

**Oracle[®] Retail Price Management
Release Notes
Release 11.0.7
June 2006**

Copyright © 2006, Oracle. All rights reserved.

The Programs (which include both the software and documentation) contain proprietary information; they are provided under a license agreement containing restrictions on use and disclosure and are also protected by copyright, patent, and other intellectual and industrial property laws. Reverse engineering, disassembly, or decompilation of the Programs, except to the extent required to obtain interoperability with other independently created software or as specified by law, is prohibited.

The information contained in this document is subject to change without notice. If you find any problems in the documentation, please report them to us in writing. This document is not warranted to be error-free. Except as may be expressly permitted in your license agreement for these Programs, no part of these Programs may be reproduced or transmitted in any form or by any means, electronic or mechanical, for any purpose.

If the Programs are delivered to the United States Government or anyone licensing or using the Programs on behalf of the United States Government, the following notice is applicable:

U.S. GOVERNMENT RIGHTS Programs, software, databases, and related documentation and technical data delivered to U.S. Government customers are "commercial computer software" or "commercial technical data" pursuant to the applicable Federal Acquisition Regulation and agency-specific supplemental regulations. As such, use, duplication, disclosure, modification, and adaptation of the Programs, including documentation and technical data, shall be subject to the licensing restrictions set forth in the applicable Oracle license agreement, and, to the extent applicable, the additional rights set forth in FAR 52.227-19, Commercial Computer Software—Restricted Rights (June 1987). Oracle Corporation, 500 Oracle Parkway, Redwood City, CA 94065

The Programs are not intended for use in any nuclear, aviation, mass transit, medical, or other inherently dangerous applications. It shall be the licensee's responsibility to take all appropriate fail-safe, backup, redundancy and other measures to ensure the safe use of such applications if the Programs are used for such purposes, and we disclaim liability for any damages caused by such use of the Programs.

Oracle, JD Edwards, PeopleSoft, and Siebel are registered trademarks of Oracle Corporation and/or its affiliates. Other names may be trademarks of their respective owners.

The Programs may provide links to Web sites and access to content, products, and services from third parties. Oracle is not responsible for the availability of, or any content provided on, third-party Web sites. You bear all risks associated with the use of such content. If you choose to purchase any products or services from a third party, the relationship is directly between you and the third party. Oracle is not responsible for: (a) the quality of third-party products or services; or (b) fulfilling any of the terms of the agreement with the third party, including delivery of products or services and warranty obligations related to purchased products or services. Oracle is not responsible for any loss or damage of any sort that you may incur from dealing with any third party.

A Release Notes document can include some or all of the following sections, depending upon the release:

- Overview of the release
- Functional, technical, integration, and/or performance enhancements
- Assumptions
- Fixed and/or known issues/defects

Because of their brevity, Release Notes do not include chapters, appendices, or a table of contents.

Audience

Release Notes are a critical communication link between Oracle Retail and its retailer clients. There are four audiences in general for whom a Release Notes document is written:

- Retail clients who wish to understand the contents of this release.
- Integrators and implementation staff who have the overall responsibility for implementing RPM into their enterprise.
- Business analysts who are looking for high-level functional information about this release.
- System analysts and system operation personnel who are looking for high-level functional and technical content related to this release.

Customer Support

- <https://metalink.oracle.com>

When contacting Customer Support, please provide:

- Product version and program/module name.
- Functional and technical description of the problem (include business impact).
- Detailed step-by-step instructions to recreate.
- Exact error message received.
- Screen shots of each step you take.

Overview

This document contains information on issues that have been addressed and resolved in Oracle Retail Price Management (RPM) since the previous release.

A Note Regarding Hot Fixes

Since the RPM 11.0.6 patch, Oracle Retail released RPM 11.0.6.1 and RMP 11.0.6.2 bundled hot fixes. Please note that the RPM 11.0.7 release includes all of the modifications that have been made since RPM 11.0.6.

The RPM Installation Guide assumes that the retailer is making a direct update to RPM 11.0.7 from RPM 11.0.6. In other words, the Installation Guide operates under the assumption that the retailer did **not** execute any database scripts associated with the hot fixes. If a retailer did execute any database scripts in conjunction with a hot fix, the retailer should **not** execute the same database script(s) released with this patch, despite the Installation Guide's instructions to do so.

Supported Oracle Retail Products

This version of RPM is compatible with the following Oracle Retail products:

- Oracle Retail Merchandising System (RMS) 11.0.8, including Oracle Retail Sales Audit (ReSA)
- Oracle Retail Allocation 11.0.5 and 11.1.3
- Oracle Retail Integration Bus (RIB) 11.1
- Oracle Retail Service Layer (RSL) 11.1
- Oracle Retail Data Warehouse (RDW) 11.0
- Oracle Retail Store Inventory Management (SIM), an application on the Integrated Store Operations (ISO) 11.0.0.3 platform release and with 11.0.2 patch level
- Oracle Retail Extract Transform and Load (RETL) 11.2.2
- Oracle Retail Security Manager (RSM) 11.1.2

A Note Regarding RMS Compatibility

While it is ultimately at the retailer's discretion as to when to apply patches, delays or lags in their application can complicate the support process. RPM 11.0.7 has been tested to be compatible with RMS 11.0.8.

RPM did not introduce any modifications that would require a retailer to completely update RMS to version RMS 11.0.8 from RMS 11.0.7 in order to maintain RPM supportability. In some RPM releases, there may be a subset of RMS fixes that must be applied to maintain proper integration functionality with the updated version of RPM. In this particular RPM patch release, Oracle Retail has **not** identified any required RMS 11.0.8 fixes.

DEFECT MODULE XREF RPM 11.0.7.xls

To assist with the patch application process, there is a defect module cross-reference spreadsheet (DEFECT MODULE XREF RPM 11.0.7.xls). This spreadsheet contains the defect, program name, revision, functional area, priority, defect description, and brief resolution.

Noteworthy Fixed Issues from the 11.0.6 RPM Release

Bug Number	Description
5175767	The Promotion Components Section in the Maintain Promotion form does not work correctly. The system does not display the component of the promotion when the user creates a buy get promotion for an item that does not have any location attached.
5040731	Merch extract is not proposing a new unit retail for a clearance strategy that has the following candidate rule: (Dept &(UDA Value type & UDA Value)& (Season Phase & Phase Code).
5102279	When the user navigates to Maintain promotions--> Selects a promotion --> and chooses to Edit it, there are performance problems. When the user opens the maintain Price Change or Clearance screen, sets up the search criteria and clicks the search button, the application returns the result of the Price Change/Clearance Search very slowly.
5203842	When there are about 1000 strategies created in RPM and the user tries to open the Maintain Pricing Strategy screen, the application stops performing for about twenty minutes while trying to open the screen. Eventually, a fatal exception is displayed. The user has to exit the application.
5114287	There has been a performance enhancement in the functionality surrounding the deletion of price changes.
5233606	For a particular Zone Group ID, if the user filters on Location (such that the location is in a zone other than the base zone), selects the Zone ID based on that filtering and then clicks on the Locations button, the following occurs: In the 'Price Zone – Location Assignment' container, the base zone, which is different from the zone selected, and locations under that base zone are displayed.
5246978	The Merch extract batch fails when the RPM worksheet screen was terminated abruptly.

Bug Number	Description
5144626	The location move batch is not creating item exclusion for a parent/zone promotion.
5169691	In the Maintain Market Basket Code screen, the user cannot see the Zone Group or Zone description as an available column in the multi record block (MRB). This issue means that business users who are familiar only with the definition of the zone and not the zone ID are not able to identify where to attach the market basket code.
