ABOUT THIS MANUAL

Agile Product Lifecycle Management for Process Documentation

The Agile Product Lifecycle Management (PLM) for Process documentation set includes Adobe® Acrobat™ PDF files. The Oracle Technology Network (OTN) Web site: <http://www.oracle.com/technetwork/documentation/agile-085940.html> contains the latest versions of the Agile PLM for Process PDF files. You can view or download these manuals from the Web site, or you can ask your Agile administrator if there is an Agile PLM for Process Documentation folder available on your network from which you can access the Agile PLM for Process documentation (PDF) files.

Note To read the PDF files, you must use the free Adobe Reader™ version 7.0 or later. This program can be downloaded from the Adobe Web site: <http://www.adobe.com/>.

If you need additional assistance or information, please go to <http://metalink.oracle.com> or phone 1.800.233.1711 for assistance.

Before calling Oracle Support about a problem with an Agile PLM for Process manual, please have the full part number, which is located on the title page.

TTY Access to Oracle Support Services

Oracle provides dedicated Text Telephone (TTY) access to Oracle Support Services within the United States of America 24 hours a day, 7 days a week. For TTY support, call 800.446.2398. Outside the United States, call +1.407.458.2479.

Agile Training Aids

Go to the Oracle University Web page http://www.oracle.com/education/chooser/selectcountry_new.html for more information on Agile Training offerings.

Accessibility of Code Examples in Documentation

Screen readers may not always correctly read the code examples in this document. The conventions for writing code require that closing braces should appear on an otherwise empty line; however, some screen readers may not always read a line of text that consists solely of a bracket or brace.

Accessibility of Links to External Web Sites in Documentation

This documentation may contain links to Web sites of other companies or organizations that Oracle does not own or control. Oracle neither evaluates nor makes any representations regarding the accessibility of these Web sites.

Audience

This guide is intended for end users who are responsible for creating and managing information in Agile Product Lifecycle Management for Process. Information about administering the system resides in the *Agile Product Lifecycle Management for Process Administrator User Guide*.

Variability of Installations

Descriptions and illustrations of the Agile PLM for Process user interface included in this manual may not match your installation. The user interface of Agile PLM for Process applications and the features included can vary greatly depending on such variables as:

- ❑ Which applications your organization has purchased and installed
- ❑ Configuration settings that may turn features off or on
- ❑ Customization specific to your organization
- ❑ Security settings as they apply to the system and your user account

Where to Find Information

Consult the table below to find specific information from the relevant Agile Product Lifecycle Management for Process information source.

Table 1: Agile Product Lifecycle Management for Process documentation topics, by source

Information type	SCRM User Guide	Admin. User Guide	Release Notes	Agile training	Help Desk	Agile sales rep
Administering Agile Product Lifecycle Management for Process		●		●		
Cache management		●

Using the SCRM application	●			●		
Workflow management	●	●				

Document Conventions

The following formatting elements are used in Agile Product Lifecycle Management for Process documentation.

Element	Meaning
Helvetica Condensed, 9 pt. bold type	A user interface (UI) element that a procedure is instructing you to click, select, or type into. For example, buttons or text entry fields.
9 pt. monospace font	Code samples
10 pt. monospace font	File names or directory names
<i>Blue italic font</i>	The linked portion of a cross-reference. Click it to go to the referenced heading, table, or figure.
Minion Typeface, Title Case	A named UI element that a procedure is describing but not instructing you to click, select, or type into.
 Note Minion 11.5 pt, with faint blue bar over & under	Alerts you to supplemental information.
 Caution! Minion 11.5 pt, with faint red bar over & under	Alerts you to possible data loss, breaches of security, or other more serious problems.
 Important Minion 11.5 pt, with thick red bar over & under	Alerts you to supplementary information that is essential to the completion of a task.

Introduction to Supply Chain Relationship Management

This chapter introduces the Supply Chain Relationship Management application. The topics covered include:

- ❑ *Touch Points with Other Applications*
 - ❑ *Getting Started with Supply Chain Relationship Management*
-

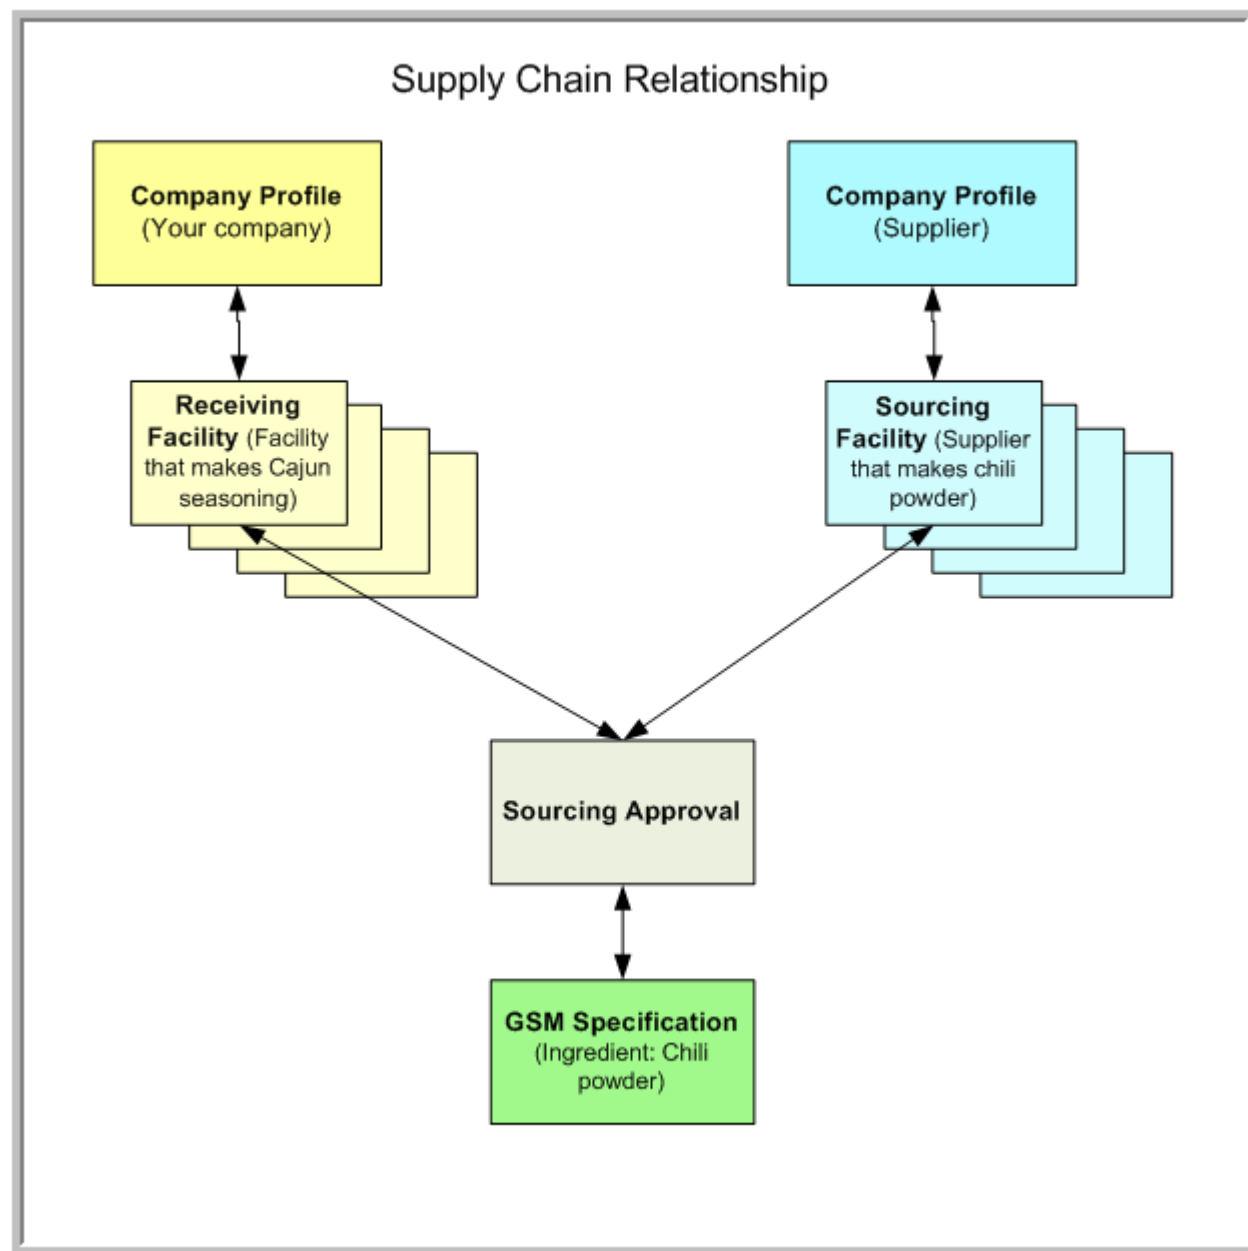

Overview

Supply Chain Relationship Management (SCRM) provides collaborative business process for managing supply chain relationships and sourcing approvals across product suppliers, distributors, and all other supply chain participants.

You can use Supply Chain Relationship Management to build a view of the relationships between participants in a supply chain. Agile PLM for Process can leverage the information you provide in other applications such as Global Specification Management (GSM) and Supplier Portal (SP).

