Oracle Insurance Insbridge Rating and Underwriting Release Notes Version 4.6.1

The purpose of this document is to:

Describe the new features and resolved issues offered in the Insbridge Rating and Underwriting system Release 4.6.1. This document also provides a history of enhancements and bug fixes from past releases.

NEW FEATURES

ORACLE Feature #	Product	Description
13804222	IBFA	<p>Impacted Area: Clustering</p> <p>Enhancement: INSB-7644, INSB-7204. If the selected rating environment is part of a cluster, the cache was not always getting cleared out properly. To assure that cache is cleared for all members of the cluster, an advanced caching feature was added in release 4.6.1. Administrators can define an environment in IBFA as a cluster and list out the cluster members. When a package is loaded in to a cluster environment the cache will be cleared for all members in the cluster. This prevents any environment from having outdated packages in cache.</p>
INSB-7624	RateManager	<p>Impacted Area: Browser Support</p> <p>Enhancement: Insbridge Rating and Underwriting RateManager has been tested and is now supported on Internet Explorer (IE) 9, 32-bit.</p>
