Oracle and Java are registered trademarks of Oracle and/or its affiliates. Other names may be trademarks of their respective owners.

Intel and Intel Xeon are trademarks or registered trademarks of Intel Corporation. All SPARC trademarks are used under license and are trademarks or registered trademarks of SPARC International, Inc. AMD, Opteron, the AMD logo, and the AMD Opteron logo are trademarks or registered trademarks of Advanced Micro Devices. UNIX is a registered trademark of The Open Group.

### **License Restrictions Warranty/Consequential Damages Disclaimer**

This software and related documentation are provided under a license agreement containing restrictions on use and disclosure and are protected by intellectual property laws. Except as expressly permitted in your license agreement or allowed by law, you may not use, copy, reproduce, translate, broadcast, modify, license, transmit, distribute, exhibit, perform, publish, or display any part, in any form, or by any means. Reverse engineering, disassembly, or decompilation of this software, unless required by law for interoperability, is prohibited.

### **Warranty Disclaimer**

The information contained herein is subject to change without notice and is not warranted to be error-free. If you find any errors, please report them to us in writing.

### **Restricted Rights Notice**

If this is software or related documentation that is delivered to the U.S. Government or anyone licensing it on behalf of the U.S. Government, the following notice is applicable:

#### *U.S. GOVERNMENT RIGHTS*

Programs, software, databases, and related documentation and technical data delivered to U.S. Government customers are "commercial computer software" or "commercial technical data" pursuant to the applicable Federal Acquisition Regulation and agency-specific supplemental regulations. As such, the use, duplication, disclosure, modification, and adaptation shall be subject to the restrictions and license terms set forth in the applicable Government contract, and, to the extent applicable by the terms of the Government contract, the additional rights set forth in FAR 52.227-19, Commercial Computer Software License (December 2007). Oracle America, Inc., 500 Oracle Parkway, Redwood City, CA 94065.

### **Hazardous Applications Notice**

This software or hardware is developed for general use in a variety of information management applications. It is not developed or intended for use in any inherently dangerous applications, including applications that may create a risk of personal injury. If you use this software or hardware in dangerous applications, then you shall be responsible to take all appropriate fail-safe, backup, redundancy, and other measures to ensure its safe use. Oracle Corporation and its affiliates disclaim any liability for any damages caused by use of this software or hardware in dangerous applications.

### **Third Party Content, Products, and Services Disclaimer**

This software or hardware and documentation may provide access to or information on content, products, and services from third parties. Oracle Corporation and its affiliates are not responsible for and expressly disclaim all warranties of any kind with respect to third-party content, products, and services. Oracle Corporation and its affiliates will not be responsible for any loss, costs, or damages incurred due to your access to or use of third-party content, products, or services.

# About this Documentation

This preface discusses:

- Understanding This Documentation
- Related Information
- Audience
- Typographical Conventions
- Comments and Suggestions

---

## Understanding This Documentation

This documentation is designed to inform you about the minimum technical requirements for the installation of your PeopleSoft application. It lists and describes the hardware requirements, software requirements, database requirements, and any other requirements that are specific to the installation of the application.

In addition, this document purposely provides a high-level view without specifics such as version numbers that may quickly become out-of-date. There are several additional resources described in this hardware software requirements guide from which you can obtain the latest information, such as details about supported platforms and version numbers.

This guide contains the hardware and software requirements for the PeopleSoft application that you are installing. To carry out the installation, you also need the PeopleSoft PeopleTools Hardware and Software requirements. You can access the PeopleSoft PeopleTools Hardware and Software requirements for your new release from the Certifications tab on My Oracle Support.

---

**Note.** This documentation is a supplement to the PeopleSoft PeopleTools Hardware and Software requirements. It discusses the additional requirements specific to this PeopleSoft application. Use this guide along with your PeopleSoft PeopleTools and licensed PeopleSoft application installation guides. You can access all PeopleSoft application and hardware and software guides on My Oracle Support.

---

---

## Related Information

Oracle provides reference information about PeopleSoft PeopleTools and your particular PeopleSoft application. :

The following resources are available on My Oracle Support:

- **Certifications:** On the Certifications tab you can find the latest information on our certified database and operating system configurations. Information about PeopleSoft supported platforms serve as a definitive resource for supported products and their version numbers. Go to My Oracle Support, select the Certifications tab, and search for the certification information for your product, release, and platform..
- **Release Notes:** These documentation updates delivered with every PeopleSoft PeopleTools application release explain new features and changes and summarize resolved incidents.