Figure 1-1 below shows the supply chain relationship of a company, a supplier, and an ingredient specification. In this example, a company owns a receiving facility that produces Cajun seasoning. The receiving facility obtains the chili powder required for the Cajun seasoning from a supplier sourcing facility. The sourcing approval tracks the approval relationship from the sourcing facility to the receiving facility.

Figure 1-1: Supply Chain

Supply Chain Relationship Management can enable several critical business processes, including:

- ❑ Vendor management
- ❑ Sourcing management and compliance
- ❑ Vendor consolidation and rationalization
- ❑ Supply chain analysis
- ❑ Product traceability

Touch Points with Other Applications

The SCRM application interfaces with several other applications.

Global Specification Management

Global Specification Management (GSM) provides your company with a tool to create and modify your company's products, including finished products and manufacturing processes to ingredient and packaging specifications. These specifications are syndicated to SCRM, where sourcing approvals are created. Refer to the *Agile Product Lifecycle Management for Process Global Specification Management User Guide* for more information.

Manage Core Data

Your Agile PLM for Process administrator uses the Manage Core Data application (ADMN) to manage core data such as data lists and extended attributes. Core data that is specific to SCRM includes the following and is further explained in the *Agile Product Lifecycle Management for Process Administrator User Guide*:

- Business units
- Classes
- Company extended attributes
- Contact categories
- Document types
- Facility extended attributes
- Protocol IDs
- SDM statuses
- Sourcing types

Workflow Administration

Workflows drive sourcing approvals, an integral part of SCRM. As part of workflow management, an Agile PLM for Process administrator plans and creates workflows using the Workflow Administration (WFA) application. This process involves creating workflow statuses, workflow transitions, workflow functional areas, and workflow groups. The workflows are then saved to Agile PLM for Process and integrated across all applications. Refer to the *Agile Product Lifecycle Management for Process Administrator User Guide* for more information.

eQuestionnaire

The eQuestionnaire (eQ) application's communication and coordination tools can be used to increase supply side collaboration between your company and its suppliers. Questionnaires containing specific data requests are created and sent electronically to suppliers. Once the requested data is returned, it can then be automatically integrated into GSM and other applications. The user has the ability to create new questionnaires for information-gathering purposes or send existing ones for validation. Refer to the *Agile Product Lifecycle Management for Process eQuestionnaire User Guide* for more information.

Supplier Portal

Supplier Portal provides a central location for your company's supply chain partners to access procurement and sourcing-related specifications, business processes and protocols in a flexible, secure and user-customizable environment. It gives internal resources and external supply chain partners (such as vendors, suppliers, brokers and distributors) the ability to obtain:

- Information regarding the specifications that are to be sourced
- Guidance surrounding expectations of deliverables
- Contact information of the various facilities and resources with which they may need to interact

Using Supplier Portal, you can set restrictions that control what information in Agile PLM for Process is visible to your suppliers. Refer to the *Agile Product Lifecycle Management for Process Supplier Portal User Guide* for more information.

Getting Started with Supply Chain Relationship Management

Accessing Supply Chain Relationship Management

To access the Supply Chain Relationship Management application, select **SCRM** from the left navigation panel as shown in figure 1-2 below, or select **SCRM** from the Applications menu on the top menu bar as shown in figure 1-3.

Figure 1-2: The left navigation panel

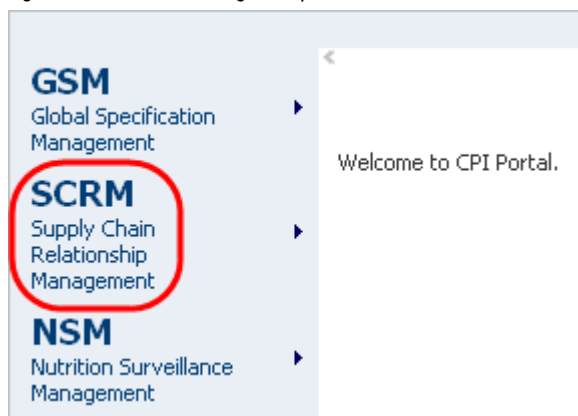

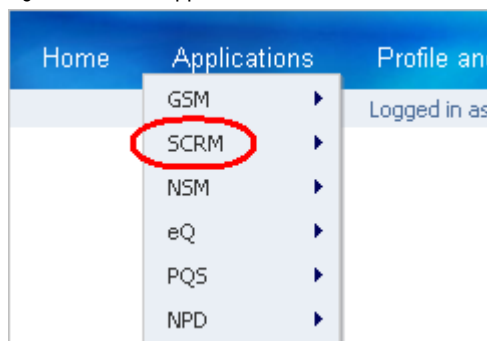

Figure 1-3: The Applications menu

For general information on using Agile Product Lifecycle Management for Process software, see the *Agile Product Lifecycle Management for Process Getting Started Guide*.

Company and Facility Profiles

This chapter describes how to use Supply Chain Relationship Management to create and maintain company and facility profiles. The topics covered include:

- ❑ *Searching for a Company or Facility Profile*
 - ❑ *Creating a Company Profile*
 - ❑ *Saving the Company Profile*
 - ❑ *Creating a Facility Profile*
 - ❑ *Saving the Facility Profile*
 - ❑ *Assigning a Facility to a Different Company*
-

Overview of Profiles

Supply Chain Relationship Management (SCRM) serves as a comprehensive platform for managing global supply and distribution relationships, and is a centralized repository for global provider information.

Information about each company is organized into two levels:

- Company profiles
- Facility profiles

Every relationship in the supply chain must have a company profile. You can arrange company relationships hierarchically, allowing you to model the sourcing relationships as far up the chain as necessary. After a company profile is created, you can create its facility profiles. Facility profiles may only be created from within a company profile. Each company may have multiple facility profiles.

Note You cannot delete a company profile or a facility profile in SCRM.

Searching for a Company or Facility Profile

Use the Company Profiles and Facility Profiles search pages, as shown in figure 2-1 and figure 2-2 below, to search for companies and facilities. The returned search results include companies or facilities that you have access to. The company and facility search pages work like other search pages in Agile PLM. For instructions on using the search page, see the *Agile Product Lifecycle Management for Process Getting Started Guide*.

Note Your visibility and access are determined by your SCRM business unit, which is assigned in the User feature of the User Group Management (UGM) application. All search screens in Agile PLM that include SCRM companies and facilities respect this visibility. For more information on visibility, see the *Agile Product Lifecycle Management for Process Administrator User Guide*.

Creating a Company Profile

Use the Company Profiles page to create a company profile. This page includes the following tabs, as shown in figure 2-3 below:

- Company Information
- Custom
- Supporting Documents
- Supply Categories
- DRL Catalog
- Facilities
- Contacts

Figure 2-3: Company Profile page

Child Relationships

Company Name	Company (Prodika#)	Relationship

Cross References

System Name	System ID	Equivalent

Section headings

Company Information Tab

Enter data in the sections on the Company Information page to complete the company profile.

Company Information Section

Use the Company Information section to provide general information such as company name, address, Web site, phone number, and fax number. When you save the information by clicking **Save**, the system assigns a company number that displays in the Company (Prodika #) field. Figure 2-4 below shows the Company Information section of a saved company profile:

Figure 2-4: Company Information section

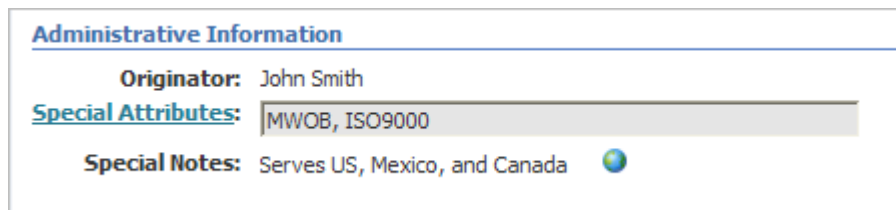

Company Information	
Company (Prodika#):	5012209
Company Name:	Global Foods 
Street Address:	100 Main St.
City:	Chicago
State/Province:	Illinois
Postal Code:	88888
Country:	USA
Website:	www.globalfoods.com
Phone:	555-111-2222
Fax:	555-222-3333
<input type="checkbox"/>	Postal Address not same as Street Address

Company Name is a required field.

Administrative Information Section

Use the Administrative Information section, shown in figure 2-5 below, to keep track of special designations for the company that may be required for reporting and tracking. Use the Special Attributes field to show special designations, such as ISO9000 and Minority or Women Owned Business.

Figure 2-5: Administrative Information section

Administrative Information	
Originator:	John Smith
Special Attributes:	MWOB, ISO9000
Special Notes:	Serves US, Mexico, and Canada 

Business Unit(s) Section

Use the Business Units section to specify the company's affiliation with one or more participating business units (required) and current status with regard to each business unit. Depending on your SCRM security configuration, you will only see business units that you have access to. Figure 2-6 below shows the Business Unit(s) section.

Figure 2-6: Business Unit(s) section

Business Unit(s)			
	Business Unit(s)	Status	
	Facilities - Latin America	Approved	
	Facilities - North America		
	Vendors - Asia	Not Approved	
Add New			

Business Unit(s) is a required field. Click **Add New** to select and add a business unit from the Business Unit dialog box.

Parent Relationships Section

Use the Parent Relationships section, shown in figure 2-7 below, to establish a parent company or agent relationship between this company (child) and a parent company.

