

**Name** list-file-users– lists the file users

**Synopsis** list-file-users  
[ --help]  
[ --authrealmname *auth\_realm\_name*]

**Description** The list-file-users subcommand displays a list of file users supported by file realm authentication.

**Options** --help  
Displays the help text for the subcommand.  
  
--authrealmname  
Lists only the users in the specified authentication realm.

**Operands** *target*  
Do not specify this option. This option is retained for compatibility with other releases. If you specify this option, a syntax error does not occur. Instead, the subcommand runs successfully and the option is silently ignored.

**Examples** **EXAMPLE 1** Listing Users in a Specific File Realm  

```
asadmin> list-file-users sample_file_realm
sample_user05
sample_user08
sample_user12
Command list-file-users executed successfully
```

**Exit Status** 0 command executed successfully  
1 error in executing the command
