

**Name** migrate-timers – moves EJB timers when a server instance stops

**Synopsis** migrate-timers [--help] [--target *target\_server\_name*]  
*server\_name*

**Description** The migrate-timers subcommand moves EJB timers to a specified server when a server instance stops or fails abnormally. This subcommand is supported in remote mode only.

**Options** --help  
-?

Displays the help text for the subcommand.

--target

This is the target server instance. If this option is not specified, then DAS will find a server instance or multiple server instances. A migration notification will be sent to the selected server instances.

--destination

This option is deprecated. It works exactly as the --target option does.

**Operands** *server\_name*

This is the server instance on which the timers are currently located. This server instance should not be active during the migration process.

**Examples** EXAMPLE 1 Migrating Timers

This example shows how to migrate timers from the server named server to a server named dance.

```
asadmin>migrate-timers --target dance server  
This command was successfully executed.
```

**Exit Status** 0 command executed successfully  
1 error in executing the command