Figure 2-7: Parent Relationship section

Parent Relationships			
	Company Name	Company (Prodika#)	Relationship
	ABC Foods	5011699	Parent
Add New			

Child Relationships Section

The Child Relationships section displays all related child companies for this company. When you select a parent company from the list of existing companies, you automatically create a child company relationship at the child company level. You can view the profile of a child company by clicking the linked Company Name field, as shown in figure 2-8 below:

Figure 2-8: Child Relationships section

Child Relationships			Click this link for more information
	Company Name	Company (Prodika#)	Relationship
	Global Foods	5012209	Child

Cross References Section

The Cross References section includes the system name, system ID, and equivalent value assigned to this company in an external system. A company can have multiple entries. Refer to figure 2-9 below:

Figure 2-9: Cross References section

Cross References		
System Name	System ID	Equivalent
Oracle System	USORACLE	29001

Custom Tab

Use the Custom tab to enter extended attributes or custom sections for a company. The Custom page, shown in figure 2-10 below, consists of two sections:

- Extended Attributes
- Custom Sections

Note The extended attribute fields and custom sections are created and maintained by your administrator.

[Edit Section](#)

[Add Section](#) [Remove Section](#)

Note Distinct attributes can only be added to a company profile one time. For more information, refer to the *Agile Product Lifecycle Management for Process Administrator User Guide*.

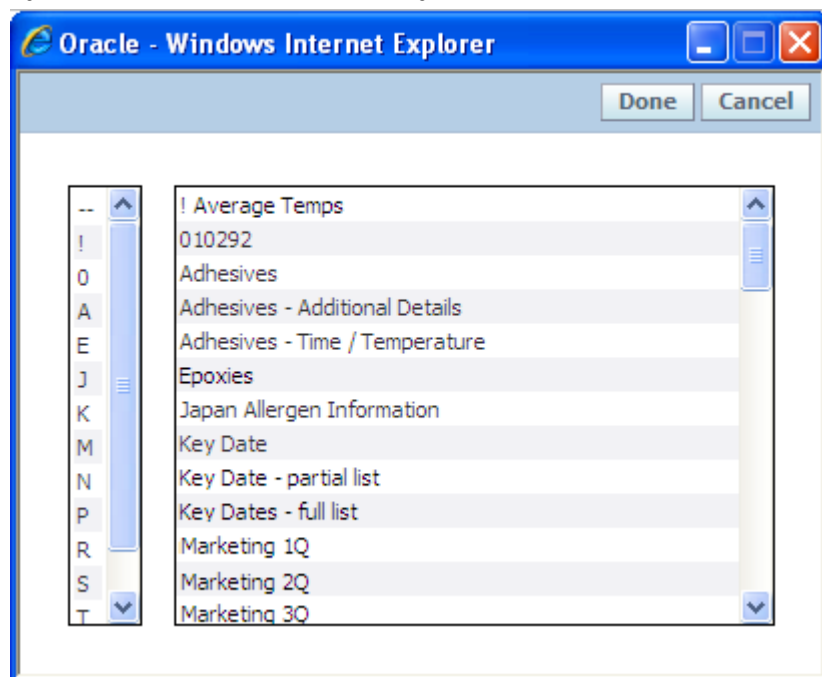

Important If you remove a custom section or extended attribute, the system deletes the data that you entered. Delete data with caution, because it cannot be retrieved.

Adding a Custom Section

To add a custom section:

- 1 With the page in edit mode, click **Add Section**. SCRM displays a dialog box listing available custom sections, as figure 2-13 shows below.

Figure 2-13: Custom section selection dialog box

- 2 Select a section name, and then click **Done**. The custom section is added to the company profile.

Editing a Custom Section

To edit a custom section table, row, or column:

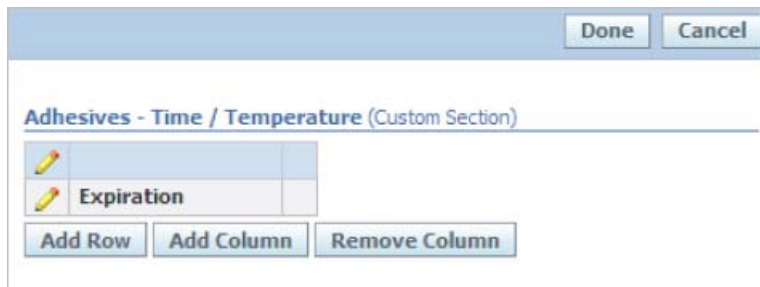

- 1 To add values to the custom section, click **Edit Section**. A dialog box displays the custom section in edit mode, as figure 2-14 shows below. The edit icon () displays for every editable row and column. It also displays in the upper left corner of the table, indicating you can edit the entire section. Depending on the size of your custom section, editing the entire section may not be available.

Figure 2-14: Custom section in edit mode

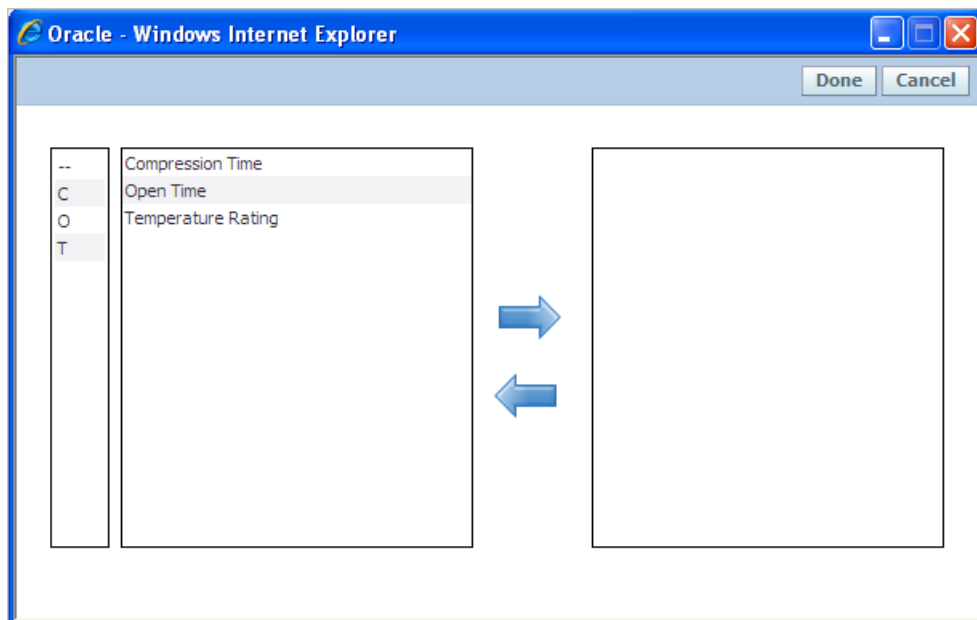

- 2 Click the edit icon () and make appropriate changes to the table, row, or column.
- 3 Click the apply changes icon ().
- 4 Click **Done**.
- 5 Click **Save**.

To add a row:

- 1 With the custom section in edit mode, click **Add Row**. SCRM displays a dialog box listing rows that can be added, as figure 2-15 shows below:

Figure 2-15: Available rows dialog box

- 2 Select a row, and then click the add selected data icon ().

- 3 Repeat step 2 to add additional rows.
- 4 Click **Done**. SCRM closes the dialog box. The added rows display in the table.
- 5 Click **Save**.

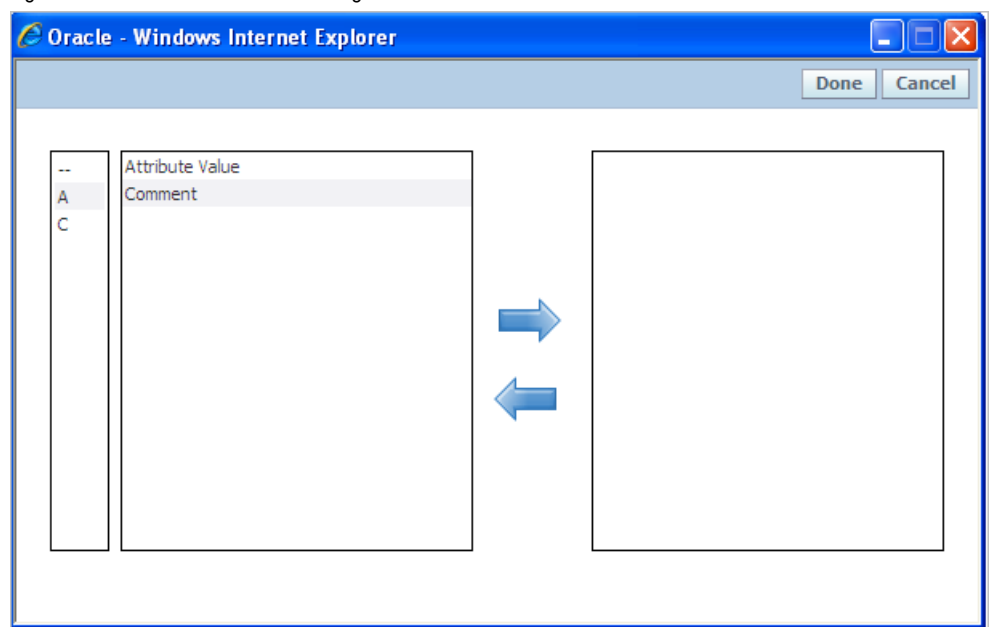

To delete a row:

- 1 With the custom section in edit mode, click the edit icon () on the row you want to delete.
- 2 Click the delete row icon (). The row is deleted from the table.
- 3 Click **Save**.

