals.

Access Control and Visibility

For the supplier to initiate a questionnaire, the following conditions must be met:

- The eQuestionnaire (eQ) application is installed.
- Supplier-initiated questionnaires must be configured on.
- The specification and sourcing approval status must contain the "Publish to Supplier Portal" tag.
- An eQ template needs to be created for each specification type.
- The "Supplier can initiate Edits" field is checked on the sourcing approval, as [Figure 2-15](#) shows.

Refer to the *Agile Product Lifecycle Management for Process eQuestionnaire User Guide* for more information.

Viewing Supplier and Facility Documents

The Documents tab lists all the shared supplier documents and attachments that are included on company and facility profiles. Documents must be marked as "Publish to Supplier Portal" in SCRM to be displayed.

Figure 2–16 shows documents attached to the supplier company and facilities.

Figure 2–16 Specifications & Documents page, Documents tab

Figure 2–16 above shows the hierarchy of how the documents are stored. The Supplier Document Type feature works much like a folder in that it holds related files in one spot. You can click the expand node icon () to expand the listing, or "open" the folder. Files can be attached independently to a company or facility (as attachments) or can be included in a supplier document. The dashed lines show where the documents are attached. Click any linked file name to open the file.

Viewing Document Reference Library

This page shows Document Reference Library (DRL) catalogs and documents available to the supplier. This visibility is set up in SCRM under the DRL Catalog tab on the company profile. The catalogs and documents are set up in DRL. The supplier has access to documents attached in DRL if:

- The document belongs to a document catalog that is associated with the supplier's company, and
- The document is marked "Publish to Supplier Portal" in the DRL application

The supplier can view the DRL catalogs and the documents in the catalog by clicking the **Reference Library** link. [Figure 2–17](#) displays the Reference Library page.

Figure 2–17 Reference Library page

A DRL document can have one or more files called attachments. Clicking the DRL document name will display the DRL document's identifying information and all of its attachments, as shown in [Figure 2–18](#).

Figure 2–18 DRL document detail

| Document Name: New Grounds | | |
|-------------------------------------|---------------------------------------|-----------|
| Document Number: 0000744-001 | | |
| Attachments | | |
| Title | File Name | File Size |
| ppt | 2007-Jan-CustomerRoadmap-Draft-v7.ppt | 363520k |
| valley | valley.jpg | 396509k |

The supplier can click on an individual attachment to view or print it.

Refer to the *Agile Product Lifecycle Management for Process Document Reference Library User Guide* for more details on DRL. Refer to the *Agile Product Lifecycle Management for Process Supply Chain Relationship Management User Guide* for more details on SCRM.

Displaying Your Company and Facility Contacts to a Supplier

Clicking the **Contacts** link from the Home page displays the Contacts page shown in [Figure 2–19](#). This page displays all facilities tied to a business unit.

Note: The Contact link displays on the Home page only if it is configured on. For more information on this feature, refer to the BUFacilitySearchPattern configuration key described in the *Agile Product Lifecycle Management for Process Configuration Guide*.

Select a business unit from the drop-down list and click **Search**. All facilities within that business unit are displayed.

Figure 2–19 *Contacts page*

The screenshot shows the 'Search Criteria' section with a dropdown menu set to 'CPI Facilities - North America' and a 'Search' button. Below this is a table with six columns: Facility #, Facility Name, Company Name, City, State/Province, and Country. The table contains four rows of facility data.

| Facility # | Facility Name | Company Name | City | State/Province | Country |
|------------|-------------------------------------|---------------------------|---------|----------------|---------|
| 5011701 | ABC Foods - Atlanta | ABC Foods | Atlanta | GA | USA |
| 5012313 | ABC Company | ABC Company | Dallas | Florida | USA |
| 5011205 | ABC Facility | ABC Pizza Company | Dallas | TX | USA |
| 5010719 | Anqus Facility | Pello Grocery Products Co | | | USA |

Select a facility from the Facility Name column. Supplier Portal displays the Facility Information dialog box shown in [Figure 2–20](#).

