

**Oracle® Retail Analytic Parameter Calculator**

Installation Guide

Release 13.0.1

August 2008

Oracle Retail Analytic Parameter Calculator, Release 13.0.1

Copyright © 2008 Oracle. All rights reserved.

Primary Author: Cristina Maldonado

Contributor: Su-Ming Wu, Max Anderson

The Programs (which include both the software and documentation) contain proprietary information; they are provided under a license agreement containing restrictions on use and disclosure and are also protected by copyright, patent, and other intellectual and industrial property laws. Reverse engineering, disassembly, or decompilation of the Programs, except to the extent required to obtain interoperability with other independently created software or as specified by law, is prohibited.

The information contained in this document is subject to change without notice. If you find any problems in the documentation, please report them to us in writing. This document is not warranted to be error-free. Except as may be expressly permitted in your license agreement for these Programs, no part of these Programs may be reproduced or transmitted in any form or by any means, electronic or mechanical, for any purpose.

If the Programs are delivered to the United States Government or anyone licensing or using the Programs on behalf of the United States Government, the following notice is applicable:

U.S. GOVERNMENT RIGHTS Programs, software, databases, and related documentation and technical data delivered to U.S. Government customers are "commercial computer software" or "commercial technical data" pursuant to the applicable Federal Acquisition Regulation and agency-specific supplemental regulations. As such, use, duplication, disclosure, modification, and adaptation of the Programs, including documentation and technical data, shall be subject to the licensing restrictions set forth in the applicable Oracle license agreement, and, to the extent applicable, the additional rights set forth in FAR 52.227-19, Commercial Computer Software--Restricted Rights (June 1987). Oracle USA, Inc., 500 Oracle Parkway, Redwood City, CA 94065.

The Programs are not intended for use in any nuclear, aviation, mass transit, medical, or other inherently dangerous applications. It shall be the licensee's responsibility to take all appropriate fail-safe, backup, redundancy and other measures to ensure the safe use of such applications if the Programs are used for such purposes, and we disclaim liability for any damages caused by such use of the Programs.

Oracle, JD Edwards, PeopleSoft, and Siebel are registered trademarks of Oracle Corporation and/or its affiliates. Other names may be trademarks of their respective owners.

The Programs may provide links to Web sites and access to content, products, and services from third parties. Oracle is not responsible for the availability of, or any content provided on, third-party Web sites. You bear all risks associated with the use of such content. If you choose to purchase any products or services from a third party, the relationship is directly between you and the third party. Oracle is not responsible for: (a) the quality of third-party products or services; or (b) fulfilling any of the terms of the agreement with the third party, including delivery of products or services and warranty obligations related to purchased products or services. Oracle is not responsible for any loss or damage of any sort that you may incur from dealing with any third party.

### **Value-Added Reseller (VAR) Language**

(i) the software component known as **ACUMATE** developed and licensed by Lucent Technologies Inc. of Murray Hill, New Jersey, to Oracle and imbedded in the Oracle Retail Predictive Application Server - Enterprise Engine, Oracle Retail Category Management, Oracle Retail Item Planning, Oracle Retail Merchandise Financial Planning, Oracle Retail Advanced Inventory Planning and Oracle Retail Demand Forecasting applications.

(ii) the **MicroStrategy** Components developed and licensed by MicroStrategy Services Corporation (MicroStrategy) of McLean, Virginia to Oracle and imbedded in the MicroStrategy for Oracle Retail Data Warehouse and MicroStrategy for Oracle Retail Planning & Optimization applications.

(iii) the **SeeBeyond** component developed and licensed by Sun Microsystems, Inc. (Sun) of Santa Clara, California, to Oracle and imbedded in the Oracle Retail Integration Bus application.

(iv) the **Wavelink** component developed and licensed by Wavelink Corporation (Wavelink) of Kirkland, Washington, to Oracle and imbedded in Oracle Retail Store Inventory Management.

(v) the software component known as **Crystal Enterprise Professional and/or Crystal Reports Professional** licensed by Business Objects Software Limited ("Business Objects") and imbedded in Oracle Retail Store Inventory Management.

(vi) the software component known as **Access Via**<sup>TM</sup> licensed by Access Via of Seattle, Washington, and imbedded in Oracle Retail Signs and Oracle Retail Labels and Tags.

(vii) the software component known as **Adobe Flex**<sup>TM</sup> licensed by Adobe Systems Incorporated of San Jose, California, and imbedded in Oracle Retail Promotion Planning & Optimization application.