To add a column:

- 1 With the custom section in edit mode, click **Add Column**. SCRM displays a dialog box listing columns that can be added, as figure 2-16 shows below:

Figure 2-16: Available columns dialog box

- 2 Select a column, and then click the add selected data icon ().
- 3 Repeat step 2 to add additional columns.
- 4 Click **Done**. SCRM closes the dialog box. The added columns display in the table.
- 5 Click **Save**.

To delete a column:

- 1 With the custom section in edit mode, click **Remove Column**. SCRM displays a dialog box listing columns that can be deleted, as figure 2-16 shows above.
- 2 Select a column, and then click the add selected data icon ().
- 3 Repeat step 2 to delete additional columns.
- 4 Click **Done**. SCRM closes the dialog box. The selected columns no longer appear in the table.
- 5 Click **Save**.

Deleting a Custom Section

To remove a custom section:

- 1 With the page in edit mode, click **Remove Section**. SCRM displays a dialog box listing all custom sections, as figure 2-17 shows below.

Figure 2-17: Available sections dialog box

- 2 Select a custom section, and then click **Done**. The custom section is removed.
- 3 Click **Save**.

Supporting Documents Tab

Use the Supporting Documents tab to store documents for a company. You can also specify documents to be viewed by suppliers who are using the Supplier Portal. You must save a company profile before you can add a supplier document or attachment. Refer to [Chapter 4, Supplier Document Management](#) for more detailed information. The Supporting Documents page consists of two sections, shown in figure 2-18 below:

- Supplier Document Management
- Attachments

Figure 2-18: Supporting Documents tab

Attachments

Add New

Supplier Document Management Section

Refer to [Chapter 4, Supplier Document Management](#) for more detailed information on creating, editing, and managing supplier documents.

Attachments Section

Use this section to add an attachment to the company profile.

Adding an Attachment

To add an attachment:

- 1 Click **Edit Document**. The page reloads in edit mode, and the Add New button displays under the Attachments section, as figure 2-19 shows:

Figure 2-19: Add New button

Attachments

Add New

- 2 Click **Add New**. SCRM displays the Attachment Detail dialog box, as figure 2-20 shows:

Figure 2-20: Attachment Detail dialog box

The screenshot shows the 'Attachment Detail' dialog box. At the top right are 'Done' and 'Cancel' buttons. The 'Owner' section has two rows of text boxes: the first row contains 'John Smith' and an empty box; the second row contains '555-111-2222' and 'john.smith@abccompany.com'. Below this is a 'Title:' label followed by an empty text box. The 'Effective:' label is followed by the text 'Tuesday, August 18, 2009'. Underneath is a checkbox labeled 'Publish to Supplier Portal'. A table with two columns, 'Attached files' and 'Size', is shown with one empty row. Below the table is a text box for file selection, a 'Browse...' button, and an 'Upload' button. At the bottom, a status bar indicates 'Upload limit on the file size: 11 MB'.

- 3 Complete the following fields:
 - **Owner**—Owner of the attachment. This field is pre-populated with the name of the user who is logged into the system.
 - **Title**—Title of the attachment.
 - **Effective**—Effective date of the attachment. This field is pre-populated with the current date.
 - **Publish to Supplier Portal**—Check this box if you want to publish the attachment on Supplier Portal.
- 4 Attach the file by clicking **Browse** to search for the file, and then click **Upload**.
- 5 Click **Done** at the top right of the dialog box.
- 6 Click **Save** at the top right of the Company Profile page.

Supply Categories Tab

The Supply Categories tab displays a consolidated list of the categories associated with all existing and potential specifications being sourced by this company (aggregated across all facilities). As figure 2-21 shows below, it consists of two sections:

- **Existing Specification Categories**—This list is automatically generated based on the existing specifications attached to each facility via sourcing approvals.
- **Potential Specification Supply Categories**—This list is automatically generated based on potential categories attached to each facility via alternate (estimated) specification-related supply capabilities.

Facilities Tab

You can add facilities owned by the company using the Facilities tab. When you add a facility for a company, the facility is tied to the company and considered a “child” of that company.

Note You must create a facility profile within an existing company profile. When you create a new company profile, you must save the profile before you can create the facility profile.

For detailed information on creating a facility profile, see [Creating a Facility Profile](#) on page 2-19.

The Facilities tab is shown in figure 2-23 below:

Figure 2-23: Facilities tab

Adding a Contact

After you have saved a company profile, you can add company contacts.

To add a contact:

- 1 Click **Edit Document**. The Add New button displays under the Company Contacts table.
- 2 Click **Add New**. The Contacts dialog box, shown in figure 2-25, displays.

Figure 2-25: Contacts dialog box

The screenshot shows a 'Contacts' dialog box with a title bar containing 'Save', 'Save & Close Document', and 'Cancel' buttons. The main section is titled 'Contact Information' and contains the following fields:

- First Name:** Text input field.
- Last Name:** Text input field.
- Contact Category:** Dropdown menu.
- Job Title:** Text input field.
- Phone:** Text input field.
- Mobile/Pager:** Text input field.
- Fax:** Text input field.
- Email:** Text input field.
- Street Address:** Text input field containing '123 Fast Ln'. To the right of this field is a link labeled '<< Import'.
- City:** Text input field containing 'Dallas'.
- State/Province:** Text input field containing 'TX'.
- Postal Code:** Text input field containing '11111'.
- Country:** Text input field containing 'USA'.
- Emergency Contact:** Check box.
- Publish to Supplier Portal:** Check box.

Below the 'Contact Information' section is the 'Additional Notes' section, which contains a 'Description:' label and a large text area. Two arrows labeled 'Key fields' point to the 'Publish to Supplier Portal' check box and the '<< Import' link.

- 3 Add contact information such as first and last name, job title, phone number, email, address, and whether the contact is designated as an emergency contact.
 - Click the **Import** link to import an existing address. When you select Import, a dialog box is displayed that lists all available addresses for that company. This feature allows you to use an existing address versus repeatedly retyping the same address.
 - Check the **Publish to Supplier Portal** box to make the contact viewable in the Supplier Portal.
- 4 Click **Save**.

Saving the Company Profile

Once you entered all data for the company profile, click **Save & Close Document** at the top right of the page.

Creating a Facility Profile

A facility is a plant or manufacturing location. When you create a facility within a company profile, the facility becomes a “child” of the “parent” company. A company is a vendor, supplier, broker, distributor, or co-packer.

In addition to using the facilities feature to manage information about facilities, use it to create all sourcing approvals, which are tied to facilities. There are two types of sourcing approvals:

- Specification-related sourcing approvals
- Non-specification related sourcing approvals

Refer to [Chapter 3, Sourcing Approvals](#) for more information on sourcing approvals.

To create a facility profile, select the parent company using the search page. Select the Facilities tab and click **Create Facility**. The facility profile page consists of several tabs across the top of the page:

- Facility Information
- Custom
- Supporting Documents
- Sourcing Approval
- Contacts
- Audit Trail

Figure 2-26 below shows the facility profile page.

Figure 2-26: Facility profile page

Click the set alternate language text icons to enter the facility name and notes in other languages.

Use these tabs to set up a facility profile in the same way that you created a company profile.

Facility Information Tab

Enter data in the Facility Information tab to complete the facility profile. The Facility Information tab contains the following sections:

- Facility Information
- Administrative Information
- Business Unit(s)
- Cross References

Facility Information Section

Use the Facility Information section to provide general information such as facility name (required), address, Web site, phone number, and fax number. Once you save the information by clicking **Save** at the top right of the page, the system assigns a facility number which displays in the Facility (Prodika #) field. Figure 2-27 shows the Facility Information section.

Figure 2-27: Facility Information section

Facility Information

Company Name: [ABC Foods](#)

Facility (Prodika#): 5011701

Facility Name: ABC Foods - Atlanta 

Street Address:

City:

State/Province:

Postal Code:

Country:

Website:

Phone:

Fax:

☐ Postal Address not same as Street Address

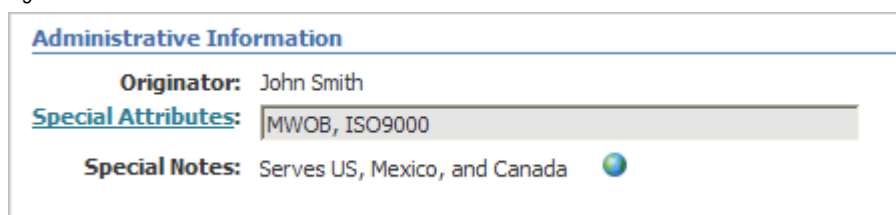

The Facility Name field is required. You can click the import data icon () to import contact information associated with the parent company. The system automatically populates the Facility Information fields with the company contact information.

Note The facility's parent name automatically displays in the Company Name field. This field contains a link to the Company Profile page. You can reassign the facility to a new company using the Company Name field if you are assigned the [SCRM_FACILITY_RELOCATER] role. For more information, refer to [Assigning a Facility to a Different Company](#) on page 2-30.

Administrative Information Section

Use the Administrative Information section, shown in figure 2-28 below, to keep track of special designations for the facility which may be required for reporting and tracking. The Special Attributes field shows special designations, such as ISO9000 and Minority or Women Owned Business.

