
PeopleSoft CRM 9.2: Event Management

June 2016

License Restrictions Warranty/Consequential Damages Disclaimer

This software and related documentation are provided under a license agreement containing restrictions on use and disclosure and are protected by intellectual property laws. Except as expressly permitted in your license agreement or allowed by law, you may not use, copy, reproduce, translate, broadcast, modify, license, transmit, distribute, exhibit, perform, publish, or display any part, in any form, or by any means. Reverse engineering, disassembly, or decompilation of this software, unless required by law for interoperability, is prohibited.

Warranty Disclaimer

The information contained herein is subject to change without notice and is not warranted to be error-free. If you find any errors, please report them to us in writing.

Restricted Rights Notice

If this is software or related documentation that is delivered to the U.S. Government or anyone licensing it on behalf of the U.S. Government, then the following notice is applicable:

U.S. GOVERNMENT END USERS: Oracle programs, including any operating system, integrated software, any programs installed on the hardware, and/or documentation, delivered to U.S. Government end users are "commercial computer software" pursuant to the applicable Federal Acquisition Regulation and agency-specific supplemental regulations. As such, use, duplication, disclosure, modification, and adaptation of the programs, including any operating system, integrated software, any programs installed on the hardware, and/or documentation, shall be subject to license terms and license restrictions applicable to the programs. No other rights are granted to the U.S. Government.

Hazardous Applications Notice

This software or hardware is developed for general use in a variety of information management applications. It is not developed or intended for use in any inherently dangerous applications, including applications that may create a risk of personal injury. If you use this software or hardware in dangerous applications, then you shall be responsible to take all appropriate fail-safe, backup, redundancy, and other measures to ensure its safe use. Oracle Corporation and its affiliates disclaim any liability for any damages caused by use of this software or hardware in dangerous applications.

Trademark Notice

Oracle and Java are registered trademarks of Oracle and/or its affiliates. Other names may be trademarks of their respective owners.

Intel and Intel Xeon are trademarks or registered trademarks of Intel Corporation. All SPARC trademarks are used under license and are trademarks or registered trademarks of SPARC International, Inc. AMD, Opteron, the AMD logo, and the AMD Opteron logo are trademarks or registered trademarks of Advanced Micro Devices. UNIX is a registered trademark of The Open Group.

Third Party Content, Products, and Services Disclaimer

This software or hardware and documentation may provide access to or information about content, products, and services from third parties. Oracle Corporation and its affiliates are not responsible for and

expressly disclaim all warranties of any kind with respect to third-party content, products, and services unless otherwise set forth in an applicable agreement between you and Oracle. Oracle Corporation and its affiliates will not be responsible for any loss, costs, or damages incurred due to your access to or use of third-party content, products, or services, except as set forth in an applicable agreement between you and Oracle.

Documentation Accessibility

For information about Oracle's commitment to accessibility, visit the Oracle Accessibility Program website at <http://www.oracle.com/pls/topic/lookup?ctx=acc&id=docacc>.

Access to Oracle Support

Oracle customers that have purchased support have access to electronic support through My Oracle Support. For information, visit <http://www.oracle.com/pls/topic/lookup?ctx=acc&id=info> or visit <http://www.oracle.com/pls/topic/lookup?ctx=acc&id=trs> if you are hearing impaired.

Preface

Understanding the PeopleSoft Online Help and PeopleBooks

The PeopleSoft Online Help is a website that enables you to view all help content for PeopleSoft Applications and PeopleTools. The help provides standard navigation and full-text searching, as well as context-sensitive online help for PeopleSoft users.

PeopleSoft Hosted Online Help

You access the PeopleSoft Online Help on Oracle's PeopleSoft Hosted Online Help website, which enables you to access the full help website and context-sensitive help directly from an Oracle hosted server. The hosted online help is updated on a regular schedule, ensuring that you have access to the most current documentation. This reduces the need to view separate documentation posts for application maintenance on My Oracle Support, because that documentation is now incorporated into the hosted website content. The Hosted Online Help website is available in English only.

Note: Only the most current release of hosted online help is updated regularly. After a new release is posted, previous releases remain available but are no longer updated.

Locally Installed Help

If your organization has firewall restrictions that prevent you from using the Hosted Online Help website, you can install the PeopleSoft Online Help locally. If you install the help locally, you have more control over which documents users can access and you can include links to your organization's custom documentation on help pages.

In addition, if you locally install the PeopleSoft Online Help, you can use any search engine for full-text searching. Your installation documentation includes instructions about how to set up Oracle Secure Enterprise Search for full-text searching.

See *PeopleTools Installation* for your database platform, "Installing PeopleSoft Online Help." If you do not use Secure Enterprise Search, see the documentation for your chosen search engine.

Note: Before users can access the search engine on a locally installed help website, you must enable the Search field. For instructions, select About This Help, Managing Locally Installed PeopleSoft Online Help, Enabling the Search Button and Field in the Contents sidebar of the online help site.

Downloadable PeopleBook PDF Files

You can access downloadable PDF versions of the help content in the traditional PeopleBook format. The content in the PeopleBook PDFs is the same as the content in the PeopleSoft Online Help, but it has a different structure and it does not include the interactive navigation features that are available in the online help.

Common Help Documentation

Common help documentation contains information that applies to multiple applications. The two main types of common help are:

- Application Fundamentals
- Using PeopleSoft Applications

Most product families provide a set of application fundamentals help topics that discuss essential information about the setup and design of your system. This information applies to many or all applications in the PeopleSoft product family. Whether you are implementing a single application, some combination of applications within the product family, or the entire product family, you should be familiar with the contents of the appropriate application fundamentals help. They provide the starting points for fundamental implementation tasks.

In addition, the *PeopleTools: Applications User's Guide* introduces you to the various elements of the PeopleSoft Pure Internet Architecture. It also explains how to use the navigational hierarchy, components, and pages to perform basic functions as you navigate through the system. While your application or implementation may differ, the topics in this user's guide provide general information about using PeopleSoft Applications.

Field and Control Definitions

PeopleSoft documentation includes definitions for most fields and controls that appear on application pages. These definitions describe how to use a field or control, where populated values come from, the effects of selecting certain values, and so on. If a field or control is not defined, then it either requires no additional explanation or is documented in a common elements section earlier in the documentation. For example, the Date field rarely requires additional explanation and may not be defined in the documentation for some pages.

Typographical Conventions

The following table describes the typographical conventions that are used in the online help.

<i>Typographical Convention</i>	<i>Description</i>
Key+Key	Indicates a key combination action. For example, a plus sign (+) between keys means that you must hold down the first key while you press the second key. For Alt+W, hold down the Alt key while you press the W key.
. . . (ellipses)	Indicate that the preceding item or series can be repeated any number of times in PeopleCode syntax.
{ } (curly braces)	Indicate a choice between two options in PeopleCode syntax. Options are separated by a pipe ().
[] (square brackets)	Indicate optional items in PeopleCode syntax.

<i>Typographical Convention</i>	<i>Description</i>
& (ampersand)	<p>When placed before a parameter in PeopleCode syntax, an ampersand indicates that the parameter is an already instantiated object.</p> <p>Ampersands also precede all PeopleCode variables.</p>
⇒	<p>This continuation character has been inserted at the end of a line of code that has been wrapped at the page margin. The code should be viewed or entered as a single, continuous line of code without the continuation character.</p>

ISO Country and Currency Codes

PeopleSoft Online Help topics use International Organization for Standardization (ISO) country and currency codes to identify country-specific information and monetary amounts.

ISO country codes may appear as country identifiers, and ISO currency codes may appear as currency identifiers in your PeopleSoft documentation. Reference to an ISO country code in your documentation does not imply that your application includes every ISO country code. The following example is a country-specific heading: "(FRA) Hiring an Employee."

The PeopleSoft Currency Code table (CURRENCY_CD_TBL) contains sample currency code data. The Currency Code table is based on ISO Standard 4217, "Codes for the representation of currencies," and also relies on ISO country codes in the Country table (COUNTRY_TBL). The navigation to the pages where you maintain currency code and country information depends on which PeopleSoft applications you are using. To access the pages for maintaining the Currency Code and Country tables, consult the online help for your applications for more information.

Region and Industry Identifiers

Information that applies only to a specific region or industry is preceded by a standard identifier in parentheses. This identifier typically appears at the beginning of a section heading, but it may also appear at the beginning of a note or other text.

Example of a region-specific heading: "(Latin America) Setting Up Depreciation"

Region Identifiers

Regions are identified by the region name. The following region identifiers may appear in the PeopleSoft Online Help:

- Asia Pacific
- Europe
- Latin America
- North America

Industry Identifiers

Industries are identified by the industry name or by an abbreviation for that industry. The following industry identifiers may appear in the PeopleSoft Online Help:

- USF (U.S. Federal)
- E&G (Education and Government)

Translations and Embedded Help

PeopleSoft 9.2 software applications include translated embedded help. With the 9.2 release, PeopleSoft aligns with the other Oracle applications by focusing our translation efforts on embedded help. We are not planning to translate our traditional online help and PeopleBooks documentation. Instead we offer very direct translated help at crucial spots within our application through our embedded help widgets. Additionally, we have a one-to-one mapping of application and help translations, meaning that the software and embedded help translation footprint is identical—something we were never able to accomplish in the past.

Using and Managing the PeopleSoft Online Help

Click the Help link in the universal navigation header of any page in the PeopleSoft Online Help to see information on the following topics:

- What's new in the PeopleSoft Online Help.
- PeopleSoft Online Help accessibility.
- Accessing, navigating, and searching the PeopleSoft Online Help.
- Managing a locally installed PeopleSoft Online Help website.