Managing Supplier Contact Information

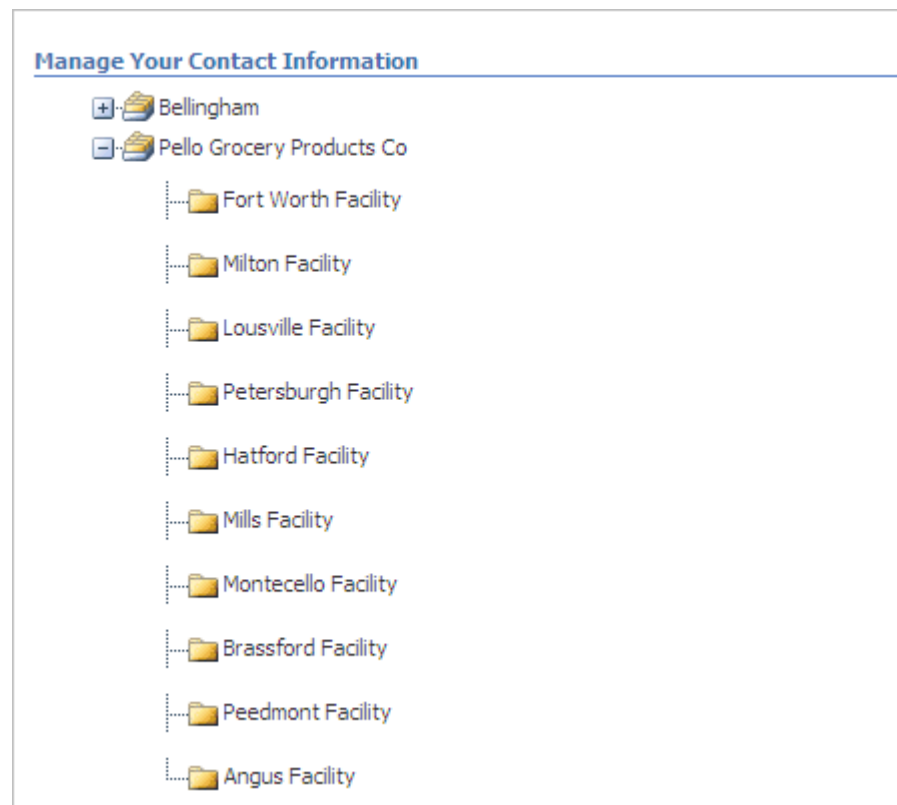

Supplier contact information can be shared from the Supply Chain Relationship Management (SCRM) application. If the contact information is shared, the supplier can view and manage that information from Supplier Portal.

The manage contact feature enables suppliers to manage their contact information and keep it accurate on an ongoing basis.

Clicking the **Administration** link displays the Administration page shown in [Figure 2-23](#).

Note: The Administration link displays only if the contact has at least one associated supplier. This association is made in Supplier Portal Administration (SPA).

Figure 2-23 Administration page, Manage Your Contact Information

In SCRM, contacts can be assigned at both the company and facility level. The supplier sees all the companies and facilities he or she has been assigned to. This page lists all of the contacts that are set to be published to the supplier. The contacts are listed by company and further filtered by facility.

The supplier selects the company name to see the company contacts located on the company profile, or selects the facility name to see the facility contacts located on the facility profile.

Refer to [Chapter 3, "Using Supplier Portal Administration"](#) for more information on how an administrator associates a supplier to a contact. The supplier can click on

either a supplier’s company or a facility name to view the associated contacts.
Figure 2–24 shows the summary page for the selected company or facility.

| 1 | | | | | | |

Add New

The supplier has several options for managing contacts:

- Clicking the name link displays the details about the supplier contact.
- Clicking the delete icon (✖) deletes the contact.
- Clicking **Add New** displays the Contact Information page, shown in Figure 2–25. The supplier creates a new contact using this page.
- Clicking the **Done** button saves changes made to the contact.

Note: When a new contact is added to Supplier Portal, the contact is added to the corresponding company or facility in SCRM.

The Contact Information dialog box provides contact details, as shown in Figure 2–25.

Using Supplier Portal Administration

This chapter describes how an administrator uses Supplier Portal Administration. It includes the following topics:

- [Accessing Supplier Portal Administration](#)
- [Processing New Registration Requests](#)
- [Managing Approved Registrations](#)
- [Managing Rejected Registrations](#)
- [Managing Deactivated Registrations](#)

Accessing Supplier Portal Administration

Note: This chapter is written for company administrators who use Supplier Portal Administration (SPA) to manage suppliers who register for and use Supplier Portal.

Company administrators use the Supplier Portal Administration (SPA) application to control access to Supplier Portal. The SPA menu choices represent administrative tasks associated with Supplier Portal registrations, as [Figure 3–1](#) shows:

Figure 3–1 *Menu choices*

The following menu choices are available:

- **New Registrations** — Use this option to manage requests from users wanting to access Supplier Portal for the first time.
- **Approved Registrations** — Use this option to manage all approved users.

- **Rejected Registrations** — Use this option to manage all users who were not approved.
- **Deactivated Registrations** — Use this option to manage users who were once approved and are now deactivated.

