This software and related documentation are provided under a license agreement containing restrictions on use and disclosure and are protected by intellectual property laws. Except as expressly permitted in your license agreement or allowed by law, you may not use, copy, reproduce, translate, broadcast, modify, license, transmit, distribute, exhibit, perform, publish, or display any part, in any form, or by any means. Reverse engineering, disassembly, or decompilation of this software, unless required by law for interoperability, is prohibited.

The information contained herein is subject to change without notice and is not warranted to be error-free. If you find any errors, please report them to us in writing.

If this software or related documentation is delivered to the U.S. Government or anyone licensing it on behalf of the U.S. Government, the following notice is applicable:

U.S. GOVERNMENT END USERS: Oracle programs, including any operating system, integrated software, any programs installed on the hardware, and/or documentation, delivered to U.S. Government end users are "commercial computer software" pursuant to the applicable Federal Acquisition Regulation and agency-specific supplemental regulations. As such, use, duplication, disclosure, modification, and adaptation of the programs, including any operating system, integrated software, any programs installed on the hardware, and/or documentation, shall be subject to license terms and license restrictions applicable to the programs. No other rights are granted to the U.S. Government.

This software is developed for general use in a variety of information management applications. It is not developed or intended for use in any inherently dangerous applications, including applications which may create a risk of personal injury. If you use this software in dangerous applications, then you shall be responsible to take all appropriate fail-safe, backup, redundancy, and other measures to ensure the safe use of this software. Oracle Corporation and its affiliates disclaim any liability for any damages caused by use of this software in dangerous applications.

Oracle and Java are registered trademarks of Oracle Corporation and/or its affiliates. Other names may be trademarks of their respective owners.

Intel and Intel Xeon are trademarks or registered trademarks of Intel Corporation. All SPARC trademarks are used under license and are trademarks or registered trademarks of SPARC International, Inc. AMD, Opteron, the AMD logo, and the AMD Opteron logo are trademarks or registered trademarks of Advanced Micro Devices. UNIX is a registered trademark of The Open Group.

This software and documentation may provide access to or information on content, products, and services from third parties. Oracle Corporation and its affiliates are not responsible for and expressly disclaim all warranties of any kind with respect to third-party content, products, and services. Oracle Corporation and its affiliates will not be responsible for any loss, costs, or damages incurred due to your access to or use of third-party content, products, or services.

Data Administration Toolkit Resolved Issues	6
Reporting Resolved Issues	6

Preface

This document describes issues that you may encounter with this release. Internal Tracking numbers that appear in the tables are used to identify issues reported by customers. You can use these numbers to identify the issue should you need to contact Oracle Support. Locator numbers that appear in parentheses after some notes are for Oracle internal use only.

Chapter 1: What's New in This Release

This chapter contains information on new product features for Extensibility Pack 3.9 of Oracle Agile Product Lifecycle Management for Process.

What's New in This Release?

This extensibility pack delivers NPD UI extensibility, a Preferred UOM Extensible Column reference implementation, and a Cost Extension reference implementation. These enhancements are described in this chapter. For resolved bugs, see [Resolved Issues](#) on page 6.

Note: The full extensibility pack library of documents is included in each release, even if there are no changes other than being compiled against the latest version.

Enhancements

[*UI Extensibility for NPD*](#)

UI Extensibility has been added to New Product Development (NPD). The following objects are supported:

- Projects and project templates
- Activities and activity templates
- Strategic briefs and strategic brief templates
- ISP and ISP templates

(34409)

[*Preferred UOM - Extensible Column Reference Implementation*](#)

This new reference implementation shows the user BOM items in their preferred UOM in extensibility columns for the Input QTY and Input YLD.

Customers can easily change the logic if needed. For more information, see the *Oracle Agile Product Lifecycle Management for Process Extensibility Guide* and the *Oracle Agile Product Lifecycle Management for Process Extensible Columns Guide*.

(34884)

Cost Extension - Pull Most Expensive - Reference Implementation

The cost extension reference implementation pulls the most expensive cost if multiple costs are found for a single cross reference system. The core behavior pulls by alphabetical order.

Customers can easily change the logic if needed. For more information, see the *Oracle Agile Product Lifecycle Management for Process Extensibility Guide*.

(34885)

Chapter 2: Resolved Issues

This chapter contains resolved issues for Extensibility Pack 3.9 of Oracle Agile Product Lifecycle Management for Process.

Resolved Issues

The following tables outline known issues that have been resolved for Extensibility Pack 3.9 of Agile Product Lifecycle Management for Process.

Data Administration Toolkit Resolved Issues

Table: 2-1 Toolkit Resolved Issues

Bug/Enh ID	Issue	Resolution
15936605	Deployment of the Data Administration Toolkit application was slower than preferred.	Instructions for restoring connection profiles have been added to the installation section of the <i>Oracle Agile Product Lifecycle Management for Process Data Administration Toolkit Guide</i> . (34777)

Reporting Resolved Issues

Table: 2-2 Reporting Resolved Issues

Bug/Enh ID	Issue	Resolution
N/A	There is a problem when importing reports to another server or trying to call the reports from navigation extensions.	We removed all hyphens '-' from BI Publisher report names, layout names, layout file names (.xpt) and data models. (34854)
N/A	Performance was slow when running the Where Used reports.	New indexes were added and there was a change to the BI Publisher data model. (34948)