Chapter 1

Getting Started With Event Management

PeopleSoft Event Management Overview

PeopleSoft Event Management is a complete solution for planning and executing a wide range of virtual and in person events, from seminars, job fairs, open houses and conferences to webinars. In addition, PeopleSoft Event Management with Online Marketing provides a full featured self-service solution supporting online registration, venue capacity checking, wait listing, early bird pricing, and credit card integration.

PeopleSoft Event Management provides the following benefits:

- Manage event costs and ROI by reducing event support costs through automated approval workflow and online registration, wait listing and credit card payments.
- Provide real time updates of event information for accurate and timely responses: event statuses (registered, waitlisted, declined) are updated in real time from the self-service pages for accurate communication to event participants.
- Measure event success and drive follow up actions: maximize event success by leveraging OLM surveys for retention, automated lead creation for Recruiting and out-of-the-box metrics for event analysis.

PeopleSoft Event Management provides the tools you need to deliver successful events, from start to finish: Planning, Invitation and Registration, Execution, and Analysis and Follow-Up.

Event Management Business Process

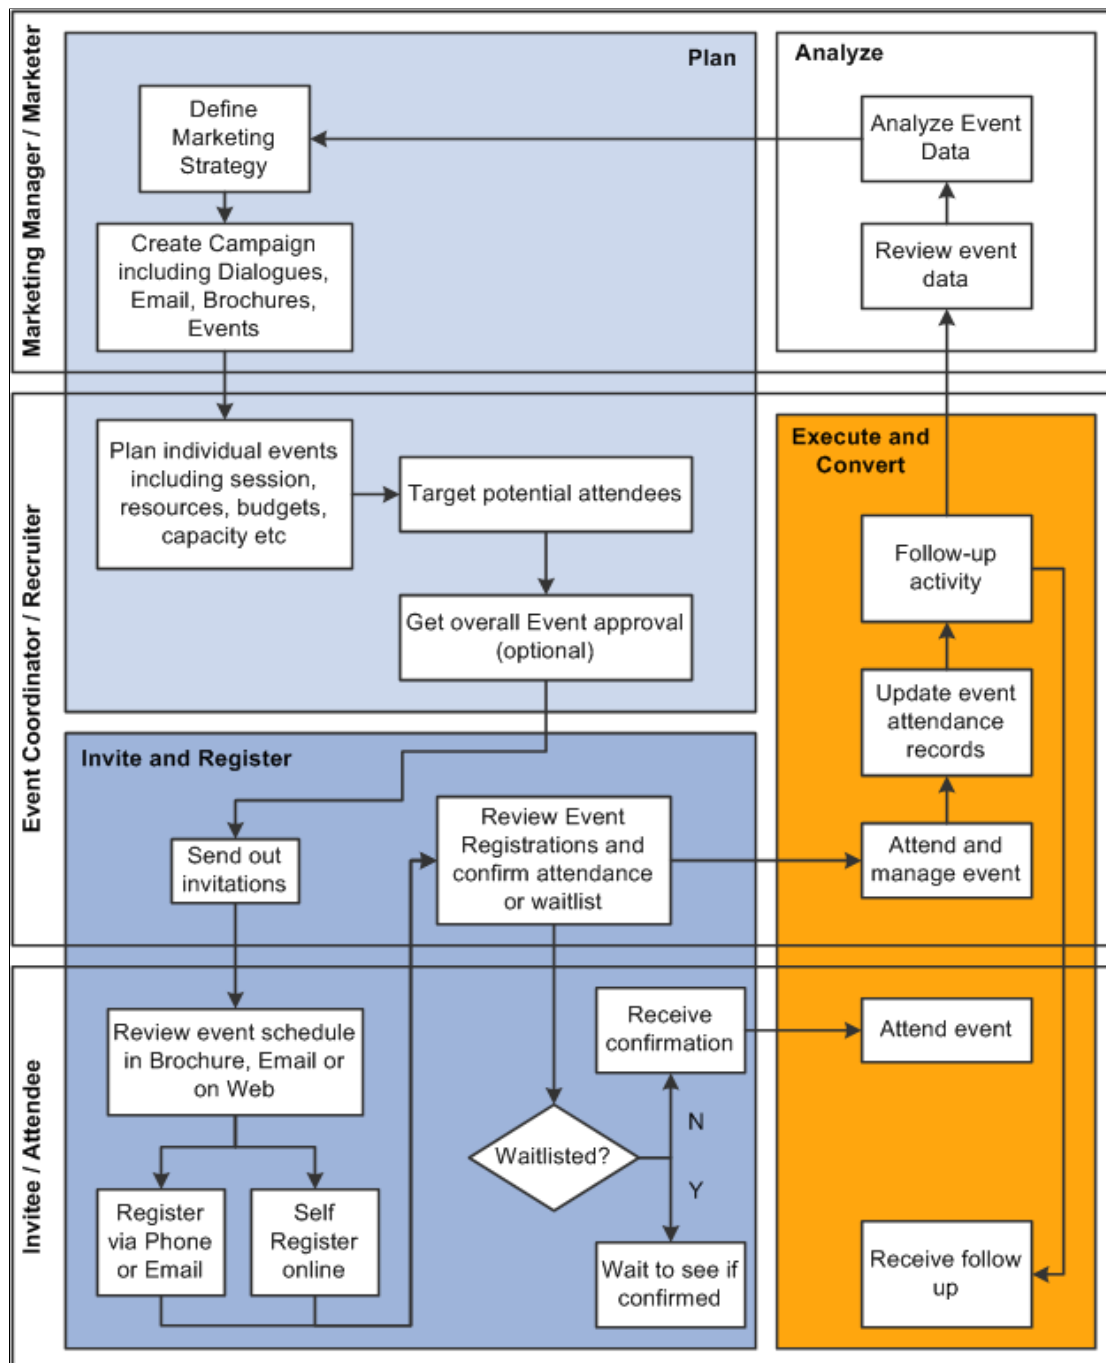

The event management business process consists of four process steps:

- Plan.
- Invite and Register.
- Execute and Convert.

- Analyze.

Image: Event Management business process

The following diagram shows the event management business process, detailing the steps that occur during the planning phase, the invite and register phase, the execute and convert phase, and the analysis phase. The people and functions who perform each task are shown.

The PeopleSoft Event Management documentation is organized according to these business process steps.

Plan

In the Plan step, marketing managers and marketers formulate a plan to address the business opportunities and challenges that includes events. They determine the goals, collaborates with all the people and organizations that would be involved with the planning and execution of the event, and set up and manage the resources necessary to implement the event. These include setting budgets, obtaining approvals, defining event agendas, and organizing venues.

Begin by establishing the event basics like the event name; important dates like start, end and RSVP date; venue and capacity; event owner and whether the event is private or public.

An event can be a part of a larger marketing campaign. For example, a university's undergraduate student recruiting campaign might include web advertisements, multiple open house events, and postcards. Event Management provides the ability to link the event to a marketing campaign, specifically a roll up program, so that the high level budgets, costs, and metrics can be rolled up from all related programs and events and be viewed for the overall campaign.

Additionally, marketers can link any number of events that are related to this event (for example, if an open house is repeated on different days in different locations). They can display the related events as part of the self-registration process so that participants can sign up for similar events if they are not able to register for their first choice.

The marketer can define financial data for the event including budgets, planned and actual costs and event registration fees, including date based pricing such as early bird pricing. During the online self-registration process, the current price for the event is determined in real time.

After they have defined the high level detail for an event (budget, venue, and so on), marketers can submit it for approval prior to defining the rest of the event details. They do this by setting the event status to *In Review*. Doing this triggers an email or worklist entry to the event approver, who reviews the event and then sets the status to *Approved*. Additional data that can be set up at the event level includes resources (such as projectors and speakers), tasks, costs, notes, and metrics.

Marketers can also define multiple sessions for events along with a capacity and number attended for each session. They can define specific costs, metrics, notes, team members, and resources at the session level, allowing for more detailed tracking of popular sessions.

Further, they can target events to a specific list of participants. Event Management provides the ability to segment prospect, customer, and employee data to build the right audience for the event. Marketers can build the participant list both from audiences and by manually adding participants. The system automatically deduplicates the participants so that the event invitation is not sent to the same person twice.

Invite and Register

In the Invite and Register step, the event coordinator sends out the invitations using both inbound and outbound channels (such as phone, email, direct mail, call center, website, and fax). The Registration process step provides event coordinators and invitees the methods to capture registration information.

When sending the event invitation using email or the web, event coordinators can direct the recipient to an online registration page where he can register, decline, be waitlisted, or sign up for a future event. The online responses automatically update the registration status for the recipient within PeopleSoft Event Management, and the response date and time are updated to help determine whom to remove from the waitlist when space becomes available. In conjunction with Online Marketing, reminders can be sent to invitees using SMS and email.

During the registration process, Event Management determines the event price in real time and can take credit card payments (for event registration or donations) and display the payment transaction history.

Event coordinators can display related events as part of the self-registration process so that participants can sign up for similar events if they are not able to register for this particular event or if the capacity for this event is exceeded. As the responses are updated automatically, the coordinator can view in real time all the participants and their current response status for the event, as well as participant counts.

Note: In order to invite participants using email or to perform online registration, you must license PeopleSoft Online Marketing.

Execute and Convert

The Execute/Convert step provides event coordinators the ability to capture attendance and no-show information, self-service check-in (requires Online Marketing), and reports and lists of attendees for each event session.

After the event actually takes place, the attended or no-show field can be updated and any new prospects and leads can be added to the system. Event coordinators can convert event success to action, leveraging event participant lists for the automated creation of leads and follow-up communications, as well as leveraging integrated surveying tools of Online Marketing to survey invitees and attendees to identify future event interest and improve events for the future.