(viii) the software component known as **Style Report**<sup>TM</sup> developed and licensed by InetSoft Technology Corp. of Piscataway, New Jersey, to Oracle and imbedded in the Oracle Retail Value Chain Collaboration application.

(ix) the software component known as **WebLogic**<sup>TM</sup> developed and licensed by BEA Systems, Inc. of San Jose, California, to Oracle and imbedded in the Oracle Retail Value Chain Collaboration application.

(x) the software component known as **DataBeacon**<sup>TM</sup> developed and licensed by Cognos Incorporated of Ottawa, Ontario, Canada, to Oracle and imbedded in the Oracle Retail Value Chain Collaboration application.

# Preface

This guide enables you to install the Oracle Retail Analytic Parameter Calculator application.

## Audience

This document is intended for system administrators and assumes that you are familiar with the following:

- Installing and configuring application server software
- Installing and configuring relational database management systems
- Installing and configuring distributed client/server applications

## Related Documents

For more information, see the following documents in the Oracle Retail Analytic Parameter Calculator Release 13.0 documentation set:

- *Oracle Retail Analytic Parameter Calculator Release Notes*
- *Oracle Retail Analytic Parameter Calculator Installation Guide*
- *Oracle Retail Analytic Parameter Calculator Configuration Guide*
- *Oracle Retail Analytic Parameter Calculator User Guide*

## Customer Support

- <https://metalink.oracle.com>

When contacting Customer Support, please provide:

- Product version and program/module name
- Functional and technical description of the problem (include business impact)
- Detailed step-by-step instructions to recreate
- Exact error message received
- Screen shots of each step you take

## Review Patch Documentation

For a base release (“ .0” release, such as 13.0), Oracle Retail strongly recommends that you read all patch documentation before you begin installation procedures. Patch documentation can contain critical information related to the base release, based on new information and code changes that have been made since the base release.

## Oracle Retail Documentation on the Oracle Technology Network

In addition to being packaged with each product release (on the base or patch level), all Oracle Retail documentation is available at the following website:

[http://www.oracle.com/technology/documentation/oracle\\_retail.html](http://www.oracle.com/technology/documentation/oracle_retail.html)

Documentation should be available on this Web site within a month after a product release. Note that documentation is always available with the packaged code on the release date.

## Conventions

The following text conventions are used in this document:

<b>Convention</b>	<b>Meaning</b>
<b>boldface</b>	Boldface type indicates graphical user interface elements associated with an action, or terms defined in text or the glossary.
<i>italic</i>	Italic type indicates book titles, emphasis, or placeholder variables for which you supply particular values.
monospace	Monospace type indicates commands within a paragraph, URLs, code in examples, text that appears on the screen, or text that you enter.

This chapter provides an overview of the Oracle Retail Analytic Parameter Calculator (APC) and a roadmap for implementing the application. It contains the following sections:

- [Overview of the Analytic Parameter Calculator](#) on page 1-1.
- [Overview of the Oracle Configuration Manager](#) on page 1-1.
- [APC Implementation Roadmap](#) on page 1-2.

## Overview of the Analytic Parameter Calculator

The APC is a single-user application that calculates the demand parameters required to perform forecasting. It uses various calculations on historical data to derive the demand parameters.

APC generates a set of text files that contain the calculated demand parameters. These parameters are loaded into the *Oracle Retail Markdown Optimization* schema during implementation.

## Overview of the Oracle Configuration Manager

Oracle Premier Support offers an automated support capability through the Software Configuration Manager and Oracle Configuration Manager (OCM). OCM is a configuration data collector that provides continuous tracking of key Oracle and system configuration settings for machines on which it is installed. This tool collects system configuration settings for customer environments and uploads it to a repository that is viewable through the Software Configuration Manager Metalink web site.

The first OCM collector distribution for Oracle Retail applications is in development. Oracle Retail recommends that retailers download OCM 13.0 from ARU and use the “emCCR update\_components” command to upgrade installed OCM collectors. See the OCM Installation and Administration Guide for further instructions. The Retail OCM Installer released with Oracle Retail 13.0 applications will install OCM 10.2.7. If the collector remains at version 10.2.7 and is installed in connected mode, an automatic update to version 10.3.0 is expected to occur later this year, the time at which 10.3.0 becomes a mandatory upgrade.

For more information, see the following:

**Metalink Note: 559539.1**

The Oracle Configuration Manager Installer Guide provides instructions for the installation of the OCM.

---

---

**Important:** If you choose to install the OCM collector, ensure that you have your Metalink user account name, customer support identification number, and the country code (where the support agreement was issued) ready for use during the OCM installation.

