Templates

Templates make the day-to-day planning and creation of promotions easier by standardizing the promotion documents.

There are three types of templates in Promotion Planning and Optimization:

- Page templates
- Vehicle templates
- Promotion templates

Page Templates

Page templates allow you to create and use standard layouts for positioning items and categories on pages. A page is a location within a vehicle (the media used to communicate promotions) where an item or items are promoted. The location may be physical, such as the first page of a circular, or virtual, such as a clip in a radio ad or the front of an in-store display.

Use the Page Templates section of Setup to edit existing page templates, create new ones, and deactivate obsolete templates.

Page templates are associated with individual pages of vehicle templates.

Viewing Page Templates

To view page templates

1. Select Setup from Navigator, and expand the Templates folder.

Figure 3–1 Navigator Setup Section

2. Select Page Templates. A list of the available page templates appears in Promotion Manager.