Analyze

The Analyze and Measure step reports on the effectiveness of the event planning and execution process. Event Management provides a number of different metrics to help event coordinators analyze how successful the event was in terms of revenue (for a fundraising event), leads and opportunities generated (for a recruiting event), attendance rates (for a seminar), and more.

PeopleSoft Event Management Integrations

PeopleSoft Online Marketing integrates with PeopleSoft Online Marketing and PeopleSoft Marketing.

We discuss integration considerations in the implementation topics in this documentation.

Supplemental information about third-party application integrations is located on the My Oracle Support website.

PeopleSoft Marketing

PeopleSoft Event Management integrates with PeopleSoft Marketing: for example, Audience Builder and Campaign Management. Marketing is a prerequisite and required for using Event Management.

PeopleSoft Online Marketing

PeopleSoft Online Marketing enables the email and web communications required for inviting attendees to your event, as well as event reminder and follow-up communications and actions, and the online registration capabilities. Online Marketing is recommended to enable the full business process for Event Management.

See PeopleSoft Online Marketing.

PeopleSoft Event Management Implementation

PeopleSoft Setup Manager enables you to generate a list of setup tasks for your organization based on the features you are implementing. The setup tasks include the components that you must set up, listed in the order in which you must enter data into the component tables, and links to the corresponding PeopleSoft documentation.

See *PeopleTools: Setup Manager*

Other Sources of Information

In the planning phase of your implementation, take advantage of all PeopleSoft sources of information, including the installation guides, data models, business process maps, and troubleshooting guidelines.

Chapter 2

Planning Events

Setting Up the Event

Pages Used to Set Up Events

Page Name	Definition Name	Usage
<u>Marketing Programs Page</u>	RA_PROGRAM_ADD	Add a new Marketing Program.
<u>Event - Event Page: Detail Section</u>	RAE_EVENT_DETAIL	Define event details.
<u>Event - Event Page: Financial Section</u>	RAE_EVENT_DETAIL	Define financial information about the event.

<u>Event - Team Page</u>	RAE_EVT_TEAM	Define team members for the event.
<u>Event - Resources Page</u>	RAE_EVENT_RESOURCE	Define resources for the event.
<u>Event - Task Page</u>	RAE_EVENT_TASK	Manage event tasks.
<u>Event - Task Details Page</u>	RB_TSK	Define detailed task information for an event task.
<u>Event - Costs Page</u>	RAE_EVENT_COSTS	Define costs related to the event.
<u>Event - Notes Page</u>	RAE_EVENT_NOTES	Define notes related to the event.
<u>Event - Participants Page</u>	RAE_EVENT_REGISTR	Define information about event participants.

Understanding Event Setup

An Event is a type of Marketing Program that provides functionality specific to Event Management business processes. It is created using the Program Type Event, which appears in the Marketing Programs list along with the Campaign, Roll Up, and Dialog program types. The Event program type allows the event to be associated with a roll up program for rolling up budgets and costs to a higher level, along with other program types such as mass mailing program or Dialog for an online marketing program.

When you define an event, you define various information about it, including:

- Event details, such as start and end date, event capacity, venue, and other descriptive information about the event.

- Event financial information, including details about the event sponsor and budget, and a breakdown of the costs associated with the event.

After you have defined the overall information about the event itself, you can define the details of the event's individual sessions, the team members and roles associated with it, the tasks that must be completed, the associated costs, and the event participants.

When an event is cloned (using the Clone link in the Toolbar), the dates associated with the event are not cloned. These include dates relating to:

- Event.
- Session.
- Fees.

After the event has been cloned, you must enter dates for these items.

Marketing Programs Page

Use the Marketing Programs page (RA_PROGRAM_ADD) to add a new Marketing Program.

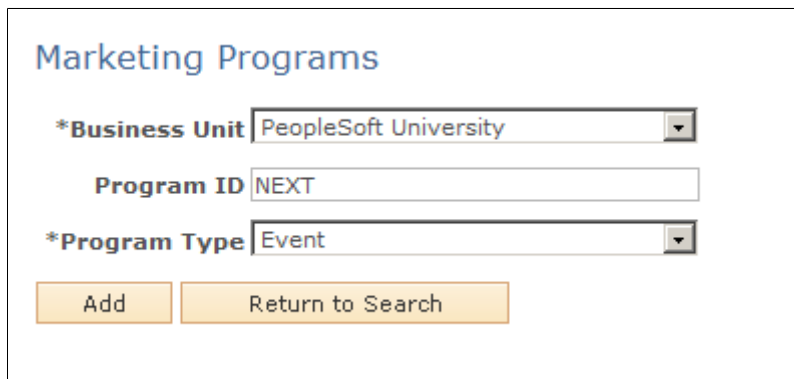

Navigation

Marketing, Marketing Programs

Click the Add Program button.

Image: Marketing Programs page

This example illustrates the fields and controls on the Marketing Programs page.

The screenshot shows a web form titled "Marketing Programs". It contains three input fields: "*Business Unit" with a dropdown menu showing "PeopleSoft University", "Program ID" with a text box containing "NEXT", and "*Program Type" with a dropdown menu showing "Event". Below these fields are two buttons: "Add" and "Return to Search".

Business Unit

Select the business unit for which you want to create the event.

Program ID

By default, this value is NEXT for a new event. The event will be assigned the next available Program ID when you save.

Program Type

Select *Event* from the list of available choices.

Event - Event Page: Detail Section

Use the Event Detail page (RAE_EVENT_DETAIL) to define event details.

Navigation

Marketing, Marketing Programs

Select an event from the list, or create a new event.

Image: Event - Event page: Detail section

This example illustrates the fields and controls on the Event - Event page: Detail section.

Add Related Event

Name

Enter a name for the event. Event names must be unique within a business unit.

Status

Select a status from the list of choices. For a new event, the status is *New* by default. Other statuses include:

- *In Review*: The event has been submitted for approval.
- *Declined*: The event has not been approved.
- *Approved*: The event has been approved and is ready for execution.
- *Executing*: The event is currently being executed.
- *Completed*: The event is complete. When the event is in this status, all of its main fields are read-only.

- *Stop*: The event has been put on hold or canceled (you can use the Notes section to provide details).

Note: You can define your own Status values using the Status Rules page in PeopleSoft Marketing. Refer to the Marketing documentation for more information.

Venue

Click the icon to search and then select a venue from the available list.

Capacity

Enter the maximum number of attendees who can attend the event. This value is used to determine whether a person registering for the event will be waitlisted if the number registered exceeds the Capacity.

If the event's Capacity increases and there are waitlisted participants, a message displays to inform you that you should review the waitlisted participants. If the Capacity decreases and the number of registrants exceeds the new capacity, a message displays to inform you to review the participant list.

Start Date, Start Time

The time and date when the event begins.

End Date, End Time

The time and date when the event ends. The End Date cannot be earlier than the Start Date.

RSVP Date

The date by which prospective registrants must respond to the invitation. This date cannot be greater than the End Date value, but it can be later than the Start Date.

Private Event

Select this check box if the event is private. If the check box is not selected, then the event is public.

Event Type

Select an event type from the list of choices. The available choices are *Auction, Break, Benefit, Breakfast, Conference, Conference Call, Demonstration, Dinner, Drinks, Entertainment, Fundraiser, Keynote, Lecture, and VIP Event*.

This value is for informational purposes only; the choice does not change what is displayed on the Event Definition pages.

Currency

Select the default currency for the event from the list of choices.

Objective

Select an objective for the event (such as Recruiting, Fundraising, and so on). Refer to the Marketing documentation for more detailed information about objectives.

Note: You can define your own objectives using the Marketing Objectives page in PeopleSoft Marketing. Refer to the Marketing documentation for more information.

Collateral	Click the icon and select marketing collateral to associate with the event, if relevant.
Owner	Click the icon and select an owner for the event from the available list. The default is the person who created the event. The event owner is leveraged in the event approval workflow process.
Approver	Click the icon and select the person who must approve the event. The event approver is leveraged in the event approval workflow process.
Host Company	Click the icon and select the name of the company that is hosting the event.
Host Employee	Click the icon and select the name of the employee who is hosting the event. The Host Employee does not have to be a member of the Host Company.
Roll Up (Campaign)	Select the name of the roll up to which this event is to be associated.
Secure Event	Select this check box to restrict access and visibility to the event. When an event is secured, users will be unable to access it unless they are a team member or part of a team role that has been associated with the event. Secure Event uses the same security framework used to secure online dialogs and audiences.
Participant Counts	<p>This section displays information about the participants for the event. It is read-only, and is updated when the main Event Detail page is updated. It includes:</p> <ul style="list-style-type: none"> • <i>Seats Remaining</i>: The event's Capacity minus the number registered. The number registered is the sum of the number of registered participants and their guests. • <i>Invited</i>: The total number of people invited to the event. • <i>Attended</i>: The total number of people who actually attended the event (including those who were not invited but who showed up anyway). • <i>Declined</i>: The total number of invitees who have declined the event. • <i>No-Shows</i>: The number of people whose attendance is set to No on the participant list. • <i>Registered</i>: The total number of invitees who have accepted the event invitation (that is, registered for the event). This total also includes anyone who has registered but was not invited. • <i>Guest Count</i>: The number of guests registered for the event on behalf of the participant. Participants can register

anonymous guest participants to attend the event on their behalf.

- *Waitlisted*: The number of attendees who have agreed to be waitlisted for the event.
- *Future Events*: The number of invitees who have requested to be notified about future events.
- *No Response*: The number of invitees who did not respond to the invitation.

Related Events

This section contains references to events that are similar in nature to the current event. This enables the event marketer or support analyst to recommend future events to anyone who cannot attend the current event or who was placed on a waiting list. Related events can also be displayed on the online Event Registration page.

