

**Oracle[®] Retail Design
Release Notes
Release 12.0
May 2006**

Copyright © 2006, Oracle. All rights reserved.

The Programs (which include both the software and documentation) contain proprietary information; they are provided under a license agreement containing restrictions on use and disclosure and are also protected by copyright, patent, and other intellectual and industrial property laws. Reverse engineering, disassembly, or decompilation of the Programs, except to the extent required to obtain interoperability with other independently created software or as specified by law, is prohibited.

The information contained in this document is subject to change without notice. If you find any problems in the documentation, please report them to us in writing. This document is not warranted to be error-free. Except as may be expressly permitted in your license agreement for these Programs, no part of these Programs may be reproduced or transmitted in any form or by any means, electronic or mechanical, for any purpose.

If the Programs are delivered to the United States Government or anyone licensing or using the Programs on behalf of the United States Government, the following notice is applicable:

U.S. GOVERNMENT RIGHTS Programs, software, databases, and related documentation and technical data delivered to U.S. Government customers are "commercial computer software" or "commercial technical data" pursuant to the applicable Federal Acquisition Regulation and agency-specific supplemental regulations. As such, use, duplication, disclosure, modification, and adaptation of the Programs, including documentation and technical data, shall be subject to the licensing restrictions set forth in the applicable Oracle license agreement, and, to the extent applicable, the additional rights set forth in FAR 52.227-19, Commercial Computer Software—Restricted Rights (June 1987). Oracle Corporation, 500 Oracle Parkway, Redwood City, CA 94065

The Programs are not intended for use in any nuclear, aviation, mass transit, medical, or other inherently dangerous applications. It shall be the licensee's responsibility to take all appropriate fail-safe, backup, redundancy and other measures to ensure the safe use of such applications if the Programs are used for such purposes, and we disclaim liability for any damages caused by such use of the Programs.

Oracle, JD Edwards, PeopleSoft, and Siebel are registered trademarks of Oracle Corporation and/or its affiliates. Other names may be trademarks of their respective owners.

The Programs may provide links to Web sites and access to content, products, and services from third parties. Oracle is not responsible for the availability of, or any content provided on, third-party Web sites. You bear all risks associated with the use of such content. If you choose to purchase any products or services from a third party, the relationship is directly between you and the third party. Oracle is not responsible for: (a) the quality of third-party products or services; or (b) fulfilling any of the terms of the agreement with the third party, including delivery of products or services and warranty obligations related to purchased products or services. Oracle is not responsible for any loss or damage of any sort that you may incur from dealing with any third party.

A Release Notes document can include some or all of the following sections, depending upon the release:

- Overview of the release
- Functional, technical, integration, and/or performance enhancements
- Assumptions
- Fixed and/or known issues/defects

Because of their brevity, Release Notes do not include chapters, appendices, or a table of contents.

Audience

Release Notes are a critical communication link between Oracle Retail and its retailer clients. There are four audiences in general for whom a Release Notes document is written:

- Retail clients who wish to understand the contents of this release.
- Integrators and implementation staff who have the overall responsibility for implementing Oracle Retail Design into their enterprise.
- Business analysts who are looking for high-level functional information about this release.
- System analysts and system operation personnel who are looking for high-level functional and technical content related to this release.

Customer Support

- <https://metalink.oracle.com>

When contacting Customer Support, please provide:

- Product version and program/module name.
- Functional and technical description of the problem (include business impact).
- Detailed step-by-step instructions to recreate.
- Exact error message received.
- Screen shots of each step you take.

Overview

Oracle Retail Design links retailers and their trading partners via the web to provide a collaborative product development lifecycle. Oracle Retail Design is a collaborative product development system that brings all users together to a single, secure place on the Internet.

Oracle Retail Design can perform the following:

- Allow you to share and annotate product sketches and images.
- Utilize workflow to organize and track the product development process.
- Enable you to collaborate with others involved in the product development process.
- Collect and maintain a complete history for every product.

Through its visual interface, Oracle Retail Design lets product development and design teams conceive, develop and finalize entire product ranges online. Images, documents, text and other product information can be placed in a central database and accessed via the web by those you designate in your supply network. As new products are built, historical information can be re-used to cut down on development and production time and to avoid repetition of costly mistakes.

Once product details are entered, Oracle Retail Design supports the sourcing of products developed within Oracle Retail Design. You can work jointly with trading partners to complete and communicate details of each new product, including detailed specifications, size and color information, delivery, costing, and supply information.

You can utilize the configurable workflow and automatic email notification to keep track of key product status and to notify the appropriate parties when products are available for review, bids have been submitted, and programs have been finalized.

Functional Enhancement

Rebranding

Oracle Retail Design software and documentation have been rebranded to comply with Oracle industry standards. References to Retek have been removed and branding for Oracle and Oracle Retail has been added. The rebranding provides visual consistency among the integrated platforms.

Fixed Defects

TAR 15821782.6

The color and sizes screen did not allow the deleting/clearing of the “date added/date approved/date dropped” boxes.

TAR 15825318.6

The “last login” column data on the Admin Users List screen was not accurate.

TAR 15819804.6

Sorting by the header fields (Code, Description, and so on) on the Labels/Floor Ready Packaging tab in PLX is now available.

TAR 5170721.993

The retrieve function now executes formulas in specification tabs to clear calculated data.

TAR 15819332.6

Rejected emails from Oracle Retail Design are now returned to the email address of the originator, rather than to automail@retail.com.
