

Name list-timers – lists all of the persistent timers owned by server instance(s)

Synopsis list-timers [--help] [*target*]

Description The list-timers subcommand lists the persistent timers owned by a specific server instance or a cluster of server instances. This command is supported in remote mode only.

Options --help
-?

Displays the help text for the subcommand.

Operands *target*

The target is either a standalone server instance or a cluster. If the target is the stand-alone instance, then the number of timers owned by the instance is listed. If the target is a cluster, then the number of timers owned by each instance in the cluster is listed. The default target is server, the default server instance.

Examples EXAMPLE 1 Listing Current Timers in a Server Instance

This example lists persistent timers in a particular standalone server instance. There is one currently active timer set.

```
asadmin> list-timers server
1
```

The list-timers command was executed successfully.

Exit Status 0 command executed successfully
1 error in executing the command
