# **ORACLE®** **Oracle Rdb and Oracle Database on OpenVMS Product Update**

Kevin Duffy  
Director Software Development  
September, 2011

The following is intended to outline our general product direction. It is intended for information purposes only, and may not be incorporated into any contract. It is not a commitment to deliver any material, code, or functionality, and should not be relied upon in making purchasing decisions. The development, release, and timing of any features or functionality described for Oracle's products remains at the sole discretion of Oracle.

## Agenda

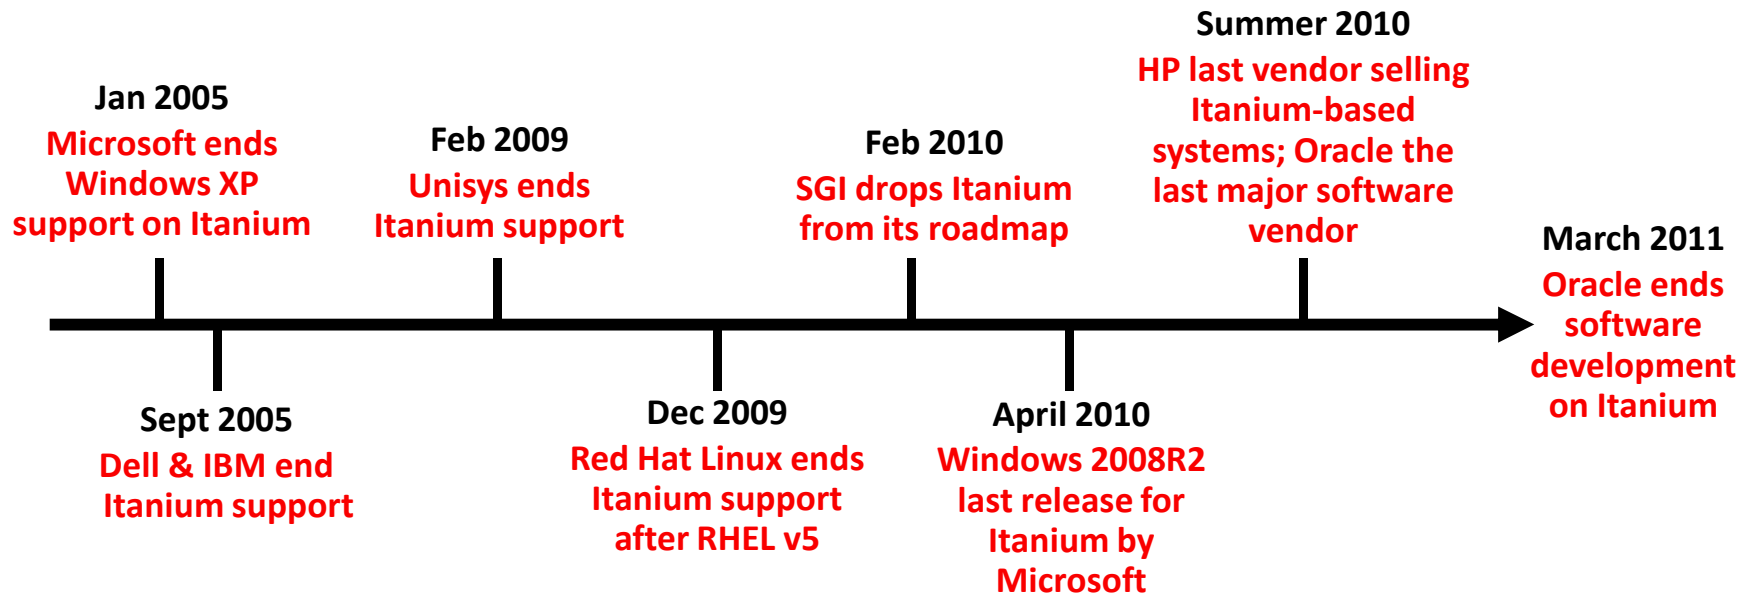

- What Was Announced
- Oracle Lifetime Support Policy
- Itanium Support Table
- Itanium Related Technical Support Policy Updates
- What does this mean for Oracle Rdb
- Oracle Rdb Customer Focus
- Oracle Rdb 7.3

