Name delete-message-security-provider – enables administrators to delete a message security provider

Synopsis delete-message-security-provider
[--help]
    --layer   *message_layer*
 provider_name

Description The `delete-message-security-provider` subcommand enables administrators to delete a message security provider.

In terms of what happens when this subcommand is run, the `provider-config` sub-element for the given message layer (`message-security-config` element of `domain.xml` is deleted. The `domain.xml`file specifies parameters and properties to the Enterprise Server). The options specified in the list below apply to attributes within the `message-security-config` and `provider-config` sub-elements of the `domain.xml` file.

If the message-layer (`message-security-config` attribute) does not exist, it is created, and then the `provider-config` is created under it.

This command is supported in remote mode only.

Options If an option has a short option name, then the short option precedes the long option name. Short options have one dash whereas long options have two dashes.

--help
   Displays the help text for the subcommand.

--target
   Do not specify this option. This option is retained for compatibility with other releases. If you specify this option, a syntax error does not occur. Instead, the subcommand runs successfully and the option is silently ignored.

--layer
   The message-layer from which the provider has to be deleted. The default value is
   `HttpServlet`.

Operands *provider_name*
   The name of the provider used to reference the `provider-config` element.

Examples EXAMPLE 1 Deleting a message security provider

The following example shows how to delete a message security provider for a client.

```
asadmin> delete-message-security-provider
--layer SOAP mySecurityProvider
```

Exit Status   0   command executed successfully
