

Topic : Resource Statistics :

server.resources.connection-pool.application.statistic
should be :

```
"server.applications.<application-name>.resources.<pool-name>.*  
for application scoped resources  
and  
server.applications.<application-name>.<module-name>.resources.<pool-  
name>.*  
for module scoped resources"
```

[
Reference : step 35 and 27 in the following demo gives the sample format of
application-scoped and module-scoped resources.
[http://wikis.sun.com/display/GlassFish/Application+Scoped+Resources+and
+JDBC+Monitoring+Features+for+MS4](http://wikis.sun.com/display/GlassFish/Application+Scoped+Resources+and+JDBC+Monitoring+Features+for+MS4)
]

Table 8-30 "Application-Scoped Resource Monitoring Statistics"
should read as
Table 8-30 "Application Specific Resource Monitoring Statistics"

[Above one is not related to application scoped resources]
