About This Guide

This guide provides detailed instructions and supporting information for installing and configuring InQuira iConnect for Oracle CRM On Demand Self-Service Portal for use with an InQuira application. This guide is intended for application developers and systems administrators who need to plan for and perform integration of the On Demand Self-Service Portal with an InQuira application and a supported Oracle CRM application.

This preface includes information on:

- The general organization of this guide
- The InQuira contact information
- The available product documentation

In This Guide

The iConnect for Oracle CRM On Demand Integration Guide is divided into the following sections:

Chapter 1, CRM On Demand Configuration	This chapter describes InQuira CRM On Demand configuration.
Chapter 2, Mapping Tool Setup	This chapter describes how to configure the CRM On Demand mapping tool components that make InQuira applications available to the CRM application.
Chapter 3, Self-Service CRM On-Demand Configuration	This chapter describes InQuira On Demand Self-Service Portal configuration.
Chapter 4, Setting up Web Services	This chapter describes the Web Service setup necessary for communication between the applications.
Chapter 5, SSP Mapping Tool – Deployment and Setup	This chapter describes how to configure the On Demand Self-Service Portal mapping tool components that make InQuira applications available to the SSP application.
Chapter 6, Web Application Configuration	This chapter describes how to configure the SSP web application.
Chapter 7, Configuring InQuira	This chapter describes how to configure the InQuira System Manager and Information Manager components.
Chapter 8, Self-Service Portal User Administration	This chapter describes how to implement and administer the SSP.
Chapter 9, Reports Configuration	This chapter describes how to configure reporting tools.
Appendix A: Build Configuration Updates	This appendix provides a reference for configuration updates.
Appendix B: Troubleshooting	This appendix contains information on troubleshooting the XML sent by Information Manager and Intelligent Search.

Contacting InQuira

You can contact InQuira by mail, telephone, fax, and email.

Address:	900 Cherry Ave. 6th floor San Bruno, CA 94066
Telephone:	(650) 246-5000
Fax:	(650) 246-5036
Email:	For sales information, send email to sales@inquira.com . For product support, send email to support@inquira.com .
World Wide Web:	Learn more about InQuira products, solutions, services, and support on the world wide web at: www.inquiracom.com .

InQuira Product Documentation

InQuira documentation is available only to licensed users of our software products and may not be redistributed in any form without express permission from InQuira, Inc.

The InQuira documentation is available in PDF format. Customers can download the PDF files from:

<http://documentation.inquiracom.com/>

Note: You need a PDF reader application installed on each processor on which you plan to view the InQuira product documentation. The Adobe Acrobat reader is available from Adobe Systems at: <http://www.adobe.com>.

If you encounter a problem, need help using the documentation, or want to report an error in the content, please contact InQuira Customer Support.

If you need help obtaining InQuira product documentation, or want to obtain permission to redistribute a portion of the contents, please contact your InQuira account representative.

Detailed information about each product document set is available in:

- “InQuira Analytics Documentation” on page 3
- “Intelligent Search Documentation” on page 3
- “Information Manager Documentation” on page 4
- “iConnect Integration Documentation” on page 4

Additional information about documentation conventions and standards can be found in:

- “Screen and Text Representations” on page 5
- “References to World Wide Web Resources” on page 5

InQuira Analytics Documentation

InQuira Analytics is distributed with the following documentation.

Document	Number	Description
InQuira Analytics Installation Guide	IA80-IG-00	This guide is intended for technical staff who are responsible for installing InQuira Analytics. It provides detailed information on installing and configuring the InQuira Analytics product for use with an InQuira 8.1 application.
Analytics User Guide	IA80-CA-00	This guide is intended for systems and application administrators who need to configure the Intelligent Search and Information Manager Analytics components to report on InQuira 8.1 application performance.

Intelligent Search Documentation

Intelligent Search is distributed with the following documentation.

Document	Number	Description
Intelligent Search Installation Guide	IS80-IG-00	This guide is intended for technical staff who are responsible for installing InQuira 8.1. It provides detailed information on installing InQuira 8.1 and configuring the application on a single processor using the Installation Configuration Environment facility.
Intelligent Search Administration Guide	IS80-CA-00	This guide is intended for system and application administrators who need to configure an InQuira 8.1 application in an enterprise environment. It describes InQuira 8.1 integration, development, configuration, and maintenance processes and tasks.
Intelligent Search Language Administration Guide	IS80-LA-00	This guide is intended for business users and subject matter experts who need to create and maintain the language processing elements of a InQuira 8.1 application using the System Manager. This book provides usage information about the System Manager, conceptual information about the InQuira 8.1 language objects, and task information about the process of managing the user experience provided by the InQuira 8.1 application.
Intelligent Search Language Tuning Guide	IS80-LD-00	This guide is intended for application developers who need to create and maintain advanced InQuira 8.1 language-processing elements using the Dictionary and other InQuira Language Workbench applications.
Intelligent Search Optimization Guide	IS80-AG-00	This guide is intended for application developers who need to implement InQuira 8.1 advanced features, including Personalized Navigation and Process Wizards.
Intelligent Search Application Development Guide	IS80-API-00	This guide provides information about integrating and customizing the InQuira 8.1 Personalized Response User Interface.
Intelligent Search Language Reference	IS80-LRG-00	This guide is for language developers implementing InQuira 8.1 applications that utilize the intent libraries and advanced language processing functions. These guides are published as separate documents that provide reference information for each industry-specific intent library. Each reference also contains complete descriptions of InQuira Match Language and Variable Instantiation Language.

Document (<i>continued</i>)	Number	Description (<i>continued</i>)
Intelligent Search User Interface Guide	IS80-UI-00	This guide is intended for application developers who need to customize the InQuira 8.1 Personalized Response User Interface, and integrate it with a production web application. It contains information about the elements and features of the User Interface, and provides guidelines for integrating it into an enterprise web architecture, customizing its appearance and functionality, and implementing various special features.

Information Manager Documentation

InQuira Information Manager is distributed with the following documentation.

Document	Number	Description
Information Manager Installation Guide	IM80-IG-00	This guide is intended for technical staff who are responsible for installing InQuira Information Manager. It provides detailed information on installing and configuring the Information Manager product.
Information Manager Administration Guide	IM80-CA-00	This guide is intended for systems and application administrators who need to configure and administer an InQuira Information Manager application, and integrate it with an InQuira 8.1 application. It also contains information for general business users who need to use the Information Manager to create and manage content.
Information Manager Content Authoring Guide	IM80-AG-00	This guide is intended for technical staff who are responsible for authoring content in InQuira Information Manager. It provides detailed information on creating content and managing workflow tasks in the Information Manager console.
Information Manager Developer's Guide	IM80-WSR-00	This guide is intended for application developers who need to integrate Information Manager content, content category, and user and security functions with external applications. It contains reference information and examples for all packages, classes, methods, and interfaces of the Information Manager Web Services API.

iConnect Integration Documentation

The InQuira iConnect products are distributed with the following documentation.

Document	Number	Description
iConnect Developers Guide	CA20-IG-01	This guide is intended for application developers and systems administrators who need to plan for and integrate the InQuira iConnect with an InQuira application and a supported CRM application.
iConnect for Siebel Contact Center Integration Guide	CA82-IG-00	This guide is intended for application developers and systems administrators who need to plan for and integrate the InQuira iConnect with an InQuira application and a supported Siebel application.

Document (<i>continued</i>)	Number	Description (<i>continued</i>)
iConnect for Oracle CRM On Demand Integration Guide	CRMOD82-SG-01	This guide is intended for application developers and systems administrators who need to plan for and integrate the InQuira iConnect CRM On Demand Self-Service Portal with an InQuira application and a supported Oracle CRM application.
iConnect for Oracle CRM On Demand User Guide	CRMOD82-SS-01	This guide is intended for systems administrators and users who need to administer and use the InQuira iConnect CRM On Demand Self-Service Portal with an InQuira application and a supported Oracle CRM application.

InQuira Platform Documentation

The InQuira products are distributed with the following general platform documentation.

Document	Number	Description
Client Library API Implementation Guide	CLAPI82-IG-00	This guide provides instructions and supporting information for implementing the InQuira Client Library API for use with an InQuira application. This guide is intended for application developers and systems administrators to provide an understanding of the design and architecture of the InQuira client library to facilitate custom development and integration with InQuira technologies.
InQuira Database Schema Reference	IQ82-DD-00	This guide is intended for database administrators and other technical users who need to information about InQuira Analytics, Information Manager, and Intelligent Search database tables and fields in order to create reports.
InQuira Events and Messages Reference	IQ82-EM-00	This guide is intended for application developers and systems administrators who need to reference specific InQuira events and messages.
Web Application Security Configuration Guide	WAS82-SG-03	This guide is intended for systems administrators and users who need to administer and use the InQuira iConnect CRM On Demand Self-Service Portal with an InQuira application and a supported Oracle CRM application.

Screen and Text Representations

The product screens, screen text, and file contents depicted in the documentation are examples. We attempt to convey the product's appearance and functionality as accurately as possible; however, the actual product contents and displays may differ from the published examples.

References to World Wide Web Resources

For your convenience, we refer to Uniform Resource Locators (URLs) for resources published on the World Wide Web when appropriate. We attempt to provide accurate information; however, these resources are controlled by their respective owners and are therefore subject to change at any time.

CRM On Demand Configuration

For iConnect functionality, you must configure the CRM On Demand application.

iConnect for CRMOD has the following requirements :

- Ability to embed InQuira answers page (An External Website) as a Web Applet in the Service Request Detail page.
- Ability to pass a set of key information to InQuira Find Answers Portal
- Ability to authenticate SSO Token from CRM On Demand in InQuira
- Ability to Link/Unlink/Get Linked InQuira Answers for a Service Request (InQuira Answers are in turn is stored in one of the Web Service 1.0 Custom Objects1 - 3)

Steps for Embedding InQuira Search Site within CRM On Demand

- 1 Logon to CRM On Demand Application
- 2 Click on the 'Admin ' link on the top right corner
- 3 Click on the 'Application Customization' link
- 4 Under 'Record Type Setup', click on 'Service Request' link
- 5 Under 'Page Layout Management' click on 'Service Request Web Applet' link
- 6 Click on the 'New' button and enter the following information:

Field	Value
Name	Find Answers
Location	Detail Page
Type	HTML
Web Applet HTML ¹	<pre><iframe width="100%" height="280" scrolling="yes" frameborder="no" name="myframe"src="https://staging.InQuira.com/iconnect/index?page=cca&sr_key=%%SR_Number%%&question_box=%%Abstract%%&cca_types=solution_id,+resolution_id&ui_mode=question&cca_connected=true&cca_system=crmod&user=%%User id%%&fname=%%Userfirst name%%&lname=%%User last name%%&email=%%Useremail%%&locale=%%User locale code%%&ssoToken=%%SSOToken%%&CONTACT_ID=%%Contact_Id%%&CONTACT_EMAIL=%%Contact_Email%%&cca_case_desc=%%Abstract%%&url=https://secure-ausomxapa.crmondemand.com?id="iconnect"></iframe></pre>

1. Note:

- "src" is the InQuira web application access URL, it should be `http://<servername>/support/index?.....`
- "iconnect" is the iconnect web application name deployed. In this case, Application type "iConnect" has been deployed as "iconnect"
- "url" is the ondemand crm application access url for customers. For each customer this url is different.

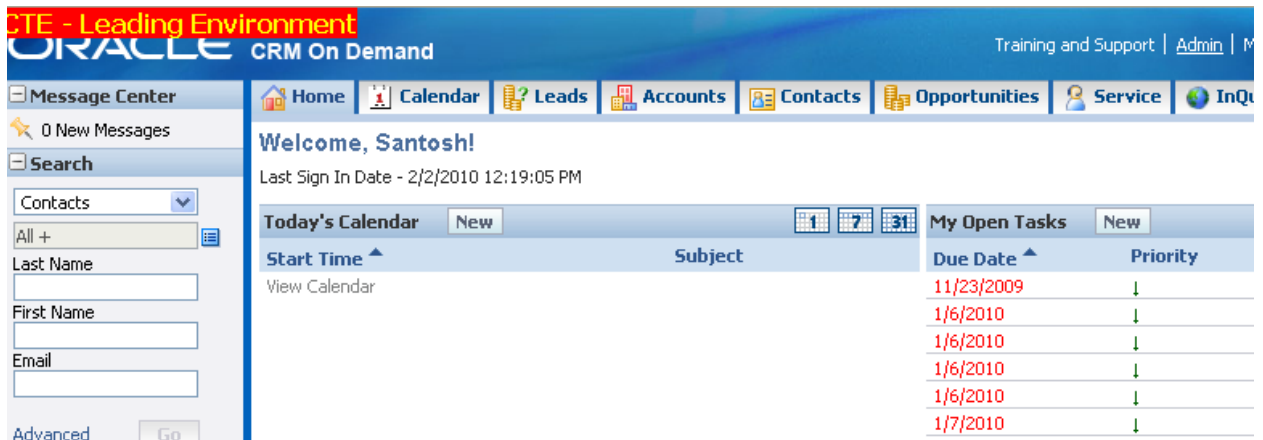

- 7 Click **Save**.
- 8 Go to any Service Request Detail page and click **Edit Layout** in the top right corner and move the 'Find Answers' from Available Related Information to Displayed Related Information.

WALK-THRU

- 1 Logon to CRM On Demand Application

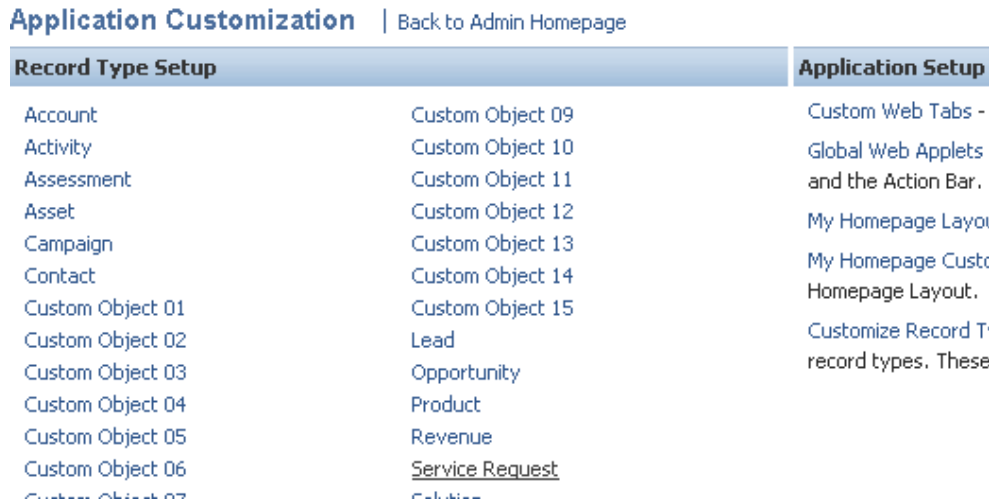

- 2 Click on the 'Admin' link on the top right corner

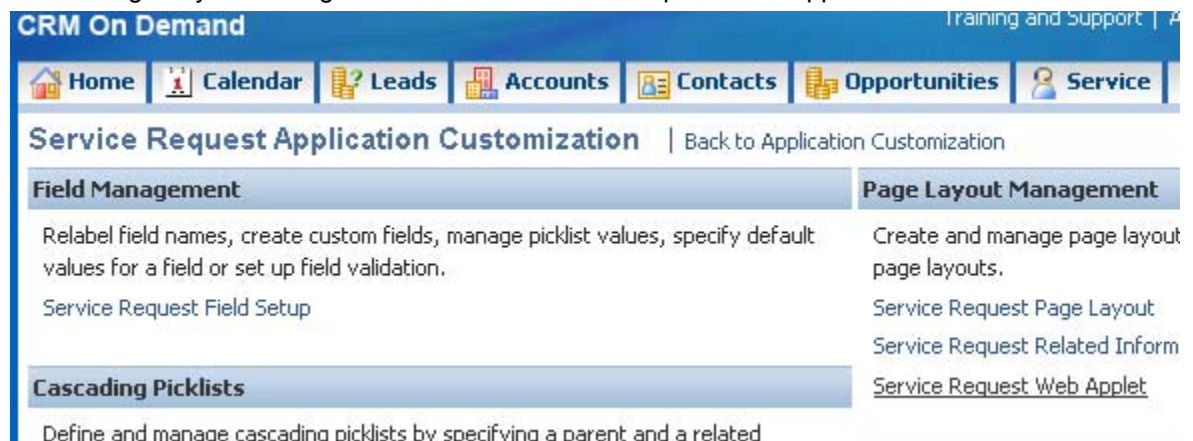

- 3 Click on the 'Application Customization' link

- 4 Under 'Record Type Setup', click on 'Service Request' link

- 5 Under 'Page Layout Management' click on 'Service Request Web Applet' link

- 6 Click on the 'New' button and enter the information listed above in step 6.

Setting Up a Symbolic Link

A *symbolic link* is a context-dependent link that has variables embedded in it. Variables embedded in a symbolic link may include user and or environment specific information.

The url specified in the src attribute of the iframe is the symbolic link to access the answers.

Parameter Key	Value
Main URL	http://<server-name>/<iconnect application context-name>/index?page=cca e.g. http://staging:8226/ssp/index?page=cca Note: <application context-name> is used to deploy the iConnect Web Application. Remember this name and make certain that the iConnect web application is registered with the same name.
sr_key	%%%SR_Number%%%
question_box	%%%Abstract%%%
cca_type	solution_id,+resolution_id
ui_mode	question
cca_connected	true
cca_system	crmod
user	%%%User id%%%
fname	%%%User first name%%%
lname	%%%User last name%%%
email	%%%User email%%%
locale	%%%User locale code%%%
ssoToken	%%%SSO Token%%%
SSP Authentication URL	&url=https://secure-ausomxapa.crmondemand.com"
CONTACT_ID	%%%Contact_Id%%%
CONTACT_EMAIL	%%%Contact_Email%%%

Authenticate the SSO Token

Refer to InQuira documentation “How to use and test SSO”

Single Sign-on

InQuira accepts the user credentials (user id and password) that are passed and automatically logs on the user when the user initiates the first search request for a case, if the user is known. If the user is unknown, then the user appears as an anonymous user.

The user is mapped to a user Role, which dictates the privileges for that user that are displayed within the InQuira application.

This password encryption/decryption only affects the autologin for system integration. It does not affect the normal login process, being native InQuira implementation, LDAP, or any custom made implementation through IAuthenticate.

Using HTTPS communication between CCA and InfoCenter/iConnect further improves the security for sensitive data.

If using Single Sign-on products, such as Site Minder, a customized SSO can replace the AUTOLOGIN delivered.

CCA Implementation

Define InQuira User Name and Password in SSO configuration. The password should be encrypted (entered in encrypted format). The default password is encrypted as it is in Information Manager when a user/password is created. See “InQuira InfoCenter Password” on page 21.

iConnect Application Configuration

Configure the encryption algorithm for entry CRYPTO_CLASS_NAME in config.properties for each iConnect application. This can be done though IM console, System Config Expert mode. By default, it is preconfigured as com.inquirafoundation.utilities.CVEncryption.

The encryption algorithm can be custom implemented and plugin to the iConnect system as long as it implements the following interface.

```
package com.inquirafoundation.utilities;
public interface ICVCrypto {
    public String encryptPassword(String str)throws CVSecurityException ;
    public String decryptPassword(String str)throws CVSecurityException ;
}
```

The encryption algorithm should apply on both CCA and on iConnect.