- **Upgrade Information:** To find tools and instructions for performing upgrades from previous PeopleTools versions, go to My Oracle Support, search for upgrade documentation, and then choose the PeopleSoft PeopleTools upgrade documentation for the appropriate release. To find tools and instructions for performing upgrades from previous PeopleSoft application releases, go to My Oracle Support and search for upgrade documentation. Choose the product family, such as Human Capital Management or Portal Solutions, and select the appropriate release.
- **Installation Documentation:** For a list of installation guides and notes for your products, go to My Oracle Support and search for installation documentation.
- **Oracle Software and Documentation:** You can download Oracle software products and documentation from the following web sites:
  - Oracle Software Delivery Cloud: <http://edelivery.oracle.com>
  - Oracle Technology Network (OTN): <http://www.oracle.com/technology/index.html>

---

## Audience

This documentation is written for the individuals responsible for installing and administering the PeopleSoft environment. This documentation assumes that you have a basic understanding of the PeopleSoft system. One of the most important components in the installation and maintenance of your PeopleSoft system is your on-site expertise.

You should be familiar with your operating environment and RDBMS and have the necessary skills to support that environment. You should also have a working knowledge of:

- Microsoft SQL and SQL command syntax.
- PeopleSoft system navigation.
- PeopleSoft windows, menus, and pages, and how to modify them.
- Microsoft Windows.

Oracle recommends that you complete training, particularly the PeopleSoft Server Administration and Installation course, before performing an installation.

See My Oracle Support

---

## Typographical Conventions

To help you locate and understand information easily, the following conventions are used in this documentation:

Convention	Description
<b>Monospace</b>	Indicates a PeopleSoft PeopleCode program or other code, such as scripts that you run during the install. Monospace is also used for messages that you may receive during the install process.

Convention	Description
<i>Italics</i>	Indicates field values, emphasis, and book-length publication titles. Italics is also used to refer to words as words or letters as letters, as in the following example:  Enter the letter <i>O</i> .
Initial Caps	Field names, commands, and processes are represented as they appear on the window, menu, or page.
lower case	File or directory names are represented in lower case, unless they appear otherwise on the interface.
Menu, Page	A comma (,) between menu and page references indicates that the page exists on the menu. For example, “Select Use, Process Definitions” indicates that you can select the Process Definitions page from the Use menu.
Cross-references	Cross-references that begin with <i>See</i> refer you to additional documentation that will help you implement the task at hand. Oracle highly recommends that you reference this documentation.  Cross-references under the heading <i>See Also</i> refer you to additional documentation that has more information regarding the subject.
“ ” (quotation marks)	Indicate chapter titles in cross-references and words that are used differently from their intended meaning.
<b>Note.</b> Note text.	Text that begins with <i>Note.</i> indicates information that you should pay particular attention to as you work with your PeopleSoft system.
<b>Important!</b> Important note text.	A note that begins with <i>Important!</i> is crucial and includes information about what you need to do for the system to function properly.
<b>Warning!</b> Warning text.	A note that begins with <i>Warning!</i> contains critical configuration information or implementation considerations; for example, if there is a chance of losing or corrupting data. Pay close attention to warning messages.

---

## Comments and Suggestions

Your comments are important to us. We encourage you to tell us what you like, or what you would like changed about our documentation, and other Oracle reference and training materials.

Please send your suggestions to: [PSOFT-Infodev\\_US@oracle.com](mailto:PSOFT-Infodev_US@oracle.com)

While we cannot guarantee to answer every email message, we pay careful attention to your comments and suggestions. We are always improving our product communications for you.

# CHAPTER 1

## Defining Support for 64-bit Processing

---

### Using 64-bit Processing

PeopleSoft PeopleTools 8.53 or higher supports 64-bit processing on most operating system platforms. You can find a list of the certified platforms for PeopleSoft PeopleTools in the Knowledge Management document 804670.1 on My Oracle Support.

If you are running your PeopleSoft installation on a 64-bit platform, any additional non-PeopleSoft products that you integrate with must also be 64-bit compatible.

For COBOL, you must update to the 64-bit version of Micro Focus COBOL Server Express and recompile your COBOL programs.