---

---

## APC Implementation Roadmap

At a high-level, the APC installation process is as follows:

**Table 1-1** *APC Implementation Roadmap*

Task	Description
<i>Pre-installation tasks</i>	
1.	Plan your installation. For more information, see <a href="#">Chapter 2, "Planning Your Installation"</a> .
2.	Set up your application database. For more information, see <a href="#">Chapter 3, "Setting Up the Database"</a> .
3.	Set up your application server. For more information, see <a href="#">Chapter 4, "Setting Up Your Application Server"</a> .
<i>Installation Task</i>	
4.	Access the APC installation software. For more information, see <a href="#">Chapter 5, "Installing APC"</a> .
<i>Post-Installation Tasks</i>	
5.	Configure the APC. For more information, see the <i>Oracle Retail Analytic Parameter Calculator Configuration Guide</i> .

---

---

## Planning Your Installation

Before installing the Analytic Parameter Calculator (APC), you must first determine the performance and availability goals for your business, and then plan the hardware, network, and storage requirements accordingly. This chapter contains some basic considerations for the implementation of the APC application.

This chapter contains the following topics:

- [Overview of the Planning Process](#) on page 2-1.
- [Supported Configurations](#) on page 2-2.

### Overview of the Planning Process

Planning your implementation prior to an installation gives you a better understanding of the environment and enables you to adapt faster to any future changes in the environment setup.

The section contains the following topic:

- [Planning Your Environment](#) on page 2-1.
- [Sizing Considerations](#) on page 2-2.

### Planning Your Environment

Use the following steps to plan and prepare the product environment:

1. Plan and design the infrastructure, based on your business needs, for the installation. This includes:
  - Meeting the hardware and associated software requirements.
  - Acquiring the prerequisite software (and licensing).
  - Gathering capacity data.
  - Planning the data security policies.
  - Designing the backup and recovery strategies.
2. Determine the size of the implementation. For more information, see [Sizing Considerations](#) on page 2-2.
3. Identify source systems. Identify the systems that will exchange data with the APC.

## Sizing Considerations

The APC schema (see [Creating the APC Database](#) on page 3-1) is installed under the User tablespace. Sizing considerations for this tablespace should use the following variables and formula as a guideline.

**Table 2–1 Sizing Variables**

**A** = number of activities (also known as item-weeks).

**M** = number of nodes in the merchandise hierarchy that are in the Raw-AP calculation.

**L** = number of nodes in the location hierarchy that are in the Raw-AP calculation.

**SC** = number of year-independent season codes. For example, if your implementation uses monthly season codes, this value is 12.

### Sizing Formula

Number of gigabytes =  $(A * 4.16 / 10 \text{ million}) + (M * L * SC * 1.4 / 1 \text{ million})$

## Supported Configurations

This section describes the hardware and network requirements for the APC application and includes the following topics:

- [Network Requirements](#)
- [Database Requirements](#)
- [Application Server Requirements](#)
- [Client System Requirements](#)

### Network Requirements

This section describes basic requirements for your network infrastructure:

- For connections between servers use the following:
  - Minimum: 100 MBps switched ethernet
  - Recommended: 1000 MBps
- For connections to the desktop, 100 MBps is sufficient.

### Database Requirements

The APC requires the use of the Oracle database as described in the following table:

**Table 2–2 Database Requirements for Analytic Parameter Calculator**

Software	Requirement
Database (64-bit)	Oracle 10g Release 2 (10.2.0.3) (64-bit)
Operating System (64-bit)	<ul style="list-style-type: none"> <li>■ Oracle Enterprise Linux 4.0 (64-bit)</li> <li>■ HP-UX 11iv2 (11.23) Itanium (64-bit)</li> <li>■ IBM AIX 5.3.0, TL5, APAR IY75211</li> <li>■ Sun Solaris 10 (SPARC platform), with timezone patch 122032-01 or later and libc patch 119689-07 or later.</li> </ul>

**Table 2–2 Database Requirements for Analytic Parameter Calculator**

Software	Requirement
Utilities	file transfer protocol utility (ftp or ssh/scp/rsync) sudo utility

## Application Server Requirements

The APC requires the use of the Oracle 10g Application Server. The following table lists the supported operating systems and the associated application server versions:

**Table 2–3 Application Server Requirements for the Analytic Parameter Calculator**

Software	Requirement			
Application Server	OAS 10.1.3.3 (32-bit)			
Operating System (64-bit)	HP-UX 11iv2 (11.23) Itanium	Oracle Enterprise Linux 4.0	IBM AIX 5.3.0, TL5, APAR IY75211	Sun Solaris 10 (SPARC)
JVM (32-bit)	HP JDK 1.5.0.03 build 1.5.0.03-13_feb_2006_16_39 (32-bit)	Sun JDK 1.5.0_6 (32-bit)	IBM JDK 1.5 - build pap32dev-20051104 (32-bit)	Sun JDK 1.5.0_6 (32-bit)

For Solaris, the following timezone and libc patches are required:

- On SPARC platform, with timezone patch 122032-01 or later and libc patch 119689-07 or later.

