

Name list-http-listeners – lists the existing network listeners

Synopsis list-http-listeners [--help]
[*target*]

Description The list-http-listeners subcommand lists the existing network listeners.

This subcommand is supported in remote mode only.

Options --help
-?
Displays the help text for the subcommand.

Operands *target*
Restricts the listing to network listeners for a specified target. Valid values are as follows:

- server*
Lists the network listeners for the default server instance. This is the default value.
- configuration-name*
Lists the network listeners for the specified configuration.
- cluster-name*
Lists the network listeners for all server instances in the specified cluster.
- instance-name*
Lists the network listeners for the specified server instance.

Examples EXAMPLE 1 Listing Network Listeners

The following command lists all the network listeners for the server instance:

```
asadmin> list-http-listeners
http-listener-1
http-listener-2
admin-listener
Command list-http-listeners executed successfully.
```

Exit Status 0 command executed successfully
1 error in executing the command