## CHAPTER 2

# Integrating with Taxware or Vertex

---

### Understanding Taxware and Vertex Integrations

Taxware Sales/Use Tax and Vertex Q-series integrations with PeopleSoft applications running on UNIX platforms and using PeopleSoft PeopleTools 8.53 are currently not available. Please contact the vendor (either Taxware or Vertex) for the latest availability information.

## CHAPTER 3

# Defining Application-Specific Requirements for PeopleSoft Financial Management, ESA, and ALM Applications

This chapter discusses:

- Defining PeopleSoft Asset Management Requirements
- Defining PeopleSoft IT Asset Management Requirements
- Defining PeopleSoft Maintenance Management Requirements
- Defining PeopleSoft Project Costing and Program Management Requirements for Microsoft Project Integration
- Defining PeopleSoft Resource Management Requirements

---

## Defining PeopleSoft Asset Management Requirements

PeopleSoft Asset Management has the flexibility to integrate with any bar coding hardware. You need the following hardware to use the Physical Inventory feature:

- Portable bar code reader
- Bar code scanning wand
- Thermal transfer label printer

See *PeopleSoft FSCM: Asset Management* for more information on software options that support this feature.

You can find installation guides for all supported PeopleSoft Financials, ESA, and Supply Chain Management release levels on My Oracle Support.

---

## Defining PeopleSoft IT Asset Management Requirements

PeopleSoft IT Asset Management integrates with additional component (third-party) vendors for IT asset inventory. You can use PeopleSoft IT Asset Management with any network inventory discovery application.

See *PeopleSoft FSCM: IT Asset Management* for more information on software options that support the feature.

---

## Defining PeopleSoft Maintenance Management Requirements

To enable the bar code option when you print a work order, you must install the appropriate bar code font, Code 39 True Type font, on the process scheduler.

To integrate Microsoft Project with PeopleSoft Maintenance Management, you must install Microsoft Project 2007 or higher on a Windows-based process schedule server and update the Microsoft Project Integration Application Engine (WM\_MSP) process definition to use this process scheduler server.

---

## Defining PeopleSoft Project Costing and Program Management Requirements for Microsoft Project Integration

Consult the Microsoft documentation for hardware and software requirements for Microsoft Project 2007 or 2010.

In addition, you must install PeopleSoft PeopleTools External APIs that require minimal disk space. The integration is not memory-intensive.

---

## Defining PeopleSoft Resource Management Requirements

The PeopleSoft Resource Management application supports the use of PeopleSoft Optimization Framework. Requirements for integration with PeopleSoft Optimization Framework are per solution set:

- PeopleSoft Optimization Framework must run on a separate dedicated server.
- 2 GB of memory.
- 1 CPU at minimum of 1.2 Ghz.

See *PeopleSoft FSCM: Resource Management*, for more information on enabling resource optimization.

See *PeopleTools: PeopleSoft Optimization Framework*

## CHAPTER 4

# Defining Cross-Application Requirements for PeopleSoft Financial Management, PeopleSoft ESA, and PeopleSoft ALM Applications

This chapter discusses:

- Defining Micro Focus COBOL Requirements
- Installing an FTP Server

---

### Defining Micro Focus COBOL Requirements

COBOL is not necessary for PeopleSoft PeopleTools or for applications that do not contain COBOL programs. However, some applications still require COBOL. The list of applications that require COBOL is available on My Oracle Support. Consult that list for application-specific COBOL requirements. If your application contains COBOL programs, you must purchase a Micro Focus COBOL compiler for non-OS/390 platforms, or an IBM Enterprise COBOL for z/OS and OS/390 compiler for OS/390 and z/OS platforms.

See "“PeopleSoft Frequently Asked Questions About PeopleSoft and the Micro Focus COBOL Compiler”" on My Oracle Support at <https://support.oracle.com/CSP/ui/flash.html>

---

### Installing an FTP Server

Some PeopleSoft applications use an FTP server to store document attachments. You must establish an FTP server with adequate disk storage to store your documents, and use the URL Maintenance page to specify the path to the appropriate FTP server.

See *PeopleTools: System and Server Administration*.

## CHAPTER 5

# Defining PeopleSoft Demantra Hardware and Software Requirements

---

### Reviewing High-Level Support Information

PeopleSoft Demantra is based on the standard PeopleSoft PeopleTools environments. You can implement PeopleSoft Demantra on any PeopleSoft PeopleTools 8.53 release.