## Client System Requirements

The following table lists the supported client system options:

**Table 2–4 Client System Environment**

Software	Requirements
Windows XP Pro SP2 (with Office 2003)	■ Microsoft Internet Explorer 7.0
Windows XP Pro SP2 (with Office XP)	■ Microsoft Internet Explorer 7.0
Windows XP Pro SP2 (with Office 2000)	■ Microsoft Internet Explorer 7.0

---

---

## Setting Up the Database

This chapter describes how you can set up your database and the various database components. It contains the following:

- [Creating the APC Database](#)

### Creating the APC Database

The APC database can be created as another instance on an existing Oracle Application Server.

---

---

**Note:** When APC is running, it will consume application server resources such as memory and CPU. These are important considerations if your application server has additional instances.

---

---

### Installing the ASDS Schema

The schema for the APC is referred to as the “ASDS Schema”. The APC installer will automatically create and install the ASDS database schema. The database will be created under the User Tablespace.

The ASDS schema must be installed on the same Oracle Application Server instance as the Oracle Retail Markdown Optimization (MDO) product. APC will use this schema to obtain historical data from MDO.

---

---

# Setting Up Your Application Server

Before installing the APC application, you must set up an instance on the application server. Based on your business need, you may set up the instance to include one or more server instances and logically related resources and services.

This chapter describes how to set up the Oracle Application Server (OAS). It contains the following sections:

- [Installing Oracle Application Server](#) on page 4-1.

## Installing Oracle Application Server

The APC application requires the use of Oracle Application Server 10g Release 3 (10.1.3.3). To install OAS, refer to the Oracle Application Server documentation.

---

---

## Installing APC

This chapter contains the following:

- [Overview of the Installation Process](#) on page 5-1.
- [Installing APC](#) on page 5-1.

### Overview of the Installation Process

To install the Analytic Parameter Calculator, obtain the installation media. To begin the installation process, see [Installing APC](#) on page 5-1.

### Installing APC

Installing APC consists of the following tasks:

- [Accessing the Installation Software](#) on page 5-1.
- [Setting Up Your Installation Properties File](#) on page 5-2.
- [Setting Up Environment Variables](#) on page 5-3.
- [Preparing Your Unix Terminal Emulator and SSH Client](#) on page 5-3.
- [Running the Installer](#) on page 5-3.

### Accessing the Installation Software

The APC installation software is bundled with the Oracle Retail Markdown Optimization product software. The software media is available from the Oracle E-Delivery site.

To download the software:

1. From the application server where you will be installing APC, open a browser and navigate to the following URL:

<http://edelivery.oracle.com/>

The **Oracle E-Delivery** download page displays.

2. Select a language, and click **Continue**.  
The **Export Validation** screen displays.
3. Respond to the following and click **Continue**.
  - **Full Name**—enter your full name.
  - **Company Name**—enter your company name.

- **E-mail Address**—enter your e-mail address.
- **Country**—select your country.
- **License Agreement**—select the License Agreement check box.
- **Export Restrictions**—select the Export Restrictions check box.

The **Media Pack Search** screen displays.

4. Respond to the following prompts, and then click **Go**.
  - **License List**—review the list to determine which Product Packs you need to download.
  - **Product Pack**—select **Oracle Retail Applications**.
  - **Platform**—(optional). Select the desired operating system.The **Oracle Retail Markdown Optimization Media Pack** screen displays.
5. In the **Select** column, click **Download**.

Oracle E-Delivery writes a ZIP file to the default location you have selected for downloads.
6. Unpack the ZIP file to a temporary directory.

## Setting Up Your Installation Properties File

In order to install APC, you first need to specify the properties to use during the installation process.

### Creating the Installation Properties File

To create the installation properties file, do the following:

1. Make a copy of the **reference.apc.install.properties** file.
2. Rename the copy to **apc.install.properties**.
3. Save this file in the same directory as the **reference.apc.install.properties** file. Define the properties specified within the sections listed below.