Figure 2-28: Administrative Information section

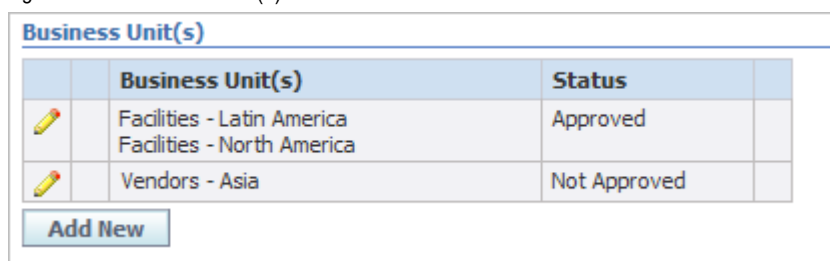

The screenshot shows the 'Administrative Information' section of a facility profile. It includes three fields: 'Originator' with the value 'John Smith', 'Special Attributes' with the value 'MWOB, ISO9000', and 'Special Notes' with the value 'Serves US, Mexico, and Canada' and a globe icon.

Business Unit(s) Section

Use the Business Unit(s) section to specify the facility's affiliation with one or more participating company's business units (required) and the current status for each business unit. Figure 2-29 below shows the Business Unit(s) section of the Facilities Profiles page.

Figure 2-29: Business Unit(s) section

The screenshot shows the 'Business Unit(s)' section of a facility profile. It contains a table with two columns: 'Business Unit(s)' and 'Status'. There are two rows of data. The first row shows 'Facilities - Latin America' and 'Facilities - North America' with a status of 'Approved'. The second row shows 'Vendors - Asia' with a status of 'Not Approved'. There is an 'Add New' button at the bottom left.

	Business Unit(s)	Status
	Facilities - Latin America Facilities - North America	Approved
	Vendors - Asia	Not Approved

[Add New](#)

Business Unit(s) is a required field. Click **Add New** to select a business unit from the Business Unit dialog box.

The business units listed are tied to sourcing approvals and can play a key role in workflow resolution.

Cross References Section

Use the Cross References table to list the system name, system ID, and equivalent value assigned to this facility in a legacy, ERP, or vendor system. You can make multiple entries. Refer to figure 2-30 below.

Figure 2-30: Cross References section

Cross References		
System Name	System ID	Equivalent

Extended Attributes Section

Add extended attributes to define characteristics of the facility. You can build these attributes to meet specific needs. Extended attributes are created and maintained by your system administrator. Refer to figure 2-32 below.

Figure 2-32: Extended Attributes section

Extended Attributes

 Extended Attributes		Notes
		

[Add New](#)

Custom Sections

Custom sections are configurable *sets* of extended attributes. The custom data you enter is displayed in a table at the bottom of the page. The custom fields are created and maintained by your administrator.

Note Distinct attributes can only be added to a facility profile once. For more information, refer to the *Agile Product Lifecycle Management for Process Administrator User Guide*.

Figure 2-33 below shows the Custom Sections section.

Figure 2-33: Custom Sections section

Important If you remove a custom section or extended attribute, the system deletes the data you entered. Delete data with caution because it cannot be retrieved.

Supporting Documents Tab

Use the Supporting Documents tab to store documents for a facility. You can also specify documents to be viewed by suppliers who are using the Supplier Portal. You must save a facility profile before you can add a supplier document or attachment. The Supporting Documents page, shown in figure 2-34, consists of two sections:

- Supplier Document Management
- Attachments

Sourcing Approvals

This chapter describes the types of sourcing approvals and discusses the steps involved in creating sourcing approvals. The topics covered include:

- ❑ *Accessing Sourcing Approvals*
 - ❑ *Creating a Specification-Related Sourcing Approval*
 - ❑ *Creating an Alternate (Estimated) Specification-Related Supply Capability*
 - ❑ *Creating a Non-Specification Related Sourcing Approval*
 - ❑ *Workflows and Sourcing Approvals*
-

Overview

A sourcing approval is a document that defines what will be supplied, who will supply it, and to whom it will be supplied. It describes the approval status among all facilities throughout the extended supply chain.

Figure 3-1: A specification-related sourcing approval defines what specifications a facility is to supply

Types of Sourcing Approvals

Use Supply Chain Relationship Management (SCRM) to create the following types of sourcing approvals:

- **Specification-related sourcing approvals**—Sourcing approvals tied to specifications in Global Specification Management (GSM). The sourcing approval captures information about your company's relationship to the specification and its suppliers.
- **Non-specification related sourcing approvals**—Sourcing approvals unrelated to specifications within GSM, such as janitorial services.

Accessing Sourcing Approvals

To view existing sourcing approvals in SCRM, you can either search for them from the Sourcing Approval submenu, shown in figure 3-2 below, or from a facility.

Figure 3-2: Sourcing Approval submenu

Select from the following menu options:

- ❑ **Spec Related**—Displays a search page for specification related sourcing approvals.
- ❑ **Non-Spec Related**—Displays a search page for non-specification related sourcing approvals.

The sourcing approval search pages work like other search pages in Agile PLM. For instructions on using the search page, see the *Agile Product Lifecycle Management for Process Getting Started Guide*.

Note Depending on your configuration, there are security limitations around sourcing approvals. Only the sourcing approvals users have access to will be made available to them.

To select a sourcing approval from a facility, first select the facility. From the facility profile, click the **Sourcing Approval** tab. This tab contains the following three sections, as figure 3-3 shows:

- Specification-related Sourcing Approvals
- Alternate (Estimated) Specification-related Supply Capabilities
- Non-specification Related Sourcing Approvals

Figure 3-3: Sourcing Approval tab within a facility profile

5011701 - ABC Foods - Atlanta						
Facility Information Custom Supporting Documents Sourcing Approval References Contacts Audit Trail

Add New						

You can click the link to view the sourcing approval

Specification-related Sourcing Approvals Section

The Specification-related Sourcing Approvals section displays the following information:

Sourcing Number—The system-assigned number for the sourcing approval

Spec #—The system-assigned specification number for the item being sourced

Spec Name—The name of the specification

Sourcing Type—The type of sourcing relationship

Receiving Facilities—The names of the receiving facilities

Sourcing Approval Status—The workflow status of the sourcing approval

Protocol ID—Can help categorize the nature of the sourcing relationship

Supplier Item #—The item number assigned to the sourcing approval in the supplier's facility

Cross Ref #—All known cross-references for the specification tied to the sourcing approval

Alternate (Estimated) Specification-related Supply Capabilities Section

This section, shown in figure 3-4 below, references the alternate capabilities of the supplier. For example, if your supplier supplies you with chili powder but could also supply you with pepper and salt, you would indicate that here using specification categories.

The category you add is consolidated with all other alternate capabilities for this facility and is displayed on the company profile's Supply Categories tab in the Potential Specification Supply Categories section. Refer to [Supply Categories Tab](#) on page 2-15 for more information.

Figure 3-4: Alternate (Estimated) Specification-related Supply Capabilities section

Alternate (Estimated) Specification-related Supply Capabilities
 Ingredient Specifications » Oils & Fats » Oils » Other Oils

Non-specification Related Sourcing Approvals Section

The Non-specification Related Sourcing Approvals section, shown in figure 3-5 below, displays the following information:

Sourcing Number—The system-assigned number for the sourcing approval

Description—The description of the item or service provided by the facility

Sourcing Type—The type of sourcing relationship

Receiving Facilities—The names of the receiving facilities

Sourcing Approval Status—The workflow status of the sourcing approval

Figure 3-5: Non-specification Related Sourcing Approvals section

This page consists of four tabs arranged across the top of the page:

- Summary
- Custom
- Supporting Documents
- Signature Approval

2 Make entries in fields in the Specification section, as detailed below:

Specification—Select the specification. The specification name and number are displayed, indicating the sourcing approval is linked to the specification. This is a required field.

Supplier Item #—Enter the supplier number for this specification.

Supplier signed spec—Check the box if the supplier has agreed to the specification. When you check the box, a text entry field displays. Enter the name of the supplier representative that signed off, then click the date field at the end of the entry field to choose the date that the supplier's approval was received. If enacting supplier electronic signature, this box will be checked automatically when a supplier signs off on a specification. To learn more about supplier electronic signature, refer to the *Agile Product Lifecycle Management for Process Supplier Portal User Guide*.

Receiving Facilities—Select the receiving facilities for the material.

Sourcing Type—Select the type of sourcing relationship. You can make multiple selections.

Sourcing Approval Status—The workflow status of the sourcing approval. This is assigned by the system.

Protocol ID—Select a protocol ID from the drop-down list.

Class—Select a class from the drop-down list.

Notes—Enter any notes.

QA Assigned—Select the name of a quality assurance auditor assigned to this facility. You can select multiple names.

SC Assigned—Select the name of the supply chain representative responsible for the relationship with the supplier. You can select multiple names.

- 3 The Cross References section, shown in figure 3-7 below, displays the linked specification's cross references.

Figure 3-7: Cross References section

Cross References		
System Name	System ID	Equivalent

- 4 The Supplier Initiated Questionnaire section, shown in figure 3-8 below, displays details of the eQ questionnaire tied to the sourcing approval. Complete this section to designate if the supplier is allowed to initiate questionnaires in Supplier Portal. For more information on supplier initiated questionnaires, refer to the *Agile Product Lifecycle Management for Process Supplier Portal User Guide*.

Note This section will not appear on the sourcing approval if the supplier-initiated questionnaire feature is not configured on.

