

Name list-file-groups– lists file groups

Synopsis list-file-groups
[--help]
[--name *username*]
[--authrealmname *auth_realm_name*]

Description Use this subcommand to view file users and groups supported by the file realm authentication. This subcommand lists available groups in the file user. If the --name option is not specified, all groups are listed.

This subcommand is supported in remote mode only.

Options --help
Displays the help text for the subcommand.

--name
Identifies the name of the file user for whom the groups will be listed.

--authrealmname
The name of the authentication realm for which to list available groups.

Operands *target*
Do not specify this option. This option is retained for compatibility with other releases. If you specify this option, a syntax error does not occur. Instead, the subcommand runs successfully and the option is silently ignored.

Examples **EXAMPLE 1** Listing Groups in all File Realms

```
asadmin>list-file-groups
staff
manager
Command list-file-groups executed successfully
```

Exit Status 0 command executed successfully
1 error in executing the command