Steps for Linking/Unlinking/Get Linked Answers

- 1 Customize the Custom Objects and add new fields specific to InQuira
- 2 Map the Custom Object to the InQuira business object

Customizing the Custom Objects

iConnect for CRM only supports Web Service 1.0 Objects. Only three custom objects are supported in WS 1.0:- CustomObject1, CustomObject2 and CustomObject3.

InQuira answers linked to a Service Request must be stored in one of the three custom objects. However at one point of time, only one object must be chosen to represent the InQuira answer.

The following example demonstrates configuration for Custom Object 2.

Note: Choosing a different custom object, once answers have been associated to a particular custom object and after this custom object has been associated to Service Request, may result in loss of data and data corruption.

The following fields are need to be created for Custom Objects in CRM On Demand :-

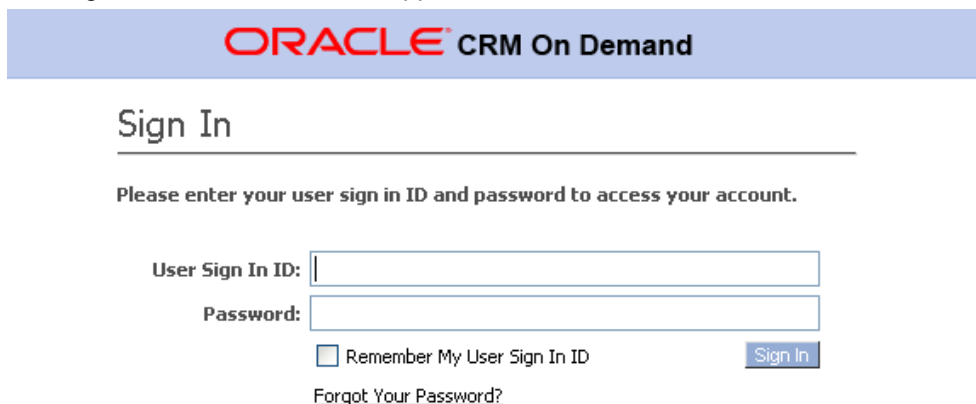

Field Display Name	CRM Data Type
IQTitle	Text (Long)
IQExcerpt	Text (Long)
IQIMDocId	Text (Short)
IQDocType	Text (Short)
IQDocGUID	Text (Long)
IQDocVersion	Text (Short)
IQLinkedDate	Text (Short)
IQDocUrl	Text (Long)

STEPS:-

- 1 Logon to CRM On Demand Application
- 2 Click on the 'Admin ' link on the top right corner
- 3 Click on the 'Application Customization' link
- 4 Under 'Record Type Setup', click on 'Custom Object 2' link
- 5 Select 'Custom Object 02 Field Setup' under Field Management section
- 6 Click on 'New Field' button
- 7 Set Display Name to 'IQTitle', Field Type to 'Text(Long)' and click 'Save'
- 8 Repeat step 6 and 7 for rest of the fields

Mapping Tool Setup

Introduction

Mapping Tool is a web-based configuration tool for setting up the communication between InQuira and CRM On-Demand. It has the following functions:-

- Ability to set up CRM OD Connection Properties
- Ability to set the CRM Objects to Use for mapping
- Ability to view CRM Object Fields (Attributes)
- Ability to map the individual attributes between InQuira and CRMOD

Mapping Tool is deployed as part of the InfoManager Configuration Utility.

CRM On-Demand Connection Properties

This feature provides a mechanism for users to define the connection properties needed for the Web Service Calls.

The following properties are required to be defined:

Property	Description
URL	URL to access Oracle CRM On-Demand
Login	CRM On-Demand Administrator Login
Password	CRM On-Demand Administrator Password
Enable	Select Yes to enable the object.

Property	Description
Package Name for InQuira Objects	Package name of the InQuira-specific Value Objects that will be mapped to CRM Out-Of-Box Objects

Configuration Properties:View/ Edit

Save

Property Name	Property Value
URL :	<input type="text" value="https://secure-ausomxapa.crmondemand.com"/>
User Name :	<input type="text" value="INQUIRA-DEV4/SCHAKRAPANI@SERENECORP.COM"/>
Password :	<input type="text" value="Serene01"/>
Enable :	<input checked="" type="radio"/> On <input type="radio"/> Off

Property Name	Property Value
Package name for InQuira Objects :	<input type="text" value="com.inquila.crm.vo"/>

Note: The URL must not contain any suffixes apart from the URL name.
Examples of Invalid URLs:

- <https://secure-ausomxapa.crmondemand.com/>
- <https://secure-ausomxapa.crmondemand.com/Services/Integration>

Ensure the User Name and Password are correct.

Check with development team what the fully qualified package name where the InQuira Objects [Case, CaseAnswerLinkInfo and CaseActivity] is stored and update the same here.

Set CRM Object

This feature allows users to define the mapping at the Object level between CRM On-Demand OOB Objects (Service Request, Custom Object 1, Custom Object 2, Activity) and InQuira-Specific Value Objects (Case, CaseAnswerLinkInfo, CaseActivity).

Note: Note that package name of the InQuira-Specific Value Objects must match the property 'Package Name for InQuira Objects' defined in the 'CRM On-Demand Connection Properties' section.

Note: The InQuira objects and CRMOD objects, discovered by the mapping tool, must be present in the classpath of the mapping tool web application.

InQuira Object	CRMOD Installed Object
Case	Service Request
CaseActivity	Activity
CaseAnswerLinkInfo	<Custom Objects>

View CRM Object Attributes

This functionality allows users to view all the configured attributes of a CRM OD Out-Of-Box Objects. The following attributes are shown: Display Name, Field Name and Data Type.

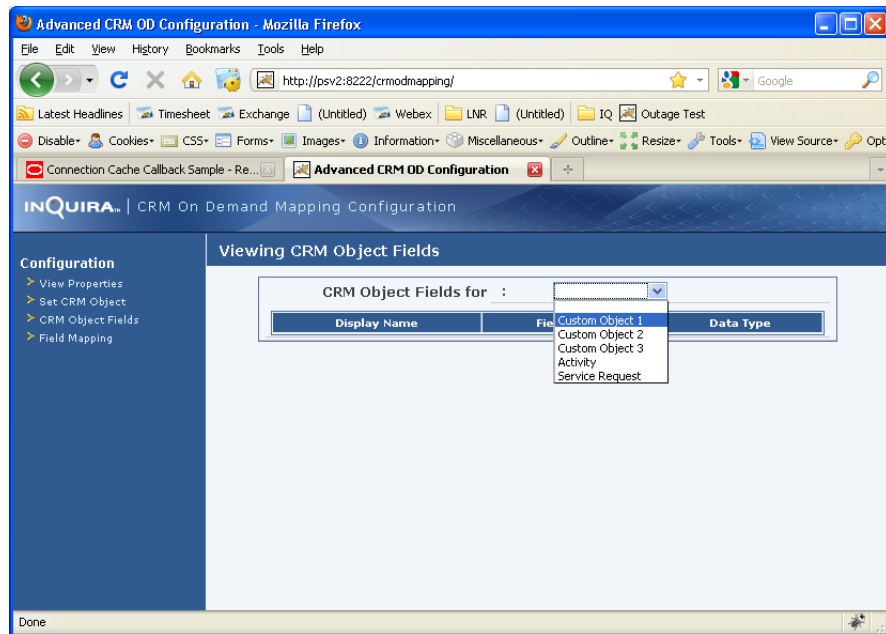

Figure.3.1

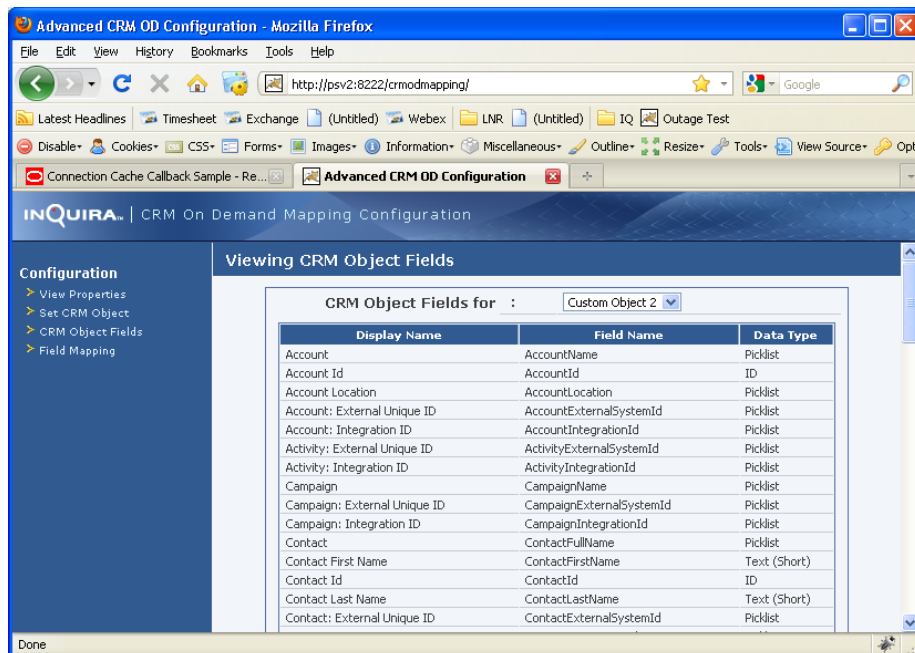

Figure 3.2

Field Mapping

This is one of the most important feature allows users to define the mapping at the Field level between CRM On-Demand OOB Objects (Service Request, Custom Object 1, Custom Object 2, Activity) and InQuira-Specific Value Objects (Case, CaseAnswerLinkInfo, CaseActivity).

Note: The InQuira objects and CRMOD objects, discovered by the mapping tool, must be present in the classpath of the mapping tool web application.

Note: CRMOD Customization of Custom Objects is the pre-requisite for Field Mapping

Case	Service Request	
Attribute Name	Display Name	Field Name

Self-Service CRM On-Demand Configuration

For Self Service functionality, configuration is required on the CRM On Demand application.

Following are the configuration tasks:-

- Customize Contact
 - Add custom fields to Contact Object
 - Add a new section to display Self Service Portal information
 - Add a new web link 'Register New User' for CRM agent to register on behalf of a new user
- Customize Activity
 - Add 2 new types for Task Activity (UserUpdate & UserTopic)
 - Add a new web link 'Topic Link' for Task Activity
 - Enable the 'Topic Link' web link only for Type 'UserTopic'

Contact Customization

Add Custom Fields to Contact

The following fields need to be created for Custom Objects in CRM On Demand :-

Field Display Name	CRM Data Type
• IQAutoPassword	• Checkbox
• IQPassword	• Text (Long)
• IQRegistrationDate	• Date/Time
• IQResetReminder	• Text (Short)
• IQUserRole	• Picklist (Editable)
• IQUserStatus	• Picklist (Editable)
• IQUserType	• Picklist (Editable)

STEPS:

- 1 Logon to CRM On Demand Application
- 2 Click on the 'Admin ' link on the top right corner
- 3 Click on the 'Application Customization' link
- 4 Under 'Record Type Setup', click on 'Contact' link
- 5 Select 'Contact Field Setup' under Field Management section
- 6 Click on 'New Field' button

- 7 Set Display Name to 'IQAutoPassword', Field Type to 'Checkbox' and click 'Save'
- 8 Repeat step 6 and 7 for rest of the fields
- 9 Click on 'Edit Picklist' for Display Name 'IQUserRole'
- 10 Enter the Picklist values as 'Restricted', 'View My Cases', 'Update My Cases', 'View Company Cases' at the appropriate Order and click on 'Save & New' button
- 11 Enter the Picklist values as 'Update Company Cases' at the appropriate Order and click on 'Save & Close' button
- 12 Click on 'Edit Picklist' for Display Name 'IQUserStatus'
- 13 Enter the Picklist values as 'Needs Approval', 'Approved', 'Registration in process' in the appropriate Order and click on 'Save & New' button
- 14 Enter the Picklist values as 'Denied' at the appropriate Order and click on 'Save & Close' button
- 15 Click on 'Edit Picklist' for Display Name 'IQUserType'
- 16 Enter the Picklist values as 'Internal' and click on 'Save & New' button
- 17 Enter the Picklist values as 'External' and click on 'Save & Close' button
- 18 Click on 'New Field' button and Set Display Name to 'Register Self-Service User', Field Type to 'Weblink' and click 'Save'
- 19 Click on 'Edit Web Link' and update the properties as below:-

Property	Value
Display Text	Register Self-Service User
Web Link Target	Open in New Window
Refresh Parent Window	Check
Display Options	Detail Page
Url	http://<server>/ssp/index?page=register&rp=home&contactId=%%Id%%&contactFirstName=%%First_Name%%&contactLastName=%%Last_Name%%&contactEmail=%%Email_Address%%

Setting up Web Services

Downloading WSDL from CRM On Demand

The Web services provided by Oracle CRM On-Demand allow users of client applications to interact with Oracle CRM On Demand, for example, to insert, update, delete, and query records and to perform a number of administrative tasks. The Web services are available through:

- Web Services v1.0. Used to interact with Custom Objects 01-03, as well as preconfigured objects.
- Web Services v2.0. Used to interact with all Oracle CRM On Demand custom objects, as well as preconfigured objects. Compared to Web Services version 1.0, the Web Services version 2.0 API also offers additional options for issuing queries, using the QueryPage method.
- Service APIs. Used to manage administrative tasks through Web services. For example, service APIs allow the administration of users in Oracle CRM On Demand, and provide the ability to issue queries for system and usage information in relation to Oracle CRM On Demand.

From the Web Services Administration page you can:

- Download the Web Services Description Language (WSDL) files used by applications that access the Web services & Access the Web services documentation

Steps for downloading WSDL Files from CRM On Demand

You can download WSDL files for each record type, and for each of the service APIs.

To download a WSDL file

- 1 From the Select Service list, select Web Services v1.0, Web Services v2.0, or Service APIs as required.
- 2 From the WSDL Object list, select the required record type, for example, Service Request or the name of the service API.
- 3 The objects displayed in the WSDL Object list depend on the record types that are set up for your company.
- 4 Click the following button:
 - Download Generic WSDL. A page containing the WSDL is displayed.For Generic WSDL, the custom fields are based on generic XML tags: CustomNumber0, CustomCurrency0, and so on. Using these placeholders, together with the Mapping Service allows applications to map to the field names that your company uses.
- 5 Save the WSDL file to your computer.

Set Up Web Services

1. Login into Oracle CRM On Demand

Generating Java Stubs from WSDL

Introduction

Using open-source tools such as Apache-Axis (WSDL2Java), necessary java code can be generated from the WSDL downloaded from CRM On-Demand. The java source code must be compiled and packaged as a jar file that must be placed under the appropriate classpath of the application that is required to communicate with CRM On-Demand using Web Service Calls.

Steps

- 1 Create a project called OracleWSSStubs20 with the following project structure

- 2 The wsdl2java is an xml file that is used to manage the wsdl and generated source code

```
<project name="OracleWS2.0" default="generateStubs1" basedir=".">
  <property name="axislib" value="${basedir}/../OracleWSSStubs20/lib" />
  <property name="wsldir" value="${basedir}/wsdl" />
  <path id="axiscp">
    <fileset dir="${axislib}">
      <include name="**/*.jar" />
    </fileset>
  </path>
  <target name="generateStubs1" depends="ws1"/>
  <target name="ws1">

    <java fork="true" classname="org.apache.axis.wsdl.WSDL2Java">
      <arg line="${wsldir}/Account.wsdl -n -s -o src -f ${wsldir}/NSToPkg2.properties"/>
      <classpath refid="axiscp"/>
    </java>

    <java fork="true" classname="org.apache.axis.wsdl.WSDL2Java">
      <arg line="${wsldir}/Account2.wsdl -w -a -o src -f ${wsldir}/NSToPkg2.properties"/>
      <classpath refid="axiscp"/>
    </java>
  </target>
</project>
```

- 3 The **axislib** property points to the lib directory containing the necessary jar files required to generate the stubs

- 4 The **wsdl** property points to the wsdl files that was downloaded from CRMOD

\\OracleWSSstubs20\wsdl

X	Name	Type
	NSToPkg2	PROPERTIES File
	Account	WSDL File
	Activity	WSDL File
	Contact	WSDL File
	CustomObject1	WSDL File
	CustomObject2	WSDL File
	CustomObject3	WSDL File
	Mapping	WSDL File
	Picklist	WSDL File
	ServiceRequest	WSDL File
	ServiceRequest2	WSDL File

- 5 Individual entries in the wsdl2java.xml file. Replace the ?.wsdl with the actual wsdl references

```
<java fork="true" classname="org.apache.axis.wsdl.WSDL2Java">
  <arg line="${wsdl}/?.wsdl -n -s -o src -f
    ${wsdl}/NSToPkg2.properties"/>
  <classpath refid="axiscp"/>
</java>
```

- 6 Using ant tool, run the following command at the root of the project structure

(ant -buildfile
wsdl2java.xml)

```
C:\WINDOWS\system32\cmd.exe
C:\eclipse\workspace\OracleWSSstubs20>ant -buildfile wsdl2java.xml
Buildfile: wsdl2java.xml

ws1:

generateStubs1:
BUILD SUCCESSFUL
Total time: 42 seconds
C:\eclipse\workspace\OracleWSSstubs20>
```

- 7 Using ant tool, run the following command at the root of the project structure

(ant)

This should compile the classes and generate a jar

```
C:\WINDOWS\system32\cmd.exe
C:\eclipse\workspace\OracleWSSstubs20>ant
Buildfile: build.xml

clean:
[delete] Deleting directory C:\eclipse\workspace\OracleWSSstubs20\build

compile:
[mkdir] Created dir: C:\eclipse\workspace\OracleWSSstubs20\build\classes
[javac] Compiling 316 source files to C:\eclipse\workspace\OracleWSSstubs20\build\classes
[javac] Note: Some input files use unchecked or unsafe operations.
[javac] Note: Recompile with -Xlint:unchecked for details.

jar:
[mkdir] Created dir: C:\eclipse\workspace\OracleWSSstubs20\build\jar
[jar] Building jar: C:\eclipse\workspace\OracleWSSstubs20\build\jar\crmod-s
tubs-2.0.jar

clean-build:

main:
BUILD SUCCESSFUL
Total time: 10 seconds
C:\eclipse\workspace\OracleWSSstubs20>
```

SSP Mapping Tool – Deployment and Setup

Introduction

Mapping Tool is a web-based configuration tool for setting up the communication between InQuira and CRM On-Demand. It has the following functions:-

- Ability to set up CRM OD Connection Properties
- Ability to set the CRM Objects to Use for mapping
- Ability to view CRM Object Fields (Attributes)
- Ability to map the individual attributes between InQuira and CRMOD

Mapping Tool is deployed as part of the InfoManager Configuration Utility

Deploying the tool

If deploying as a stand-alone web application:

- 1 Check-out the code
- 2 Move the config property file under the src/properties folder into an external file location and update the web.xml entries for `CONFIG_PROPERTIES` (config.properties)
- 3 Build application as a war file
- 4 Deploy the war file in tomcat server

CRM On-Demand Connection Properties

This feature provides a mechanism for users to define the connection properties needed for the Web Service Calls.

The following properties are required to be defined:

Property	Description
URL	URL to access Oracle CRM On-Demand
Login	CRM On-Demand Administrator Login
Password	CRM On-Demand Administrator Password
Enable	Select On to enable the object.