Figure 3-8: Supplier Initiated Questionnaire section

Supplier Initiated Questionnaire

Supplier can initiate Edits: ☒

Questionnaire Owner: 

Additional Administrators: 

Due Date: days after initiated

Documentation Due Date: days after initiated

Amber Date: days before due date

- 5 Make entries in the following fields:

Supplier can initiate Edits—Select the checkbox if the supplier can initiate edits to the specification. If selected, the supplier will see the **Submit Changes** supplier action in Supplier Portal.

Questionnaire Owner—Select who will be the owner of the questionnaire if the supplier initiates one. Click the field label to display a UGM user search page. You can select only one owner.

Additional Administrators—Select the users or groups who will be the additional administrators of the questionnaire. Click the field label to display a UGM user and group search page. You can select multiple administrators.

Due Date—Enter the number of days after the supplier initiates the questionnaire that it is due.

Documentation Due Date—Enter the number of days after the supplier initiates the questionnaire that supporting documentation is due.

Amber Date—Enter the number of days prior to the Due Date when the questionnaire becomes flagged as amber.

For more information on supplier-initiated questionnaires, refer to the *Agile Product Lifecycle Management for Process eQuestionnaire User Guide* and the *Agile Product Lifecycle Management for Process Supplier Portal User Guide*.

 Documentation Due Date: 10 days after initiated
 Amber Date: 5 days before due date

Annotations:

- These buttons appear once you select a template. (points to Edit and Workflow buttons)
- The status is automatically assigned based on the chosen workflow template (points to Sourcing Approval Status: Draft)

Important A workflow is tied to a sourcing approval when you first save the sourcing approval. Once you select a workflow template, you will not be asked to define this again. If you need to tie the sourcing approval to another workflow template, you will need to use the **Resolve Workflow** button (available with user role [CAN_RERESOLVE_WORKFLOWS_SCRM]).

The system assigns a sourcing approval status based on the workflow template you chose. Refer to [Workflows and Sourcing Approvals](#) on page 3-19 for more information on workflows.

Custom Tab

The Custom tab allows you to enter customized information, in the form of extended attributes and custom sections. Refer to page 2-7, [Custom Tab](#) for more information on custom data.

Supporting Documents Tab

Use the Supporting Documents page to store documents for sourcing approvals. You can also specify attachments to be viewed by suppliers who are using the Supplier Portal. The Supporting Documents page consists of two sections, and is shown in figure 3-12 below.

- Supplier Document Management
- Attachments

Note Supplier Portal does not display supplier documents assigned to a sourcing approval. However, it does display attachments assigned to a sourcing approval through the attachments section.

Supplier Document Management Section

Refer to [Chapter 4, Supplier Document Management](#) for more detailed information on creating, editing, and managing supplier documents.

Attachments Section

Use this section to add an attachment to the sourcing approval. For detailed instructions on adding an attachment, see [Adding an Attachment](#) on page 2-13.

Signature Approval Tab

Use the Signature Approval tab to view the workflow step that the sourcing approval is in, as well as workflow event history. Figure 3-13 shows the tab.

Signature Document

Review [4.9 WFA](#) Review

Click to view the signature document

This tab consists of the following three sections:

- **Current Status**—Snapshot view of the sourcing approval’s workflow summary
- **Event History**—Listing of all actions taken for this sourcing approval
- **Signature Document**—Listing of all signature documents

Current Status Section

The following fields reside in the Current Status section:

- **Current Owner**—The name of the persons responsible for managing the current step in the sourcing approval. When the sourcing approval is in ‘Draft’ status, the originator is displayed.
- **Current Workflow**—The workflow that the sourcing approval has resolved to
- **Current Status**—The current status of the sourcing approval
- **Desired Action**—The recommended action based on the instructions from the workflow step
- **Start Date**—The date that the current step was assigned to the owner

- **Amber Date**—The date that a reminder will be issued to the owner indicating a deadline is approaching
- **Red Date**—The date that the current workflow task is due

Event History Section

The Event History section displays the current and past steps within the sourcing approval process. Each step status is displayed along with the name of the user who transitioned the workflow, the date that the workflow was transitioned, and any related comments. The most recent transitions are displayed first.

Signature Documents Section

The Signature Documents section lists all signature documents assigned to this sourcing approval. See [Working with a Signature Document](#) on page 3-21 for more information on signature documents.

Creating an Alternate (Estimated) Specification-Related Supply Capability

Use this feature to track alternate specification categories that an existing company or facility provides but does not currently supply to your organization.

To add an alternate specification-related sourcing approval:

- 1 Select a facility using the search page.
- 2 Select the **Sourcing Approval** tab.
- 3 Click **Edit Document** at the top right of the page. The Sourcing Approval tab displays in edit mode, as figure 3-14 shows below.

Non-specification Related Sourcing Approvals

	Sourcing Number	Description	Sourcing Type	Receiving Facilities	Sourcing Approval Status
Add New					

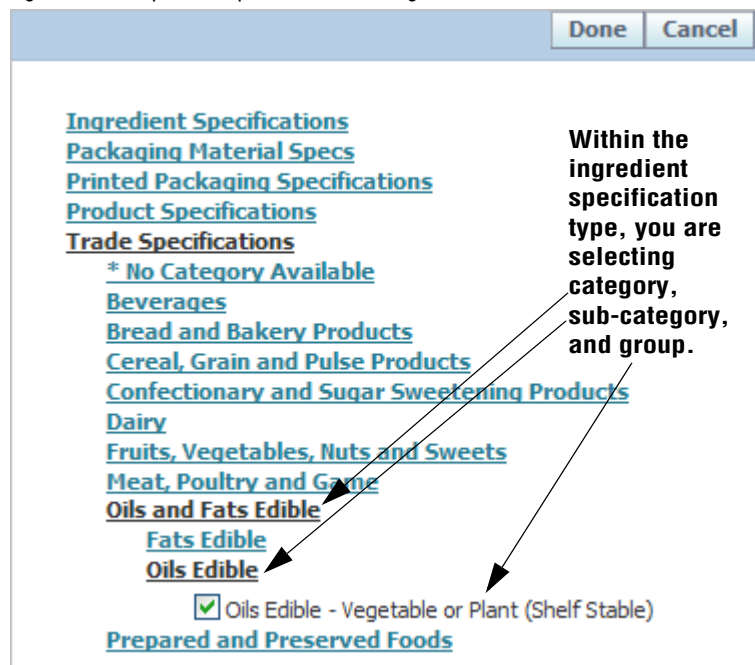

- 4 Under the Alternate (Estimated) Specification-related Supply Capabilities section, click **Add New**. A dialog box displays specification categories, as shown in figure 3-15 below.

Figure 3-15: Specification categories dialog box

- 5 Click a specification type to expand the listing, then check the checkbox next to the chosen specification category, as shown in figure 3-16 below.

Figure 3-16: Expanded specifications dialog box

- 6 Click **Done**. The specification category that you defined displays under the Alternate (Estimated) Specification-related Supply Capabilities section as shown in figure 3-17 below.

Figure 3-17: Added alternate specification type

- Click **Save**. The record is now tied to the sourcing approval. This information will be displayed in the Potential Specification Supply Categories section on the company profile's Supply Categories tab. See [Supply Categories Tab](#) on page 2-15 for more information.

Note You can later search for the record using “alternate supply capability” as your search criteria.

Creating a Non-Specification Related Sourcing Approval

To create a non-specification related sourcing approval, follow steps similar to creating a specification-related sourcing approval.

To add a new non-specification related sourcing approval:

- Select a facility using the search feature.
- Select the **Sourcing Approval** tab, and then click **Edit Document** at the top right of the page.
- In the Non-specification Related Sourcing Approval section, click **Add New**. The Non Specification-Related Sourcing Approval page is displayed, as shown in figure 3-18 below.

Figure 3-18: Non Specification-Related Sourcing Approval page

Sourcing Approval Status:

Class:

Notes:

QA Assigned:

SC Assigned:

The status is automatically assigned based on the chosen workflow template

Click the clear data icons to delete all names in these fields

- 4 In the Approval Attributes section, make entries in the following fields:

Item/Service Description—Enter a detailed description of the item or service. This is a required field.

Receiving Facilities—Select the receiving facilities for the material.

Sourcing Type—Select the type of sourcing relationship from the list in the pop-up dialog box. You can make multiple selections.

Sourcing Approval Status—Assigned by the system. The workflow status of the sourcing approval.

Class—Select a class from the drop-down list.

Notes—Enter any notes.

QA Assigned—Select the name of a quality assurance auditor assigned to this facility. You can select multiple names.

SC Assigned—Select the name of the supply chain representative responsible for the relationship with the supplier. You can select multiple names.

Note It is important to enter a detailed description in the Item/Service Description field. Doing so will make it easier to locate the record if you ever need to search for the sourcing approval by description.

Use the remaining sourcing approval tabs to add more information:

- Custom
- Supporting Documents
- Signature Approval

- 5 Click **Save**. See [Transitioning a Workflow](#) on page 3-22 for more information.

Workflows and Sourcing Approvals

You can use SCRM to obtain supplier approval at the facility and specification level through workflow automation.

Workflows represent business practices and processes used by your company. You create workflows using the Workflow Administration (WFA) application. Refer to the *Agile Product Lifecycle Management for Process Administrator User Guide* for more information.