- *Event Name*: Click the icon to display a list of related events.
- *Start Date*: The start date of the selected event. This value is read-only.
- *End Date*: The end date of the selected event. This value is read-only.
- *Status*: The status of the selected event. This value is read-only.
- *Event Type*: The event type of the selected event. This value is read-only.
- *Description*: The description of the selected event. This value is read-only.

Target Academic Term

Specify the institution, career, and admit term for the marketing event.

This section appears only if the Higher Education field is selected on the General Options page. Specify the admit term if you run the *Recruiting Performance* Fusion Intelligence reports off of the *CSW: Recruiting & Admissions* Interactive Dashboard.

Event Workflow

The following table shows the workflow actions for events based on a change in the event status.

Event Status Change	Action Name	Role Name
Changed to In Review	Worklist to Approver	Approver

<i>Event Status Change</i>	<i>Action Name</i>	<i>Role Name</i>
	Email to Approver	Approver
Changed to Approved.	Worklist to Event Owner	Owner
	Email to Event Owner	Owner
Changed to Declined	Worklist to Event Owner	Owner
	Email to Event Owner	Owner
Changed to Stopped	Worklist to Event Owner	Owner
	Email to Event Owner	Owner

<input type="button" value="Add Registration Fee"/>				

Sponsors and Budgets

This section is a common sub page used by marketing campaigns, marketing roll ups, and the Dialog Designer if the dialog was created using the Marketing Programs page.

- *Sponsor Name*: Click the icon and select a sponsor from the list of available choices. Note that the sponsor name is required for all but one record in the list. In other words, you can include one budget record that does not include a sponsor name, but all others must include one.
- *External*: Select this check box to allow external viewing, or leave it cleared to specify internal viewing only.
- *Budget Source*: Click the icon and select a budget source from the available list.
- *Budget Amount*: Enter a budget amount. Note that the amount entered is included with and edited against any budgeted amount specified for an associated roll up.

Record Program Costs

This section is a common sub page used by marketing campaigns, marketing roll ups, and the Dialog Designer if the dialog was created using the Marketing Programs page.

- *Cost Type*: Select a cost type from the list of choices.
- *Component*: This value is based on the Cost Type, and is read-only.
- *Variable*: This value is based on the Cost Type, and is read-only.
- *Currency*: The currency code that was specified in the Currency field in the Detail section.

- *Unit Cost*: Enter a unit cost for the budget item.
- *Planned Cost*: Enter the anticipated cost of the budget item. This amount cannot be a negative value.
- *Actual Cost*: Enter the actual cost of the budget item. This amount cannot be a negative value.
- *Totals*: The totals of all the Actual Cost values and the Planned Cost values.
- *Calculate*: Click this button to calculate the Totals fields.
- *Add a New Cost*: Click this button to add a new cost to the list.

Registration Fees

This section contains an amount and a respond-by date.

Typically, an event includes a promotional or Early Bird fee in order to encourage invitees to sign up early for an event.

If payment is received on or before the respond-by date, then the special fee takes effect. If the event start is after the last respond-by date, the system uses the most recent fee as the walk in fee.

- *Amount*: Enter the amount of the fee. The currency is determined by what was specified in the Currency Code field on the Event Detail page.
- *Currency*: This value is read-only and is taken from the Currency Code field on the Event Detail page.
- *Respond By*: The final date to which the fee in the Amount field applies.
- *Description: (Optional)* Enter any explanation you want to include pertaining to the fee.

Event - Sessions Page

Use the Event - Sessions page (RAE_EVENT_SESSIONS) to define event sessions.

Navigation

Marketing, Marketing Programs

Select an event from the list, or create a new event.

Click the Sessions tab.

Image: Event - Sessions page

This example illustrates the fields and controls on the Event - Sessions page.

The screenshot shows the 'Event - Sessions' page. At the top, there are tabs: Event, Sessions (selected), Team, Resources, Participants, Tasks, Costs, Metrics, Communications, and Notes. Below the tabs is a 'Go To' dropdown menu. The main section is titled 'Session Summary' and contains a table of sessions. Below the table are two buttons: 'Clone Selected Session' and 'Add a New Session'. Below these buttons is a 'Session Detail' section for the selected session '1. Registration'. The detail section includes fields for Name, Location, Capacity, Start Date, End Date, Start Time, End Time, and Description. Below the detail section are several collapsed sections: Costs, Metrics, Team Members, Notes, and Resource.

Session Name	Start Date	Start Time	End Date	End Time	Location
<input type="checkbox"/> 1. Registration	02/19/2016	8:00AM	02/19/2016	9:00AM	Ludwig Auditorium
<input type="checkbox"/> 7. Morning Greeting	02/20/2016	9:00AM	02/20/2016	9:30AM	Ludwig Auditorium
<input type="checkbox"/> 9. Lunch and Farewell	02/21/2016	12:00AM	02/21/2016	2:00PM	Dining Hall

*End Date: 02/19/2016 End Time: 9:00AM

Description: Meeting and General Information

Costs

Metrics

Team Members

Notes

Resource

Click the Sessions tab to show all sessions for this event. Sessions are a series of smaller events within the main event. For example, for an Open House event, sessions could define the agenda for the day (9-10 a.m., Overview of Institution; 10-11 a.m., Overview of Arts program, and so on). You can define multiple sessions for any event and each session can have its own resources (external speaker, projector, and so forth) associated with it. When you first display the Sessions page, several of its sections are collapsed.

Note: Every event must have a minimum of one session. If you create an event without defining a session for it, a default session with the same start and end date values as the event itself is created with it.

Session Summary

The Session Summary section provides an overview of the event's sessions, including name, start date and time, end date and time, and location. All of these items are described in more detail in the Session Detail section.

Selection Check Box	Select one or more check boxes to include a selected session for cloning.
Clone Selected Session	Click this button to clone the selected sessions. Session information as well as Costs, Metrics, and Team Members will be cloned.
Add a New Session	Click this button to add a new empty session.

Session Detail

This section provides a more detailed view of the event's sessions. To display information about a particular session, click its name in the Session Summary section.

Name	Enter the name of the session. This value is required.
Location	Enter the location of the session.
Capacity	Enter the capacity of the session's location.
Attended	Enter the number of people who attended the session.
Start Date, Start Time	Enter the starting date and time of the session. The Start Date value is required.
End Date, End Time	Enter the ending date and time of the session. The End Date value is required.
Description	Enter any defining information or particulars that need to be included for further clarification about the session.

Other Sections

The remaining sections on the page allow you to associate resources with the selected session (as opposed to the entire event).

Costs	Use this section to associate costs with a specific session of the event.
Metrics	Use this section to associate metrics (such as session attendance rate or cost per attendee) with a specific session of the event.
Team Members	Use this section to associate team members with a specific session of the event.
Notes	Use this section to attach a note to a specific session of the event.
Resource	Use this section to associate other resources (such as collateral, external participants, or internal participants) with the session.

Event - Team Page

Use the Event - Team page (RAE_EVT_TEAM) to define team members for the event.

Navigation

Marketing, Marketing Programs

Select an event from the list, or create a new event.

Click the Team tab.

Image: Event - Team page

This example illustrates the fields and controls on the Event - Team page.

The screenshot displays the 'Event - Team' page for 'Spring Recruiting Event 1'. The page includes a header with event details (Start Date: 02/19/2016, Venue: Lexington, Status: New, End Date: 02/20/2016, Event ID: EVT000000010004) and a navigation bar with tabs for Event, Sessions, Team, Resources, Participants, Tasks, Costs, Metrics, Communications, and Notes. The 'Team' tab is active.

Team Members Section: This section contains a table with columns: Owner, Name, Telephone, Email Address, and Role Name. It lists four team members: Michael Miles, Mandy Moore, Mitzi McCartney, and Nori Sakai. The 'Owner' checkbox is checked for Nori Sakai. Below the table is an 'Add Team Member' button.

Team Roles Section: This section contains a table with columns: *Role Name and Description. It is currently empty, with an 'Add Team Role' button below it.

Team Marketing Center Section: This section contains a table with columns: *Marketing Center, Description, Institution, and Center Type. It is currently empty, with an 'Add Marketing Center' button below it.

The page footer includes a 'Save' button, a 'Refresh' button, and a 'Top of Page' link.

Team Members section

This section shows the team members associated with the event.

The Owner check box is selected for the event owner. You can add more team members by clicking the Add Team Member button.

If you add a team member on this page, that person will be immediately available for selection on the Sessions page.

Likewise, if you delete a team member who was already associated with a session, that team member is automatically deleted from any sessions with which he or she was associated.

You can secure an event so that only team members and team roles that you have specified on this page can view or access the event.

Team Roles section

This section shows the roles associated with the event. You can select a role from the available list, and add another role by clicking the Add Team Role button.

Team Marketing Center section

The Team Marketing Center grid allows you to specify which events team members can access. Users can only select authorized Marketing Centers from the Marketing Center prompt.

The Marketing Program component search excludes any secured events that the user is not authorized to access. If the user has at least one of the allowed roles, or is a team member or is authorized to at least one of the Marketing Centers, then that user can access the secured event.

The Event Transfer icon on the Related Events section of the Event Detail page is secured. If user is not authorized to view the event, an error message is displayed.

Event - Resources Page

Use the Event - Resources page (RAE_EVENT_RESOURCE) to define resources for the event.

Navigation

Marketing, Marketing Programs

Select an event from the list, or create a new event.

Click the Resources tab.

Image: Event - Resources page

This example illustrates the fields and controls on the Event - Resources page.