The following lists high-level support information:

- **Web Server:** PeopleSoft Demantra can be implemented on any PeopleSoft PeopleTools 8.53 certified web server.
- **Client Workstation:** PeopleSoft Demantra can be implemented on any PeopleSoft PeopleTools 8.53 certified client workstation.
- **File Server:** PeopleSoft Demantra can be implemented on any PeopleSoft PeopleTools 8.53 certified file server.
- **Application Server:** PeopleSoft Demantra can be implemented on any PeopleSoft PeopleTools 8.53 certified application server.
- **Batch Server:** PeopleSoft Demantra can be implemented on any PeopleSoft PeopleTools 8.53 certified batch server.

---

**Note.** PeopleSoft PeopleTools does not require COBOL, nor do applications that do not contain COBOL programs. However, some applications still require COBOL. The list of applications that require COBOL is available on My Oracle Support. Consult the list for application-specific COBOL requirements. If your application contains COBOL programs, you must purchase a Micro Focus COBOL compiler for non-mainframe platforms, or an IBM Enterprise COBOL for z/OS and OS/390 compiler for z/OS platforms.

---

See PeopleSoft Application COBOL Requirements in My Oracle Support.

## CHAPTER 6

# Defining PeopleSoft Supply Planning 9.2 Hardware and Software Requirements

---

### Reviewing High-Level Support Information

PeopleSoft Supply Planning 9.2 is based on the standard PeopleSoft PeopleTools environments. PeopleSoft Supply Planning 9.2 can be implemented on any PeopleSoft PeopleTools 8.53 release.

Listed below is a high-level list of support information:

- Web Server: PeopleSoft Supply Planning 9.2 can be implemented on any PeopleSoft PeopleTools 8.53 certified web server.
- Client Workstation: PeopleSoft Supply Planning 9.2 can be implemented on any PeopleSoft PeopleTools 8.53 certified client workstation.
- File Server: PeopleSoft Supply Planning 9.2 can be implemented on any PeopleSoft PeopleTools 8.53 certified file server.
- Application Server: PeopleSoft Supply Planning 9.2 can be implemented on any PeopleSoft PeopleTools 8.53 certified application server.
- Batch Server: PeopleSoft Supply Planning 9.2 can be implemented on any PeopleSoft PeopleTools 8.53 certified batch server.

---

**Note.** COBOL is not required for PeopleSoft PeopleTools or for applications that do not contain COBOL programs. However, some applications still require COBOL. The list of applications that require COBOL is available in My Oracle Support. Please consult that list for application-specific COBOL requirements. If your application contains COBOL programs, you need to purchase a Micro Focus COBOL compiler for non-mainframe platforms, or an IBM Enterprise COBOL for z/OS and OS/390 compiler for z/OS platforms.

---

See PeopleSoft Application COBOL Requirements in My Oracle Support.

## **CHAPTER 7**

# **Defining PeopleSoft Inventory Hardware and Software Requirements**

---

## **Defining PeopleSoft Inventory Requirements**

You must select Postscript or HP-compatible printers to print bar codes.

## CHAPTER 8

# Defining PeopleSoft Mobile Inventory Management

## 9.2 Hardware and Software Requirements

This chapter discusses:

- Defining PeopleSoft Mobile Inventory Management Software Requirements
- Defining PeopleSoft Mobile Inventory Management Operating Systems and Browsers
- Defining PeopleSoft Mobile Inventory Management Devices

---

### Defining PeopleSoft Mobile Inventory Management Software Requirements

The PeopleSoft Mobile Inventory Management product enables the mobile user to perform their work wherever the work is being done. The PeopleSoft Mobile Inventory Management product uses Oracle Application Developer Framework (ADF) to extend the PeopleSoft Inventory functionality to the mobile device.

To use mobile applications you need the following Oracle Products:

- Oracle WebLogic Server
- Oracle Application Developer Framework

For more information and prerequisite details of installing PeopleSoft Mobile Inventory Management, see *PeopleSoft Financials/Supply Chain Management Installation* guide.

---

### Defining PeopleSoft Mobile Inventory Management Operating Systems and Browsers

The Oracle Application Developer Framework supports most consumer mobile browsers. Oracle tested the PeopleSoft Mobile Inventory Management product using the following browsers and operating systems in combination with the devices listed in the following section.