### Defining File Directories

Use the **basedest.basedest.dir** property to specify the directory where the APC files will be copied.

### Defining the Administrative User ID and Password

Define the Oracle Application Server administrative user id and password using the following properties:

```
oracle.admin.userid  
oracle.admin.password
```

---

---

**Note:** The userid and password should be equal to the oc4jadmin userid and password of your Oracle Application Server installation.

---

---

### Oracle.Home

Use the **oracle.home** property to define the location of the J2EE Home folder within your Oracle Application Server installation. An example is listed below.

```
oracle.home=/home/apc/OAS_AIX/oracle/product/10.1.3/OracleAS_1/j2ee/home
```

### Defining Ports

Specify the following port property:

```
oracle.admin.port=12401
```

### Defining Database Properties

Specify the following database properties:

```
database.apcdb.oracle.create=yes
```

```
database.apcdb.oracle.upgrade=no
```

### Optional Definitions

You also have the option of providing definitions for the following properties:

- database.apcdb.oracle.address
- database.apcdb.oracle.dbalias
- database.apcdb.oracle.dbname
- database.apcdb.oracle.dbport
- database.apcdb.oracle.auth.apcoracleauth.user
- database.apcdb.oracle.auth.apcoracleauth.password

## Setting Up Environment Variables

Before you start the installation, ensure that the following environment variables are set in the system:

- JAVA\_HOME
- PATH
- LIBPATH

To set up the environment variables for the current session, at the UNIX prompt type the following commands in sequence:

```
export JAVA_HOME=$OAS_HOME/jdk
export PATH=$JAVA_HOME/bin:$PATH
export LIBPATH=$ORACLE_HOME/lib:$LIBPATH
```

## Preparing Your Unix Terminal Emulator and SSH Client

In order to run the APC installer, you will need to use a Unix terminal emulator. In addition, your SSH Client must be configured to allow x-forwarding. Please refer to the documentation for your SSH Client for instructions on how to enable x-forwarding.

## Running the Installer

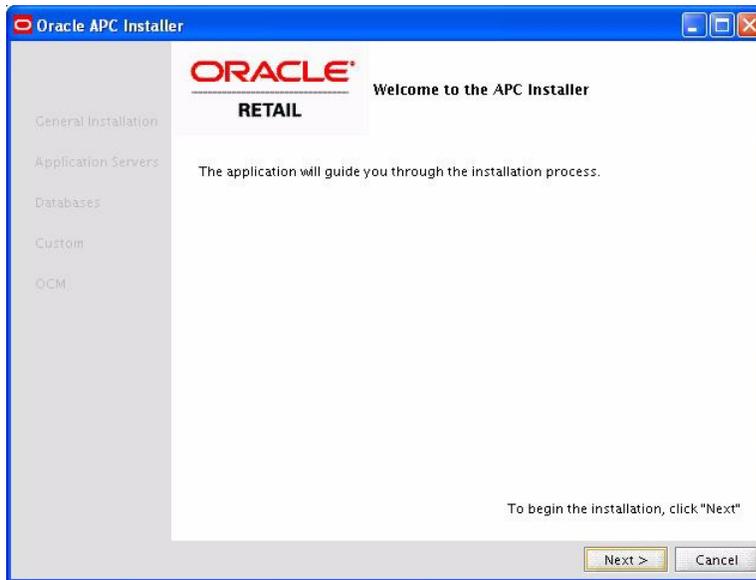

To install the application, complete the following steps:

1. Ensure that you have completed [Setting Up Your Installation Properties File](#) on page 5-2.
2. From your Windows client, start your Unix terminal emulator.

3. Ensure that your application server software is running.
4. Navigate to directory that contains the installer shell script.
5. Start the installer by issuing the following command:
 