Property	Description
Package Name for Inqura Objects	Package name of the InQuira-specific Value Objects that will be mapped to CRM Out-Of-Box Objects

Configuration Properties:View/Edit

Save

Property Name	Property Value
URL :	<input type="text" value="https://secure-ausomxapa.crmondemand.com"/>
User Name :	<input type="text" value="INQUIRA-DEV4/SCHAKRAPANI@SERENECORP.COM"/>
Password :	<input type="text" value="Serene01"/>
Enable :	<input checked="" type="radio"/> On <input type="radio"/> Off

Property Name	Property Value
Package name for Inqura Objects :	<input type="text" value="com.inqura.crm.vo"/>

Important! The URL must not contain any suffixes apart from the URL name.

Example of Invalid URLs:

`https://secure-ausomxapa.crmondemand.com/`

`https://secure-ausomxapa.crmondemand.com/Services/Integration`

Important! Ensure the User Name and Password are correct. Check with development team what the fully qualified package name where the InQuira Objects [Case, CaseAnswerLinkInfo, CaseActivity, SSPCase, SSPContact, SSPActivity] is stored and update the same under 'Package name for inQuira objects'.

The password is encrypted in the appconfig.properties

```

appconfig.properties
#Mon Feb 22 13:53:52 PST 2010
OD_WS_LOGIN_USERNAME=INQUIRA-DEV3/DMOJAHED
FROM_PACKAGE=com.inqura.crm.vo
OD_WS_LOGIN_ADDRESS=https://secure-ausomxapa.crmondemand.com
OD_WS_LOGIN_PASSWORD=1VFoBr11/z0Z3o9Gbql1ow\=\=|

```

Set CRM Object

This feature allows users to define the mapping at the Object level between CRM On-Demand OOB Objects (*Service Request, Contact, Activity, Custom Object X*) and SSP Specific Value Objects (*SSPCase, SSPActivity, SSPContact*).

Note: Note that package name of the InQuira-Specific Value Objects must match the property 'Package Name for SSP Objects' defined in the 'CRM On-Demand Connection Properties' section.

Note: The SSP objects and CRMOD objects, discovered by the mapping tool, must be present in the classpath of the mapping tool web application.

InQuira Object	CRMOD Installed Object
Case	Service Request
CaseActivity	Activity
CaseAnswerLinkInfo	<Custom Objects>

InQuira Object**CRM Object Installed Object**

SSPCase	Service Request
SSPContact	Contact
SSPActivity	Activity

View CRM Object Attributes

This functionality allows users to view all the configured attributes of a CRM OD Out-Of-Box Objects. The following attributes are shown: Display Name, Field Name and Data Type.

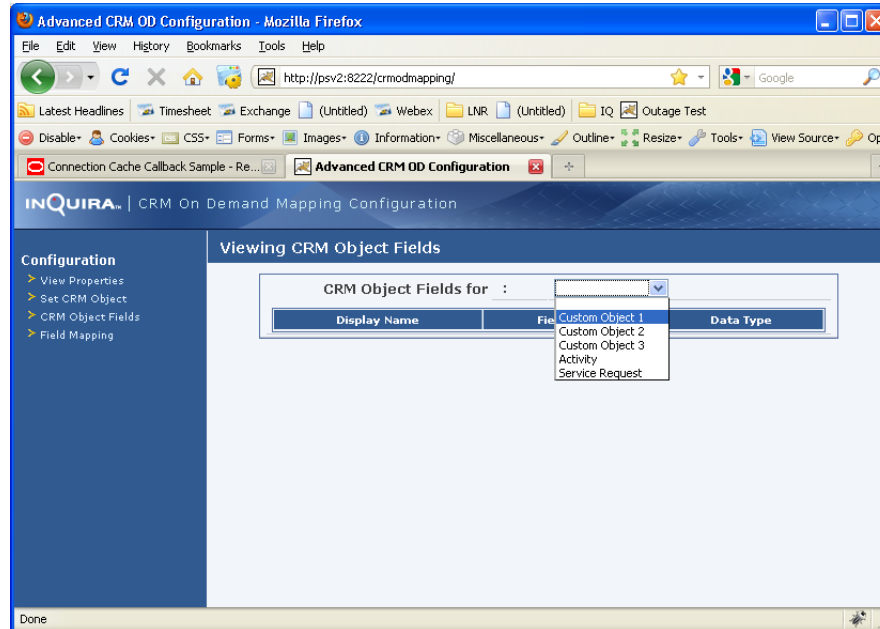

Figure.3.1

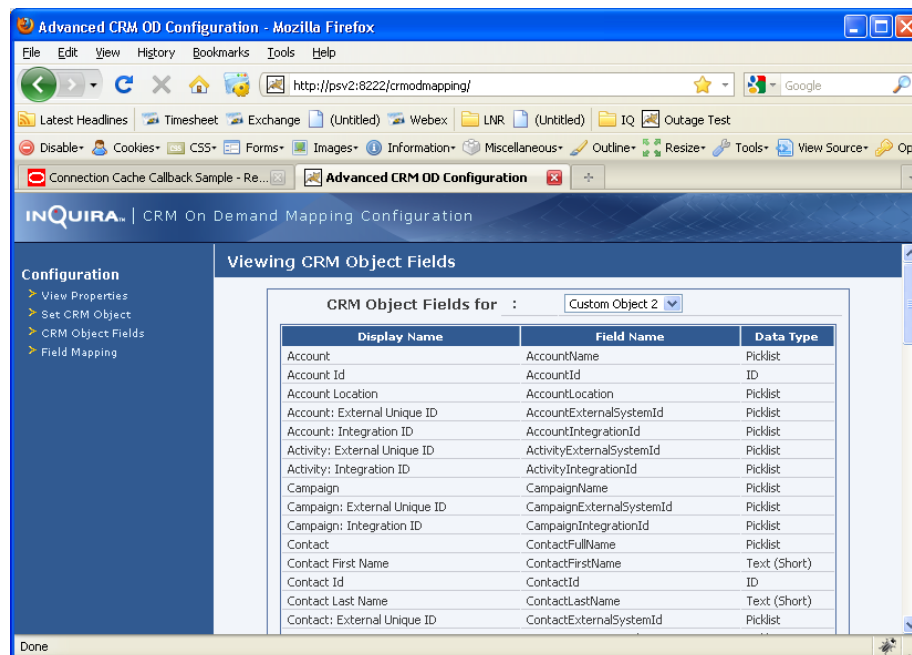

Figure 3.2

Field Mapping

This is one of the most important feature allows users to define the mapping at the Field level between CRM On-Demand OOB Objects (*Service Request, Contact, Activity*) and SSP-Specific Value Objects (*SSPCase, SSPContact*).

Note: The Inquia objects and CRMOD objects, discovered by the mapping tool, must be present in the classpath of the mapping tool web application.

Note: CRMOD Customization of Custom Objects is the pre-requisite for Field Mapping

SSPContact	Service Request	
Attribute Name	Display Name	Field Name
contactId		contactId
accountId		accountId
description		description
contactType		contactType
createdDate		createdDate
contactEmail		contactEmail
externalSystemId		externalSystemId
contactFirstName		contactFirstName
contactFullName		contactFullName
contactLastName		contactLastName
mrMrs		mrMrs
middleName		middleName
modifiedBy		modifiedBy
modifiedById		modifiedById
modifiedDate		modifiedDate
ownerId		ownerId
owner		owner
ownerFullName		ownerFullName
timeZoneName		timeZoneName
workPhone		workPhone
iqPassword		<Determined during CRMOD customization>
iqUserRole		<Determined during CRMOD customization>
iqStatus		<Determined during CRMOD customization>
iqUserType		<Determined during CRMOD customization>
iqRegistrationDate		<Determined during CRMOD customization>
iqAutoPassword		<Determined during CRMOD customization>

SSPCase	Contact	
Attribute Name	Display Name	Field Name
serviceRequestId		serviceRequestId
createdDate		createdDate
modifiedDate		
accountName		accountName
accountId		accountId
accountLocation		accountLocation
area		area
cause		cause
closedTime		closedTime
contactEmail		contactEmail
contactFirstName		contactFirstName
contactFullName		contactFullName
contactId		contactId
contactLastName		contactLastName
createdByName		createdByName
subject		subject
description		description
ownerId		ownerId
owner		owner
SRNumber		SRNumber
status		status
priority		priority
listOfAttachment		
listOfActivity		

The following mapping is required if linked answers (from iConnect) need to be displayed in Case Details.

Case	Service Request	
Attribute Name	Attribute Name	Attribute Name
	Refer to iConnect setup Documentation	

CaseAnswerLinkInfo	Custom Object 1 – 3	
Attribute Name	Display Name	Field Name
	Refer to iConnect setup Documentation	

CaseActivity	Activity	
Attribute Name	Display Name	Field Name
	Refer to iConnect setup Documentation	

Example Mapping of Contact

After Mapping is complete, user should see the following:

SSPContact	Contact_Type	
contactId	contactId	×
accountId	accountId	×
description	description	×
contactType	contactType	×
createdDate	createdDate	×
contactEmail	contactEmail	×
externalSystemId	externalSystemId	×
contactFirstName	contactFirstName	×
contactFullName	contactFullName	×
contactLastName	contactLastName	×
mrMrs	mrMrs	×
middleName	middleName	×
modifiedBy	modifiedBy	×
modifiedById	modifiedById	×
modifiedDate	modifiedDate	×
ownerId	ownerId	×
owner	owner	×
ownerFullName	ownerFullName	×
timeZoneName	timeZoneName	×
workPhone	workPhone	×
iqPassword	customText0	×
iqUserRole	customPickList2	×
iqStatus	customPickList1	×
iqUserType	customPickList3	×
iqRegistrationDate	customDate0	×
iqAutoPassword	customBoolean0	×
iqResetReminder	customText30	×

Example Mapping of Service Request

After Mapping is complete, user should see the following:-

SSPCase	ServiceRequest_Type
<input checked="" type="checkbox"/> serviceRequestId	<input checked="" type="checkbox"/> serviceRequestId
<input checked="" type="checkbox"/> createDate	<input checked="" type="checkbox"/> createDate
<input checked="" type="checkbox"/> modifiedDate	<input checked="" type="checkbox"/> modifiedDate
<input checked="" type="checkbox"/> accountName	<input checked="" type="checkbox"/> accountName
<input checked="" type="checkbox"/> accountId	<input checked="" type="checkbox"/> accountId
<input checked="" type="checkbox"/> accountLocation	<input checked="" type="checkbox"/> accountLocation
<input checked="" type="checkbox"/> area	<input checked="" type="checkbox"/> area
<input checked="" type="checkbox"/> cause	<input checked="" type="checkbox"/> cause
<input checked="" type="checkbox"/> closedTime	<input checked="" type="checkbox"/> closedTime
<input checked="" type="checkbox"/> contactEmail	<input checked="" type="checkbox"/> contactEmail
<input checked="" type="checkbox"/> contactFirstName	<input checked="" type="checkbox"/> contactFirstName
<input checked="" type="checkbox"/> contactFullName	<input checked="" type="checkbox"/> contactFullName
<input checked="" type="checkbox"/> contactId	<input checked="" type="checkbox"/> contactId
<input checked="" type="checkbox"/> contactLastName	<input checked="" type="checkbox"/> contactLastName
<input checked="" type="checkbox"/> createdByName	<input checked="" type="checkbox"/> createdByName
<input checked="" type="checkbox"/> subject	<input checked="" type="checkbox"/> subject
<input checked="" type="checkbox"/> description	<input checked="" type="checkbox"/> description
<input checked="" type="checkbox"/> ownerId	<input checked="" type="checkbox"/> ownerId
<input checked="" type="checkbox"/> owner	<input checked="" type="checkbox"/> owner
<input checked="" type="checkbox"/> SRNumber	<input checked="" type="checkbox"/> SRNumber
<input checked="" type="checkbox"/> status	<input checked="" type="checkbox"/> status
<input checked="" type="checkbox"/> priority	<input checked="" type="checkbox"/> priority
<input checked="" type="checkbox"/> listOfAttachment	<input checked="" type="checkbox"/> listOfAttachment
<input checked="" type="checkbox"/> listOfActivity	<input checked="" type="checkbox"/> listOfActivity

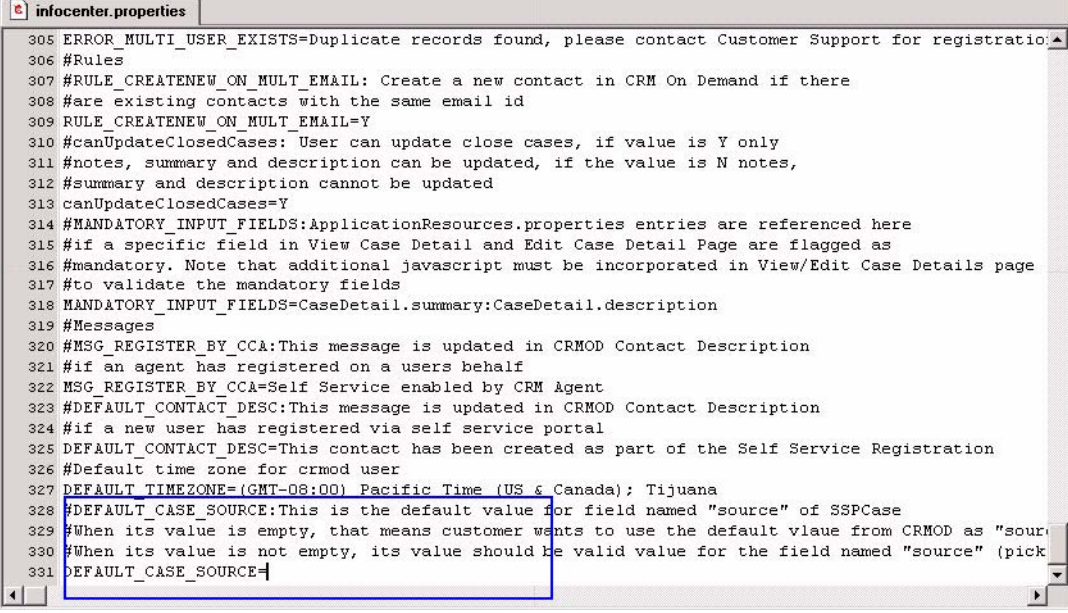

Mapping of the "source" field for SSPCase and CRMOD Service Request

If you choose to use the default value of CRMOD Service Request field "source" as the value of the "source" field for SSPCase, set the default value of CRMOD service Request field "source" in CRMOD side and no additional configuration is necessary.

SSPCase	ServiceRequest_Type
<input checked="" type="checkbox"/> serviceRequestId	<input checked="" type="checkbox"/> serviceRequestId
<input checked="" type="checkbox"/> createDate	<input checked="" type="checkbox"/> createDate
<input checked="" type="checkbox"/> modifiedDate	<input checked="" type="checkbox"/> createDate
<input checked="" type="checkbox"/> accountName	<input checked="" type="checkbox"/> accountName
<input checked="" type="checkbox"/> accountId	<input checked="" type="checkbox"/> accountId
<input checked="" type="checkbox"/> accountLocation	<input checked="" type="checkbox"/> accountLocation
<input checked="" type="checkbox"/> area	<input checked="" type="checkbox"/> area
<input checked="" type="checkbox"/> cause	<input checked="" type="checkbox"/> cause
<input checked="" type="checkbox"/> source	<input checked="" type="checkbox"/> source
<input checked="" type="checkbox"/> closedTime	<input checked="" type="checkbox"/> closedTime
<input checked="" type="checkbox"/> contactEmail	<input checked="" type="checkbox"/> contactEmail
<input checked="" type="checkbox"/> contactFirstName	<input checked="" type="checkbox"/> contactFirstName

If you choose to set the value of the "source" field for SSPCase not using the default value of CRMOD Service Request field "source", complete the following additional configuration steps:

- 1 While doing the field mapping configuration, you also must do the field mapping for field "source" of SSPCase and CRMOD Service Request in System Manager side.
- 2 Do the configuration to set the value of field "source" of SSPCase in "infocenter.properties". The related key is "DEFAULT_CASE_SOURCE" and the configured value should be one valid value of the field "source" of CRMOD Service Request. For example, "Portal" is one valid value of the field "source" of CRMOD Service Request, so users can set it like this "DEFAULT_CASE_SOURCE=Portal". After that, the field "source" of all CRMOD Service Request from SSP will be set as "Portal".

```

```

Web Application Configuration

This section describes step-by-step approach for setting up web services communication with CRM On Demand in Self Service Portal.

- 1 Following jar files specific to SSP are placed under CRMODServices/SelfService/lib directory

Jar File	Source
gson-1.3.jar	http://code.google.com/p/google-gson/
crmod-stubs-ws2.jar	This is generated from the WSDL's provided by CRM On Demand. The name of the jar file can be anything as long as it does not conflict with other jar files in the library
displaytag-1.2.jar	http://displaytag.sourceforge.net/1.2/download.html
jcaptcha-all-1.0-RC6.jar	http://sourceforge.net/projects/jcaptcha/files/
custom-jcaptcha.jar	This jar file was generated using code provided by InQuira(Mark Buckallew)

- 2 Update web.xml to include Quartz scheduler, MappingInitServlet, SSPRegValServlet, CaptchaServlet, ViewSRAttachment

