

San Francisco MTA SFpark Parking Management

OVERVIEW

- The SFMTA manages surface transportation in San Francisco
- System enables:
 - Asset management of complex parking space data
 - Creates a single source of truth between other systems, meter vendors, and customer facing parking meters
 - Demand-responsive parking meter rate adjustments

CHALLENGES / OPPORTUNITIES

- Business process engineering/re-engineering
- Reconciling multiple data sources involved in workflow
- Integrating disparate datasets

SOLUTIONS

- Oracle 11g RDBMS, ODI, and SOA Suite
- Oracle 11g Business Intelligence Enterprise Edition
- MapViewer
- Deployed Oracle Spatial data in internal and external web portals and mobile applications using GeoServer and ADF

RESULTS

- Manages location, regulation, and complex meter rate configuration for 29,000 on-street parking spaces
- Reconciles tens of thousands of meter configurations against four meter vendors
- Supports operations of Parking Division
- Facilitates complex analyses of data across multiple spatial and temporal dimensions
- Metadata standardizes analyses and asset management improves workflow
