Non-Billed budgets may be used when billing is infrequent and provides customers with a mechanism to make smaller payments more frequently. Bills are not created for the Non-Billed Budget's scheduled payment. Customers may have a payment coupon book, however must remember to make payments at the scheduled intervals.

A Non-Billed Budget is a special type of budget or payment plan that encompasses three major elements:

- A set of scheduled payments
- The business rules used to recommend and potentially renew the payment schedule
- The business rules that govern the financial impact on the current and payoff balances of the SAs covered by the payment schedule.

The process is triggered when the customer contacts the organization requesting Budget plan options. Based on established business rules, the CSR or Authorized User then decides to create a Non-Billed Budget for the customer.