---

**Important!** Newer versions of these hand held devices, browsers and operating systems could result in additional configuration requirements by you.

---

- Microsoft Windows Mobile 6.1 Classic, running on the windows mobile CE OS5.2.20963  
Processor: PXA32X-806MHz

- Microsoft Windows Mobile 6.1 Professional, running on the windows mobile CE OS 5.2.20963  
Processor: PXA32X-806MHz
- Microsoft Windows Mobile 6.1 Professional, running on the windows mobile CE OS 5.2.20758  
Processor: PXA270-520MHz
- Windows Embedded Handheld 6.5 Classic, running on the windows mobile CE OS 5.2.29040.5.3.12  
. Processor: PXA32X-806MHz
- Microsoft Windows Mobile 6.5 Classic, running on the windows mobile CE OS 5.2.21915  
Processor: ARMv5TE PXA320
- Microsoft Windows Embedded Handheld 6.5 Classic, running on the windows mobile CE OS 5.2.29049  
Processor: TI Cortex-A8 800MHz

---

## Defining PeopleSoft Mobile Inventory Management Devices

The following lists the devices that Oracle used to develop the PeopleSoft Mobile Inventory Management product. Oracle tested using the following devices in combination with the preceding browsers and operating systems.

---

**Important!** Newer versions of these hand held devices, browsers and operating systems could result in additional configuration requirements by you.

---

- Motorola - MC9500
- Motorola - MC55
- Motorola - MC75A
- Motorola - MC9190-GMS
- Honeywell - Dolphin 7800
- Honeywell - LXE MX7 Tecton

For more information on device set up, configuration and implementation details, refer to the *PeopleSoft FSCM: Mobile Inventory Management*.

## CHAPTER 9

# Defining PeopleSoft Supplier Contract Management Hardware and Software Requirements

---

## Defining PeopleSoft Supplier Contract Management Requirements

The PeopleSoft Supplier Contract Management system uses Microsoft Word content. It is controlled extensively in XML format, and requires any client machines that access and edit Word documents to have Microsoft Word 2007 or higher installed.

The following PeopleSoft Supplier Contract Management hardware and software considerations apply:

- Document Comparisons and Rendering

This optional feature requires you to set up a Microsoft Windows application server and install Microsoft Word 2007 or higher. This process ensures that the server side generation of compare files and Microsoft Word documents is in the correct document format during the dispatch to suppliers.

See the product documentation for *PeopleSoft FSCM: Supplier Contract Management*, “*Defining Installation Options for PeopleSoft Supplier Contract Management*”.

- Digital Signatures and Rendering PDF

With the optional digital signature feature, specialists can prepare documents for signatures using the same Microsoft Windows application server where you installed Microsoft Word 2007 or higher version. If you use Adobe digital signatures instead of Microsoft Word, it is no longer recommended to install Adobe Acrobat on the windows server. This configuration from prior release is being deprecated in the 9.2 releases. If you are upgrading to 9.2 and you are set up to use Adobe digital signatures, you will need to edit your signature clauses to replace all the EPS images in order to use Microsoft Word 2007 or higher version to render PDF for digital signatures.

See *PeopleSoft FSCM: Supplier Contract Management*

Adobe Acrobat Professional 8.0 or higher version is still required on client machines where contract administrators will need to extend signatures rights to Adobe Reader users.

It is also possible to use Microsoft Word instead of Adobe PDF to create a .docx signature file. This option also requires Word 2007 or higher version on the Windows application server.

- sFTP Servers and Directories

Unless you store attachments directly within the database, a sFTP file server must be set up to store all clauses and versions of contract documents. The disk space you need depends on how large your clause library will be, as well as the size and volume of authored documents.

- Multi-Byte database consideration

There are certain multi-byte characters in Microsoft Word that a non-multi-byte PeopleSoft database integration cannot support for clause content in the library. When a clause is checked into the system that contains these characters, the system attempts to translate known characters into a simpler form when possible. While PeopleSoft Supplier Contract Management does support non-multi-byte database configurations, there are a few exception characters that are better supported in a multi-byte configuration.

See the product documentation for *PeopleSoft FSCM: Supplier Contract Management*, for more information on Microsoft Word Integration with Supplier Contract Management.

---

**Note.** These exceptions apply to the clause library content that the system stores in the database, not the final authored documents themselves.
