Name list-network-listeners – lists the existing network listeners

Synopsis `list-network-listeners [--help]`
`[`*target*`]`

Description The `list-network-listeners` subcommand lists the existing network listeners. This subcommand is supported in remote mode only.

Options `--help`
`-?`
   Displays the help text for the subcommand.

Operands *target*
   Restricts the listing to network listeners for a specified target. Valid values are as follows:

   `server`
      Lists the network listeners for the default server instance. This is the default value.

   configuration-name
      Lists the network listeners for the specified configuration.

   cluster-name
      Lists the network listeners for all server instances in the specified cluster.

   instance-name
      Lists the network listeners for the specified server instance.

Examples EXAMPLE 1 Listing Network Listeners

   The following command lists all the network listeners for the server instance:

   ```
   asadmin> list-network-listeners
   admin-listener
   http-listener-1
   https-listener-2
   Command list-network-listeners executed successfully.
   ```

Exit Status 0   command executed successfully

   1   error in executing the command
