About This Guide

This guide details how data is mapped between P6 EPPM and XER format when you export roles. Throughout this guide, the term P6 EPPM includes P6 Professional. Any content that applies to only one of these applications is labeled accordingly.

All users who want to exchange data between P6 EPPM and other systems using XER format should use this document.

Caution Personal information (PI) may be at risk of exposure. Depending on local data protection laws organizations may be responsible for mitigating any risk of exposure.

ROLELIMIT - (Role Limits)

P6 EPPM Field	P6 EPPM Column Name
max_qty_per_hr	Max Units / Time
role_id	Role ID
rolelimit_id	Unique ID
start_date	Effective Date

ROLERATE - (Role Prices)

P6 EPPM Field	P6 EPPM Column Name
cost_per_qty	Standard Rate (P6 EPPM) Price/Unit1 (P6 Professional)
cost_per_qty2	Internal Rate (P6 EPPM) Price/Unit2 (P6 Professional)
cost_per_qty3	External Rate (P6 EPPM) Price/Unit3 (P6 Professional)

P6 EPPM Field	P6 EPPM Column Name
cost_per_qty4	Price/Unit4
cost_per_qty5	Price/Unit5
max_qty_per_hr	Max Units / Time
role_id	Role ID
role_rate_id	Unique ID
start_date	Effective Date

Note P6 Professional overwrites resource rates and their respective effective dates during import. P6 EPPM updates resource rates if the effective date can be matched or creates new resource rates if the effective date cannot be matched.

ROLES - (Roles)

P6 EPPM Field	P6 EPPM Column Name
cost_qty_type	Price Time Units
def_cost_qty_link_flag	Calculate costs from units
parent_role_id	Parent Role
role_descr	Responsibilities
role_id	Unique ID
role_name	Role Name
role_short_name	Role ID
seq_num	Sort Order
