

Oracle® Retail Labels and Tags

Release Notes

Release 13.0

May 2008

This document highlights the major changes for Release 13.0 of Oracle Retail Labels and Tags.

Overview

Oracle Retail Labels and Tags is a module of Oracle Retail Back Office that provides the ability to print tags and labels at individual stores, using templates provided by the corporate headquarters. The list of items that require a tag or label can come from either corporate headquarters or from the individual store. Lists from corporate headquarters can be sent at any time and can also be triggered by an event such as the addition of new items or price promotions.

Oracle Retail Labels and Tags incorporates AccessVia to facilitate the creation of templates.