File (Web XML Entries)	Purpose
MappingInitServlet	Load the mapping, appconfig and crmodconfig properties into memory on application startup
SSPRegValServlet	Servlet to activate a registration activated via an email link
QuartzInitializer	Load the quartz.properties into memory on application startup. This required for running jobs that refresh the session pool
CaptchaServlet	Servlet required for word verification during user registration
ViewSRAttachment	Servlet required for downloading files associated with a Service Request
SSPTagLib	Tag Library for SSP

```

Configuring InQuira

Export Properties

Use the Export Properties feature to export the CRMOD configuration files for InQuira webapp's integration with CRMOD.

Field	Description
Export CRMOD config files to:	Enter the full file path for the location where the CRMOD integration configuration properties files to be exported. The exported files are <code>appconfig.properties</code> , <code>crmconfig.properties</code> and <code>mapping.properties</code> . Click Export .

If the specific directories do not exist, the user will be asked to create the directory first.

If the directories and files already exist, the exported files will over write the existing files.

When completed, the system displays this message: The properties files are exported successfully.

Setting Up Contact Center Advisor in System Manager

You must complete the Contact Center Advisor setup in System Manager. See *iConnect Developers Guide*, Chapter 3, “Deploying iConnect in a CRM Environment” for details on completing this setup.

Use the following parameters:

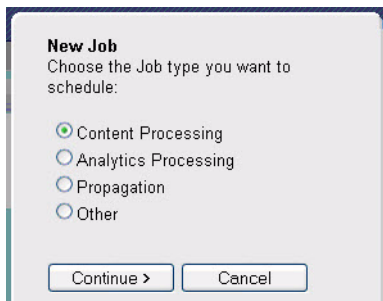

Parameter	Entry
cca-response-handler-impl	
Item name	cmrod
cca-response-handler-impl	com.InQuira.response.cca.CCACRMODLinkedAnswersResponseHandler
cca-request-handler-impl	
Item name	cmrod
cca-request-handler-impl	com.InQuira.request.cca.CCACRMODHandler
Call Center Adviser	
cca-request-handler	cmrod (select from picklist)
cca-response-handler-impl	cmrod (select from picklist)
Base URL	This is the cmrod URL provided to the customer.
User Name	User name with admin privilege created on CRMOD.
Password	Password of above user.

Propagate number.xml file to Synch with Runtime

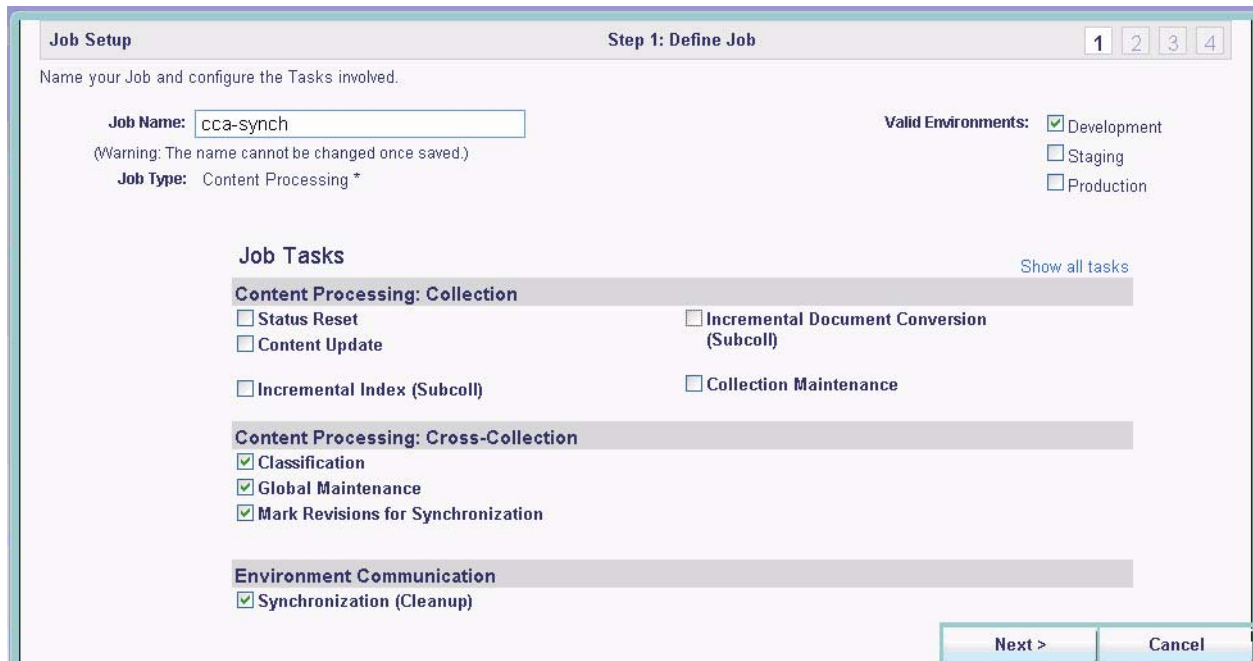

- 1 Logon to InQira System Manager at `http://<server-name>:port (if required) >/InQirawb/app`
- 2 Create the schedule job to synch. Go to Schedule->New

- 3 Select **Content Processing** and click **Continue**.

The Job Setup page displays.

- 4 Enter the parameters provided below and click **Next**.

Parameter	Entry
Job Name:	cca-synch
Valid Environments:	Select Development .
Job Tasks	
Content Processing: Collection	Leave all fields clear
Content Processing: Cross-Collection	Select all.
Environment Communication	Select Synchronization (cleanup) .

- 5 Click **Next**.

Job Setup: cca-synch Step 3: Schedule Run Times

Determine when the Job will run and how often it will repeat.

How often do you want to run this Job?
Repeat: On Demand

< Back Next > Cancel

- 6 Click **Save**.

Job Setup: cca-synch Step 4: Configure Notifications

Configure who will be notified of Job processing events.

Send e-mail notification to:
Administrators

When the Job...
☐ starts
☐ succeeds
☒ fails

< Back Save Cancel

- 7 Select the job and click More Actions-> Start Job Now.

Current System Time: 06/23/2010 06:36 PM

Job	Status	Next Start Time	Env
testFullCollection	Succ		D S P
synchcca	On D		D S P
cca-synch	On D		D S P

Start Job cca-synch

- ☒ Start Job now
- ☐ Temporarily modify job before starting
- ☐ Continue Job Processing
- ☐ Restart from Failure

Continue > Cancel

View... Edit... New... More Actions

- 8 Click **Continue**.

Allow the job to run to completion.

Information Manager Setup and Configuration

The following sections describe:

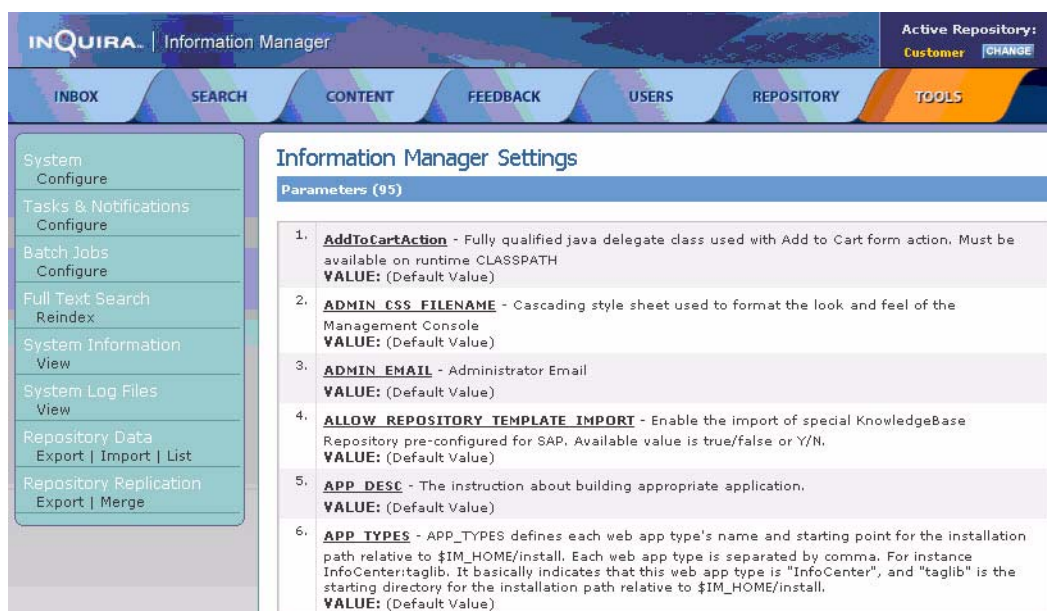

- **Updating System Configuration**
- **Deploying SSP Web Application**
- **Deploying iConnect Web Application**

Updating System Configuration

- 1 Login to Information Manager Console from Web Application server. (<http://<servername>/InfoManager>).

- 2 Go to "Tools->System:Configure-> Go to Expert Mode" as shown below.

The following screen appears:

Note: This screen shot shows a partial page. All parameters listed below appear on the full page.

- Click on a parameter link to modify/configure the value. Follow the below table for the parameters need to be changed and values.

Paramter Name / Field	Value
APP_TYPES	
Parameter Value	InfoCenter:taglib,SSP:ssp,iConnect:iconnect
Allow administrators to edit value	Select

Save to default value	Select

Deploying SSP Web Application

- 1 Follow the InfoCenter web application registration. On the application registration page, select **SSP** as the **Application Type**, as shown below.

INQUIRA Information Manager

Web Application Properties

URL To Container

Context*

Application Type:

InfoCenter

InfoCenter

SSP

iConnect

Correct application type to register.

Directory: /opt/inquiras/shared/InfoManager

Choose the web application deployment directory

Move To parent directory

clientLibrary

- 2 After completing the Web application registration, copy the files `appconfig.properties`, `crmodconfig.properties` and `mapping.properties` from the Indexer server, exported from System Manager Export Properties utility under the folder `/usr/local/InQuira/InQuira_8.2.2/instances/$INQUIRA_Instance/appserverim/webapps/$SSP_Instance/WEB-INF/classes` on the server where web application is deployed.

Deploying iConnect Web Application

- 1 Follow InfoCenter web application registration. On the application registration page, select **iConnect** as the **Application Type**, as shown below.

Context*

Application Type:

InfoCenter

InfoCenter

SSP

iConnect

Correct application type to register.

Directory: /opt/inquiras/shared/InfoManager

Choose the web application deployment directory

Move To parent directory

Important! Make certain that the iConnect application context name is same as in the ODCRM:Service Request Web Applet. E.g. if the URL in ODCRM is `https://staging.InQuira.com/support/` then the Context here would be `/support`.

- 2** Login to machine where the iConnect application is deployed.
- 3** Go to folder `/usr/local/InQuira/InQuira_8.2.2/instances/imicd1-1/appserverim/webapps/support/WEB-INF/`.
- 4** Open the `infocenter.properties` file.
- 5** Set the value of `ccaDraftContentChannels`, `ccaRecommendationChannels` and `ccaDiscussionBoards`. Values are the `REF_KEY` configured in InformationManager channels. E.g. `ccaDraftContentChannels=SOLUTIONS`, `ccaRecommendationChannels=SOLUTIONS`.

Self-Service Portal User Administration

User Registration Introduction

InQuira's Self Service Portal is an online case (Service Request) management system that enables companies implement web self-service. Self Service integrates Intelligent Search, Discussion Forums, and Information Manager together with Case Management capabilities into a comprehensive knowledge portal that reduces the cost of implementation and ensures consistency of information across all user constituencies, including customer, employees and partners.

It is important to understand that the portal user is represented as a Contact on CRM On Demand with additional custom fields specific to Self Service Portal.

Self Service portal supports escalation processes where a user can submit a case (Service Request) themselves through the knowledge portal. It uses Intelligent Search to attempt to deflect the case or email by providing potential answers to the user's question. Customers can open and track cases online. Employees of a company (Customer) can open and track company cases. They can create topics in discussion forums from their specific case context. They can create notes, upload attachments for a case.

Portal has Time Zone Support for end-users. User can specify the time zone they belong to during the time of registration; they can also modify their time zone settings.

Self Service portal supports new user registration and user account activation triggered via email notification. A newly registered user is created as a contact in CRM On Demand with default status and roles needed to access the portal.

Once a user completes registration, CRM Agents may need to update user's self-service status and roles, and sometimes perform new user registration on behalf of the user if users are unable to do so by themselves.

After a case (Service Request) is created by a Self Service User, CRM Agents can assign the case (Service Request) to appropriate owners, they can communicate with end-users (CRM On Demand Contacts) via special type of notes. Apart from these, CRM agents will work on Service Requests as they would normally do.

CRM agents can also view the topics that the self-service end-users post from the context of a case. Further, agents can view the search history and document history of a case created by an end-user giving some insight to what the user was searching for and what documents they viewed before submitting a case (Service Request).

Registering Users

Self-Service portal allows new users to register themselves. But there are times when users may not be able to perform self-registration. For example, if the user already exists as a contact in CRM On-Demand or if there are multiple contacts matching their email id. It is also possible that there are multiple contacts in the CRM On Demand with matching email ids. It is CRM agent's responsibility to determine if the user, requesting to register, already exist as contacts in CRM On-Demand and if there are multiple contacts for

the same user, identify the right user. Verify if the users already have an Infocenter account (by asking the users), if so then they need not go through the registration process as the portal automatically creates a contact in CRM On Demand when the users logs in into Self Service Portal using Infocenter login and password.

External user registration allows for an email address to be entered as the user ID. The field accepts a maximum of 50 characters. If the user does not select the option **Display Name to Public?**, the registration page prompts for an alias. Information Manager creates the web user record with First Name, Last Name, User ID, and the CRM OD contact ID. If the user selected Use my user ID as my email address, Information Manager stores the email address as the User ID. The contact ID is used when creating or updating activities in CRM OD.

The following CRM OD contact record fields and InQuira web user record fields are required for SSP user registration.

CRM OD Contact Record Required Fields

First Name	
Last Name	
Email Address	
IQAutoPassword	Defaults to Yes to initiate password reset upon login.
IQRegistrationDate	import date
IQUserRole	DEFAULT_CRMOD_USER_ROLE from infocenter.properties file
IQUserStatus	DEFAULT_CRMOD_USER_STATUS from the infocenter.properties file
IQUserType	DEFAULT_CRMOD_USER_TYPE from the infocenter.properties file

InQuira Web User Record Required Fields

First Name	
Last Name	
User ID	
Password	Set to default password.
Email Address	
showName	Display Name to Public? option. When enabled, SSP displays the user's name.
Alias	Required ONLY if the user <i>does not</i> select the Display Name to Public? option.

Remote Authentication Configuration

To complete the require remote authentication configuration:

- 1 Log in to IM System Manager.
- 2 Navigate to Tools > System(Configure) > ExpertMode.
- 3 Select REMOTE_FIELD_BUILDER_CLASS from the list.
- 4 Enter **com.inquiraservices.Idapservices.CRMODFieldBuilder** as input value.
- 5 Save changes.

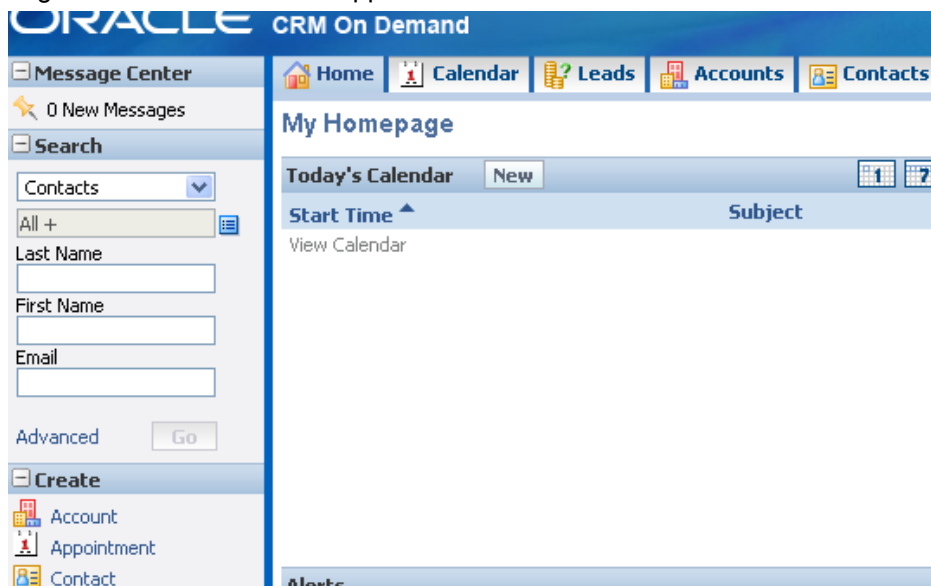

New User Registration

Steps to register a new user:

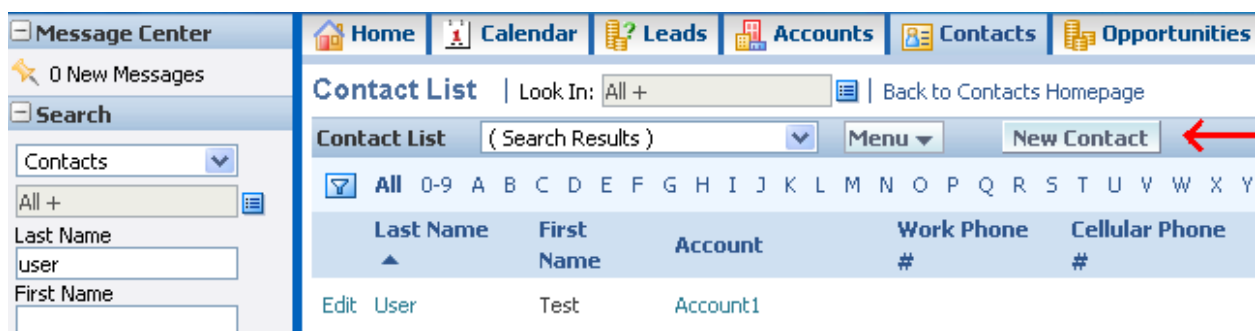

- 1 Logon to CRM On Demand application and search Contacts
 - 2 If the contact does not already exist, create a contact (First Name, Last Name, and Email required). If the contact already exists and is not an existing SSP user, Click on the 'Register Self-Service User' web link. First Name, Last Name and Email Id are automatically pre-populated.
 - 3 Enter a user id of the callers choice
 - 4 Enter all the required fields (If the word verification is not legible, Click on  to get a new word)
 - 5 Click on 'Register'
- If the registration fails, appropriate error messages will be displayed

WALK-THRU

- 1 Logon to CRM On Demand application and search Contacts

- 2 If the contact does not already exist, create a contact (First Name, Last Name, and Email required). If the contact already exists and is not an existing SSP user, Click the [Register Self-Service User](#) link.

Welcome

Registration Request Received
 An activation email has been sent

In case registration fails because the User id is already taken, you will see the following error message, choose another User Id and try again

New User Registration

 **Sorry, that username is already taken.** Although you indicated you're a new user, an account already exists for the User ID you entered. Please select a different User ID or [Sign in](#) first. Forgot your password [click here](#) for assistance.

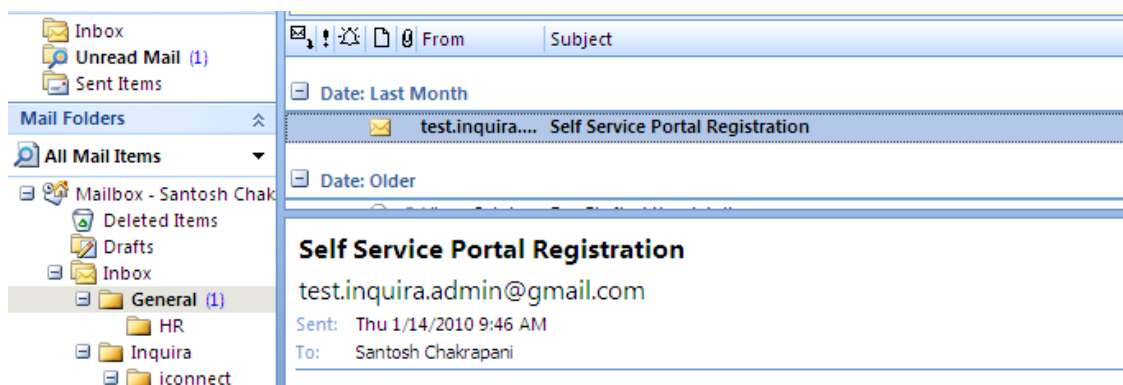

In case registration fails because the User Email id is already taken, you will see the following error message. Remind the user that this email id is already taken. Ask the user if they recall creating a self-service portal or an existing Infocenter account

New User Registration

 **Sorry, that email address is already taken.** Although you indicated you're a new user, an account already exists for the Email address you entered. Please [Sign in](#) or if you forgot your password [click here](#) for assistance.

Account Activation

- 1 If registration process was successful, notify the user (if still on the phone) that an activation email will be sent to the user. Users will receive an email as below:-

- 2 Email contains the steps required to activate the newly registered user

Self Service Portal Registration

test.inquiradmin@gmail.com

Sent: Thu 1/14/2010 9:46 AM

To: Santosh Chakrapani

Hi Santosh,

Thanks for registering with Self Service Portal.

1. Click the following link to complete your activation process:-

[Click here to complete registration](#)

2. After successful activation, you may login with following credentials :-

Login: schakrapani

Password: 22fdc

Note: You may not be able to access case management if you login without activating your account!

- 3 Self-Service portal user should following the steps provided in the email and complete the registration process and activate the user account.
- 4 Upon activation via email, the following status are possible depending upon portal configuration

Note: User passwords between Information Manager and CRMOD must be synchronized manually.

(1)

IUserRole **View My Cases**
IUserStatus **Approved**
IUserType **External**

(2)

IUserRole **View My Cases**
IUserStatus **Needs Approval**
IUserType **External**

(3)

IUserRole **Restricted**
IUserStatus **Approved**
IUserType **External**

(4)

IUserRole **Restricted**
IUserStatus **Needs Approval**
IUserType **External**

- 5 By default all contacts created via the new user registration process are considered as '**External**' User Type. External User types are Web Users in Infocenter. '**Internal**' User types are Console Users in Infocenter. Case Management for Internal users is not supported in the current version of the portal.

Managing Self-Service User Privileges

The Self-Service Portal uses the following parameters to determine access to various functions:

- User Type
- User Status
- User Role

User Type

User Type: A user type represents the level of security a user is assigned within the portal. Every portal user is assigned a user type. The assigned user type determines the functions user can perform when they are logged into Self-Service Portal. A user type is assigned to upon approval of the registration request and/or by a CRM On-Demand Agent or Administrator.

The allowed values for Portal User are:

User Type	Definition
External	An end-user who has issues with the products, searches the Infocenter to look for solutions to issues, creates cases via web self-service and has limited access to advanced Infocenter capabilities.
Internal	Internal users are typically employees of a company who have administrative capabilities of Infocenter. Internal users have no access to case management.

User Status

User Status: User status is an indication of the state of the user within the Self-Service Portal.

The following User Statuses are supported:

User Status	Definition
Approved	This is the normal state for a fully functional portal user after a user has activated and completed the registration process. External Users can access case management only if their User Status is Approved .
Needs Approval	Alternative initial state after the user has activated and completed the registration process. The CRM Agent manually updates the status to Approved after reviewing the request.
Registration in Process	A user has registered but must complete the process by clicking the link in the verification email sent by the portal to confirm that the user is at the email address given upon registration. In this state, users can sign-in but external users cannot access Case Management capabilities.
Denied	A denied user cannot access case management capabilities ever. A denied user can still access limited Infocenter capabilities if the user is an external user and an internal user can access advanced Infocenter capabilities.

User Role

User Role: User Role describes the type of actions the user are allowed to perform in the context of Case Management. Upon registration, a default role is assigned to the user based on portal configuration. If the user wishes to modify the assigned role, they must contact the assigned organization.

The following user roles are supported:

User Role	Definition
Restricted	This role restricts all access to case management. The internal user is assigned this role. Depending on portal configuration, an external user could be assigned this role upon registration.
View My Cases	This role is valid only for External user type and allows read-only access to cases that the users own. A user with View My Cases can submit a case but does not have sufficient privileges to update the case once it has been submitted, or view others cases.
Update My Cases	This role is valid only for External users and allows update access to all cases that a user owns. A user with Update My Cases can submit a case, and update user's own cases; however they cannot delete a case or view others cases.
View Company Cases	This role is valid only for External users and allows update access to the all cases that a user owns and read-only access to the cases of users that this user manages. A user with View Company Cases can submit a case, update own, and view company cases; however they cannot delete any case.
Update Company Cases	This role is valid only for External users and allows update access to the all cases that a user owns and also the cases of users that this user manages. A user with Update Company Cases can submit a case, update own or company cases; however they cannot delete a case.

Setting Up Role Change Notification Workflow

- 1 Go to the Admin Homepage.

The screenshot shows the Admin Homepage with the following sections:

- Admin Homepage** | [Back to Contact List](#) [Help](#) | [Printer Friendly](#)
- Company Administration**
 - Company Administration - Manage your company profile and global information, including currencies and active languages. Monitor usage and set password policies. Define company Fiscal Calendars. Create Homepage alerts.
- User Management and Access Controls**
 - User Management and Access Controls - Create and manage user profiles and relationships. Set up user roles that define data access levels, privileges to various application features and presentation of information. Manage groups of users to share data and calendar entries.
 - Territory Management - Define the hierarchy that makes up your company's Territory.
- Data Management Tools**
 - Import and Export Tools - Import your company data, export your company data, or view the import and export queues.
 - Batch Delete Queue - View the batch delete requests (active and completed).
- Web Services Integration**
 - Web Services Administration - View and download web services.
 - Web Services Utilization - Review a summary of services used by your company.
- Application Customization**
 - Application Customization - Customize application specific to your company; create custom page layouts, homepage layouts, search result layouts, and dynamic layouts; change field names, modify picklist values, create custom fields, specify cascading picklists, define custom web tabs and applets, set up custom audit trail and rename record types.
- Business Process Management**
 - Workflow Configuration - Extend business processes with workflow rules to send emails, create, update or delete information, wait for a time period and enable outbound integration requests. Workflow rules and actions will not be processed unless the "Enable Workflow" checkbox is checked on the Company Profile Page.
 - Workflow Monitor - Monitor and manage active instances of waiting workflows, and review workflow error messages.
 - Data Rules & Assignment - Define the data rules for your company, including automatic assignment of records, forecasting, and sales methodologies.
- Content Management**
 - Content Management - Define your company Product list and hierarchy. View, delete and replace all of your company's Attachments. Manage access to Reports Folders and define visibility to shared custom analyses folders. Define your company's assessments templates.

Managing User Activities

During the course of case management, users may update their cases by adding notes, creating topics in the context of the case. Note that 'Notes' created by the user in the portal are not directly related to the term 'Notes' in CRM On-Demand. In fact when a user adds notes to a case, an activity of the type 'UserUpdate' is created against the Service Request in CRM On-Demand. Similarly when a user posts a topic to the community in the context of a case, an activity of the type 'UserTopic' is created against the Service Request in CRM On-Demand.

CRM Agents can utilize the feature of user notes to communicate with a portal user by creating an activity of the type 'UserUpdate' in a service request, with relevant information for the end-user to view. CRM Agents can view the topics posted to the community by the user in order to get a better understanding of the issue faced by the users and in-turn provide better case handling.

Activities are also created within CRM On-Demand that indicates the recent searches and documents viewed by the user within the inQuira portal before submitting a case. These could provide significant insight to what the user was searching for before he/she decided to create a case online.

Activity with Self-Service Context Information

- 1 [Self-Service Portal] User performs some searches and views some documents in Self-Service portal. Recent searches and documents viewed are stored in infocenter profiles.

The screenshot displays the inQUIRA Information Center interface. At the top, there is a navigation bar with links for Home, FAQs, and Discussions. Below this, a breadcrumb trail shows 'Home > Results'. The main heading is 'Find Answers'. A search bar contains the query 'How is iconnect configured in CRM On Demand', with a 'Search' button and a 'Start Over' link. Below the search bar, there are filters for 'All Content' and 'Specified Languages'. The search results are displayed under the heading 'Results' and include a link to 'Serene Corporation' with a sub-link 'E&C CRM Features and Functions Contact and Lead Management, Marketing ROI and Analytics ... Project and Demand Planning'. Below the search results, there is a 'Personal Profile' section. This section is divided into two parts: 'Recent Search Questions:' and 'Recently Viewed Articles:'. The 'Recent Search Questions:' list includes 'How is iconnect configured in CRM On Demand', 'How do i connect to CRMOD', 'Dev4 SSO Training', and 'Test'. The 'Recently Viewed Articles:' list includes 'FAQ4 - Serene Implements CRM On Demand'.

- 2 [Self-Service Portal]User then creates a case online

Reports Configuration

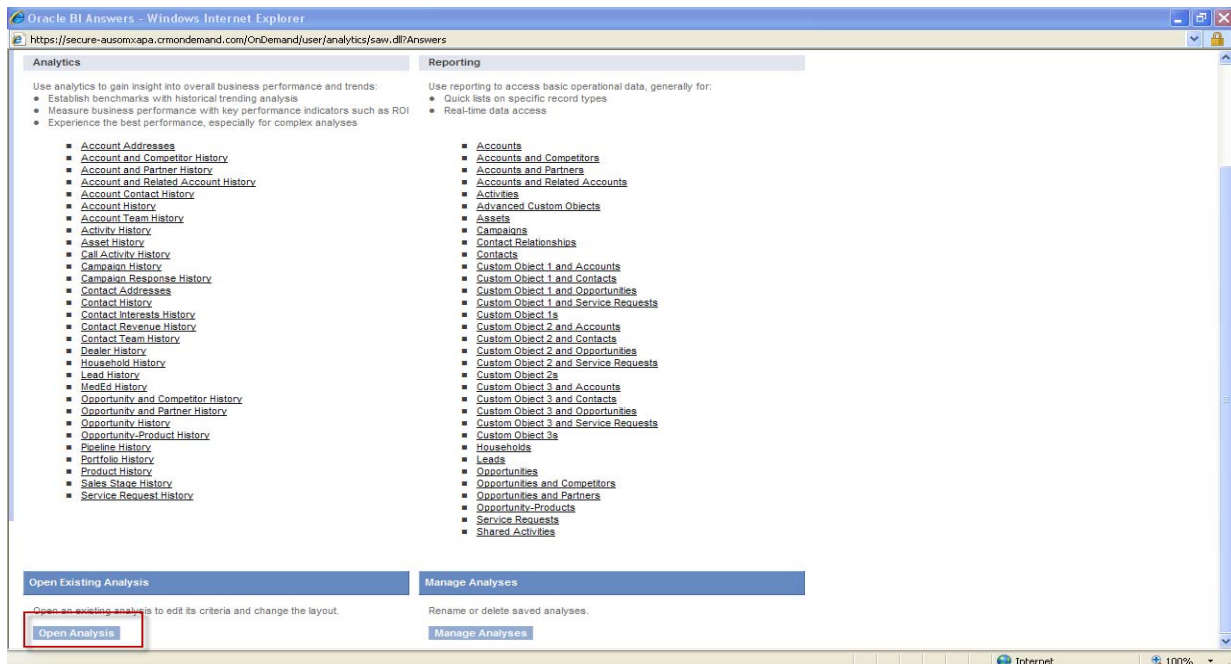

This chapter describes configuration for the following reports:

- **Participation Rate Report**
- **Participation Rate Report by User**
- **Add To Service Home Page: Participation Report (optional)**

Participation Rate Report

The following Oracle CRM On Demand analytics report is a calculated metric to provide management guidance for measuring effectiveness of knowledge articles in solving ALL service cases.

- 1 Login as an Oracle CRM On Demand user with the Administrator role.
- 2 From the Report screen (tab) select the Design Analyses link. Then, click on the 'Service Requests' subject area in the Reporting Column.

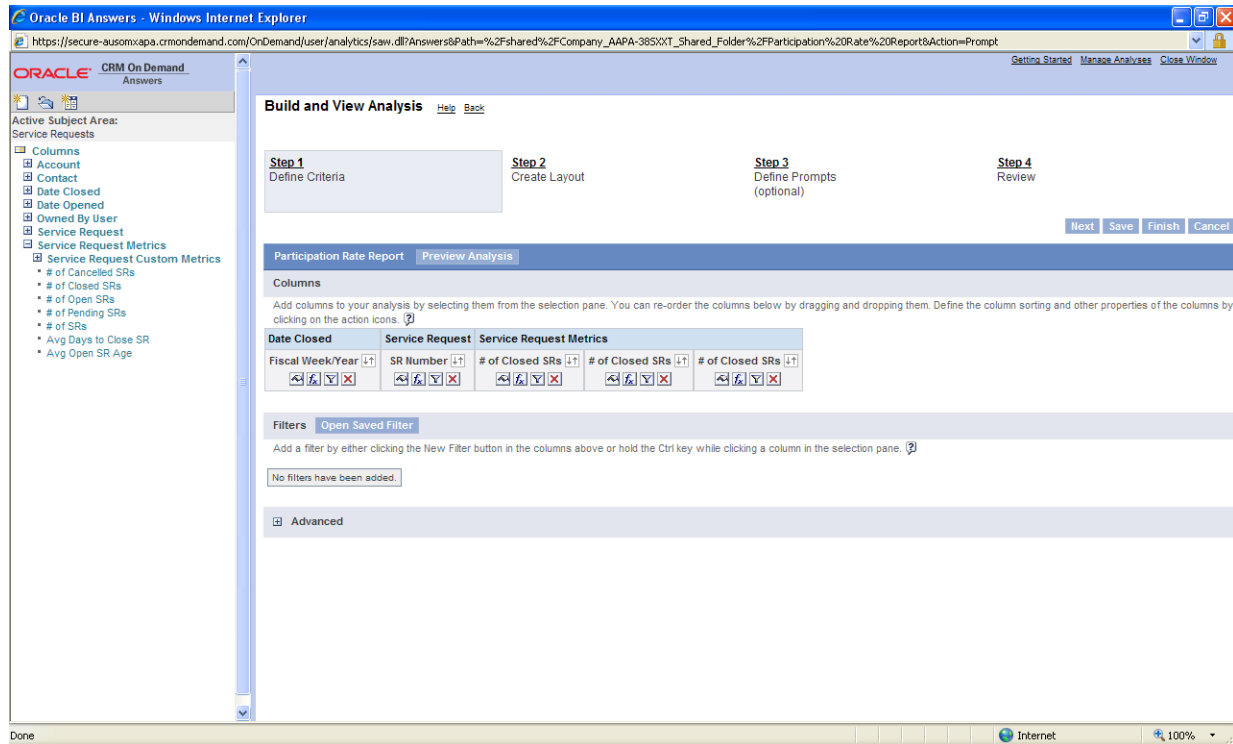

- 3 Add columns from left hand pane to the right pane as follows:

Note: **NOTE:** To add columns in the following steps simply click and drag the choice. This will then populate the column in the section on the right of the screen to begin building the formula.

- a Add the column - **Fiscal Week/Year** from Date Closed section from left hand pane to the right pane.

- b Add the column - **SR Number** from Service Request section from left hand pane to the right pane.
- c Add the column - **# of Closed SRs** from the Service Request Metrics from the left pane to the right. We will be using this column to store some calculated values. **TIP:** Repeat this step three (3) times so that you have a template to work from for subsequent steps.

- 4 Rename one of the **# of Closed SRs** columns to **Participation Rate**. Check the 'Custom Headings' check box and then type the new name.
- 5 Create the following formula in the Column Formula field. You may cut at paste the formula from below.