# Oracle Statement Summary - 3/22/11

- **What:** Oracle has discontinued all software development on the Intel Itanium microprocessor.
- **Why:** The announcement is based on changing market conditions and follows both RedHat and Microsoft in dropping Itanium support.
  - [Press Release](#)
- **What This Means:** Oracle will continue to provide support for the current products that are already certified on Itanium until the end of either the release's Premier or Extended Support period. After those end, we will continue to provide indefinite Sustaining Support, which does not include any new fixes.
  - [Oracle Lifetime Support Policy](#)

# The Itanium Business Risk

**It's time to begin addressing transition.**

## Navigating The Transition With Oracle

### Legacy: Oracle DB on any platform

- RAS and scale for business critical computing
- Balanced system performance, systems management
- Industry standard, broad market adoption and support

### Future Focus: Oracle HW and SW engineered to work together

- Affordable, mainframe-class RAS for mission critical computing
- Extreme performance, secure by default, integrated systems management, lowest total cost of ownership
- Open systems, industry standards, "one-stop" support

### Charting the way forward from HP: HP Migration Workshop

- Finding the right solutions for your current and future needs
- Reducing risk and cost, protecting your investments

# Oracle's Lifetime Support Policy offers three stages of support for Itanium-based servers

- **Oracle Premier Support** provides customers with maintenance and support of Oracle software on Itanium servers for five years from the general availability date of the software release.
- **Oracle Extended Support** provides customers with an extra three years of support for specific Oracle releases for an additional fee. Customers benefit from the same quality of service received with Oracle Premier Support, with the security of knowing they can migrate their software to a new platform when the time is right.
- **Oracle Sustaining Support** customers will receive technical support for as long as they operate their Itanium-based systems—including access to online support tools, knowledge bases, pre-existing fixes and assistance from technical support experts.
- Oracle Lifetime Support