The screenshot displays the 'Event - Resources' page. At the top, there's a header with 'Event' and a 'Personalize' link. Below this is a navigation bar with buttons: Save, Refresh, Search, Clone, and Notification. The main content area shows event details: Event Name (Spring Recruiting Event 1), Start Date (02/19/2016), Venue (Lexington), Status (New), End Date (02/20/2016), and Event ID (EVT000000010004). Below the details is a tabbed interface with tabs: Event, Sessions, Team, Resources (selected), Participants, Tasks, Costs, Metrics, Communications, and Notes. A 'Go To' dropdown menu is next to the tabs. The 'Resource Summary' table is shown below the tabs, with columns: Type, Name, Session, and Description. The table lists four resources: Stephen Ray (Setup and Cleanup), Refreshments (Bagels and Coffee), Custodial (Setup and Cleanup), and Refreshments (Bagels and Coffee). Each row has a trash icon in the rightmost column. At the bottom, there is an 'Add a Resource' button.

Type	Name	Session	Description
Other	Stephen Ray	1. Registration	Setup and Cleanup
Other	Refreshments	1. Registration	Bagels and Coffee
Other	Custodial	7. Morning Greeting	Setup and Cleanup
Other	Refreshments	7. Morning Greeting	Bagels and Coffee

This section displays any resources currently attached to the event. You can use the page to associate resources to a particular session.

Resource Summary

The Resource Summary section displays an overview of all the event's resources. Click a resource name to display more detail about the resource. The summary includes the following:

- *Type*: The type of resource. The available values are *Collateral*, *External Participant*, *Internal Participant*, and *Other*.
- *Name*: The name of the resource. Click the name to display more detail about it.
- *Session*: If the resource is related to a session, then the session name appears here; otherwise, the field is empty.
- *Description*: A description of the resource.

Add a Resource

Click this button to insert another resource item in the list and display its Resource Detail information.

Resource Detail

The Resource Detail section displays more information about a new or selected resource. Click the Apply Resource button to update the grid with any changes and hide the Resource Detail section.

- *Type*: The type of resource: *Collateral*, *External Participant*, *Internal Participant*, or *Other*.
- *Name*: The name of the resource. If the Type is *Collateral*, a lookup for Marketing Collateral appears. If Type is *Internal Participant*, a lookup for Workers appears. If the Type is *External Participant* or *Other*, then no lookup appears.
- *Session*: You can select a session to which to relate this resource. A resource can only be related to one session.
- *Description*: A description of the resource.
- *Apply Resource*: Click this button to close the Resource Detail section and apply the changes to the Resource Summary grid. If you arrived at this page from the Session page, then you will be returned there after the changes are applied.

Event - Task Details Page

Use the Event - Task Details page (RB_TSK) to define tasks for the event.

Navigation

Marketing, Marketing Programs

Select an event from the list, or create a new event.

Click the Tasks tab, then click the name of a task or click the Add Task button.

Image: Event - Task Details page

This example illustrates the fields and controls on the Event - Task Details page.

The screenshot displays the 'Task Details' page. At the top, there's a navigation bar with buttons like 'Save', 'Options', 'Add New Task', and links to 'My Accounts', 'My Contacts', 'My Tasks', 'My Calendar', and 'Add Contact'. Below this, a summary bar shows the task subject '1 Create an Audience for loading', owner 'Burt Lee', status 'Open', and company. The main section, titled 'Task Details', contains several fields: '*Subject' (1 Create an Audience for loading), '*Status' (Open), '*Task Type' (To Do), '*Priority' (Medium), 'Start Date' (11/05/2014), 'End Date' (11/05/2014), '*Owner' (Burt Lee), '*Repeats' (Does Not Repeat), and a 'Description' text area. There are also checkboxes for 'Private' and 'Reminder', and a 'Location' field. A link 'View or Link Related Objects' is present. At the bottom, the 'Assigned To' section indicates 'No Assignees have been added.' and provides input fields for 'First Name' and 'Last Name' along with an 'Assign' button.

You can use Task Groups to set up common recurring tasks for events, then reuse the tasks for a different event. Examples of common recurring tasks could include reserving the venue, reserving speakers, printing name cards, and so forth.

Refer to the Tasks section in the Marketing documentation for more information about using tasks.

See "Defining Task Tools" (PeopleSoft CRM for Marketing Applications 9.2), "Marketing Programs - Tasks Page" (PeopleSoft CRM for Marketing Applications 9.2).

Event - Costs Page

Use the Event - Costs page (RAE_EVENT_COSTS) to define costs related to the event.

Navigation

Marketing, Marketing Programs

Select an event from the list, or create a new event.

Click the Costs tab.

Image: Event - Costs page

This example illustrates the fields and controls on the Event - Costs page.

Event

Save Refresh | Search | Clone | Notification Personalize

Event Name Spring Recruiting Event 1 Status New

Event View Cost Type View Go To Select One...

Event Costs Personalize Find View All First 1-4 of 4 Last

Name	Budget Amount	Planned	Actual	Difference
Spring Recruiting Event 1	5,000.00	4,500.00		4,500.00
9. Lunch and Farewell		500.00		500.00
Totals		5,000.00		5,000.00

The Cost tab displays costs associated to the specified event and its sessions.

Event View tab

This tab displays information about the event costs:

- *Name*: The event or session name. Event names are not linked; session names are linked to their associated event and clicking them will display that event's information.
- *Budget Amount*: The budget amount from the event. This value is not used in calculations.
- *Planned*: The planned amount (totals) as entered as event or session costs, totaled by event or session.
- *Actual*: The actual amount (totals) as entered as event or session costs, totaled by event or session.
- *Difference*: The Planned value minus the Actual value.

Cost by Cost Types tab

This tab displays information about event cost types:

- *Description*: A description of the cost, entered during Cost Setup.
- *Cost Type*: The type of cost, entered during Cost Setup.
- *Planned*: The planned amount (totals) as entered as event or session costs, summarized by cost type.
- *Actual*: The actual amount (totals) as entered as event or session costs, summarized by cost type.

- *Difference*: The Planned value minus the Actual value.

For more information about costs, refer to the Costs section in the Marketing documentation.

See "Defining Cost Elements" (PeopleSoft CRM for Marketing Applications 9.2).

Event - Notes Page

Use the Event - Notes page (RAE_EVENT_NOTES) to define notes related to the event.

Navigation

Marketing, Marketing Programs

Select an event from the list, or create a new event.

Click the Notes tab.

Image: Event - Notes page

This example illustrates the fields and controls on the Event - Notes page.

The screenshot shows the 'Event - Notes' page. At the top, there are buttons for 'Save', 'Refresh', 'Search', 'Clone', and 'Notification'. The event details are: Event Name: Spring Recruiting Event 1, Start Date: 02/19/2016, Venue: Lexington, Status: New, End Date: 02/20/2016, Event ID: EVT000000010004. Below this is a tabbed interface with 'Notes' selected. The 'Notes Summary' table has columns: Select, Subject and Details, Session, Attachment(s), Added By, and Date Added. Two notes are listed: 'On Call Saturday' (7. Morning Greeting) and 'On Call Friday' (1. Registration). At the bottom, there are buttons for 'Check All / Clear All', 'Email', and 'Add Note'.

Select	Subject and Details	Session	Attachment(s)	Added By	Date Added
<input type="checkbox"/>	On Call Saturday If an issue arises for the assigned speaker, then this session will be covered by Nicole Taylor: (510) 555-4949	7. Morning Greeting			02/24/2009 6:18PM
<input type="checkbox"/>	On Call Friday If an issue arises for the assigned speaker, then Stu Marx is On Call (510) 555-4000	1. Registration			02/24/2009 5:57PM

Clicking the Notes tab will display notes associated to this event or to an event session.

Selection Check Box

Select the check box to select a note for emailing.

See "Sending Manual Notifications From CRM Transactions" (PeopleSoft CRM 9.2: Automation and Configuration Tools).

Subject and Details

Click the Subject link to view the note detail.

Session Name

The event session to which the note is related. If the note is for an event, this field is empty.

Attachments

If there are any attachments associated with the note, a paperclip icon appears in this field.

Row Added By, Row Added Date

The name of the person who added the note and the date on which it was added.

Note Type

Select *Event* or *Session* from the list of choices.

Session

If you selected *Session* in the Note Type field, you can select an available session from the list of choices.

Subject

The subject of the note.

Event - Participants Page

Use the Event - Participants page (RAE_EVENT_REGISTR) to define information about event participants.

Navigation

Marketing, Marketing Programs

Select an event from the list, or create a new event.

Click the Participants tab.

Image: Event - Participants page

This example illustrates the fields and controls on the Event - Participants page.

The screenshot displays the 'Event - Participants' page. At the top, there's a header with 'Event' and a toolbar with 'Save', 'Refresh', 'Search', 'Clone', and 'Notification'. Below this, event details are shown: 'Event Name: Spring Recruiting Event 1', 'Start Date: 02/19/2016', 'Venue: Lexington', 'Status: New', 'End Date: 02/20/2016', and 'Event ID: EVT000000010004'. A navigation bar contains tabs for 'Event', 'Sessions', 'Team', 'Resources', 'Participants' (selected), 'Tasks', 'Costs', 'Metrics', 'Communications', and 'Notes'. Below the tabs is a 'Go To' dropdown menu. The main section is titled 'Participants Summary' and includes a 'Load Audience' button. A table lists participants with columns: 'Last Name', 'First Name', 'Invited', 'Response', 'Guest Count', 'Response Date', 'Response Time', 'Attended', and 'Future Event'. The table contains 18 rows of participant data. At the bottom, there are buttons for 'Check All / Clear All', 'Delete', 'Mark as Invited', 'Mark as Attended', 'Mark as No Show', and 'Add Participant'.

