ORACLE®

Oracle® Retail Design Release Notes, Release 12.0.1

Preface

A Release Notes document can include some or all of the following sections, depending upon the release:

- Overview of the release
- Functional, technical, integration, and performance enhancements
- Assumptions
- Fixed defects
- Known issues

Because of their brevity, Release Notes do not include chapters, appendixes, or a table of contents.

Audience

Release Notes are a critical communication link between Oracle Retail and its retailer clients. There are four general audiences for whom a Release Notes document is written:

- Retail clients who want to understand the contents of this release
- Integrators and implementation staff who have the overall responsibility for implementing this product in their enterprise
- Business analysts who want high-level functional information about this release
- System analysts and system operation personnel who want high-level functional and technical content related to this release

Related Documents

For more information, see the following documents in the Oracle Retail Server Release 12.0.1 documentation set:

- Oracle Retail Server Installation Guide

Customer Support

https://metalink.oracle.com

When contacting Customer Support, please provide the following:

- Product version and program/module name
- Functional and technical description of the problem (include business impact)
- Detailed step-by-step instructions to re-create
- Exact error message received
- Screen shots of each step you take

Conventions

Navigate: This is a navigate statement. It tells you how to get to the start of the procedure and ends with a screen shot of the starting point and the statement "the Window Name window opens."

> **Note:** This is a note. It is used to call out information that is important, but not necessarily part of the procedure.

```
This is a code sample
    It is used to display examples of code
```

Release Notes

Overview

This document contains information on the issues that have been fixed in Oracle Retail Design since the previous release.

Fixed Defects

Defect	Description
5631923	The user was unable to send e-mails from Retail.com on a Mac running Safari and the 10.4 operating system. The OK button was not enabled in Safari to send the e-mail.
5460110	The Department and Sub-Department field length on the Configuration Management screen did not match the field length on the Organization Management screen. The user experienced trouble when trying to configure the Summary screen by department, so that a critical report would only be seen by agents/vendors in certain sub-departments. When the user tried to assign the Departments/Sub-Departments on the Configuration Management screen, error messages occurred. This required the user to remove the report from production until this issue was resolved.
5882836	Print in Portrait Mode. The Design application only allowed printing of .xml pages in landscape mode. The ability was added to select portrait or landscape printing, based on a radio button setting.
