### **When contacting Customer Support, please provide:**

- Product version and program/module name.
- Functional and technical description of the problem (include business impact).
- Detailed step by step instructions to recreate.
- Exact error message received.
- Screen shots of each step you take.

## Overview

This document details the enhancements and fixes to Integrator when used with RetailCommerce.

The enhancements have been made to improve the performance of the product.

The enhancements have been applied to base. All customers will be moved onto the new version on March 28th, 2002.

## Enhancements

### CSV file extension issues fix.

The Partner Export of RetailCommerce purchase orders now uses a new Integrator servlet call to access the .CSV files (actually .CS1 file extension).

When a PO is exported in RetailCommerce, RetailCommerce will pop up a dialog box to ask the user to save the exported PO into a file. The file extension becomes CS1 as opposed to CSV. The file can be viewed as an Excel spreadsheet in the file detail frame of Integrator user console. Also, files with extension CSV should be displayed in file detail frame directly.

Before this fix is made, clicking a CSV file, a dialog box will pop up to ask to save or open the file. However, if a dialog box still pops up to ask the user whether save or open the file, then this dialog box can be disabled by following these steps.

- 1 Start Windows Explorer.
- 2 From the Tools menu, select **Folder Options...** This opens the Folder Options dialog box.
- 3 Click **File Types** tab, and from Registered file types list, click the list item with a **CSV Extension**.
- 4 In the **Details for CSV extension** panel of the dialog box, click **Advanced**. This opens the Edit File Type dialog box.
- 5 Uncheck the **Confirm open after download** check box, and click **OK** to close the Edit File Type dialog box.
- 6 To close Folder Options dialog box, click **Close**.