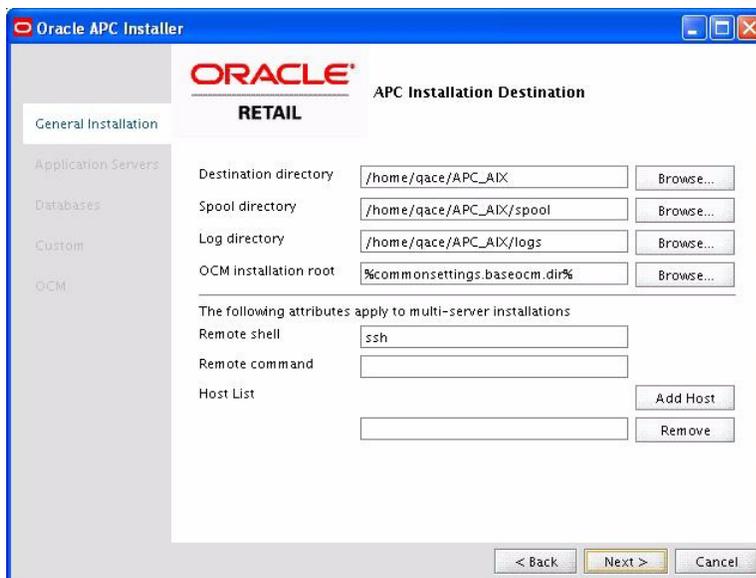

```
bash install.sh -p APC/apc.install.properties -x APC.xml
```
6. The installer opens and displays the **APC Installer Welcome Screen**. Click **Next**.

**Figure 5–1 APC Installer Welcome Screen**

7. The **APC Installation Destination** screen opens.

**Figure 5–2 APC Installation Destination Screen**

- **Destination Directory**—enter the path to the APC installation target directory.
- **Spool Directory**—enter the path to the APC spool directory.

- **Log Directory**—enter the path to the APC log files.
  - **OCM Installation root**—enter the path where the Oracle Configuration Manager (OCM) is installed.
  - **Remote shell**—this field is populated by default.
  - **Remote command**—leave blank.
  - **Host List**—leave blank.
  - Click **Next**.
8. The **Application Server Selections** screen opens.

**Figure 5–3 Application Server Selections**

- Select **Oracle Application Server**.
  - Click **Next**.
9. The **Oracle Application Server** screen appears.

Figure 5–4 Oracle Application Server Screen

- **OAS Home**—enter the location of your OAS installation.
- **Host**—enter the host name for your OAS installation.
- **OAS Instance Home**—enter the OAS Instance Home location.
- **Oracle Multicast Default**—leave blank.
- **Oracle Group Name**—leave blank.
- **Admin Port**—enter the administrative port on your OAS installation.
- **Admin User Name**—enter the administrative user name for your OAS installation.
- **Admin Password**—enter the administrative password for your OAS installation.
- Click **Next**.

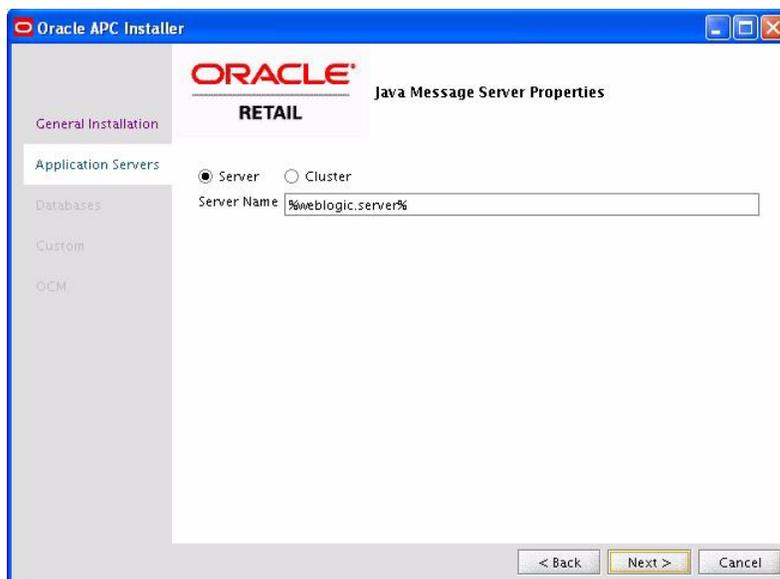

---

**Note:** If the installation does not proceed ahead, check the application server information and/or the status of the application server.

---

10. The **Java Message Server Properties** screen appears.

Figure 5–5 Java Message Server Properties Screen

- Select **Server**.
- **Server Name Field**—enter the name of the server that you may have set up as a Java Message Server (JMS).
- Click **Next**.

11. The **Database Selections** screen appears.

Figure 5–6 Database Selections Screen

- Select **Oracle**.

---

**Note:** APC does not support the use of DB2.

---

- Click Next.

