Name list-configs – lists named configurations

Synopsis list-configs [--help] [*target*]

Description The list–configs subcommand lists named configurations in the configuration of the domain administration server (DAS) in the domain.xml file. The list can be filtered by cluster or instance.

This subcommand is supported in remote mode only.

Options --help
-?
   Displays the help text for the subcommand.

Operands *target*
   Filters the list of configurations. Valid values are as follows:

   domain
      Lists all named configurations in the current domain.

   cluster-name
      Lists the named configuration that defines the configuration of instances in the specified cluster.

   instance-name
      Lists the named configuration that defines the configuration of the specified instance.