Last Name	First Name	Invited	Response	Guest Count	Response Date	Response Time	Attended	Future Event
Brown	Lawrence	<input type="checkbox"/>						<input type="checkbox"/>
Dewey	Jo	<input type="checkbox"/>						<input type="checkbox"/>
Glass	Dorothy	<input type="checkbox"/>						<input type="checkbox"/>
Clark	Elmore	<input type="checkbox"/>						<input type="checkbox"/>
Charteris	Heron	<input type="checkbox"/>						<input type="checkbox"/>
Frommer	Margaret	<input type="checkbox"/>						<input type="checkbox"/>
Miller	Savana	<input type="checkbox"/>						<input type="checkbox"/>
Day	Deborah	<input type="checkbox"/>						<input type="checkbox"/>
Richards	Melissa	<input type="checkbox"/>						<input type="checkbox"/>
Downing	Denise	<input type="checkbox"/>						<input type="checkbox"/>
Estleman	Stephen	<input type="checkbox"/>						<input type="checkbox"/>
Dreyer	Sybil	<input type="checkbox"/>						<input type="checkbox"/>
Cannell	Robert	<input type="checkbox"/>						<input type="checkbox"/>
Ling	Hsu	<input type="checkbox"/>						<input type="checkbox"/>
Dietz	David	<input type="checkbox"/>						<input type="checkbox"/>

Note: This section describes only the Participants page fields relevant to defining participants for the event. For information about inviting participants, refer to the Sending Invitations section.

You can select audiences to load in order to populate the participant list for your event. You can also add participants manually. There are no restrictions to the number of participants that can be loaded.

Audience

Select the name of the audience you want to load.

Load Audience

Click this button to load one or more seed audiences to create the initial participant list. You can add participants manually or by loading additional audiences, which are added cumulatively to the list. If the audience is dynamic, clicking this button will generate it.

Note: If you load multiple audiences, the Audience field will display the name of the last audience loaded. Members of all the loaded audiences are displayed in the participant list, but after they have been loaded the list does not display the name of the audience from which they were loaded. In the case of multiple audiences containing the same person, deduplication is performed so that the person's name appears only once in the participant list.

Participants Tab

The Participants tab shows detailed information about the invitees.

360 icon

Click this icon to access the 360-degree view for the invitee. The type of 360-degree view displayed depends on which application is installed and enabled.

Last Name, First Name

The name of the invitee.

Guest Count

The number of guests to attend the event on behalf of the participant.

Add Participant

Click this button to add additional individuals to the participant list.

If the person already exists in the participant list with a different role, an error message displays informing you that you cannot add the same person with a different role. If you want to change the participant's role, you can delete the existing participant and add a new one.

If the search returns no results, you can quick create the person with the role of Consumer, or Contact for a Company. If the prospective participant has requested not to be contacted, an error message displays and that person is not added to the participant list.

Address Tab

This tab contains invitees' email and physical addresses.

More Info Tab

Role

The invitee's role (for example, Consumer, Contact, or Worker).

If the same person appears in the attendee list under multiple roles (for example, if the person belongs to more than one audience), then priority is given to the Consumer role followed by Contact for Company, and finally Worker.

Do Not Contact requests are not considered when loading audiences, since it is expected that any applications using the lists will be applying Do Not Contact rules.

Company

The company with which the invitee is associated. This field is optional.

Guest Of

The name of the event participant who registered for this guest attendee, if the guest is registered through an Online Marketing Dialog using the Register Event for Guest function.

Note: A guest attendee can be the guest of only one participant and not multiple participants.

Comments

Enter any relevant comments from or about the attendee (for example, meal preference or any special accommodations that must be made).

360 icon

Click this icon to access the 360-degree view for the invitee. The type of 360-degree view displayed depends on which application is installed and enabled.

Note: On deleting an invitee from this page, the system displays a warning if there are guests associated with the invitee.

See [Sending Invitations](#).

☐ Check All / Clear All

Delete Mark as Invited Mark as Attended Mark as No Show Add Participant

Note: This section describes only the Participant page fields relevant to inviting participants to the event. For information about defining participants, refer to the Defining Participants section.

Depending on the number of seats available for the event, invitees can either be Registered or Waitlisted. Additionally, they can decline the invitation but specify that they are interested in future events similar to this one. Finally, the participant can be marked as either Attended or a No Show, depending on whether they actually attended the event.

Participants Tab

The Participants tab shows detailed information about the invitees.

360 icon

Click this icon to access the 360-degree view for the invitee. The type of 360-degree view displayed depends on which application is installed and enabled.

Last Name, First Name

The name of the invitee.

Invited	Select this check box to include the specified person in the event invitation.
Response	<p>Select the invitee's response to the invitation from the list of choices. The default value is no response; other options include <i>Registered</i>, <i>Waitlisted</i>, and <i>Declined</i>.</p> <p>Invitees are waitlisted if they accept the invitation after all available seats for the event have been filled.</p> <p>If you select <i>Registered</i>, the system verifies whether the event has the required number of available seats. If seats are not available, the system displays a warning indicating that the event does not have available seats, but the invitee can be waitlisted for the event.</p>
Guest Count	The number of guest participants to attend the event on behalf of the invitee.
Response Date, Response Time	The date and time on which the invitee responded to the invitation.
Attended	Specifies whether the invitee attended the event. By default this field is blank; select <i>Yes</i> or <i>No</i> .
Future Event	Select this check box if the invitee has indicated interest in receiving information about upcoming future events similar to this one.
Mark as Invited	Click this button to mark all selected invitees as Invited to the event.
Mark as Attended	Select this check box to mark all selected invitees as having Attended the event.
Mark as No Show	Click this button to set the value in the selected invitees' Attended field to No.
Add Participant	<p>Click this button to add additional individuals to the participant list.</p> <p>If the person already exists in the participant list with a different role, an error message displays informing you that you cannot add the same person with a different role. If you want to change the participant's role, you can delete the existing participant and add a new one.</p> <p>If the search returns no results, you can quickly create the person with the role of Consumer, or Contact for a Company. If the prospective participant has requested not to be contacted, an error message displays and that person is not added to the participant list.</p>

Payment Info Tab

This tab shows the details about the invitee's payment.

Amount Paid	The amount that the invitee has paid to attend the event. This amount is captured automatically from the Online Marketing credit card payment.
Refund Amount	The amount refunded to the invitee (for example, if attendance was cancelled). The Amount Paid and Refund Amount are used when calculating the revenue generated from the event.
Currency Code	The currency type in which the payment was made. The Currency Code displayed is the same as the value specified on the Event Detail page.
360 icon	Click this icon to access the 360-degree view for the invitee. The type of 360-degree view displayed depends on which application is installed and enabled.

See [Sending Invitations](#).

Registering Online for Events

This section describes:

- Setting Up Online Marketing to Access Marketing Events.
- Setting Up an Online Marketing Document to Accept Credit Card Payments.
- Sending Event Reminders

Note: A PeopleSoft Online Marketing license is required for online registration.

Setting Up Online Marketing to Access Marketing Events

This section provides an overview of the Access Marketing Event custom content extension and its use in Online Marketing Dialogs.

To allow you to access event information from an Online Marketing dialog, Online Marketing includes a custom content extension named Access Marketing Event. The extension itself is described in the Online Marketing documentation, as is the general process for including extensions in documents; this section explains how you can use it in your Online Marketing dialogs.

See "Understanding Extensions" (PeopleSoft CRM for Online Marketing 9.2) and "Creating and Using Extensions" (PeopleSoft CRM for Online Marketing 9.2).

Creating the Document Field

To insert the Access Marketing Event extension into a document, first add a Text Entry field.

Image: Document Designer page with Text Entry field

This example illustrates the fields and controls on the Document Designer page with Text Entry field.

The screenshot displays the 'Document Designer' interface. At the top, there's a header bar with 'Save', 'Clone', 'Search', and 'Add Web Document' buttons, along with a 'Personalize' link. Below this, a table shows 'Name' as 'Web Doc' and 'SetID' as 'English'. A tabbed interface shows 'Document', 'Designer' (selected), and 'Marketing Center'. Below the tabs, there's a section for 'Element Summary' and 'Element Detail'. A toolbar with various icons is visible. The main area is titled 'Element Properties' and shows 'Name' as 'Text Entry'. Below this, the 'Text Entry Details' section includes 'Profile' set to 'None' and a 'Question' field. The 'Element Settings' section has checkboxes for 'Required' (unchecked), 'Hide Field' (checked), and 'Validate email address format' (unchecked). The 'Answer' section shows a 'Default' field with an empty tag '{}', and 'Width' and 'Height' settings (32 characters, 1 line). At the bottom, there are 'Clone Element', 'Format Properties', and 'Delete' buttons.

If you want to format the results in a more attractive way, select the Hide Field check box, and put an empty tag ({}) in the Default field.

Next, click the Merge icon next to the Default field to display the Merge Content page, and select Extensions from the list.

Image: Merge Content page

This example illustrates the fields and controls on the Merge Content page.

The screenshot shows the 'Merge Content' page within the 'Document Designer' application. The page is divided into two main sections: 'Step 1: Select Tag' and 'Step 2: Select Content to Merge'.

Step 1: Select Tag

This section contains a large text area with a merge tag icon (a yellow square with a black 'X' and a bracket) in the top left corner. Below the text area are four buttons: 'Previous Tag', 'Next Tag', 'OK', and 'Cancel'.

Step 2: Select Content to Merge

This section is divided into two panels. The left panel, titled 'Browse', contains a list of content types with document icons next to them:

- Profile Fields
- Web Link
- Current Date
- Current Time
- Recipient ID
- Tracking Number
- Extensions (highlighted)

At the top of the list is a navigation bar with 'First', '1-7 of 7', and 'Last' buttons. The right panel, titled 'Extensions', contains a 'Name' label followed by a text input field.