12. The Database Properties screen appears.

**Figure 5–7 Database Properties Screen**

- **RAC Database**—leave this field blank. There is no support for Oracle RAC in this release of APC.
- **Database server address**—enter the address of the database server.
- **Database server port**—enter the server port number associated with your database.
- **Database name**—enter the name used to identify your database.
- **Database alias**—enter the database alias.
- **RAC Host List**—leave this field blank.
- **Database URL**—(optional). Enter your database’s URL.
- **Tables**—select one of the following options:
  - **No Change**—select this option if you have an existing database schema that you do not want to modify. This enables you to configure data sources and EAR files without affecting the database.
  - **Create**—select this option if you are installing a new database schema for APC. The Oracle Installer drops all the schemas and creates new ones.
  - **Upgrade**—select this option if you have an existing database schema that you want to update. Any existing data remains intact. It is modified on a row-by-row, column-by-column basis, depending on the actions specified in the database patches.
- **Connection Pool**—this field is not editable.

- **User ID**—enter the user name associated with the database.
- **Password**—enter the password associated with the database.
- **Min Connections**—accept the default value.
- **Max Connections**—accept the default value.
- Click **Next**.

13. The **Oracle Configuration Manager Registration** screen opens.

**Figure 5–8 Oracle Configuration Manager Registration**

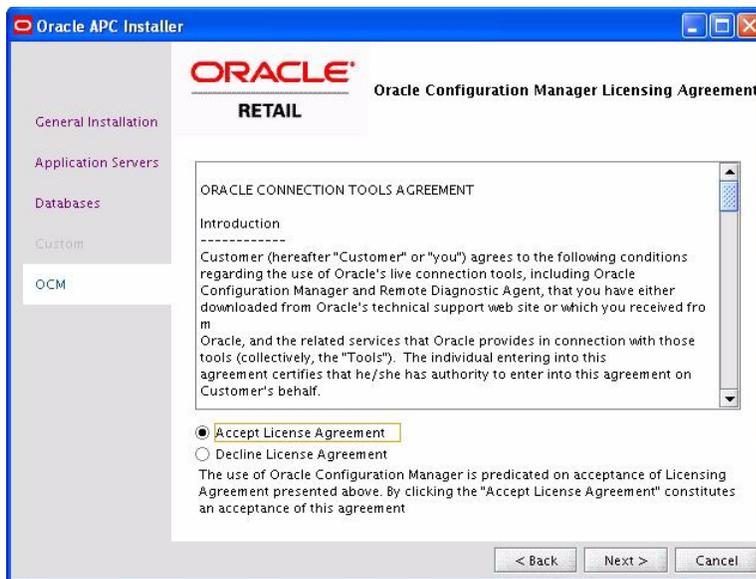

---

**Note:** For more information about the Oracle Configuration Manager (OCM), see [Overview of the Oracle Configuration Manager](#) on page 1-1 in [Chapter 1, "Overview"](#).

---

- Click **Next**.

14. The **Oracle Configuration Manager Licensing Agreement** screen opens.

**Figure 5–9 Oracle Configuration Manager Licensing Agreement Screen**

- To install the OCM, select **Accept License Agreement**.
- Click **Next**.

15. The **Choose OCM Distribution** screen opens.

**Figure 5–10 Choose OCM Distribution Screen**

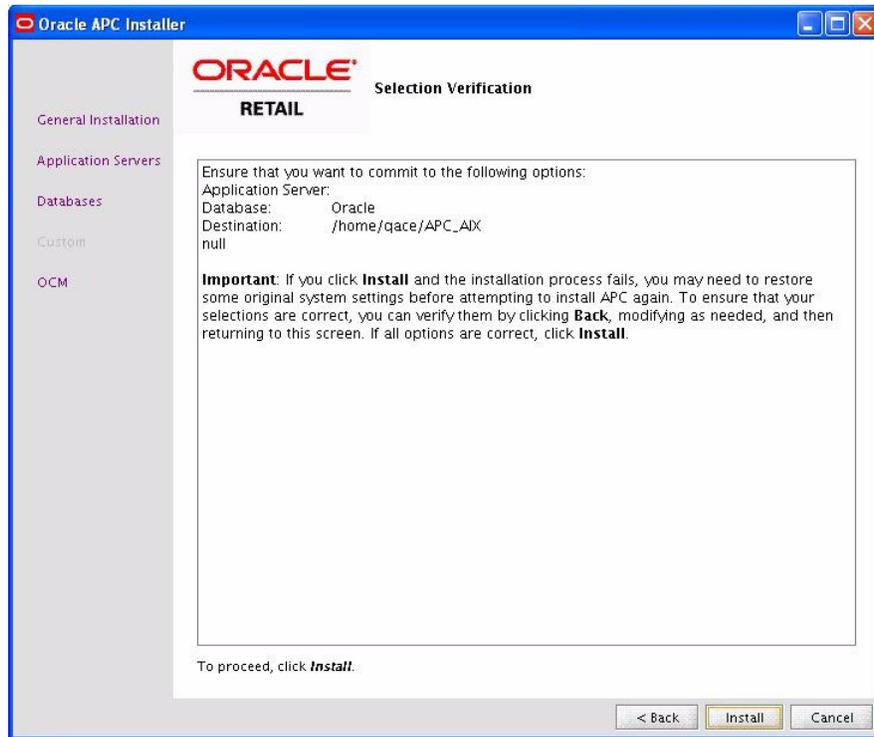

- Select the operating system hosting the application.
- Click **Next**.