```
((CASE WHEN (" - Service Request Custom Attributes".BOOL_0 = 'Y') THEN 1
ELSE 0 END)/CASE WHEN ("Service Request"."SR Num" = NULL) THEN 0
ELSE 1 END)*100
```

Build and View Analysis

Step 1: Define Criteria

Participation Rate Report

Columns:

- Date Closed
- Service Request
- Fiscal Week/Year
- SR Number

Filters:

Open Saved Filter

Add a filter by either clicking the New Filter

No filters have been added.

Advanced

Edit Column Formula

Column Formula: Bins

23 Save the Report in the Company Wide Shared Folder by clicking on the Save Button.

24 Finally Run the report from the Saved location to check that it has saved correctly.

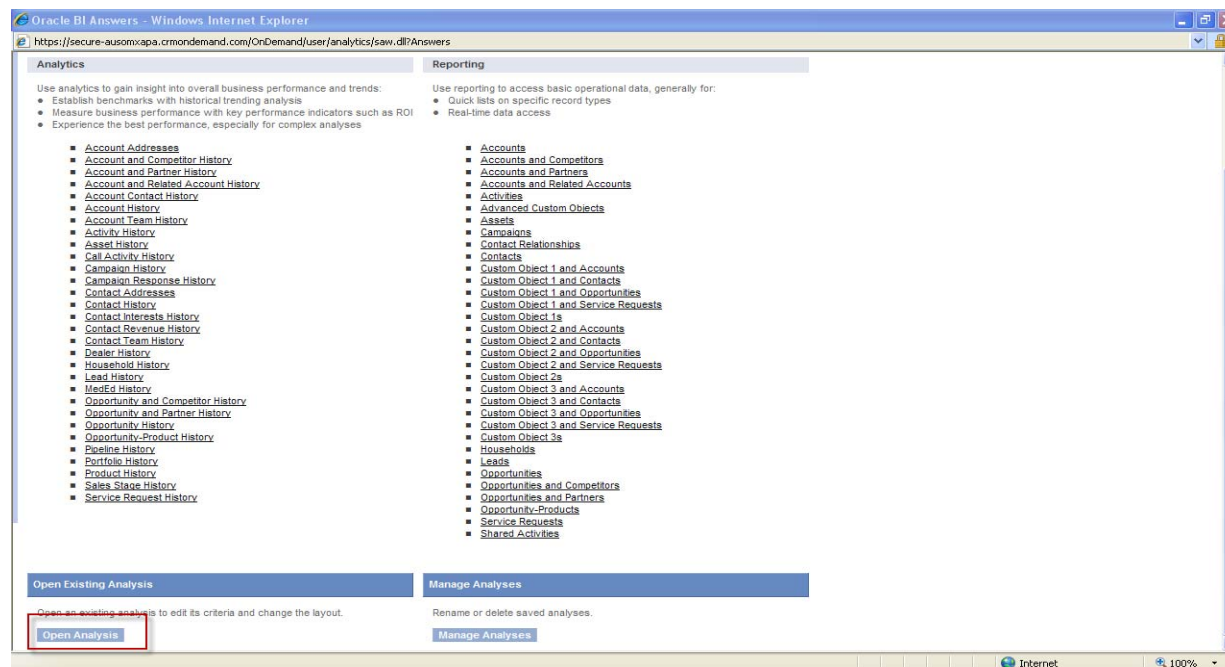

This completes the setup of the Participation Rate Report. Section C then goes into how to add the report to the Service screen (tab).

Participation Rate Report by User

The following Oracle CRM On Demand analytics report is a calculated metric to provide management guidance for measuring effectiveness of the Users' ability to close cases using knowledge articles.

The steps below detail creating the Participation Rate report from scratch for Users.

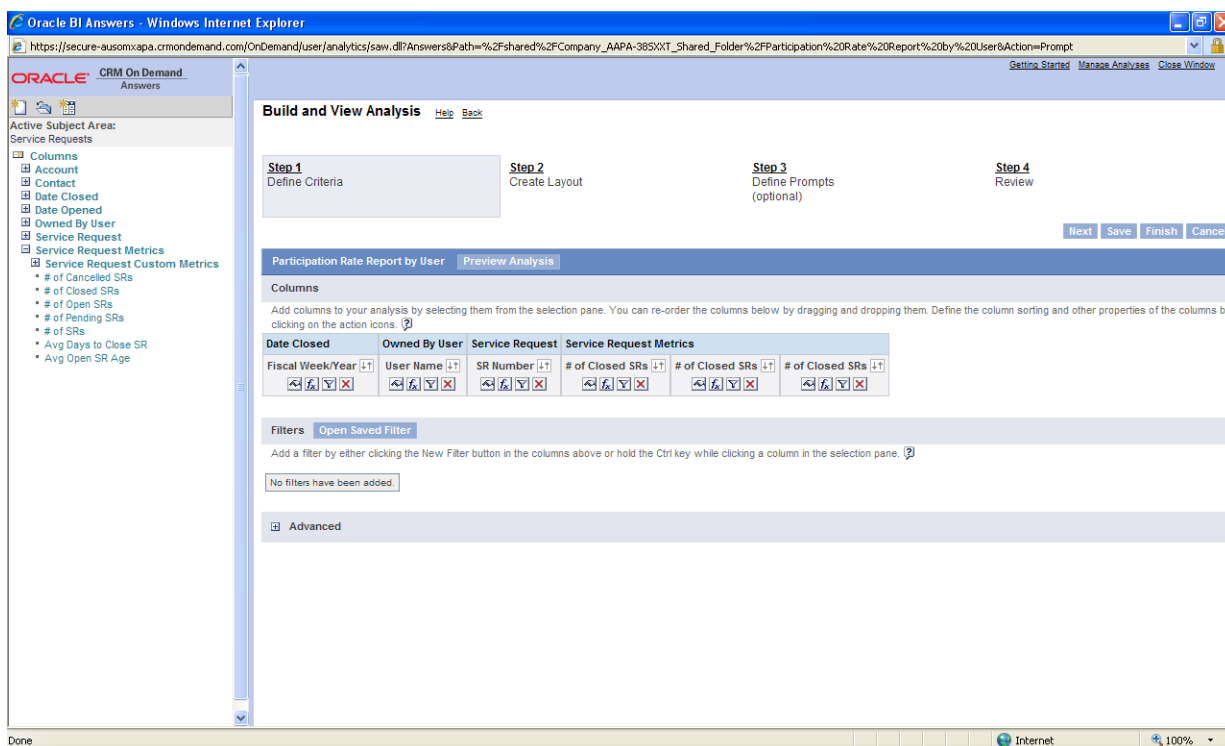

- 1 Login as an Oracle CRM On Demand user with the Administrator role.
- 2 From the Report screen (tab) select the Design Analyses link. Then, click on the 'Service Requests' subject area in the Reporting Column.

- 3 Add columns from left hand pane to the right pane as follows:

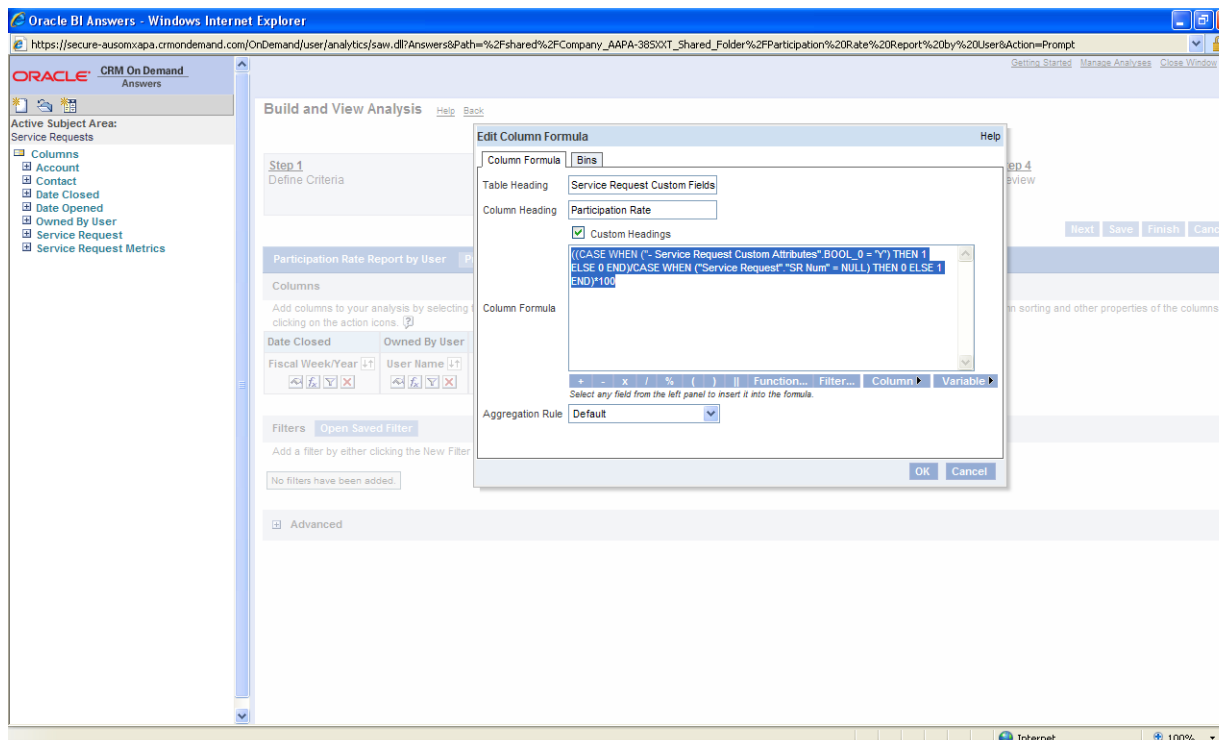

Note: To add columns in the following steps simply click and drag the choice. This will then populate the column in the section on the right of the screen to begin building the formula.

- a Add the column – **Fiscal Week/Year** from Date Closed section from left hand pane to the right pane.
- b Add the column – **SR Number** from Service Request section from left hand pane to the right pane.
- c Add the column – **User Name** from the Owned by User section from the left hand pane to the right pane. **NOTE:** This new variable, when added to report created in Section A, creates Participation Report by User.
- d Add column - **# of Closed SRs** from the Service Request Metrics from the left pane to the right. Repeat this step three times so that you have the same column three times. We will be using this column to store some calculated values.

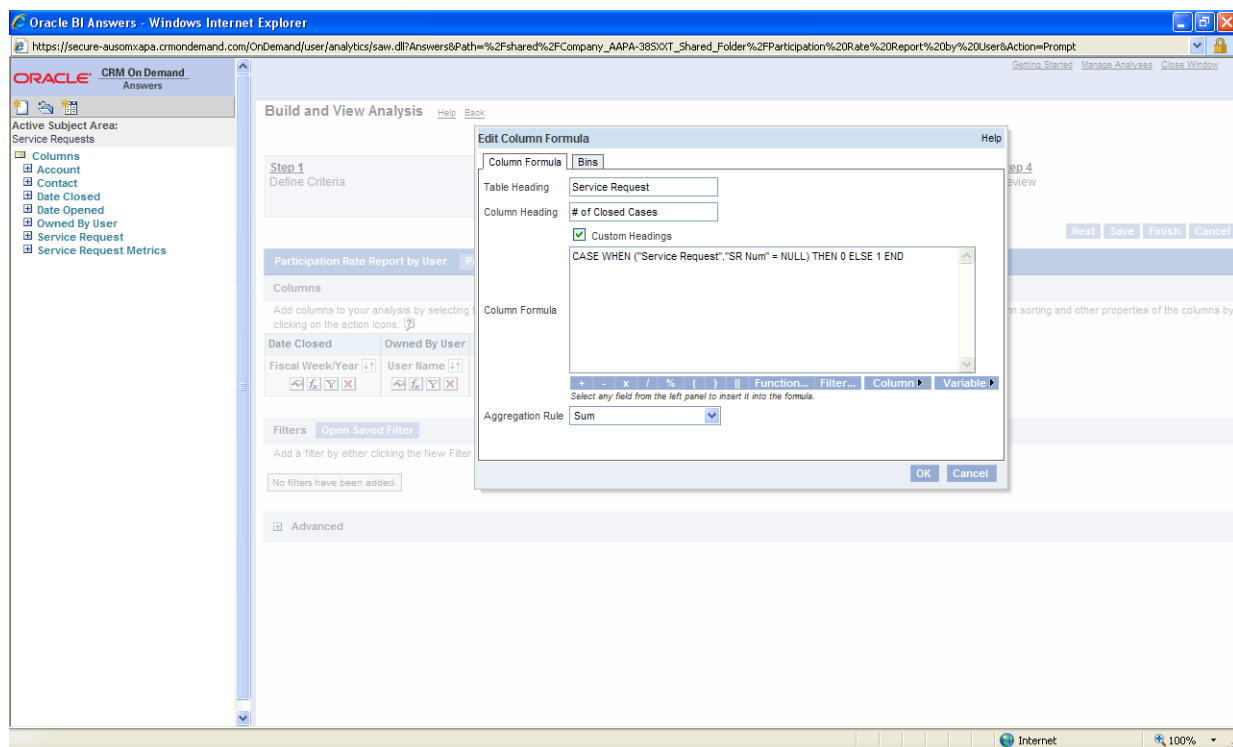

- 4 Rename one of the **# of Closed SRs** columns to **Participation Rate**. Check the 'Custom Headings' check box and then type the new name.
- 5 Create the following formula in the Column Formula field. You may cut and paste the formula from below.

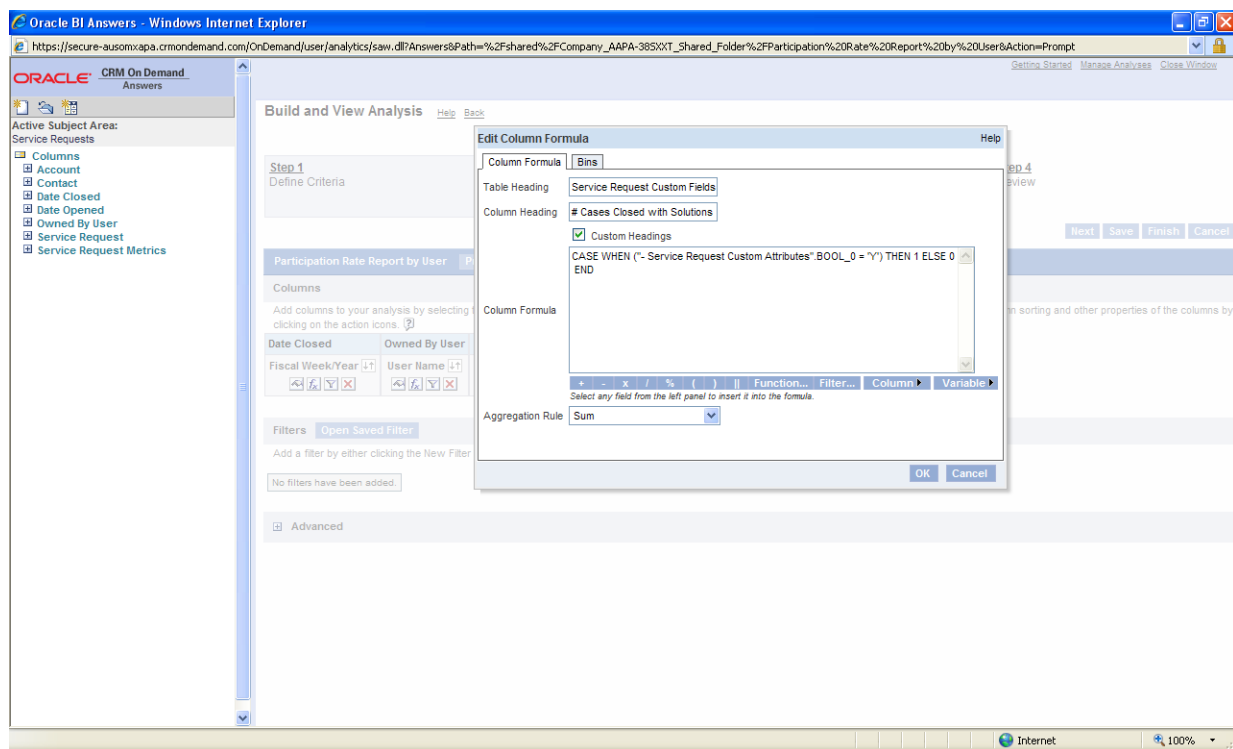

