

**Name** list-iiop-listeners – lists the existing IIOP listeners

**Synopsis** list-iiop-listeners [--help]  
[*target*]

**Description** The `list-iiop-listeners` subcommand lists the existing IIOP listeners. This subcommand is supported in remote mode only.

**Options** --help  
-?  
Displays the help text for the subcommand.

**Operands** *target*  
This operand specifies the target for which the IIOP listeners are to be listed. Valid values are:

*server*

Lists the listeners in the default server instance `server` and is the default value.

*configuration\_name*

Lists the listeners in the specified configuration.

*cluster\_name*

Lists the listeners in the specified cluster.

*instance\_name*

Lists the listeners in a particular server instance.

**Examples** **EXAMPLE 1** Using the `list-iiop-listeners` subcommand

The following command lists all the IIOP listeners for the server instance:

```
asadmin> list-iiop-listeners
orb-listener-1
SSL
SSL_MUTUALAUTH
sample_iiop_listener
Command list-iiop-listeners executed successfully.
```

**Exit Status** 0 command executed successfully  
1 error in executing the command