Processing New Registration Requests

When a supplier requests access to Supplier Portal, a new registration request is created in SPA. The New Registrations page lists registrants waiting for approval, as shown in [Figure 3–2](#).

Figure 3–2 *New Registrations page*

| New Registrations | | | |
|------------------------------|--------------|--------|-----------------------|
| Results Per Page: 10 ▼ | | | |
| Name | Company | Login | Registered |
| Adams, Sarah | Global Foods | sadams | 5/31/2011 10:45:00 AM |
| Smith, Sam | XYZ | ssmith | 8/31/2010 4:06:45 PM |
| Clark, Madge | | mclark | 5/13/2009 12:33:02 PM |

Supplier Representative Editor Page

Clicking the hypertext name link located in the gray shaded area displays the registration request on the Supplier Portal Registrant page, as shown in [Figure 3–3](#).

| Company # | Company Name |
|-----------|--------------------------|
| 5010731 | ABC Food Ingredients Co. |

Associated Facilities

| Facility # | Facility Name | Company Name |
|------------|---------------------|--------------|
| 5011701 | ABC Foods - Atlanta | ABC Foods |

The administrator uses the three tabs on this page to review and approve the registrant.

Company Information Tab

The Company Information tab displays all the company information that the registrant supplied. The administrator can use this page to update the company information if necessary. Note that the new registrant is not yet associated with any company or facility in SCRM.

Associated Companies and Associated Facilities are key fields. The administrator uses these fields to tie a supplier to companies or facilities. Doing so affects what data the supplier will see inside Supplier Portal.

Click **Edit** to open the page in edit mode.

Assigning Companies or Facilities to a Supplier Portal User

For a registrant to be able to view specifications and contact information in Supplier Portal, he must be associated with one or more companies or facilities. The Associated Companies section contains a table with associated companies; the Associated Facilities section contains a table with associated facilities.

The administrator clicks **Add New** under either table to assign a company or facility to the registrant. This action displays the standard search page. The administrator selects one or more companies or facilities, then clicks **Done**.

Note: If a facility is assigned to a registrant, only the specifications, documents and contacts for that facility will be available for viewing. If a company is assigned to the registrant, data for all facilities belonging to that company will be available for viewing.

Added companies and facilities are displayed in the Associated Companies and Associated Facilities sections, as shown in [Figure 3-4](#).

Clicking the delete icon (X) removes the associated company or facility.

Contact Information Tab

The Contact Information tab, shown in [Figure 3–5](#), displays the contact information that the registrant has provided.

Figure 3–5 Contact tab with registrant information in edit mode

The screenshot shows a web interface for editing registrant information. At the top, there's a header with a logo, the name 'Joseph Foodscientist (ABC, Inc.)', the role 'Supplier Portal Registrant', and a 'New' button. Below the header are three tabs: 'Company Information', 'Contact Information' (which is active), and 'Status/Actions'. The 'Contact Information' tab is expanded, showing a form with the following fields:

- Contact Search Enabled:** A checkbox that is checked.
- First Name:** Text input with 'Joseph'.
- Last Name:** Text input with 'Foodscientist'.
- User Name:** Text input with 'foodscientist'.
- Email:** Text input with 'joefoods@abcfoods.com'.
- Street Address 1:** Text input with '123 Elm Street'.
- Street Address 2:** Empty text input.
- City:** Text input with 'San Francisco'.
- State/Province:** Text input with 'CA'.
- Postal Code:** Text input with '94212'.
- Country:** A dropdown menu showing 'USA' with a search icon to the right.
- Phone:** Text input with '555-222-3333'.
- Fax:** Text input with '555-123-4321'.

The user name is automatically generated by the system. The administrator can change the user name if needed.

Status/Actions Tab

The Status/ Actions tab, shown in [Figure 3–6](#), displays the current status of the registrant. This tab has three sections:

- **Next Action** — Shows the actions possible on this user at this time. The administrator can either approve or reject a new request by clicking the appropriate button. The system sends an email if the registrant is approved.
- **Current Status** — Displays the time stamp when the request was made and the status of the user request.
- **Event History** — Displays events that have been performed.

Figure 3–6 Status/Actions tab

The screenshot shows the 'Status/Actions' tab for a new supplier registration. The header includes the user 'Joseph Foodscientist (ABC, Inc.)' and the title 'New'. The tab is divided into three sections: 'Next Action', 'Current Status', and 'Event History'.