```
((CASE WHEN (" - Service Request Custom Attributes".BOOL_0 = 'Y') THEN 1
ELSE 0 END)/CASE WHEN ("Service Request"."SR Num" = NULL) THEN 0
ELSE 1 END)*100
```

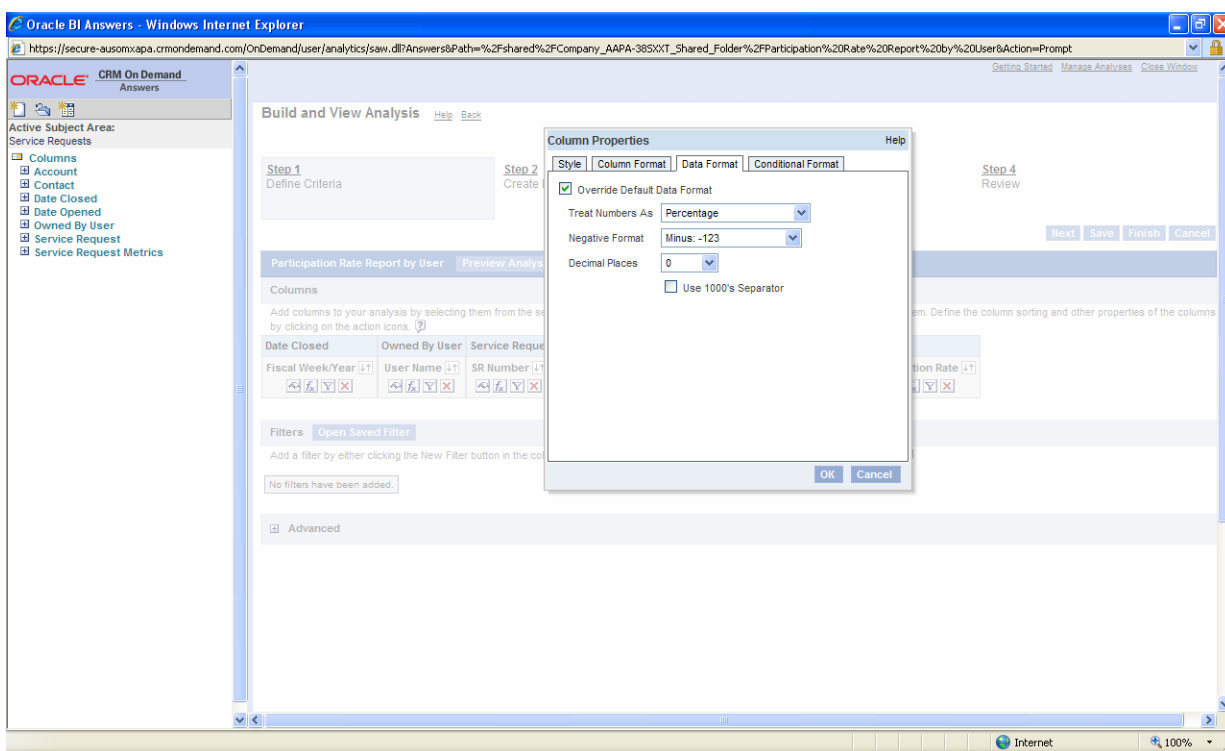

- 6 Rename one of the **# of Closed SRs** columns to **# of Closed Cases**. Check the 'Custom Headings' check box and then type the new name.
- 7 Create the following formula in the Column Formula field.
CASE WHEN ("ServiceRequest"."SR Num"=NULL) THEN 0 ELSE 1 END

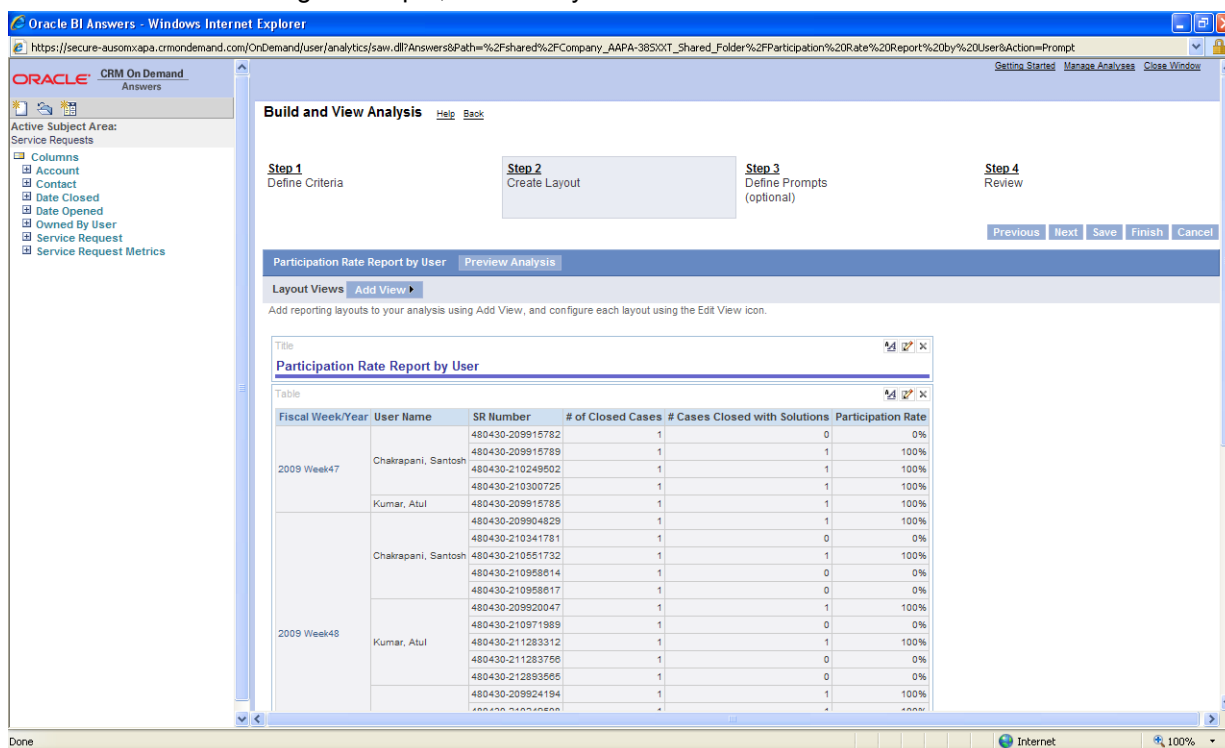

- 8 Rename one of the **# of Closed SRs** columns to **# of Closed Cases with Solutions**. Check the 'Custom Headings' check box and then type the new name.
- 9 Create the following formula in the Column Formula field.
CASE WHEN (" - Service Request Custom Attributes".BOOL_0 = 'Y') THEN 1
ELSE 0 END

- 10 From the column 'Participation Rate' click the Column Properties icon (hand icon). Check the box 'Override Default Data Type', and change the 'Treat Numbers As' dropdown to **Percentage**.

11 Click on Next to go to Step 2, Create Layout.

12 Click Add View and select 'Pivot Table' from the list

Done Internet 100%

27 Save the Report in the Company Wide Shared folder by clicking on the Save Button.

28 Finally Run the report from the Saved location to check that it has saved correctly.

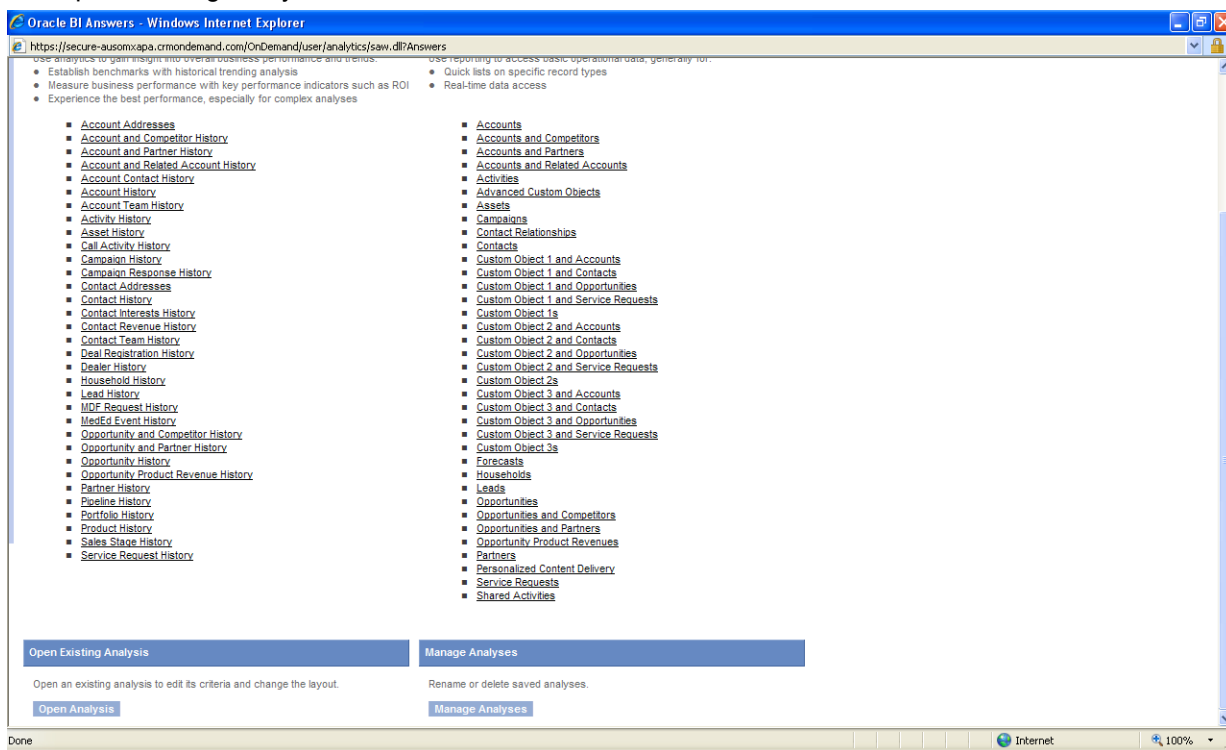

This completes the setup of the Participation Rate Report by User. Section C then goes into how to add the report to the Service screen (tab).

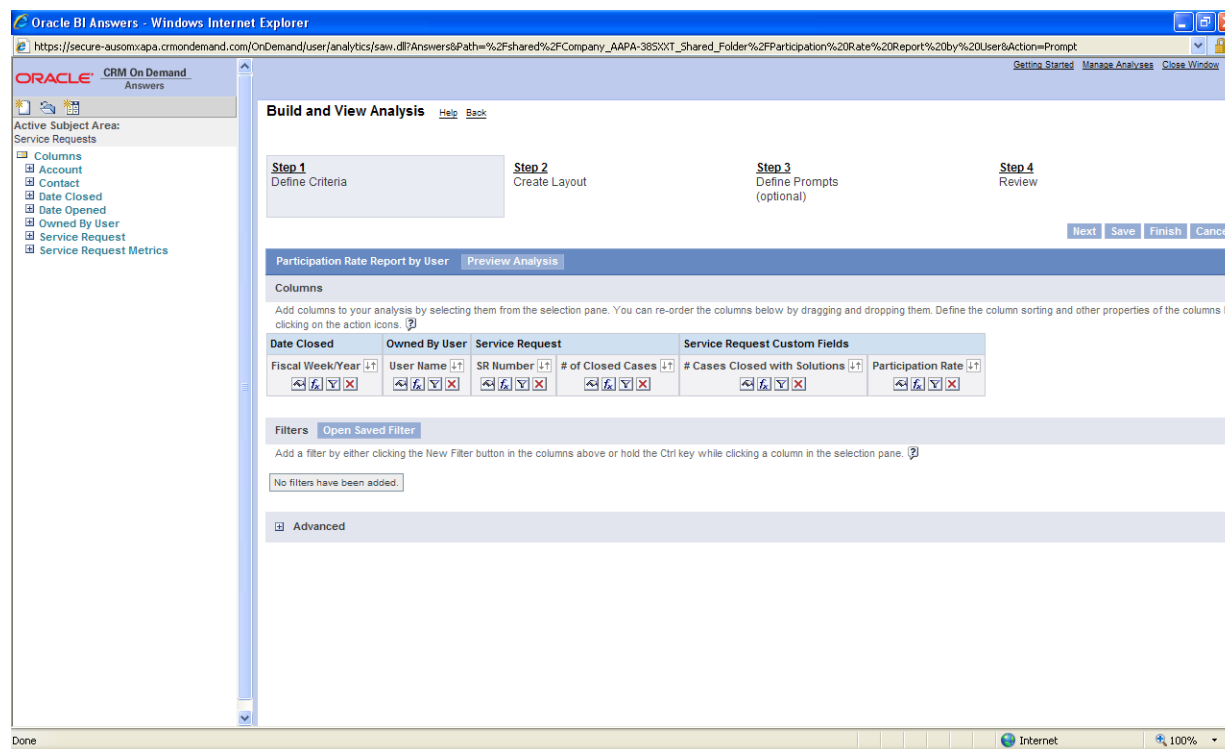

Add To Service Home Page: Participation Report *(optional)*

This optional step is provided as an example for a Service Manager, typically, that wishes to see this metric when they login to Oracle CRM On Demand. This will save clicks one would otherwise have to navigate to the Reports screen and drill into to see the results. Following is an example of but one way to incorporate with other CRM On Demand analytics.

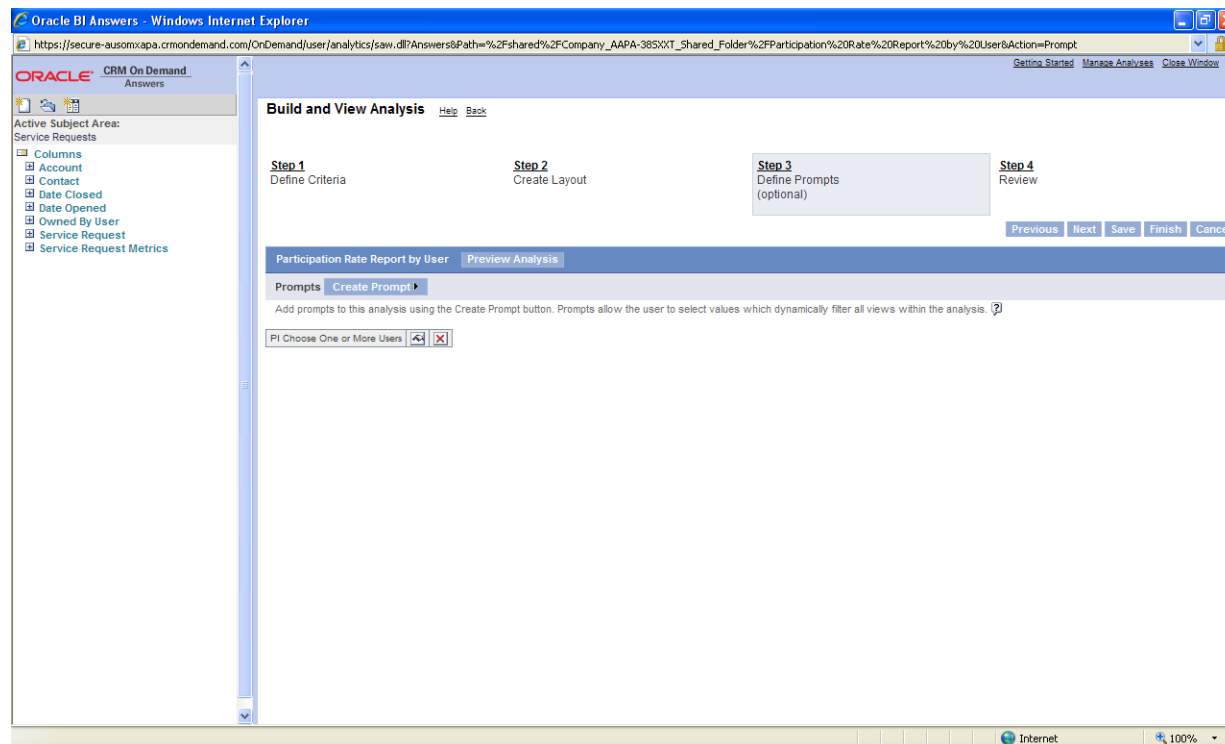

- 1 Login as an Oracle CRM On Demand user with the Administrator role.
- 2 Go to the Design Analyses link on the Reports Home. Choose Open Analysis from the section Open Existing Analysis on the lower left side of the browser window.

- 3 Open the Participation Rate Report. Navigate to the same folder where the reports have been saved as noted in sections A and B above.

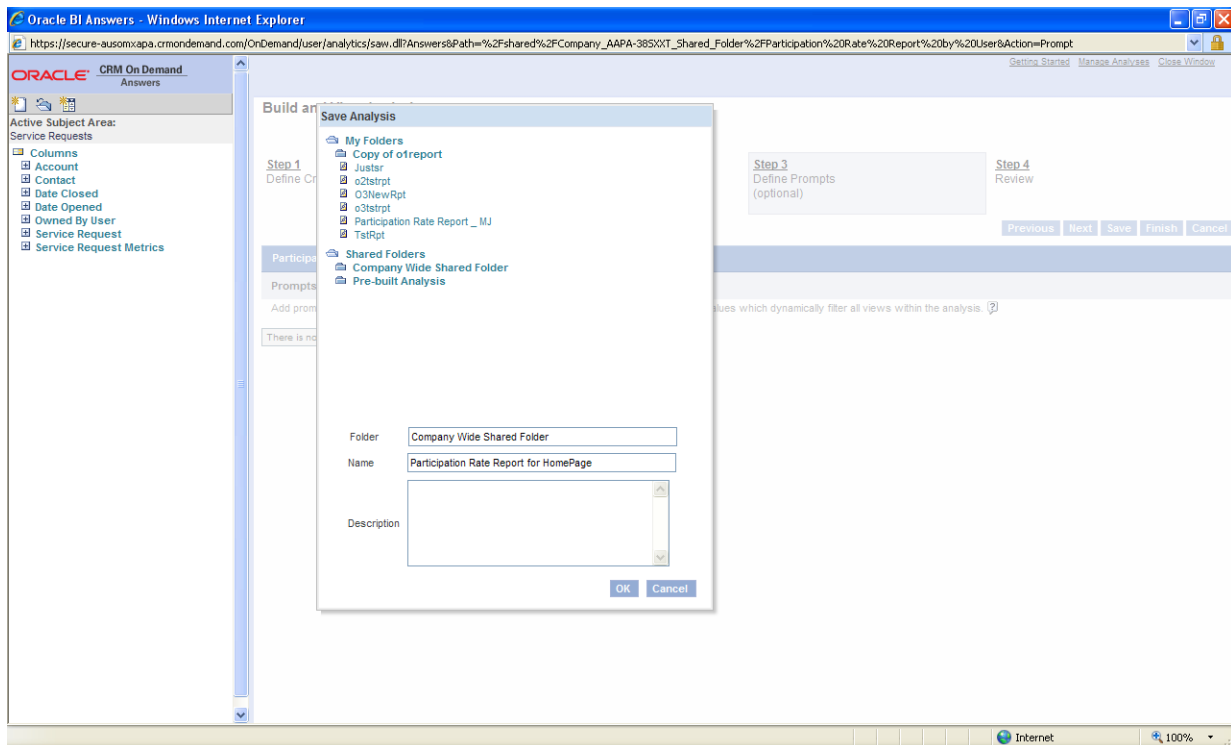

- Go to the Prompts Section and delete the previously created prompt. If this was not defined in section B then you may skip this step.

125 ADD TO SERVICE HOME PAGE: PARTICIPATION REPORT (OPTIONAL)

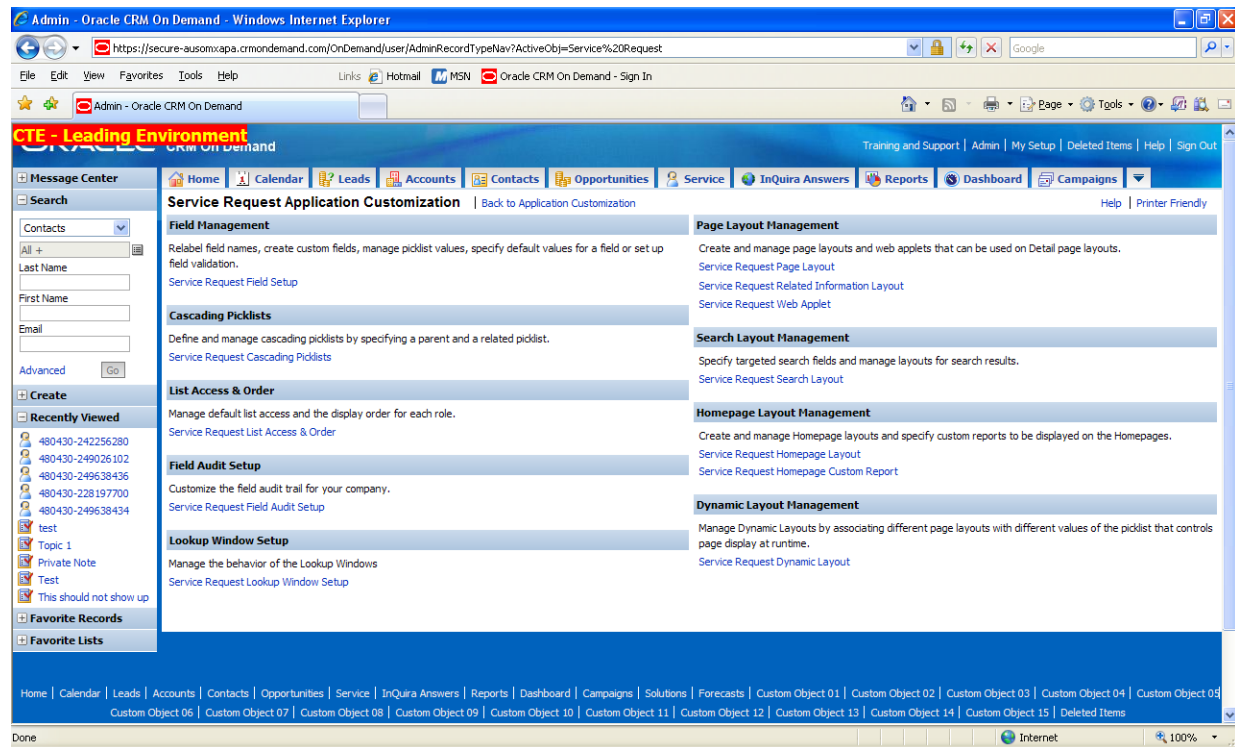

- 5 Save this report under a different Name e.g. **Participation Rate Report for HomePage**. You may close the window after Saving.

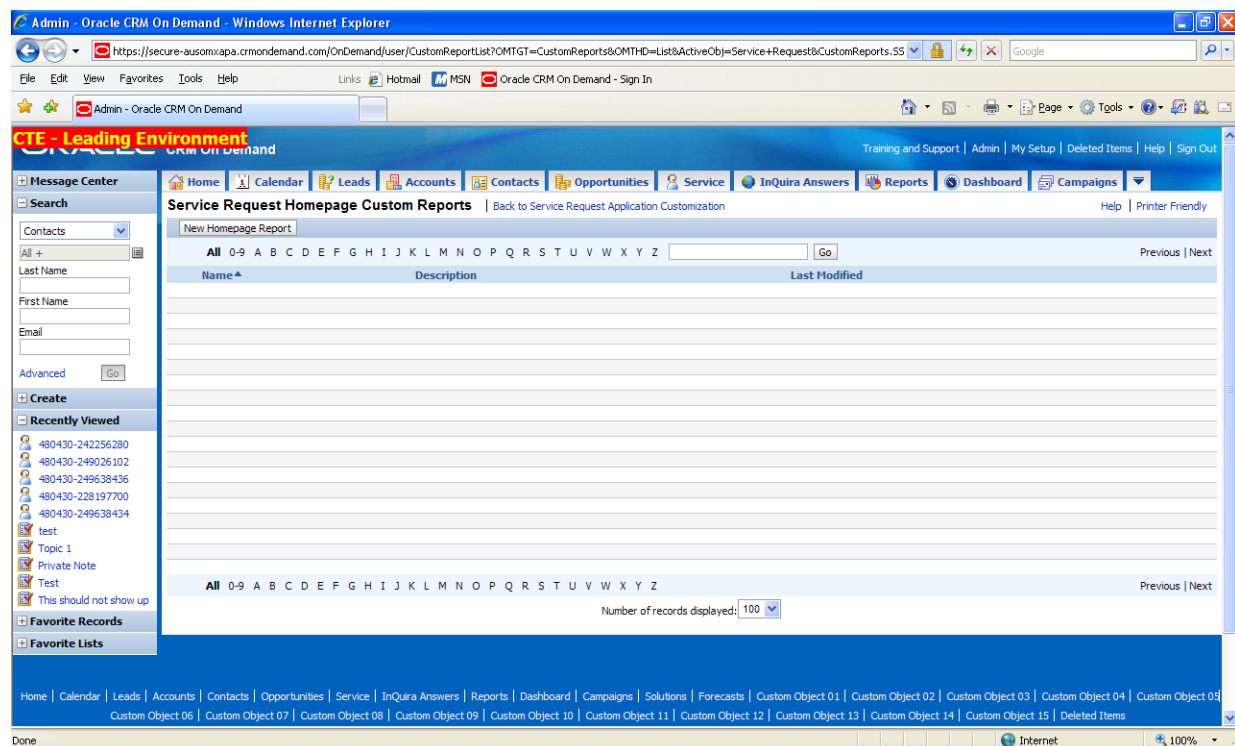

- 6 Click the Admin link on the top right corner of your screen.

- 7 Click 'Application Customization' and Then 'Service Request' Link. Then Select the Service Request Homepage Custom Report.

- 8 Click on the 'New Homepage Report' button.

- 9 Give the Homepage Report a Name e.g, Participation Report HP. The report path will change depending on the name of the report you are putting on the homepage. Enter the following Report Path value. **NOTE:** This must be the same name as specified during creation else it will error out.

Homepage Custom Report Detail | Back to Service Request Homepage Custom Reports