  - Released February 2009

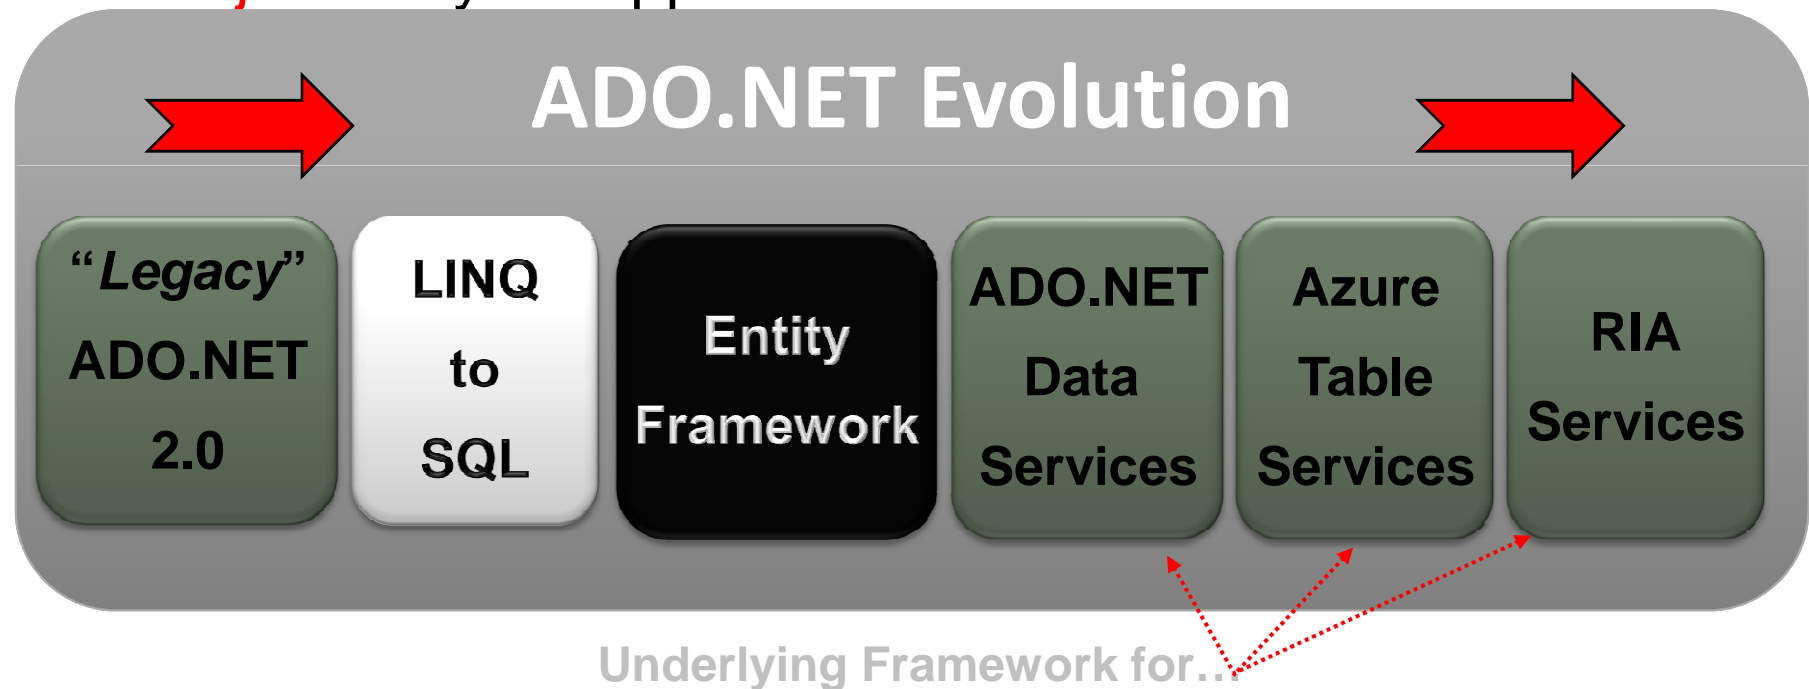

## DDEX Provider for Visual Studio

## What is Entity Framework?

- EF is a *data access framework* from Microsoft that helps *bridge the gap* between *data structures* and *objects* in your applications

## SQL Developer For Rdb

SQL Developer provides

- A free client database development tool
- Comprehensive core functionality
- Great user experience
- Enhanced productivity
- Simplified database development tasks

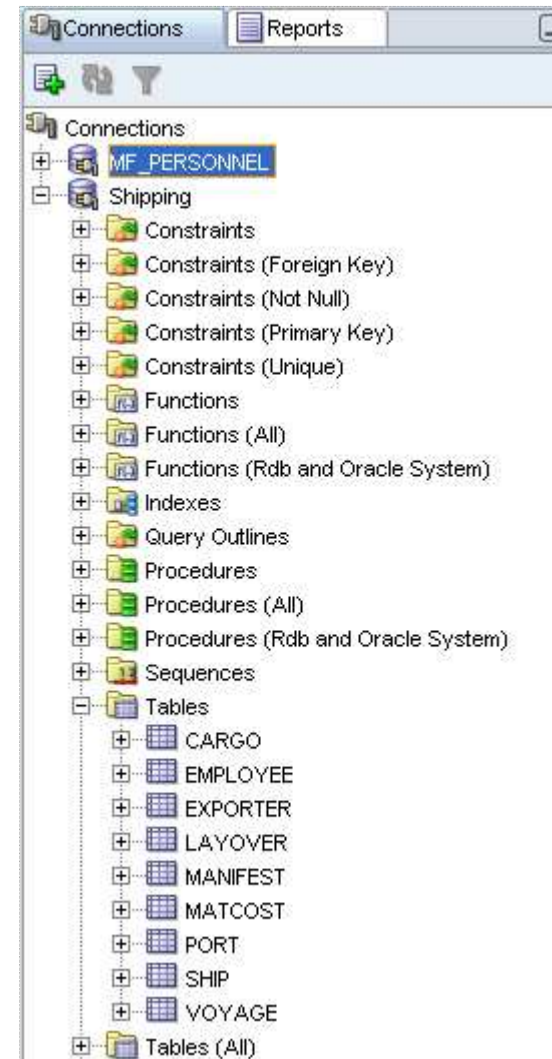

## Product Overview

- Creating Connections
- Creating and Browsing Objects
- Querying Data
- Executing Queries
- Defining and Running Database Reports