Managing Sourcing Approvals

You manage sourcing approvals using signature documents and workflows. Get to your sourcing approvals and signature documents by:

- ❑ Using your Action Items list
- ❑ Clicking a link that is emailed to you (for signature documents only)

Using Action Items

As a sourcing approval moves through the workflow process, action items generate for designated team members. Each owner of subsequent steps will receive the item (sourcing approval or signature document) in his or her Action Items list, as figure 3-19 shows below. The signature requestees will also be alerted via email.

The Action Items page displays when you select **Action Items** from the SCRM menu. Action items are workflow items assigned to you that require your attention—think of them as your “To Do” list. Action items indicate that review or a signature document is required before the document can progress to the next step.

As you take appropriate action for each item assigned to you, the item’s status updates, and the item progresses to the next step in the workflow. It remains in your Action Items list as long as you are the “owner” of the current step in the workflow.

Figure 3-19: Action Items list

Action Items

SCRM Action Items			
Title	Type	Status	RAG/SLA
Beverage-Air - Japan (Sweetened - 2003)	Specification-Related Sourcing Approval	Review	
Angus Facility (Product Specification - 2003)	Specification-Related Sourcing Approval	Review	
Beverage-Air (Orange Juice - 2003)	Specification-Related Sourcing Approval	Review	
A E Staley Manufacturing Co (Vinegar - Distilled - White - 100 Grain)	Specification-Related Sourcing Approval		
A E Staley Manufacturing Co (Vinegar - Red)	Specification-Related Sourcing Approval		
A E Staley Manufacturing Co	Non Specification-Related Sourcing Approval	Review	
Europe Vendor Facility	Signature Document	Review	 Mar 1, 2008/Mar 3, 2008
Europe Manufacturing, Inc.	Non Specification-Related Sourcing Approval	Review	
Global Foods - Florida (Orange)	Specification-Related Sourcing Approval	Developmental	

 Late (Red)
 Needs Attention (Amber)
 Normal (Green)

Each row in the SCRM Action Items table gives more information about the item in the workflow, as described below:

Title—The name of action item.

- For specification-related sourcing approvals, it consists of the name of the facility and specification.
- For non-specification-related sourcing approvals, it consists of the facility name.
- For signature documents, it consists of the name of the facility and specification (if applicable)

Type—The type of action item. Types are:

- Specification-related sourcing approval
- Non-specification related sourcing approval
- Signature document

Status—The step of the workflow that the item is in.

RAG/SLA—RAG indicates Red, Amber, or Green. This field is an indicator of compliance with the established service level agreement (SLA) time lines for that document type:

- Red—Late
- Amber—Needs Attention
- Green—Normal

Amber and red dates display to the right of the color indicator for signature document action items.

Working with a Signature Document

When you select a signature document as an action item or through an email link, the signature document page displays, as shown in figure 3-20 below.

Figure 3-20: Signature document page

The screenshot shows a web interface for a signature document. At the top right is a button labeled "Workflow". Below it are two tabs: "Summary" (selected) and "Signature Approval". The main content area displays the following information:

- Sourcing Approval:** v490-rc4 Facility 20061128(5080377-001 - v460 Product 20060511)
[»click HERE to review the original Sourcing Approval](#)
- Source Facility:** v490-rc4 Facility 20061128(v490-rc4 Company 20061128)
[»click HERE to review the original facility document](#)
- Receiving Facilities:** [v490-rc4 Facility 20061128](#)

The Summary tab shows links to the sourcing approval, the source facility, and the receiving facility. You can click the links to view or edit the sourcing information, depending on your workflow permissions.

As figure 3-21 shows below, the Signature Approval tab shows the current status and owner of the signature document, the desired action, assigned dates, and a history of signatures.

Figure 3-21: Signature Approval tab

The screenshot shows the "Signature Approval" tab selected. At the top right is a button labeled "Workflow". Below it are two tabs: "Summary" and "Signature Approval" (selected). The main content area is divided into two sections:

Current Status

- Current Owner:** [John Smith]
- Current Workflow:** Specification Signature Document Workflow
- Current Status:** Review
- Desired Action:** Review and move forward in the workflow.
- Start Date:** 2/8/2007
- Amber Date:** 2/13/2007
- Red Date:** 2/15/2007

Event History

Status	User	Time	Comments
--------	------	------	----------

Click **Workflow** at the top right of the page to take action on the signature document, either by advancing it to the next step or sending it back to the prior step.

For a sourcing approval with outstanding signature requests, you can now workflow the sourcing approval to a prior step. You do not have to wait for all signature requests to be approved or disapproved.

Transitioning a Workflow

Within a sourcing approval or signature document, you can use the workflow button to transition the workflow.

To transition a workflow:

- 1 Click **Workflow** at the top right of the page. The Document Workflow dialog box displays, as shown in figure 3-22. Remember that the buttons and fields that display vary based on the workflow and current workflow step.

Figure 3-22: Document Workflow dialog box

Document Workflow [Cancel]

← →

Draft ▼ Approved ▼

Select a step from either drop-down list

Current Status

Current Owner:

Current Workflow: Workflow Template A

Current Status: Review

Desired Action: Review and move forward in the workflow.

Start Date: 12/28/2007

Amber Date: -----

Red Date: -----

Your Comments:

You must enter comments in this field.

- 2 Enter comments in the **Your Comments** field (required).
- 3 Select a step from the action drop-down list.
- 4 Click the move step forward icon (→) to forward the sourcing approval or signature document to the next step in the approval process, or click the move step back icon (←) to return to a prior step. The system updates the workflow status based on your selection.

Selecting Workflow Participants

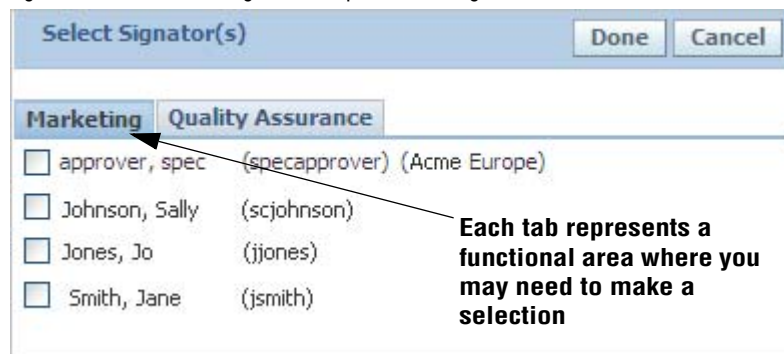

If the workflow button includes people, you may have to select a person such as an owner, the signature requestee, or notifiee, in the next dialog box. The dialog box may contain preselected data, or it may prompt you to select one or multiple participants, depending on how the workflow has been set up. You may need to select participants from multiple dialog boxes. Refer to the figures below for examples of selecting workflow participants.

Figure 3-23: The signature notifiee has been preselected

The dialog box titled "Select Notification Recipient(s)" has a blue header bar with "Done" and "Cancel" buttons. Below the header, the text "Member(s) have been selected" is displayed in a light blue font. The main area of the dialog box is empty.

Figure 3-24: Select the signature requestees using checkboxes

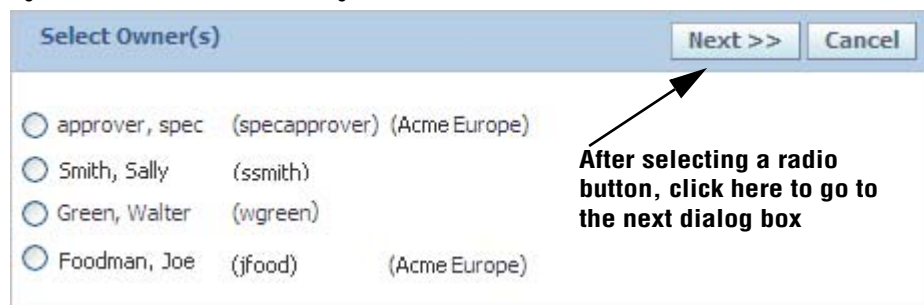

The dialog box titled "Select Signator(s)" has a blue header bar with "Done" and "Cancel" buttons. Below the header, there are two tabs: "Marketing" and "Quality Assurance". The "Marketing" tab is selected. Below the tabs, there is a list of four signatories, each with a checkbox, a name, a user ID, and a company name:

Checkbox	Name	User ID	Company
<input type="checkbox"/>	approver, spec	(specapprover)	(Acme Europe)
<input type="checkbox"/>	Johnson, Sally	(scjohnson)	
<input type="checkbox"/>	Jones, Jo	(jjones)	
<input type="checkbox"/>	Smith, Jane	(jsmith)	

An arrow points from the "Marketing" tab to the first checkbox. A text box on the right says: "Each tab represents a functional area where you may need to make a selection".

Figure 3-25: Select one owner using a radio button

The dialog box titled "Select Owner(s)" has a blue header bar with "Next >>" and "Cancel" buttons. Below the header, there is a list of four owners, each with a radio button, a name, a user ID, and a company name:

Radio Button	Name	User ID	Company
<input type="radio"/>	approver, spec	(specapprover)	(Acme Europe)
<input type="radio"/>	Smith, Sally	(ssmith)	
<input type="radio"/>	Green, Walter	(wgreen)	
<input type="radio"/>	Foodman, Joe	(jfood)	(Acme Europe)

An arrow points from the "Next >>" button to a text box on the right that says: "After selecting a radio button, click here to go to the next dialog box".