Specify the homepage custom report properties. If you want the report to span the entire homepage from left to right, set the width to Double. If you set the height to Double, the report will be twice the height of the other sections on the homepage. The report path is defined when you save the report. To view the path, navigate to the Save Analyses window in the Build and View Analysis wizard. The path is constructed by cutting and pasting the value in the Folder field, followed by a colon (:) and a space, and then adding the value in the Name field. For example: Shared Folders : Pre-built Analysis : Sales Stage History Analytics : Team Sales Stage History Analysis

Name* Participation Report HP

Height Single

Width Single

Report Path* Company Wide Shared Folder : Participation Rate Report for HomePage

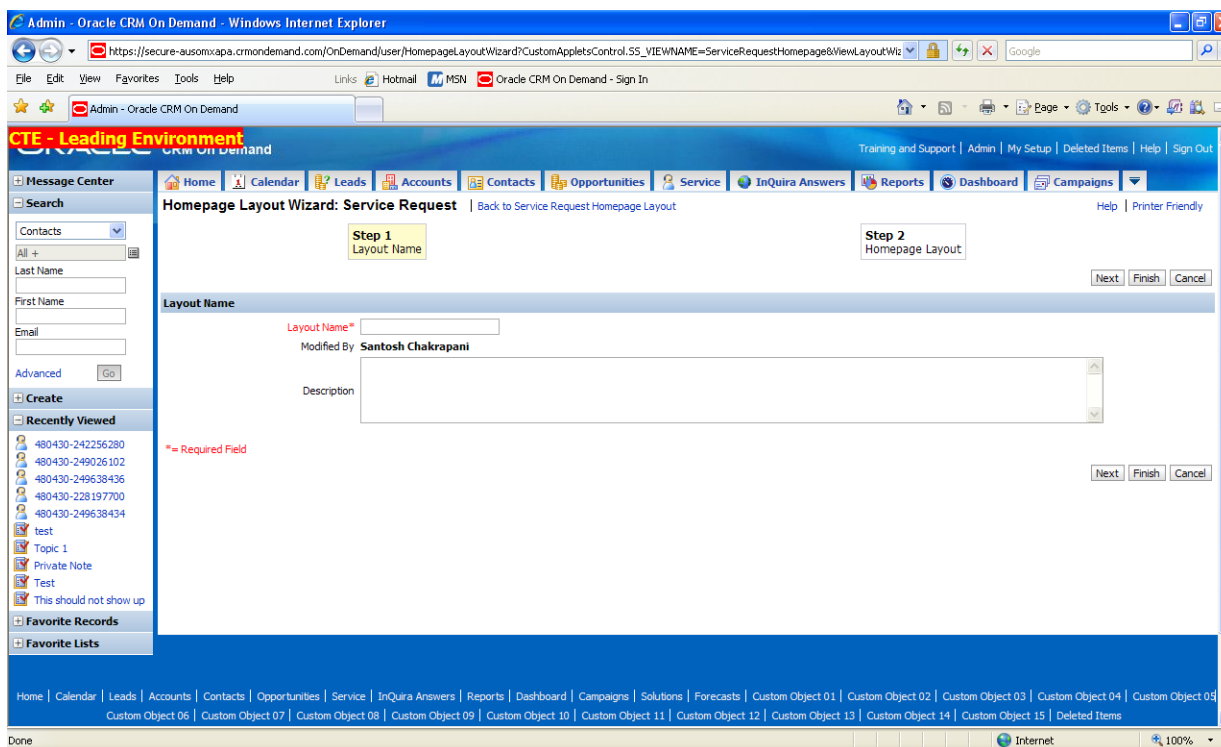

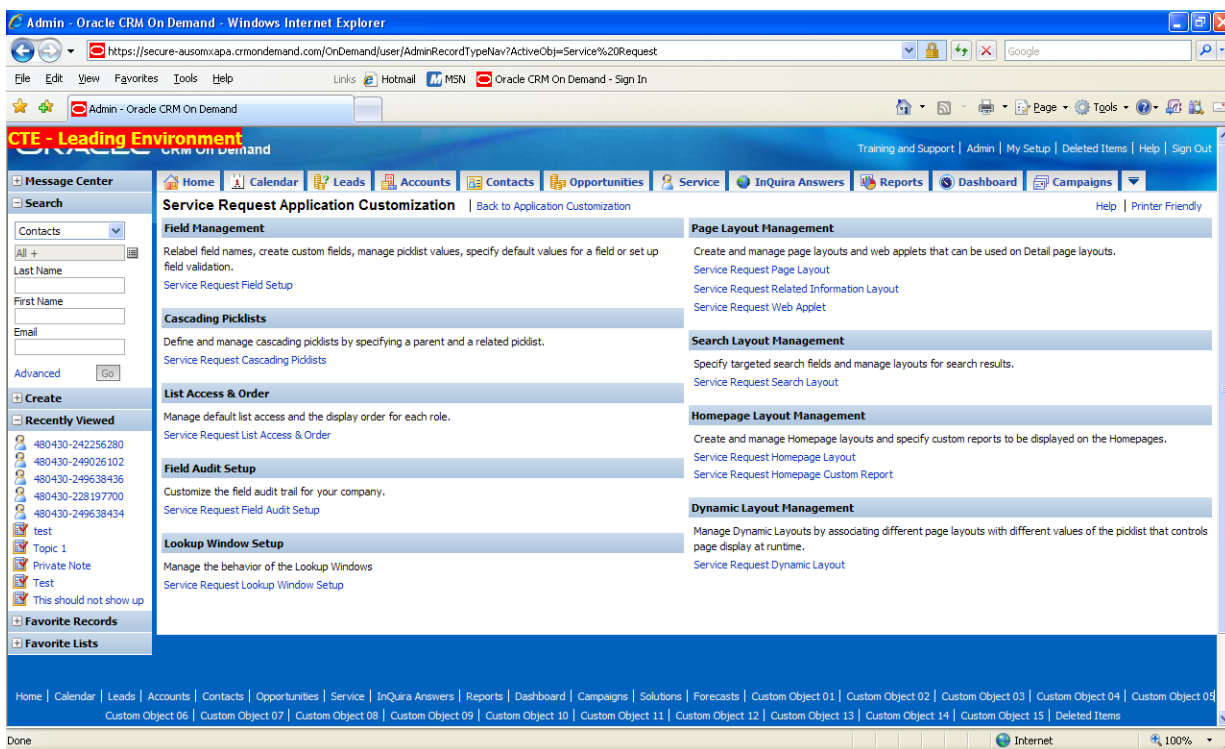

Description Company Wide Shared Folder : Participation Rate Report for HomePage

* = Required Field

Save Cancel

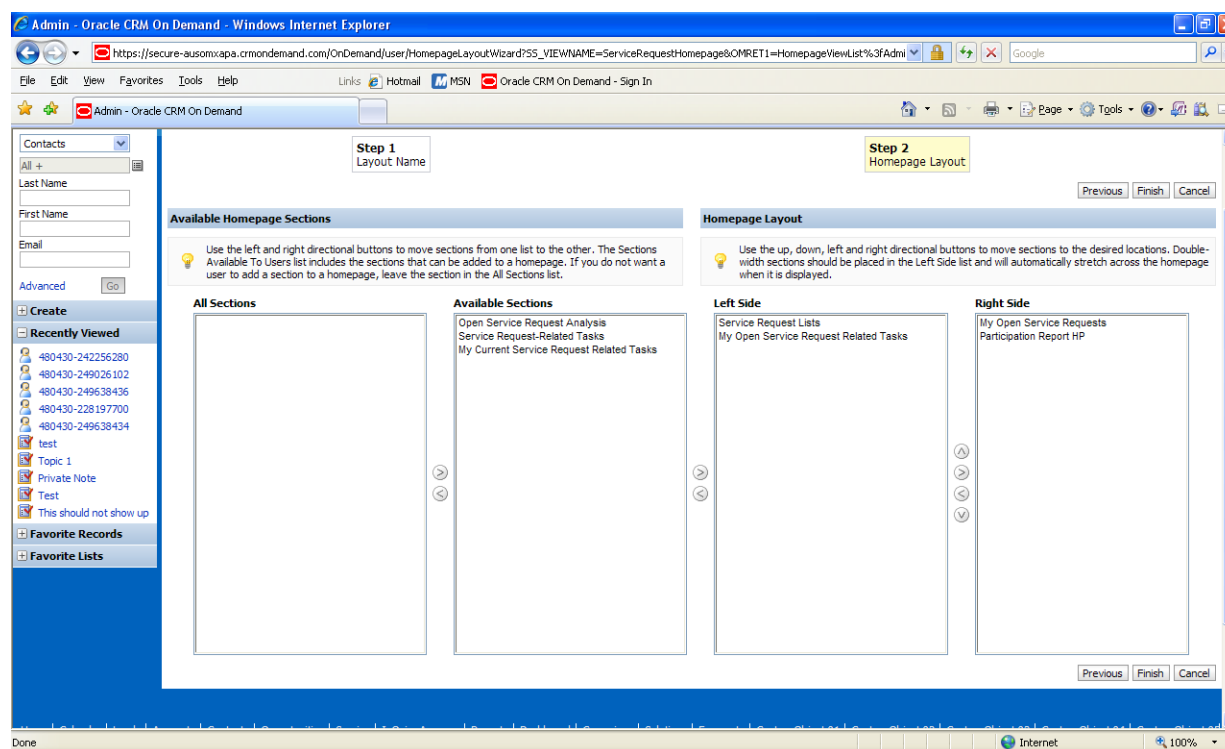

- 10 Click Save and Exit.
- 11 Now Select the 'Service Request Homepage' Layout. Click the copy link to create a copy of the out-of-the-box homepage layout. Choose any name you want for the layout.

128 ADD TO SERVICE HOME PAGE: PARTICIPATION REPORT (OPTIONAL)

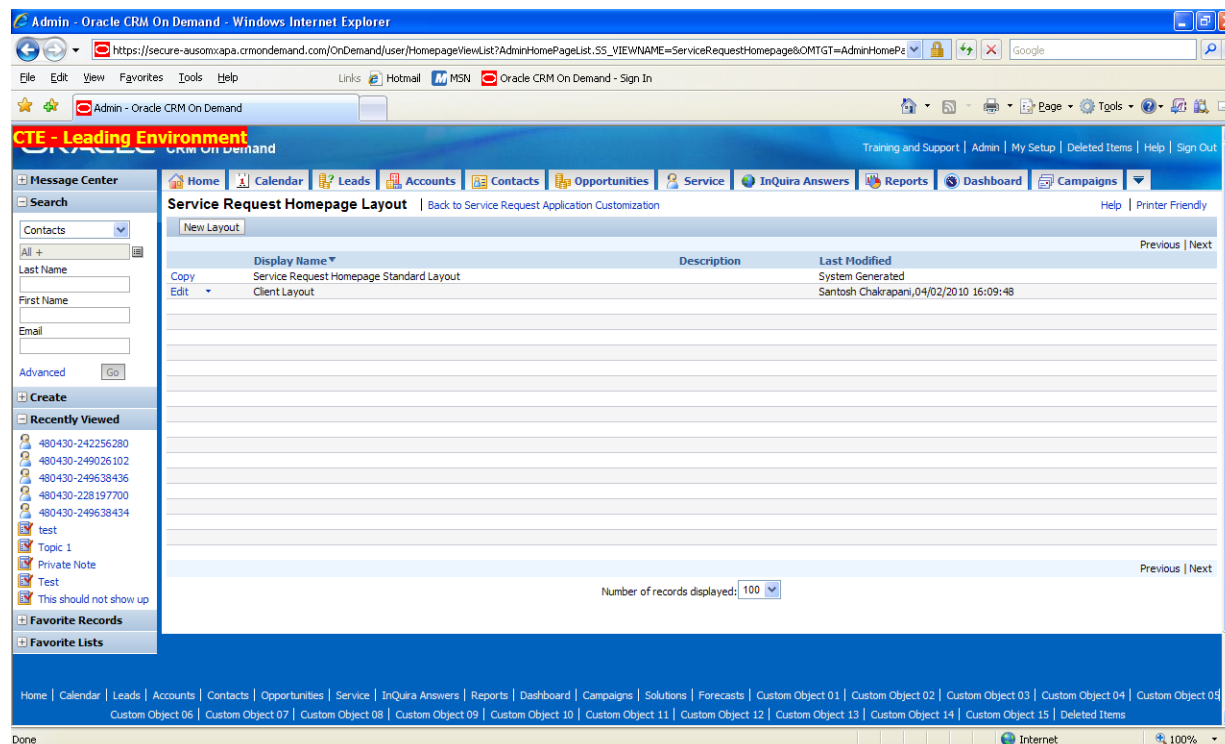

- 12 Click 'Next', on the next screen swap the out-of-the-box 'Open Service Request Analysis' for the 'Participation Report HP' – the custom report we created in the previous steps.

129 ADD TO SERVICE HOME PAGE: PARTICIPATION REPORT (OPTIONAL)

13 Click Finish

14 Now you have a separate homepage layout for the 'Participation Rate' report. You can now use this Service Page layout and Associate it to any Role Name.

130 ADD TO SERVICE HOME PAGE: PARTICIPATION REPORT (OPTIONAL)

15 Next step is to show the Report on the User Home Page.

- Go to the Service Home Page and Click on the Edit Layout link.

The screenshot shows the Oracle CRM On Demand interface. The main content area is titled 'Service Request Homepage'. On the right, there is a table 'My Open Service Requests' with columns: Service Number, Subject, Status, and Priority. Below this, there is a 'Participation Report HP' section containing a table titled 'Participation Rate Report for HomePage'.

Fiscal Week/Year	User Name	# of Closed Cases	# Cases Closed with Solutions	Participation Rate
2009 Week47	Chakrapani, Santosh	4	3	75%
	Kumar, Atul	1	1	100%
	Chakrapani, Santosh	5	2	40%
	Kumar, Atul	5	2	40%
2009 Week48	Sani, Vinay	4	4	100%
	Chakrapani, Santosh	4	4	100%

- Swap the out-of-the-box 'Open Service Request Analysis' for the 'Participation Report HP' – the custom report we created in the previous steps. When finished, click Save.

The screenshot shows the 'Service Request Homepage Layout' editor. It has a central workspace with 'Available Sections' on the left and 'Left Side' and 'Right Side' panels on the right. The 'Participation Report HP' is being moved from the 'Right Side' to the 'Left Side'.

Available Sections:

- Service Request-Related Tasks
- My Current Service Request Related Tasks
- Open Service Request Analysis

Left Side:

- Service Request Lists
- My Open Service Request Related Tasks

Right Side:

- My Open Service Requests
- Participation Report HP

- You should now see the Participation Rate Report by User on the Service Homepage.

Note: Due to performance of generating the report, it will not automatically render. To see the report as shown below click on the link

CONNECT FOR ORACLE CRM ON DEMAND INTEGRATION GUIDE

Build Configuration Updates

To build configuration updates:

- 1 Under `<target name="infocenter-init">` add the following entry:

```
<!-- SSP InfoCenter root -->
<property name="ssp-infocenter.rootdir" value="${infocenter.rootdir}/ssp" />
<!-- SSP InfoCenter destination-->
<property name="ssp.dest" value="${basedir}/Build/IM_HOME/install/ssp" />
```

- 2 Under `<target name="infocenter" depends="infocenter-init">`, append the following entry to `<copy todir="${infocenter.dest}">`

```
<exclude name="ssp/**" />
```

3 Create a new target for SSP.

```
<target name="ssp-infocenter" depends="infocenter-init,infocenter">
  <mkdir dir="${ssp.dest}" />
  <!-- Copy everything except app/infocenter/system/pages folder to ssp destination.
  -->
  <copy todir="${ssp.dest}">
    <fileset dir="${infocenter.dest}">
      <!--<exclude name="apps/infocenter/system/pages/**" /> -->
    </fileset>
  </copy>

  <!-- copy ssp's file to destination and may replace the same ones with InfoCenter-->
  <copy todir="${ssp.dest}" overwrite="true">
    <fileset dir="${ssp-infocenter.rootdir}">
      <exclude name="WEB-INF/**/*.*.properties"/>
    </fileset>
  </copy>

  <!-- copy crmsselfservice jar and other ssp related jar to ssp-infocenter -->
  <copy todir="${ssp.dest}/WEB-INF/lib" overwrite="true">
    <fileset dir="CRMSelfService/lib"/>
    <fileset dir="Build/Frameworks/CRMSelfService.framework/Resources/Java"
      includes="**/*.jar"/>
  </copy>

  <mergeProperties oriConfig="${infocenter.dest}/WEB-INF/infocenter.properties"
    overConfig="${ssp-infocenter.rootdir}/WEB-INF/infocenter.properties"
    destConfig="${ssp.dest}/WEB-INF/infocenter.properties" />

  <mergeProperties
    oriConfig="${infocenter.dest}/WEB-INF/classes/ApplicationResources.properties"
    overConfig="${ssp-infocenter.rootdir}/WEB-INF/classes/
ApplicationResources.properties"
    destConfig="${ssp.dest}/WEB-INF/classes/ApplicationResources.properties" />
</target>
```

4 Add ssp-infocenter as dependency to <target name="dist"../>.

5 Add the following target for building CRMSelfService jar.

```
<target name="CRMSelfService" description="Build
CRMSelfService.framework">
  <ant dir="CRMSelfService"/>

  <emma enabled="${emma.enabled}">
    <instr destdir="${emma.instr.dir}"
      metadatafile="${emma.coverage.dir}/crmselfservice.emma"
      merge="no" mode="fullcopy">
      <instrpath>
<fileset dir="Build/Frameworks/CRMSelfService.framework/Resources/
Java"
      includes="**/*.jar"/>
    </instrpath>
  </instr>
</emma>
</target>
```

6 Add the CRMSelfService as dependency to target 'dev'.

```
<target name="dev" depends=".., ,CRMSelfService">
```

Troubleshooting

This appendix contains information on troubleshooting the XML sent by Information Manager and Intelligent Search.

Troubleshooting the CRM OnDemand XML Files

Self-Service Portal InfoCenter(IM)

- 1 Stop the Information Manager server if it is running.
- 2 Open the file `$IM_HOME\config\SSP_Repository\log4j.properties`.
If it does not exist, then create a new `log4j.properties` under `$IM_HOME\config\SSP_Repository`.
- 3 Add the following contents into the `log4j.properties`:

```
log4j.logger.org.apache.axis.transport.http.HTTPSender=DEBUG, LOGFILE
# LOGFILE is set to be a File appender using a PatternLayout.
log4j.appender.LOGFILE=org.apache.log4j.FileAppender
log4j.appender.LOGFILE.File=axis.log
log4j.appender.LOGFILE.Append=true
log4j.appender.LOGFILE.Threshold=DEBUG
log4j.appender.LOGFILE.layout=org.apache.log4j.PatternLayout
log4j.appender.LOGFILE.layout.ConversionPattern=%-4r [%t] %-5p %c %x - %m%n
```
- 4 Restart the Information Manager server.

The SOAP message appears in `$IM_instance\axis.log` if there is a webservice call from Information Manager. See “Self-Service Portal Axis Log” on page 136 for an example.

Runtime (Search)

- 1 Stop the Runtime server if it is running.
- 2 Open the `$Runtime_instance\appserver\webapps\inquiragw.war`, unzip the file `inquiragw.war\WEB-INF\lib\merged.jar`.
- 3 Open the unzipped `merged.jar`, unzip the file `log4j.properties`.
- 4 Add a new line:

```
log4j.logger.org.apache.axis.transport.http.HTTPSender=DEBUG, LOGFILE
```

 to the `log4j.properties` file.
- 5 Change the value of

```
log4j.appender.LOGFILE.Threshold
```

to DEBUG.

Here is the file content after making the preceding changes:

```
# Set root category priority to INFO and its only appender to CONSOLE.
log4j.rootCategory=INFO, CONSOLE
#log4j.rootCategory=INFO, CONSOLE, LOGFILE
log4j.logger.org.apache.axis.transport.http.HTTPSender=DEBUG, LOGFILE
# Set the enterprise logger category to FATAL and its only appender to
CONSOLE.
log4j.logger.org.apache.axis.enterprise=FATAL, CONSOLE
# CONSOLE is set to be a ConsoleAppender using a PatternLayout.
log4j.appender.CONSOLE=org.apache.log4j.ConsoleAppender
log4j.appender.CONSOLE.Threshold=INFO
log4j.appender.CONSOLE.layout=org.apache.log4j.PatternLayout
log4j.appender.CONSOLE.layout.ConversionPattern=- %m%n
# LOGFILE is set to be a File appender using a PatternLayout.
log4j.appender.LOGFILE=org.apache.log4j.FileAppender
log4j.appender.LOGFILE.File=axis.log
log4j.appender.LOGFILE.Append=true
log4j.appender.LOGFILE.Threshold=DEBUG
log4j.appender.LOGFILE.layout=org.apache.log4j.PatternLayout
log4j.appender.LOGFILE.layout.ConversionPattern=%-4r [%t] %-5p %c %x - %m%n
```

- 6 Add the new log4j.properties into merged.jar.
- 7 Copy the new merged.jar to inquiragw.war\WEB-INF\lib.
- 8 Restart the Runtime server.

The SOAP message appears in \$Runtime_instance\axis.log when there is a webservice call (link/unlink in iConnect) from Runtime. See “Runtime Axis Log” on page 162 for an example.

Self-Service Portal Axis Log
