Jersey
Making RESTful Web services easy

- Jersey is the reference implemention for JSR-311, the Java API for RESTful Web services

- Jersey 0.8 was released last Friday

- Jersey provides additional value

  - Plugable containers

  - Client API

  - Plugable model view controller abstraction

  - JSON using JAXB

  - Plugable IoC integration and dependency injection

Jersey
Making RESTful Web services easy

- GET /Jersey 0.8