Supplier Document Management

This chapter explains the Supplier Document Management feature. The topics covered include:

- ❑ *Publishing to Supplier Portal*
 - ❑ *Searching for Supplier Documents*
 - ❑ *Adding Supplier Documents*
 - ❑ *Editing Supplier Documents*
 - ❑ *Deleting Supplier Documents*
-

Overview

Use the Supplier Document Management feature to manage documents related to companies, facilities, and sourcing relationships. Supplier documents can be attached to:

- Company profiles
- Facility profiles
- Specification-related sourcing approvals
- Non-specification related sourcing approvals

A supplier document is a collection of attachments with corresponding data that allows for easier managing, searching, and reporting against the documents. A supplier document includes the following:

- Name of the parent object (company, facility, or sourcing approval)
- Document type
- Document status
- Description
- Originator
- Due/renewal date
- Effective date
- Expiration date

Supplier documents are created on the company or facility profile or on the sourcing approval. Once they are created, supplier documents can be searched and edited from the left navigation panel in Supply Chain Relationship Management (SCRM).

Publishing to Supplier Portal

Each attachment can be marked to publish to the Supplier Portal. When a supplier document contains an attachment that is published to the Supplier Portal, the document type, document description, title and filename of the attachment are shown to the supplier. Suppliers are able to download the attachment.

Suppliers can access the supplier documents by selecting **Specifications & Documents** from the Supplier Portal home page.

Only supplier documents attached to company and facility profiles are available through the Supplier Portal Documents section. Supplier documents attached to sourcing approvals will not be available through the Supplier Portal; only sourcing approval attachments are available. Figure 4-1 shows company and facility supplier documents. Figure 4-2 shows sourcing approval attachments.

Searching for Supplier Documents

Using the Supplier Document Management feature, you can search for supplier documents tied to a company or facility profile, a specification-related sourcing approval, or a non-specification-related sourcing approval. These choices are represented in the left navigation panel, as shown in figure 4-3 below, and in the Applications menu, as shown in figure 4-4 below.

Figure 4-3: Left navigation panel

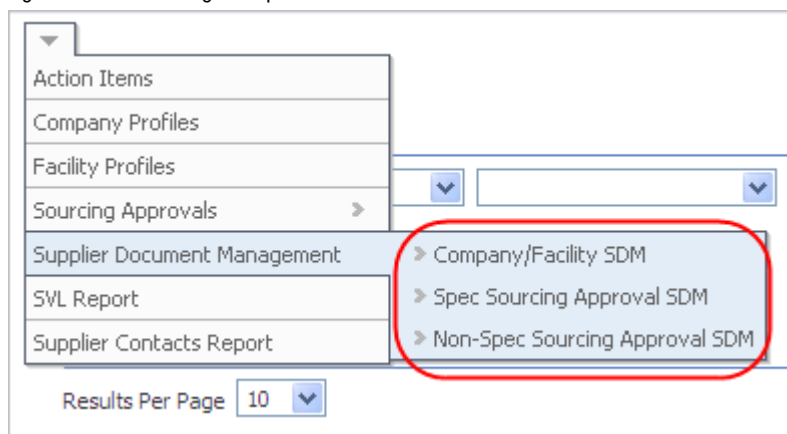

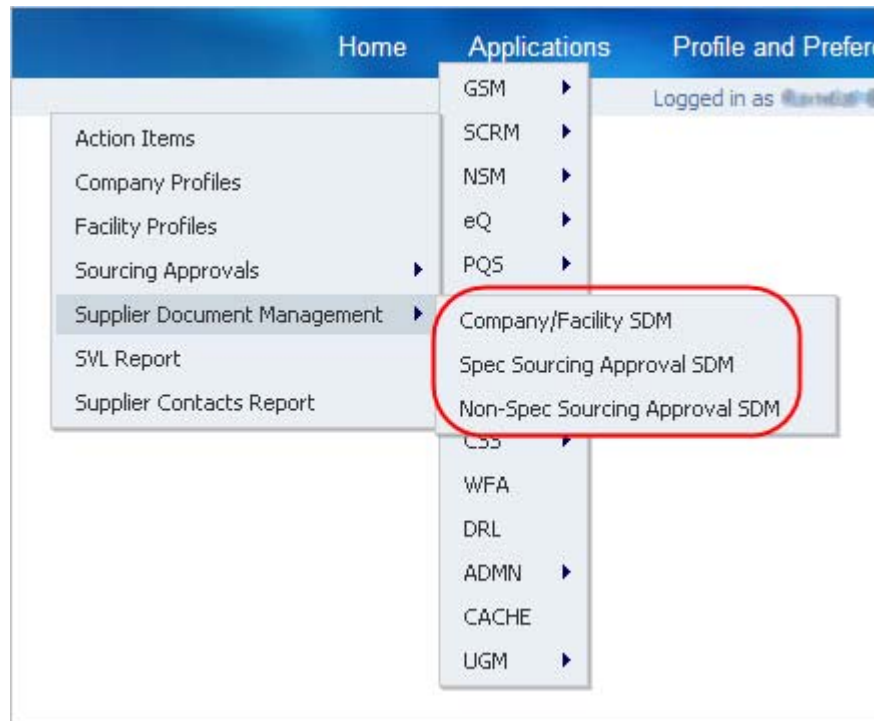

Figure 4-4: Applications menu

The search feature in Supplier Document Management includes three standard business unit search options:

- **Exact**—Searches for documents within a specific business unit
- **Children**—Searches for documents within a certain business unit as well as the children of that business unit
- **Hierarchy**—Performs a hierarchical business unit search for documents

These options display at the top of the key field search drop-down list, as shown in figure 4-5 below.

Figure 4-5: New SDM search options

Company/Facility SDM

Search Criteria

-
- Business Unit (+Children)
- Business Unit (Exact Match)
- Business Unit (Hierarchical)
- City
- Company
- Company/Facility Name
- Company/Facility Status
- Country Name
- Description
- Document Type
- Due/Renewal Date
- Effective Date
- Expiration Date
- Facility
- Originator
- Postal Code
- Sourcing (taxonomy)
- State/Province
- Status

To search for a supplier document:

- 1 Select a search option from the navigation panel or the Applications menu.
- 2 Enter criteria in the search fields, then click **Search**. The Search Results table lists all supplier documents meeting the criteria you specified, as figure 4-6 shows below.

Figure 4-6: Returned supplier documents

Click the date fields to display a calendar pop-up window.

Click these icons to clear the date fields.

- 4 Complete the following fields in the Supplier Document Management section:

(Object Name)—The name of the company, facility, specification-related sourcing approval, or non-specification related sourcing approval. This field is supplied by the system and cannot be changed.

Document Type—Type of supplier document.

Document Status (unlabeled)—Status of the document.

Description—Description of the document.

Originator—The name of the person who created the document. This field is supplied by the system and cannot be changed.

Due/Renewal Date—The due date or renewal date.

Effective Date—The date the supplier document takes effect.

Expiration Date—The date the supplier document expires.

Security Classification—The security classification assigned to the document. This field appears when object level security (OLS) is configured on. For more information on OLS, refer to the *Agile Product Lifecycle Management for Process Administrator User Guide*.

- 5 Click **Save** at the top right of the page. The Add New button displays at the bottom of the Attachments section.
- 6 Click **Add New** to add a new attachment to the supplier document. SCRM displays the Attachment Detail dialog box, as shown in figure 4-10 below.

Figure 4-10: Attachment Detail dialog box

The screenshot shows the 'Attachment Detail' dialog box with a title bar and 'Done' and 'Cancel' buttons. The form contains the following fields and controls:

- Owner:** A label followed by two input fields. The first field contains 'John Smith' and the second field contains '555-111-2222'.
- Title:** A label followed by a single input field.
- Effective:** A label followed by a date field containing 'Tuesday, August 18, 2009'.
- Publish to Supplier Portal:** A checkbox that is currently unchecked.
- Attached files:** A table with two columns: 'Attached files' and 'Size'. The table is currently empty.
- File Selection:** An input field followed by a 'Browse...' button.
- Upload Limit:** A label 'Upload limit on the file size: 11 MB'.
- Upload:** A button.

- 7 Complete the following fields:
- **Owner**—The owner of the attachment. This field is pre-populated with the name of the user who is logged into the system.
 - **Title**—The title of the attachment.

- **Effective**—The effective date of the attachment. This field is pre-populated with the current date.
 - **Publish to Supplier Portal**—Check this box if you want to publish the attachment on Supplier Portal.
- 8 Attach the file by clicking **Browse** to search for the file, and then click **Upload**.
 - 9 Click **Done** at the top right of the page. The Supplier Document Management page refreshes and the fields you changed display in edit mode.
 - 10 Click **Save & Close Document** at the top right of the page.

Editing Supplier Documents

To edit a supplier document, use the Supplier Document Management search feature or go to the business object to locate the document. Click **Edit Document**. The Supplier Document Management page displays in edit mode. Make changes to the fields as described on page 4-8. Click **Save** at the top right of the page.

Deleting Supplier Documents

To delete a supplier document, use the Supplier Document Management search feature or go directly to the business object to locate the document. With the page in edit mode, click the delete icon (✖) on the row of the document that you want to delete, as figure 4-11 shows below.

Figure 4-11: Business object document row in edit mode

Supplier Document Management							
	Document	Due/Renewal Date	Effective Date	Expiration Date	Status	Attached files	
	Workplace Safety Internal workplace safety document provided to all suppliers	12/31/2008	1/1/2007	12/31/2008	New Supplier		
Add New							

Click **OK** in the confirm deletion dialog box. Click **Save** at the top right of the page.