Type *Access Marketing Event* in theName field, or click the lookup icon to select it from a list of available extensions. The list of parameters for the Access Marketing Event extension are displayed.

Image: Merge Content page with parameters displayed

This example illustrates the Merge Content page with parameters displayed.

get_paid	N	
set_paid	0	
update_note	N	
set_guest_counts	0	
guest_Email	{}	
guest_Last Name	{}	
guest_accept	N	

Apply

Click the OK or Apply button to save your settings.

When the document is rendered, the Access Marketing Event extension performs its functionality, filling the Text Entry box with its return value (in the case of the example, this value will be either *Registered*, *Full*, or *Waitlisted*, depending on whether available spaces still exist for the event).

See "System Delivered Extensions" (PeopleSoft CRM for Online Marketing 9.2).

Using Access Marketing Event with Dynamic Content

After you have defined the parameters for the Access Marketing Event extension, you can insert it into dynamic content in the document.

To do this, insert a dynamic content into your text field, and then insert a document field containing the return value of the Access Marketing Event extension into the Content section of the Dynamic Content page. Refer to your Online Marketing documentation for more information about inserting dynamic content into documents.

See "Adding Dynamic Content to an Email Document" (PeopleSoft CRM for Online Marketing 9.2).

Using Access Marketing Event with the Dialog Flow

After you have defined the parameters for the Access Marketing Event extension, you can insert it into a decision point in a dialog flow.

To do this, define documents for each of the conditions (for example, one to be sent if the invitee is able to successfully register for the event, another to be sent if he or she is added to a waitlist, and a third if the event is full). When you create the flow for the dialog, you can add a Decision Point element and configure it to send the specified document for the specified parameter value.

Setting Up an Online Marketing Document to Accept Credit Card Payments

This section provides an overview of the Credit Card Service custom content extension and its use in Online Marketing Dialogs.

To allow you to accept credit card payments from an Online Marketing dialog, Online Marketing includes a custom content extension named Credit Card Service. The extension itself is described in the Online Marketing documentation, as is the general process for including extensions in documents and for creating online dialogs; this section explains how you can use it in your Online Marketing dialogs.

Note: The Credit Card Service extension supports only the use of credit cards. Debit cards and pay services such as Paypal are not supported. Cards that are both debit and credit cards are assumed to be credit cards for the purposes of the extension.

See "System Delivered Extensions" (PeopleSoft CRM for Online Marketing 9.2).

See "Creating and Using Extensions" (PeopleSoft CRM for Online Marketing 9.2).

Overview of Creating an Online Marketing Dialog to Accept Credit Cards

In order for your Online Marketing dialog to accept credit cards, you must do the following:

1. Create document fields or profile fields containing the values you want to include on your credit card page (first and last name, billing address, credit card number, expiration date, and so forth). These fields should correspond to the parameters on the Credit Card Service extension.
2. Create a document that includes fields requesting all of the information you want to gather (these fields should correspond to the profile or document fields you already created). Include a Submit button on the document.
3. Create a second document. It should contain the following:
 - Some sort of text, graphic, or other indication that the system is processing the credit card (for example, Please wait while we process your credit card.)
 - A hidden document field that includes merge content to call the Credit Card Service extension (refer to the section on creating the document field). For each parameter in the extension, include the appropriate profile or document field that you have previously created.
 - A hidden document field to accept the results of the Credit Card Service extension. The extension returns an authorization code if the credit card is accepted, 0 if it is declined, or 1 if a system error occurs.
 - A Submit button with the Invisible Auto-submit Button option selected. A button with this option selected does not appear on the page, but is automatically clicked when the page is displayed.

The typical document flow might include the following:

- An External Event Trigger.
- A Landing Page (the page where the user enters the credit card data and submits it).
- An Intermediate Page (the credit card submit page that contains the text, the hidden fields, and the hidden auto-submit button).
- A Decision Point: If the value returned is greater than 0 (indicating success), go to a Final Page informing the user that the transaction was successful. Otherwise, you can choose to either send the user back to the data collection page, or display another Final Page indicating that the transaction failed.

See "System Delivered Extensions" (PeopleSoft CRM for Online Marketing 9.2).

See PeopleSoft Online Marketing.

Creating the Document Field

To insert the Credit Card Service extension into a document, first add a Text Entry field.

Image: Document Designer page with Text Entry field

This example illustrates the Document Designer page with Text Entry field.

The screenshot displays the 'Document Designer' web application. At the top, there's a navigation bar with 'Save', 'Clone', 'Search', and 'Add Web Document' buttons, along with a 'Personalize' link. Below this, a header section shows 'Name: Web Doc' and 'SetID: English'. A tabbed interface includes 'Document', 'Designer' (selected), and 'Marketing Center'. The main area is titled 'Element Summary' and 'Element Detail'. A toolbar with various icons is visible. The 'Element Properties' section is expanded, showing 'Name: Text Entry'. Under 'Text Entry Details', 'Profile' is set to 'None', and the 'Question' field is empty. The 'Element Settings' section contains checkboxes for 'Required' (unchecked), 'Hide Field' (checked), and 'Validate email address format' (unchecked). The 'Answer' section shows a 'Default' field with an empty tag '{}', and 'Width' and 'Height' settings (32 characters, 1 line). At the bottom, there are 'Clone Element', 'Format Properties', and 'Delete' buttons.

If you want to format the results in a more attractive way, select the Hide Field check box, and put an empty tag ({}) in theDefault field.

Next, click the Merge icon next to the Default field to display the Merge Content page, and select Extensions from the list.

Image: Merge Content page

This example illustrates the fields and controls on the Merge Content page.

The screenshot shows the 'Merge Content' page within the 'Document Designer' application. The page is divided into two main sections: 'Step 1: Select Tag' and 'Step 2: Select Content to Merge'.

Step 1: Select Tag

This section contains a single tag placeholder, `{v}`, represented by a small yellow icon. Below the tag area are four buttons: 'Previous Tag', 'Next Tag', 'OK', and 'Cancel'.

Step 2: Select Content to Merge

This section is divided into two panes. The left pane, titled 'Browse', displays a list of available content items for merging:

- Profile Fields
- Web Link
- Current Date
- Current Time
- Recipient ID
- Tracking Number
- Extensions (highlighted)

Navigation controls for the list include 'First', '1-7 of 7', and 'Last'. The right pane, titled 'Extensions', contains a 'Name' label followed by an empty text input field.

Type *Credit Card Service* in theName field, or click the lookup icon to select it from a list of available extensions. The list of parameters for the Credit Card Service extension are displayed.

When the document is rendered, the Credit Card Service extension performs its functionality, filling the Text Entry box with its return value (in this case, the value will either be an authorization code, 0 for failure, or 1 for a system error).

See "System Delivered Extensions" (PeopleSoft CRM for Online Marketing 9.2).

Sending Event Reminders

Using Online Marketing, you can send event promotions, reminders, and notices to event invitees and participants. Using the audience builder capabilities, event registration reminders can be sent specifically

to those who have been invited to the event but have not yet registered in order to maximize event registration, or invitees who have not registered can be reminded that a deadline for early bird registration is approaching. To maximize event attendance, reminders can be sent specifically to those that have registered to inform them of event updates like a venue change, or to send a reminder of the upcoming event using any of the communication methods enabled in online marketing, including email and SMS notification

The process for sending reminders is discussed in the topics on executing and converting events, and in the Online Marketing documentation in the topics on designing flows for online dialogs and on designing email documents.

Chapter 4

Executing and Converting Events

Setting Up Event Communications

This section describes how to set up email communications for an event.

Pages Used to Set Up Event Communications

<i>Page Name</i>	<i>Definition Name</i>	<i>Usage</i>
<u>Event - Communications Page</u>	RAE_EVENT_ACTIONS	Set up email and print communications for an event.

Event - Communications Page

Use the Event - Communications page (RAE_EVENT_ACTIONS) to set up email and print communications for an event.

Navigation

Marketing, Marketing Programs

Select an event from the list, or create a new event.

Click the Communications tab on the Event page.

Image: Event - Communications page

This example illustrates the fields and controls on the Event - Communications page.

The screenshot displays the 'Event - Communications' page. At the top, there's a header with 'Event' and a 'Personalize' link. Below this, event details are shown: Event Name (Spring Recruiting Event 1), Start Date (02/19/2016), Venue (Lexington), Status (New), End Date (02/20/2016), and Event ID (EVT000000010004). A navigation bar includes tabs for Event, Sessions, Team, Resources, Participants, Tasks, Costs, Metrics, Communications (selected), and Notes. A 'Go To' dropdown is set to 'Select One...'. The main section is titled 'Email Communications' and shows a dialog name 'Spring Recruiting Event 2/19' with a long description. Below this is a table of triggers with columns for Trigger Name, Description, Last Email Sent, and actions (Send Email, trash). The triggers listed are 'Spring 2/19 Email Event', 'Spring Event 2/19 - SMS 10 Minute', 'Reminder Email to Registered Atten', and 'Post Event Survey'. An 'Add Trigger' button is at the bottom. Below the triggers is a section for 'Print Communications' with a similar table structure for Audience, Description, Last Print Sent, and actions (Print Sent, trash). An 'Add Print Communication' button is at the bottom.

The Communication tab displays both email and print communications associated with the event.

Email Communications

Email communications are a direct interface to Online Marketing Dialog Designer. You must select a dialog and a trigger. The trigger should be associated with a broadcast email action with an associated audience, depending on the type of email communication required.

Dialog Name

Select an Online Marketing dialog from the list of choices. The list displays all dialogs that:

- Are not in the *Archived* or *Completed* status.
- Have the Trigger On Demand check box selected.