Next Action

| | |
|----------------|--|
| Approve | This action will approve the submitted application and enable the user to log into the Vendor Portal |
| Reject | This action will reject the submitted application and not allow the user to log into the Vendor Portal |

Current Status

Registration Date: 12/17/2007 4:27 PM
Current Status: New

Event History

| Event | User | Time |
|--|-------------|-------------------|
| Added Company - ABC Food Ingredients Co. | Sarah Adams | 2/28/2011 9:43 AM |
| Added Facility - ABC Foods - Atlanta | Sarah Adams | 2/28/2011 9:43 AM |

If the administrator clicks **Approve**, the current status will change to "Approved" and an event will be added to Event History. On approval, an email will be sent to the registrant, informing him that his account is now active.

At this point, the registration request will no longer be visible on the New Registrations page.

If the administrator clicks **Reject**, the current status will change to "Rejected" and an event will be added to Event History.

At this point, the registration request will no longer be visible on the New Registrations page and will be visible on the Rejected Registrations page.

The administrator must click **Save** or **Save & Close** for the changes to take effect.

Managing Approved Registrations

The Approved Registrations page displays all of the registrants that have been approved to access Supplier Portal, as [Figure 3-7](#) shows.

Figure 3-7 *Approved Registrations page*

| Name | Company | Login | Approved |
|-----------------------------|-----------|-------|----------------------|
| Smith, Mike | ABC Foods | smith | 5/17/2007 3:32:35 PM |

To obtain more information about the registrant, the administrator can click on the first and last name link on the Approved Registrations page. The Supplier Portal Registrant page displays, as described beginning on page 3-2. The administrator clicks **Edit** to edit information on this page. [Figure 3-8](#) shows the page in edit mode.

Figure 3-8 *Supplier Portal Registrant page, Status/Actions tab in edit mode*

| Event | User | Time |
|---|-------------|------------------|
| Added Company - ABC Company | Sarah Adams | 2/6/2008 2:04 PM |
| Added Facility - Archer Daniels Midland Corn SW | Sarah Adams | 2/6/2008 2:05 PM |
| Approved | Sarah Adams | 2/6/2008 2:06 PM |

To deactivate a registrant, the administrator clicks **Deactivate** on the Status/ Actions tab, then **Save**. A deactivated user can no longer access Supplier Portal and will not be visible on the Approved Registrations page. The registrant will be visible on the Deactivated Registrations page.

Managing Rejected Registrations

The Rejected Registrations page displays all of the registrants who have been rejected access to Supplier Portal, as [Figure 3–9](#) shows:

Figure 3–9 Rejected Registrations page

| Name | Company | Login | Rejected |
|-----------------------------|-------------------|--------|----------------------|
| Jones, Trey | ABC Manufacturing | tjones | 4/23/2009 2:20:29 AM |

The administrator clicks on the first and last name link to view more information about the registrant. The Supplier Portal Registrant page displays, as described beginning on page 3-2. The administrator clicks **Edit** to edit information on this page, as shown in [Figure 3–10](#):

Figure 3–10 Supplier Portal Registrant page, Status/Actions tab in edit mode

| Event | User | Time |
|----------|-------------|--------------------|
| Rejected | Sarah Adams | 2/28/2011 10:30 AM |

To activate the rejected registrant, the administrator clicks **Approve** on the Status/Actions tab, and then **Save**. Once approved, the registrant will be able to access the Supplier Portal site. The registrant will no longer be visible on the Rejected Registrations page and will be visible on the Approved Registrations page.

Managing Deactivated Registrations

The Deactivated Registrations page displays all of the registrants that have been deactivated. Deactivated registrants are users that do not have access to Supplier Portal. Deactivated registrants were active users at one time. Figure 3–11 shows the Deactivated Registrations page.

Figure 3–11 Deactivated Registrations page

| Name | Company | Login | Deactivated |
|-------------------------------|-------------|--------|----------------------|
| Orange, Jerry | LBK Oranges | orange | 4/23/2009 2:33:05 AM |

The administrator clicks on first and last name link to obtain more information about the registrant. The Supplier Portal Registrant page displays, as described beginning on page 3-2. The administrator clicks **Edit** to edit information on these tabs, as shown in Figure 3–12.

Figure 3–12 Supplier Portal Registrant page, Status/Actions tab in edit mode

| Event | User | Time |
|---------------------------|-------------|--------------------|
| Approved | Sarah Adams | 5/17/2007 3:32 PM |
| Added Company - ABC Foods | Sarah Adams | 5/17/2007 9:23 PM |
| Deactivated | Sarah Adams | 9/13/2007 10:26 AM |

To activate the user, the administrator clicks **Reactivate** on the Status/ Actions tab, then **Save**. Once reactivated, a user will be able to access the Supplier Portal site. The user will no longer be visible on the Deactivated Registrations page and will be visible on the Approved Registrations page.