16. The **Choose OCM Connection Mode** screen opens.

**Figure 5–11 Choose OCM Connection Mode Screen**

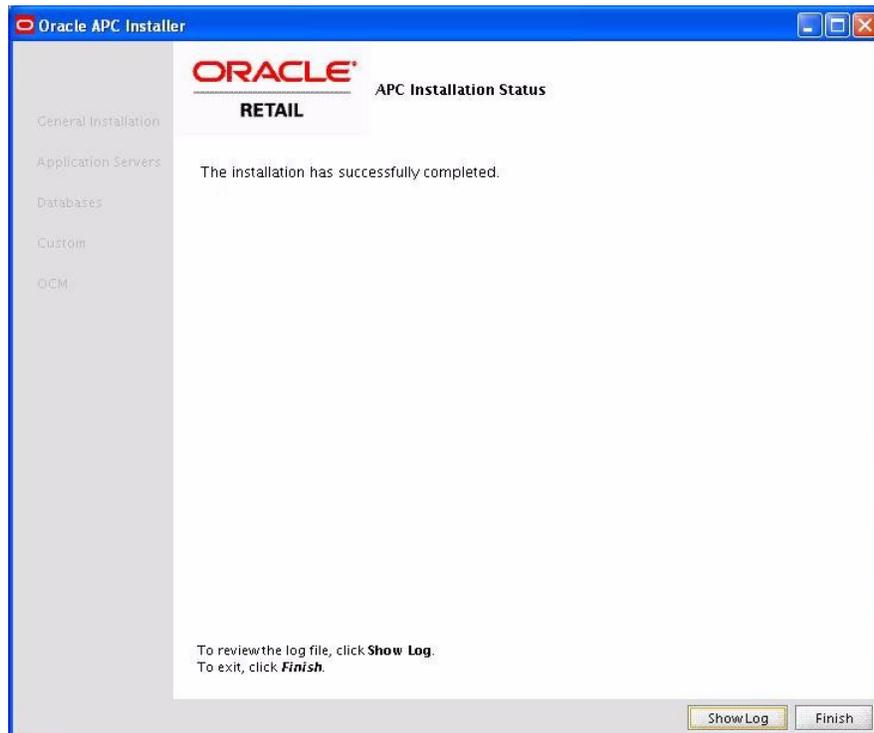

- **Disconnected**—select this mode of OCM installation if you want to keep the automatic installation of configuration data disabled. Click **Next**, and go to step 18.
  - **Connected**—select this mode of OCM installation to continue installing OCM. Click **Next**.
17. The **Oracle Customer Information** screen opens. Enter your Customer Support Identifier (CSI) number, Metalink account user name, and the country code where the service agreement was initiated. Click **Next**.
18. The **Selection Verification Screen** opens.

**Figure 5–12 Selection Verification Screen**

- Review this screen, and then click **Install**.

19. The APC Installation Status screen opens.

**Figure 5–13 APC Installation Status Screen**

20. To complete installation:
  - Click **Finish** to exit.
  - Click **Show Log** to view the installation log file.

## Post-Installation Tasks

After the installer has finished, complete the following steps:

1. Navigate to the directory where APC is installed. This is the directory you defined using the `basedest.basedest.dir` within the `apc.install.properties` file.
2. Edit the `config/ecf.conf` within the following directory:

```
../APC/modules/APC/config/ecf.conf
```
3. Within the `ecf.conf` file, update the user name and password with the `oracle.admin.userid` and `oracle.admin.password` as specified in [Defining the Administrative User ID and Password](#) on page 5-2.
4. Next, navigate to the `bin` directory.
5. Within this directory, issue the following command:

```
bash runAPC.sh -l http://<host>:<rmiPort> > APCBackEndLog &
```

where `<host>` is the machine where OAS is running and `<rmiPort>` is the `oracle.admin.port` as defined in [Defining Ports](#) on page 5-3.