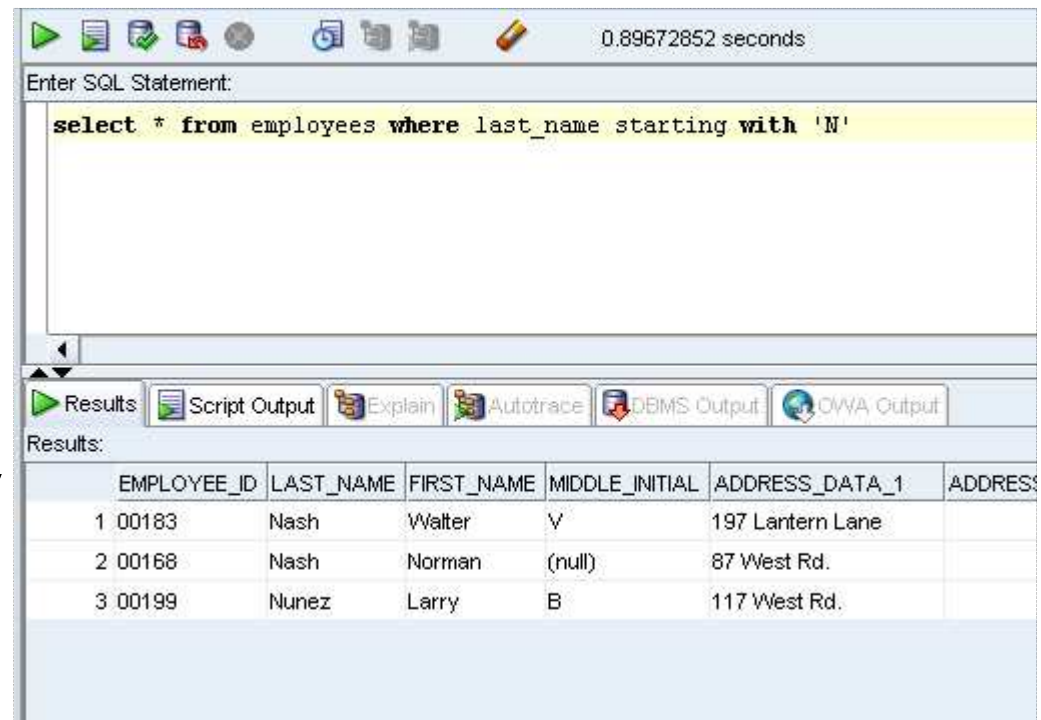

# Object Browsing

- Tree Based Object Browser
- Browse Database Objects
- Support for common objects
  - Tables, Views, Indexes
  - Procedures, Functions
  - Triggers, Constraints
  - Query Outlines

# SQL Worksheet

- Syntax Highlighting
- Code Insight
- Single Statement Execution
- Script Execution
- Code Formatting
- Command History

The screenshot displays the Oracle SQL Worksheet interface. At the top, a toolbar contains icons for running, saving, and other functions, along with a timer showing 0.89672852 seconds. Below the toolbar is a text area labeled 'Enter SQL Statement:' containing the query: `select * from employees where last_name starting with 'N'`. The query is syntax-highlighted. Below the text area is a row of tabs: 'Results', 'Script Output', 'Explain', 'Autotrace', 'DBMS Output', and 'OWA Output'. The 'Results' tab is active, showing a table of results. The table has six columns: EMPLOYEE\_ID, LAST\_NAME, FIRST\_NAME, MIDDLE\_INITIAL, ADDRESS\_DATA\_1, and ADDRESS. The results are as follows:

	EMPLOYEE_ID	LAST_NAME	FIRST_NAME	MIDDLE_INITIAL	ADDRESS_DATA_1	ADDRESS
1	00183	Nash	Walter	V	197 Lantern Lane	
2	00168	Nash	Norman	(null)	87 West Rd.	
3	00199	Nunez	Larry	B	117 West Rd.
