

Oracle® Agile Engineering Data Management

Installation Requirements for Enterprise
Integration Platform 2.2.2

Part No. E18856-01

April 2011

Preface

The Oracle documentation set includes Adobe® Acrobat™ PDF files. The [Oracle Technology Network \(OTN\) Web site](http://www.oracle.com/technology/documentation/agile.html) (<http://www.oracle.com/technology/documentation/agile.html>) contains the latest versions of the Oracle Agile EDM PDF files. You can view or download these manuals from the Web site, or you can ask your Agile administrator if there is an Oracle Documentation folder available on your network from which you can access the documentation (PDF) files.

Note To read the PDF files, you must use the free Adobe Acrobat Reader™ version 7.0 or later. This program can be downloaded from the [Adobe Web site](http://www.adobe.com) (<http://www.adobe.com>).

Note Before calling Agile Support about a problem with an Oracle Agile EDM manual, please have the full part number, which is located on the title page.

TTY Access to Oracle Support Services

Oracle provides dedicated Text Telephone (TTY) access to Oracle Support Services within the United States of America 24 hours a day, 7 days a week. For TTY support, call 800.446.2398. Outside the United States, call +1.407.458.2479.

Readme

Any last-minute information about Oracle Agile EDM can be found in the Release Notes file on the [Oracle Technology Network \(OTN\) Web site](http://www.oracle.com/technology/documentation/agile.html) (<http://www.oracle.com/technology/documentation/agile.html>)

Agile Training Aids

Go to the [Oracle University Web page](http://www.oracle.com/education/chooser/selectcountry_new.html) (http://www.oracle.com/education/chooser/selectcountry_new.html) for more information on Agile Training offerings.

Accessibility of Code Examples in Documentation

Screen readers may not always correctly read the code examples in this document. The conventions for writing code require that closing braces should appear on an otherwise empty line; however, some screen readers may not always read a line of text that consists solely of a bracket or brace.

Accessibility of Links to External Web Sites in Documentation

This documentation may contain links to Web sites of other companies or organizations that Oracle does not own or control. Oracle neither evaluates nor makes any representations regarding the accessibility of these Web sites.

Release Overview

Platform Support Matrix

In general, the Integration Platform is running on any platform which provides a Java Runtime Environment 6 (1.6.0). Nevertheless there are some restrictions based on certain connectors which are listed below:

The Agile EDM connector supports all platforms which are supported by Agile EDM 6.1.2.

The Administration Client is part of the Integration Platform. Since it is a Java application and only needs a Java Runtime Environment, no platform restrictions apply. The Administration Client does also allow remote administration of the Integration Platform. In that case, you need to have a network connection between the workstation where you run the Administration Client and the Integration Platform Server.

Chapter 2

Hardware Requirements

Minimum Network Connectivity and Bandwidth

Note 100 MB/s LAN connections based on TCP/IP between the Integration Platform, Agile EDM Server and ERP Server.

Note At a minimum, a TCP/IP loopback device is required

Minimum Memory Requirements

The following recommendations are incremental to the amount of RAM required for other applications and the operating system.

Note Minimum of 128 MB for the Integration Platform.

Note Minimum of 30 MB for the Administration Client

Minimum Disk Space

Note The basic server installation requires 120 MB which also includes administration client installation.

Note Depending on the location of the queue database, temp directory for DEBUG files and checked-out physical files and log directory, more space may be required during runtime.

Chapter 3

Software Requirements

Java Runtime Environment

This version of the Integration Platform runs on Java 1.6.0 (latest patch level recommended). You may download this from the website of the respective operating system provider:

AIX:	http://www-106.ibm.com/developerworks/java/jdk/aix/
Windows, Solaris, Linux/Intel:	http://java.sun.com/j2se/
HP-UX:	http://www.hp.com/products1/unix/java/

Please check that the `JAVA_HOME` environment variable is set correctly. When calling the program

```
java -version
```

on the Integration Platform Server, you should get the version of the current installation of the Java Runtime Environment.

Agile EDM Server and Java Daemon

The minimum Agile PLM version to be used together with the Integration Platform is **Agile EDM 6.1.1**. Older versions of Eigner or Agile EDM products are not supported.

Since the Agile EDM connector is using the Java-ECI for connecting to Agile EDM, please make sure that the **Agile EDM Java-Daemon** is configured and running properly.

Installation

The distribution is provided as a zipped tar file because the UNIX execution file rights are not preserved by WinZIP.

We recommend using WinZIP on Windows Platforms for uncompressing the delivered file.

On UNIX platforms you need the respective *tar* and *unzip* tools (recommended *gtar* and *unzip*).

Configuration

The configuration of the Integration Platform is done in XML files and XML stylesheet files. Although you can use any text editor to modify those files, we recommend using special XML/XSL Editing tools.

These tools are not part of the standard distribution of the Integration Platform.

Chapter 4

Installation Checklist

As a courtesy to you, we have provided a pre-installation checklist to help you prepare for your installation. When Agile project managers will assist you with the installation, you will need to complete this checklist and return it to them before the planned installation date.

Company Name:	_____
Company Address:	_____

<u>System Administrator:</u>	_____
Phone:	_____
Fax:	_____
Email:	_____

Installation Media

Please verify:

- We are able to mount and read CDROMS (ISO9660 with rrip) locally on each target machine for the Enterprise Integration Platform installation.

Node for the License Manager

The Felics License manager has following Host ID:

UCHOSTID: _____ (as shown by uchostid)

Note Make sure that you run the uchostid program as Administrator (NT) or as root (UNIX) on the license manager node.

Target Platform for the Integration Platform

Please check:

- The operating system and Java Runtime Environment on all target machines are compliant with the currently supported versions. Refer to sections 1 and 3 of this document.
- The respective ZIP / TAR tools are available on the target machine.

Please list node name, node operating system version and version of the Java Runtime Environment (JRE) of the target platform (*uname -a* or Windows version):

Node: _____

Operating system: _____

Version of JRE: _____

System Administration Requirements

Please check:

- A system administrator prepared to log in as root (UNIX) and/or (Domain)Administrator (Windows) is available to assist for system specific parts of the installation at any time during the installation process.
- Recovery procedures for installation nodes and trained personnel for recovery are available at any time during the installation process.
- Nodes can be rebooted prior to the installation.
- Nodes can be rebooted for startup testing during and after the installation.
- The system requirements are met on all target machines running Agile EDM and the Java Daemon as listed earlier in this document.
- The necessary FELICS as described in chapter 3 are either already installed or the Felics Host-ID was sent to Agile Software.

The Agile EDM server process and JavaDaemon is installed on the following hardware/operating system:

Node Name: _____

Agile EDM Version: _____

Database Version: _____

Hardware Platform: _____

Operating System: _____

Java Daemon Port: _____