Description

A description of the selected Online Marketing dialog.

Trigger Name

The name of the trigger on the selected dialog.

Trigger Description

Description of the selected trigger.

Last Email Sent	The last time the Send Email button was clicked to launch the action.
Send Email	Click this button to launch the selected processes on the selected dialog.
Add Trigger	Click this button to add another trigger to the list.

The typical email communications flow is as follows:

1. Create a participant list using the Participant tab (by loading audiences, manually adding participants, and so forth).
2. Create an audience that consists of all the participants for whom the Invited check box has not been selected.
3. Associate the audience to a bulk email action and associate a trigger to one or more bulk mail actions.
4. When you click the Send button, the email is sent to all of the participants based on the audience that has been defined.
5. After the email process is complete, the Invited check boxes are updated with all of the participants who received an invitation through the email process.
6. The Last Email sent timestamp is updated and the event is set to *Executing*.

You can set up multiple triggers for different email communications; for example:

- Send reminders to non-responders.
- Send more information to registered participants.
- Send reminders prior to event for registered participants.
- Send surveys to those who attended.

You should use the trigger description to give some indication of the type of communication to be sent. You can use the Comments field on the Comments tab to specify any further details about the specific communication.

Note that if email was sent against the trigger, then you will no longer be able to click the Dialog Name prompt or the Trigger prompt; further, the trash can (delete) icon is display only so you will not be able to delete the trigger. If no triggers have been sent and you try to change the dialog name, a message is displayed stating that all triggers will be deleted and asking you to confirm that you want to continue.

Note: Though you cannot add the same trigger twice, it is possible to temporarily do so if you add a trigger, do not click Save, and then add the same trigger again. If you temporarily add a trigger more than once, emails can be sent from each iteration of the trigger.

The dialog must be live in order to send email.

See "Understanding Flows" (PeopleSoft CRM for Online Marketing 9.2).

Print Communications

Print communications are used when sending print invitations, brochures, postcard reminders, and so forth, using PeopleSoft Correspondence Management. Online Marketing is not required for sending print communications.

You can transfer from the audience to Correspondence Management and initiate one or more Correspondence Management jobs. Alternatively, if you choose not to use Correspondence Management and are simply mailing brochures, postcards, or other print media using a third party, then you can enter the audience and click the Timestamp to provide an audit history of the print communications.

Audience

Select an audience from the available list. Note that audiences that are not in the Committed state might appear as empty. If this occurs, the system takes the information from the audience record itself rather than the list of Committed audiences.

Print Sent

Click to view a history of which print communications were sent, when they were sent, and the audience they were sent to.

When you click this button, a message is displayed informing you that the system is setting the Last Print Set field, and that audience correspondence must be initiated in the Audience component. You can click the icon next to the Audience field to transfer to the Audience component.

Creating Leads from Events

Following an event's completion, you can create sales leads from audience members and events. You can create leads from audience members without reference to an event, or for all audience members associated with a particular event.

Pages Used to Create Leads from Events

<i>Page Name</i>	<i>Definition Name</i>	<i>Usage</i>
<u>Create Leads Page</u>	RA_CREATE_LEADS	Create sales leads from audiences, marketing campaigns, and events.
Lead Qualify Page	RSF_LEAD_QUALIFY	Associate sales leads and opportunities with events.

Create Leads Page

Use the Create Leads page (RA_CREATE_LEADS) to create sales leads from audiences, marketing campaigns, and events.

Navigation

Marketing, Execution, Manual Leads Creation

Image: Create Leads page

This example illustrates the fields and controls on the Create Leads page.

Create Leads

Run Control ID HE-001 [Report Manager](#) [Process Monitor](#) [Run](#)

This schedules a batch process that will create a Sales Lead for each member of the Audience that is associated with the selected Campaign Activity, each member of an Audience related to an Event, or each member of an Audience itself.

Create Leads For

Lead Load Type ☐ Campaign
☒ Event
☐ Audience

*Business Unit [PeopleSoft University](#)

Campaign

Activity

Event [Spring Recruiting Event 1](#)

Audience [Spring Event 1 : Invitees](#)

[View Audience](#)

Status

Process Status Not Yet Processed [View Results](#)

[Refresh](#)

Lead Load Type

Select *Audience*, *Campaign*, or *Event*. Depending on which option you select, different options on the page will become available.

Business Unit

Select a business unit from the list of choices.

Campaign

This option becomes available only if you select *Campaign* in the Lead Load Type field.

Activity

This option becomes available only if you select *Campaign* in the Lead Load Type field.

Event

This option becomes available only if you select *Event* in the Lead Load Type field.

Audience

This option becomes available if you select *Audience* or *Event* in the Lead Load Type field. Selecting a Lead Load Type of *Audience* allows you to select an audience from an available list; the audience will *not* be associated with an event. If you

select a Lead Load type of *Event*, then you must also select an audience. The audiences available for selection in this field are those associated with the event you selected in the *Event* field.

View Audience

Click this button to view information about the audience associated with the selected Lead Load Type:

- If *Campaign* is selected, then the View Audience page shows audiences associated with the selected activity.
- If *Audience* is selected, the page displays information about the selected audience.
- If *Event* is selected, the page displays information about the event and the audience associated with it.

Note that you cannot load multiple campaigns, or events with audiences, an error message displays if you attempt to do so. You can load multiple audiences: a warning displays, but you will be allowed to continue with the operation.

Manually Associating Leads and Opportunities with Events

Use the Lead - Qualify page (RSF_LEAD_QUALIFY) to manually associate sales leads and opportunities with events.

Navigation

Sales, Search Leads

Click the Qualify tab.

Image: Lead - Qualify page

This example illustrates the fields and controls on the Lead - Qualify page.

The screenshot displays the 'Lead - Qualify' page. At the top, there's a navigation bar with buttons: Save, Add Lead, Notification, Clone, Convert, 360-Degree View, 360-Degree Search, Search, and Personalize. Below this is a header section with 'Description' (Customer, Contact Phone) and 'Status' (New, Contact, Rating). The main area has tabs: Discover, Assign, Qualify (selected), Propose, Call Reports, Tasks, Notes, More Info, and History. The 'Qualify' tab contains several sections: 'Campaign' with 'Marketing Information' (Business Unit, Campaign, Activity, Event) and 'Lead Type', 'Lead Source', 'Accepted Date', 'Referred Date'. Below is the 'Survey' section with a table for tracking surveys. Then the 'Competition' section with a table for competitor involvement. Finally, the 'Related Transactions' section with buttons for Assign Team, Add Product, Create Quote, Add Contact, Add Note, and Add Task.

You can associate Sales leads and opportunities with events. In order for the event metrics to accurately track the number of leads and opportunities generated by the event, you must track every lead that is generated.

If the lead is created from an event or from the Manual Lead Creation process, the relevant event is already assigned to the lead. Otherwise, you can add or update the Event ID on this page to indicate that the lead has been created for this specific event. For example, you might want to create a lead manually if someone attended your event and then later called you indicating that they want to receive more information about the event.

When a lead is converted to an opportunity, the associated event is carried over to the opportunity.

Event

Select an event from the available list to associate an event with this lead.

Lead Source

Select *Marketing Event* from the list of choices.

See "Creating a Sales Lead" (PeopleSoft CRM 9.2: Sales) and "Creating a Sales Opportunity" (PeopleSoft CRM 9.2: Sales).

First1-2 of 2Last

*Metric	UOM	Forecast	Actual	Difference
Event Cost per Lead	Amount	10.00		-10.00
Event Attendance Rate	Percentage	70.00		-70.00

Add Performance Metric

During the event planning process, marketing managers and marketers set budgets, track costs and forecast the results that are expected of the event. During the last stage of event management, event analysis, marketers can assess event impact, whether or not it was successful and if it met forecasted expectations. The event metrics page is where event analysis can be performed, providing marketers answers to questions like:

- Was the event outcome (revenue, leads and opportunities generated) worth the cost?
- Did the event generate the leads and opportunities expected?
- How effective was the event promotion and invitation? (response rate)
- Was the event compelling to the target audience? (response rate)
- Were we able to get registrants to show up for the event? Were event reminders effective? Could event logistics have been altered to increase attendance?
- What was the event return on investment?

Metrics

Select a metric from the list of choices. Metrics are calculated when the page is opened, so current values are displayed.

Note: You can define your own metrics using the Metrics - Detail page in PeopleSoft Marketing. Refer to the Marketing documentation for more information.

UOM (Unit of Measurement)

Determined based upon the metric selected.

Forecast Value

This value is entered manually. When the metric is calculated, the system subtracts the actual value from the forecasted value, resulting in the difference value.

Actual Value

The computed value from the metric.

Difference

The Actual Value minus the Forecast Value.

Currency

The Currency Code, as entered on the Events page.

Supported metrics for events include:

- Cost: Total cost of the event.
- Cost per Lead: Total cost of the event divided by the number of leads generated from it.
- Cost per Opportunity: Total cost of the event divided by the number of opportunities generated from it. The number of opportunities is determined by counting all leads generated from the event.
- Number of Leads: The total number of leads generated from the event.
- Number of Opportunities: The total number of opportunities associated with the event.
- Response Rate: The number of registered and waitlisted attendees divided by the number invited, multiplied by 100. Registered and waitlisted invitees are included in this calculation only if their Invited check boxes were selected.
- Attendance Rate: The number of attendees divided by the Capacity, multiplied by 100.
- Percent Requested Not Invited: Those who were not invited who registered directly through the website versus those who were invited and registered.
- No show rate: The number attended divided by the number who registered.

- Revenue: The total revenue received (if applicable, for example, for fundraising events).
- Profit: Revenue minus Cost.
- Cost per Person vs. Revenue.
