

Name update-file-user– updates a current file user as specified

Synopsis update-file-user
[--help]
[--groups *user_groups[:user_groups]**]
[--authrealmname *authrealm_name*]
username

Description This subcommand updates an existing entry in the keyfile using the specified user name, password and groups. Multiple groups can be entered by separating them, with a colon (:).

Options --help
Displays the help text for the subcommand.

--groups
This is the name of the group to which the file user belongs.

--authrealmname
Name of the authentication realm where the user to be updated can be found.

--target
Do not specify this option. This option is retained for compatibility with other releases. If you specify this option, a syntax error does not occur. Instead, the subcommand runs successfully and the option is silently ignored.

Operands *username*
This is the name of the file user to be updated.

Examples EXAMPLE 1 Updating a user's information in a file realm
asadmin> **update-file-user**
--groups **staff:manager:engineer** *sample_user*
Command update-file-user executed successfully

Where *sample_user* is the file user for whom the groups and the user name are updated.

Exit Status 0 command executed successfully
1 error in executing the command
